

Route 114 Danvers/Peabody Safety Improvements Project Public Information Meeting

Where?

Peabody City Hall
24 Lowell Street, Peabody, MA 01960

When?

Wednesday, May 17 from 6-8pm

What?

In-person meeting where the project team will present the details of the Tier 2 improvements. Residents and stakeholders will have the opportunity to ask questions and provide feedback to the project team.

Why?

This safety-focused project is the result of two Road Safety Audits (RSAs) performed on the Route 114 due to high corridor crash rates and crash clusters at intersections. The purpose is to implement short-term and mid-term enhancements identified in the RSAs in multiple tiers, as quickly as possible, to improve safety incrementally.
