

What is Focus 2050?

Decisions we make today will shape how people move around Massachusetts for decades. Focus 2050 will set the long-term direction for a safer, more reliable, more accessible MBTA through the year 2050.

Focus 2050 is the MBTA's long-term plan for transit investments. It is the latest update to the Program for Mass Transportation, a plan required by state law.

Priorities Focus 2050 will help us achieve:

- ✓ Help guide decisions by the MBTA and ensure our decisions are smart and keep long-term goals in mind.
- ✓ Connect the MBTA's strategic goals with the Capital Investment Plan.
- ✓ Identify fiscally unconstrained investment priorities and potential capital improvements.
- ✓ Look beyond today's needs to prepare the system for the needs of the Commonwealth, accounting for future growth, climate impacts, and changing travel patterns.

Major Initiatives

What's Next?

The MBTA is advancing major initiatives to strengthen the transit system and prepare it for future growth. Recent investments have improved reliability and safety across the network while expanding service to new communities. Looking ahead, the T is planning upgrades that will increase capacity, accessibility, and travel options for riders.

Green Line “Core Capacity”

This program will leverage federal funds to build on recent infrastructure upgrades and extensions by introducing new Type 10 vehicles and improving station accessibility across the line.

Water Transportation

MassDOT and the MBTA are studying opportunities to expand water transportation by improving existing ferry routes, exploring new routes and terminals, and enhancing multimodal access to ferry service.

North Station Draw One

We are replacing the North Station Draw One Bridge to bring it to a state of good repair and increase safety for riders on Commuter Rail routes into North Station. This \$1.286B mega-project will improve on-time performance and access.

Rail Modernization

MBTA is developing a plan to shape the next decade of investment in the regional rail system. This plan will inform decision making around improved service, infrastructure, and decarbonization.
