

# Replacement of Bridge M-27-026, Stafford Hollow Road over New England Central Railroad (NECRR) In-person Public Information Meeting

## What is happening?

The purpose of this meeting is to provide the public with the opportunity to become fully acquainted with the proposed replacement of Bridge M-27-026, Stafford Hollow Road over NECRR. Public comment and concerns are being solicited and will be reviewed and considered to the maximum extent possible.

## How will this affect you?

The proposed project initially consisted of replacement of the timber superstructure. After the initial site visit, a full bridge replacement is now being considered. The project limits extend approximately 200 feet in either direction from the ends of the current bridge. Bicycle and pedestrian facilities do not exist within this area; however, accommodations are currently being considered in the design. Options are also being investigated on routes that may be necessary for a detour during construction.
