

Public Informational Meeting

Reconstruction of Mountain Street

What is happening?

A Public Informational Meeting to present the revised preliminary design of the (607231) Reconstruction of Mountain Street project. Comments received at the Design Public Hearing were reviewed and considered while revising the width of the roadway.

How will this affect you?

The project is located along Mountain Street from the Kingsley Avenue intersection, northerly to the Whately Town Line, for a total project length of approximately 15,000 linear feet. This project includes the reconstruction of Mountain Street by reclaiming the existing pavement. The project proposes to provide a constant 24-foot-wide roadway to match the existing roadway that has a current average paved width of 24 feet. Travel lanes will be striped promoting traffic calming for driver self-regulation of travel speed awareness.
