

March 28, 2024

Commonwealth of Massachusetts
Massachusetts Department of Public Utilities
Attn: Mark D. Marini and Emily Luksha
One South Station
Boston, MA 02110

Dear Secretary Marini and Ms. Luksha:

Filed herewith is a copies of the return for the year ended December 31, 2023 for Massachusetts Electric Company.

A check in the amount of \$15.00 (check #: 7002600032, check date: 3/4/2024) was mailed directly to the Department to cover the 2023 \$5.00 filing fees for Boston Gas Company, Massachusetts Electric Company and Nantucket Electric Company.

Sincerely,

Michael Dixon
Vice President
US Controller

THE COMMONWEALTH OF MASSACHUSETTS

ANNUAL RETURN

OF

MASSACHUSETTS ELECTRIC COMPANY

TO THE

DEPARTMENT OF PUBLIC UTILITIES

For the Year Ended December 31,

2023

nationalgrid

THIS FILING IS
Item 1: ☒ An Initial (Original) Submission OR ☐ Resubmission No.

FERC FINANCIAL REPORT
FERC FORM No. 1: Annual Report of
Major Electric Utilities, Licensees
and Others and Supplemental
Form 3-Q: Quarterly Financial Report

These reports are mandatory under the Federal Power Act, Sections 3, 4(a), 304 and 309, and 18 CFR 141.1 and 141.400. Failure to report may result in criminal fines, civil penalties and other sanctions as provided by law. The Federal Energy Regulatory Commission does not consider these reports to be of confidential nature

Exact Legal Name of Respondent (Company) Massachusetts Electric Company	Year/Period of Report End of: 2023/ Q4
---	--

INSTRUCTIONS FOR FILING FERC FORM NOS. 1 and 3-Q

GENERAL INFORMATION

I. Purpose

FERC Form No. 1 (FERC Form 1) is an annual regulatory requirement for Major electric utilities, licensees and others (18 C.F.R. § 141.1). FERC Form No. 3-Q (FERC Form 3-Q) is a quarterly regulatory requirement which supplements the annual financial reporting requirement (18 C.F.R. § 141.400). These reports are designed to collect financial and operational information from electric utilities, licensees and others subject to the jurisdiction of the Federal Energy Regulatory Commission. These reports are also considered to be non-confidential public use forms.

II. Who Must Submit

Each Major electric utility, licensee, or other, as classified in the Commission’s Uniform System of Accounts Prescribed for Public Utilities, Licensees, and Others Subject To the Provisions of The Federal Power Act (18 C.F.R. Part 101), must submit FERC Form 1 (18 C.F.R. § 141.1), and FERC Form 3-Q (18 C.F.R. § 141.400).

Note: Major means having, in each of the three previous calendar years, sales or transmission service that exceeds one of the following:

- 1. one million megawatt hours of total annual sales,
- 2. 100 megawatt hours of annual sales for resale,
- 3. 500 megawatt hours of annual power exchanges delivered, or
- 4. 500 megawatt hours of annual wheeling for others (deliveries plus losses).

III. What and Where to Submit

- a. Submit FERC Form Nos. 1 and 3-Q electronically through the eCollection portal at <https://eCollection.ferc.gov>, and according to the specifications in the Form 1 and 3-Q taxonomies.
- b. The Corporate Officer Certification must be submitted electronically as part of the FERC Forms 1 and 3-Q filings.
- c. Submit immediately upon publication, by either eFiling or mail, two (2) copies to the Secretary of the Commission, the latest Annual Report to Stockholders. Unless eFiling the Annual Report to Stockholders, mail the stockholders report to the Secretary of the Commission at:
Secretary
Federal Energy Regulatory Commission 888 First Street, NE
Washington, DC 20426
- d. For the CPA Certification Statement, submit within 30 days after filing the FERC Form 1, a letter or report (not applicable to filers classified as Class C or Class D prior to January 1, 1984). The CPA Certification Statement can be either eFiled or mailed to the Secretary of the Commission at the address above.

The CPA Certification Statement should:

- a. Attest to the conformity, in all material aspects, of the below listed (schedules and pages) with the Commission’s applicable Uniform System of Accounts (including applicable notes relating thereto and the Chief Accountant’s published accounting releases), and
- b. Be signed by independent certified public accountants or an independent licensed public accountant certified or licensed by a regulatory authority of a State or other political subdivision of the U. S. (See 18 C.F.R. §§ 41.10-41.12 for specific qualifications.)

Schedules	Pages
Comparative Balance Sheet	110-113
Statement of Income	114-117
Statement of Retained Earnings	118-119
Statement of Cash Flows	120-121
Notes to Financial Statements	122-123

- e. The following format must be used for the CPA Certification Statement unless unusual circumstances or conditions, explained in the letter or report, demand that it be varied. Insert parenthetical phrases only when exceptions are reported.

“In connection with our regular examination of the financial statements of [COMPANY NAME] for the year ended on which we have reported separately under date of [DATE], we have also reviewed schedules [NAME OF SCHEDULES] of FERC Form No. 1 for the year filed with the Federal Energy Regulatory Commission, for conformity in all material respects with the requirements of the Federal Energy Regulatory Commission as set forth in its applicable Uniform System of Accounts and published accounting releases. Our review for this purpose included such tests of the accounting records and such other auditing procedures as we considered necessary in the circumstances.

Based on our review, in our opinion the accompanying schedules identified in the preceding paragraph (except as noted below) conform in all material respects with the accounting requirements of the Federal Energy Regulatory Commission as set forth in its applicable Uniform System of Accounts and published accounting releases.” The letter or report must state which, if any, of the pages above do not conform to the Commission’s requirements. Describe the discrepancies that exist.

- f. Filers are encouraged to file their Annual Report to Stockholders, and the CPA Certification Statement using eFiling. Further instructions are found on the Commission’s website at <https://www.ferc.gov/ferc-online/ferc-online/frequently-asked-questions-fags-efilingferc-online>.
- g. Federal, State, and Local Governments and other authorized users may obtain additional blank copies of FERC Form 1 and 3-Q free of charge from <https://www.ferc.gov/general-information-0/electric-industry-forms>.

IV. When to Submit

- III. Complete each question fully and accurately, even if it has been answered in a previous report. Enter the word “None” where it truly and completely states the fact.
- IV. For any page(s) that is not applicable to the respondent, omit the page(s) and enter “NA,” “NONE,” or “Not Applicable” in column (d) on the List of Schedules, pages 2 and 3.
- V. Enter the month, day, and year for all dates. Use customary abbreviations. The “Date of Report” included in the header of each page is to be completed only for resubmissions (see VII. below).
- VI. Generally, except for certain schedules, all numbers, whether they are expected to be debits or credits, must be reported as positive. Numbers having a sign that is different from the expected sign must be reported by enclosing the numbers in parentheses.
- VII. For any resubmissions, please explain the reason for the resubmission in a footnote to the data field.
- VIII. Do not make references to reports of previous periods/years or to other reports in lieu of required entries, except as specifically authorized.
- IX. Wherever (schedule) pages refer to figures from a previous period/year, the figures reported must be based upon those shown by the report of the previous period/year, or an appropriate explanation given as to why the different figures were used.
- X. Schedule specific instructions are found in the applicable taxonomy and on the applicable blank rendered form.

Definitions for statistical classifications used for completing schedules for transmission system reporting are as follows:

FNS - Firm Network Transmission Service for Self. “Firm” means service that can not be interrupted for economic reasons and is intended to remain reliable even under adverse conditions. “Network Service” is Network Transmission Service as described in Order No. 888 and the Open Access Transmission Tariff. “Self” means the respondent.

FNO - Firm Network Service for Others. “Firm” means that service cannot be interrupted for economic reasons and is intended to remain reliable even under adverse conditions. “Network Service” is Network Transmission Service as described in Order No. 888 and the Open Access Transmission Tariff.

LFP - for Long-Term Firm Point-to-Point Transmission Reservations. “Long-Term” means one year or longer and “firm” means that service cannot be interrupted for economic reasons and is intended to remain reliable even under adverse conditions. “Point-to-Point Transmission Reservations” are described in Order No. 888 and the Open Access Transmission Tariff. For all transactions identified as LFP, provide in a footnote the termination date of the contract defined as the earliest date either buyer or seller can unilaterally cancel the contract.

OLF - Other Long-Term Firm Transmission Service. Report service provided under contracts which do not conform to the terms of the Open Access Transmission Tariff. “Long-Term” means one year or longer and “firm” means that service cannot be interrupted for economic reasons and is intended to remain reliable even under adverse conditions. For all transactions identified as OLF, provide in a footnote the termination date of the contract defined as the earliest date either buyer or seller can unilaterally get out of the contract.

SFP - Short-Term Firm Point-to-Point Transmission Reservations. Use this classification for all firm point-to-point transmission reservations, where the duration of each period of reservation is less than one-year.

NF - Non-Firm Transmission Service, where firm means that service cannot be interrupted for economic reasons and is intended to remain reliable even under adverse conditions.

OS - Other Transmission Service. Use this classification only for those services which can not be placed in the above-mentioned classifications, such as all other service regardless of the length of the contract and service FERC Form. Describe the type of service in a footnote for each entry.

AD - Out-of-Period Adjustments. Use this code for any accounting adjustments or “true-ups” for service provided in prior reporting periods. Provide an explanation in a footnote for each adjustment.

DEFINITIONS

- I. Commission Authorization (Comm. Auth.) -- The authorization of the Federal Energy Regulatory Commission, or any other Commission. Name the commission whose authorization was obtained and give date of the authorization.
- II. Respondent -- The person, corporation, licensee, agency, authority, or other Legal entity or instrumentality in whose behalf the report is made.

EXCERPTS FROM THE LAW

Federal Power Act, 16 U.S.C. § 791a-825r

Sec. 3. The words defined in this section shall have the following meanings for purposes of this Act, to with:

- 3. ‘Corporation’ means any corporation, joint-stock company, partnership, association, business trust, organized group of persons, whether incorporated or not, or a receiver or receivers, trustee or trustees of any of the foregoing. It shall not include ‘municipalities, as hereinafter defined;
- 4. ‘Person’ means an individual or a corporation;
- 5. ‘Licensee, means any person, State, or municipality Licensed under the provisions of section 4 of this Act, and any assignee or successor in interest thereof;
- 7. ‘municipality means a city, county, irrigation district, drainage district, or other political subdivision or agency of a State competent under the Laws thereof to carry and the business of developing, transmitting, unitizing, or distributing power;
- 11. “project” means, a complete unit of improvement or development, consisting of a power house, all water conduits, all dams and appurtenant works and structures (including navigation structures) which are a part of said unit, and all storage, diverting, or fore bay reservoirs directly connected therewith, the primary line or lines transmitting power there from to the point of junction with the distribution system or with the interconnected primary transmission system, all miscellaneous structures used and useful in connection with said unit or any part thereof, and all water rights, rights-of-way, ditches, dams, reservoirs, Lands, or interest in Lands the use and occupancy of which are necessary or appropriate in the maintenance and operation of such unit;

“Sec. 4. The Commission is hereby authorized and empowered

FERC Forms 1 and 3-Q must be filed by the following schedule:

- a. FERC Form 1 for each year ending December 31 must be filed by April 18th of the following year (18 CFR § 141.1), and
- b. FERC Form 3-Q for each calendar quarter must be filed within 60 days after the reporting quarter (18 C.F.R. § 141.400).

V. **Where to Send Comments on Public Reporting Burden.**

The public reporting burden for the FERC Form 1 collection of information is estimated to average 1,168 hours per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data-needed, and completing and reviewing the collection of information. The public reporting burden for the FERC Form 3-Q collection of information is estimated to average 168 hours per response.

Send comments regarding these burden estimates or any aspect of these collections of information, including suggestions for reducing burden, to the Federal Energy Regulatory Commission, 888 First Street NE, Washington, DC 20426 (Attention: Information Clearance Officer); and to the Office of Information and Regulatory Affairs, Office of Management and Budget, Washington, DC 20503 (Attention: Desk Officer for the Federal Energy Regulatory Commission). No person shall be subject to any penalty if any collection of information does not display a valid control number (44 U.S.C. § 3512 (a)).

GENERAL INSTRUCTIONS

- I. Prepare this report in conformity with the Uniform System of Accounts (18 CFR Part 101) (USofA). Interpret all accounting words and phrases in accordance with the USofA.
- II. Enter in whole numbers (dollars or MWH) only, except where otherwise noted. (Enter cents for averages and figures per unit where cents are important. The truncating of cents is allowed except on the four basic financial statements where rounding is required.) The amounts shown on all supporting pages must agree with the amounts entered on the statements that they support. When applying thresholds to determine significance for reporting purposes, use for balance sheet accounts the balances at the end of the current reporting period, and use for statement of income accounts the current year's year to date amounts.

FERC FORM NO. 1 (ED. 03-07)

- a. "To make investigations and to collect and record data concerning the utilization of the water 'resources of any region to be developed, the water-power industry and its relation to other industries and to interstate or foreign commerce, and concerning the location, capacity, development costs, and relation to markets of power sites; ... to the extent the Commission may deem necessary or useful for the purposes of this Act."

"Sec. 304.

- a. Every Licensee and every public utility shall file with the Commission such annual and other periodic or special" reports as the Commission may by rules and regulations or other prescribe as necessary or appropriate to assist the Commission in the proper administration of this Act. The Commission may prescribe the manner and FERC Form in which such reports shall be made, and require from such persons specific answers to all questions upon which the Commission may need information. The Commission may require that such reports shall include, among other things, full information as to assets and Liabilities, capitalization, net investment, and reduction thereof, gross receipts, interest due and paid, depreciation, and other reserves, cost of project and other facilities, cost of maintenance and operation of the project and other facilities, cost of renewals and replacement of the project works and other facilities, depreciation, generation, transmission, distribution, delivery, use, and sale of electric energy. The Commission may require any such person to make adequate provision for currently determining such costs and other facts. Such reports shall be made under oath unless the Commission otherwise specifies".¹⁰

"Sec. 309.

The Commission shall have power to perform any and all acts, and to prescribe, issue, make, and rescind such orders, rules and regulations as it may find necessary or appropriate to carry out the provisions of this Act. Among other things, such rules and regulations may define accounting, technical, and trade terms used in this Act; and may prescribe the FERC Form or FERC Forms of all statements, declarations, applications, and reports to be filed with the Commission, the information which they shall contain, and the time within which they shall be field..."

GENERAL PENALTIES

The Commission may assess up to \$1 million per day per violation of its rules and regulations. See FPA § 316(a) (2005), 16 U.S.C. § 825o(a).

CORPORATIONS CONTROLLED BY RESPONDENT

1. Report below the names of all corporations, business trusts, and similar organizations, controlled directly or indirectly by respondent at any time during the year. If control ceased prior to end of year, give particulars (details) in a footnote.
2. If control was by other means than a direct holding of voting rights, state in a footnote the manner in which control was held, naming any intermediaries involved.
3. If control was held jointly with one or more other interests, state the fact in a footnote and name the other interests.

Definitions

1. See the Uniform System of Accounts for a definition of control.
2. Direct control is that which is exercised without interposition of an intermediary.
3. Indirect control is that which is exercised by the interposition of an intermediary which exercises direct control.
4. Joint control is that in which neither interest can effectively control or direct action without the consent of the other, as where the voting control is equally divided between two holders, or each party holds a veto power over the other. Joint control may exist by mutual agreement or understanding between two or more parties who together have control within the meaning of the definition of control in the Uniform System of Accounts, regardless of the relative voting rights of each party.

FOOTNOTE DATA			

(a) Concept: OfficerSalary
The salary disclosure reflects the amount that has been allocated to Massachusetts Electric Company. The salary amount allocated to other companies was \$217,217. These salary amounts exclude incentive compensation payments and only reflect base salary paid from 1/1/2023 through 12/31/2023.
(b) Concept: OfficerSalary
The salary disclosure reflects the amount that has been allocated to Massachusetts Electric Company. The salary amount allocated to other companies was \$264,048. These salary amounts exclude incentive compensation payments and only reflect base salary paid from 1/1/2023 through 12/31/2023.
(c) Concept: OfficerSalary
The salary disclosure reflects the amount that has been allocated to Massachusetts Electric Company. The salary amount allocated to other companies was \$292,281. These salary amounts exclude incentive compensation payments and only reflect base salary paid from 1/1/2023 through 12/31/2023.
(d) Concept: OfficerSalary
The salary disclosure reflects the amount that has been allocated to Massachusetts Electric Company. The salary amount allocated to other companies was \$123,819. These salary amounts exclude incentive compensation payments and only reflect base salary paid from 1/1/2023 through 12/31/2023.
(e) Concept: OfficerSalary
The salary disclosure reflects the amount that has been allocated to Massachusetts Electric Company. The salary amount allocated to other companies was \$136,307. These salary amounts exclude incentive compensation payments and only reflect base salary paid from 1/1/2023 through 12/31/2023.
(f) Concept: OfficerSalary
The salary disclosure reflects the amount that has been allocated to Massachusetts Electric Company. The salary amount allocated to other companies was \$413,317. These salary amounts exclude incentive compensation payments and only reflect base salary paid from 1/1/2023 through 12/31/2023.
(g) Concept: OfficerSalary
The salary disclosure reflects the amount that has been allocated to Massachusetts Electric Company. The salary amount allocated to other companies was \$121,715. These salary amounts exclude incentive compensation payments and only reflect base salary paid from 1/1/2023 through 12/31/2023.
(h) Concept: OfficerSalary
The salary disclosure reflects the amount that has been allocated to Massachusetts Electric Company. The salary amount allocated to other companies was \$194,886. These salary amounts exclude incentive compensation payments and only reflect base salary paid from 1/1/2023 through 12/31/2023.
(i) Concept: OfficerSalary
The salary disclosure reflects the amount that has been allocated to Massachusetts Electric Company. The salary amount allocated to other companies was \$24,483. These salary amounts exclude incentive compensation payments and only reflect base salary paid from 1/1/2023 through 12/31/2023.
(j) Concept: DateOfficerIncumbencyStarted
Charles McLeod was appointed as Vice President Chief Financial Officer, NE and Director effective 1/10/2023.
(k) Concept: DateOfficerIncumbencyStarted
Lisa Wieland was appointed as President and Director effective 11/17/2023.

INFORMATION ON FORMULA RATES - Formula Rate Variances				
1. If a respondent does not submit such filings then indicate in a footnote to the applicable Form 1 schedule where formula rate inputs differ from amounts reported in the Form 1. 2. The footnote should provide a narrative description explaining how the "rate" (or billing) was derived if different from the reported amount in the Form 1. 3. The footnote should explain amounts excluded from the ratebase or where labor or other allocation factors, operating expenses, or other items impacting formula rate inputs differ from amounts reported in Form 1 schedule amounts. 4. Where the Commission has provided guidance on formula rate inputs, the specific proceeding should be noted in the footnote.

IMPORTANT CHANGES DURING THE QUARTER/YEAR			
Give particulars (details) concerning the matters indicated below. Make the statements explicit and precise, and number them in accordance with the inquiries. Each inquiry should be answered. Enter "none," "not applicable," or "NA" where applicable. If information which answers an inquiry is given elsewhere in the report, make a reference to the schedule in which it appears. 1. Changes in and important additions to franchise rights: Describe the actual consideration given therefore and state from whom the franchise rights were acquired. If acquired without the payment of consideration, state that fact. 2. Acquisition of ownership in other companies by reorganization, merger, or consolidation with other companies: Give names of companies involved, particulars concerning the transactions, name of the Commission authorizing the transaction, and reference to Commission authorization. 3. Purchase or sale of an operating unit or system: Give a brief description of the property, and of the transactions relating thereto, and reference to Commission authorization, if any was required. Give date journal entries called for by the Uniform System of Accounts were submitted to the Commission. 4. Important leaseholds (other than leaseholds for natural gas lands) that have been acquired or given, assigned or surrendered: Give effective dates, lengths of terms, names of parties, rents, and other condition. State name of Commission authorizing lease and give reference to such authorization. 5. Important extension or reduction of transmission or distribution system: State territory added or relinquished and date operations began or ceased and give reference to Commission authorization, if any was required. State also the approximate number of customers added or lost and approximate annual revenues of each class of service. Each natural gas company must also state major new continuing sources of gas made available to it from purchases, development, purchase contract or otherwise, giving location and approximate total gas volumes available, period of contracts, and other parties to any such arrangements, etc. 6. Obligations incurred as a result of issuance of securities or assumption of liabilities or guarantees including issuance of short-term debt and commercial paper having a maturity of one year or less. Give reference to FERC or State Commission authorization, as appropriate, and the amount of obligation or guarantee. 7. Changes in articles of incorporation or amendments to charter: Explain the nature and purpose of such changes or amendments. 8. State the estimated annual effect and nature of any important wage scale changes during the year. 9. State briefly the status of any materially important legal proceedings pending at the end of the year, and the results of any such proceedings culminated during the year. 10. Describe briefly any materially important transactions of the respondent not disclosed elsewhere in this report in which an officer, director, security holder reported on Pages 104 or 105 of the Annual Report Form No. 1, voting trustee, associated company or known associate of any of these persons was a party or in which any such person had a material interest. 11. (Reserved.) 12. If the important changes during the year relating to the respondent company appearing in the annual report to stockholders are applicable in every respect and furnish the data required by Instructions 1 to 11 above, such notes may be included on this page. 13. Describe fully any changes in officers, directors, major security holders and voting powers of the respondent that may have occurred during the reporting period. 14. In the event that the respondent participates in a cash management program(s) and its proprietary capital ratio is less than 30 percent please describe the significant events or transactions causing the proprietary capital ratio to be less than 30 percent, and the extent to which the respondent has amounts loaned or money advanced to its parent, subsidiary, or affiliated companies through a cash management program(s). Additionally, please describe plans, if any to regain at least a 30 percent proprietary ratio.			
1. <u>Changes in Franchise Rights:</u> None			
2. <u>Information on consolidations, mergers, and reorganizations:</u> None			
3. <u>Purchase or sale of an operating unit or system:</u> None			
4. <u>Important Leaseholds:</u> None			
5. <u>Important extension or reduction of transmission or distribution system:</u> None			
6. <u>Issuance of securities or assumption of liabilities or guarantees:</u> None			
7. <u>Changes in Articles of Incorporation:</u> None			
8. <u>Wage Scale Increases:</u> The following unions had a general wage increase of 3.0% effective 5/12/2023: 1465, 322, 326, 329, 330, 369, and 48A-G. The Company's management employees were budgeted for a general wage increase of 4% effective 7/1/2023. An addition 0.5% budget for US Career Progression promotional increases. The actual wage increase for each management employee was commensurate with annual performance.			
9. <u>Status of Legal Proceedings:</u> Refer to Page 122-123 (Notes to Financial Statements), Note 11 (Commitments and Contingencies).			
10. <u>Additional Material Transactions Not Reported Elsewhere in this Report:</u> None			
13. <u>Changes in General Officers and Directors:</u> <u>Appointment</u> • Charles McLeod was appointed as Vice President, Chief Financial Officer, NE and Director effective 1/10/2023. • Lisa Wieland was appointed as President and Director effective 11/17/2023. • Nicola Medalova appointed as Director and Vice President effective 11/20/2023. <u>Resignation</u> • David H. Campbell resigned as Vice President, Chief Financial Officer, NE and Director effective 1/9/2023. • Keri Sweet-Zavaglia resigned as Senior Vice President effective 5/12/2023. • Jennifer Briere resigned as Vice President and Chief People Officer, NE effective 7/3/2023. • Stephen Woerner resigned as President and Director effective 11/17/2023. • Carol Sedewitz resigned as Vice President and Director effective 11/20/2023.

STATEMENT OF INCOME

Quarterly

1. Report in column (c) the current year to date balance. Column (c) equals the total of adding the data in column (g) plus the data in column (i) plus the data in column (k). Report in column (d) similar data for the previous year. This information is reported in the annual filing only.
2. Enter in column (e) the balance for the reporting quarter and in column (f) the balance for the same three month period for the prior year.
3. Report in column (g) the quarter to date amounts for electric utility function; in column (i) the quarter to date amounts for gas utility, and in column (k) the quarter to date amounts for other utility function for the current year quarter.
4. Report in column (h) the quarter to date amounts for electric utility function; in column (j) the quarter to date amounts for gas utility, and in column (l) the quarter to date amounts for other utility function for the prior year quarter.
5. If additional columns are needed, place them in a footnote.

Annual or Quarterly if applicable

6. Do not report fourth quarter data in columns (e) and (f).
7. Report amounts for accounts 412 and 413, Revenues and Expenses from Utility Plant Leased to Others, in another utility column in a similar manner to a utility department. Spread the amount(s) over Lines 2 thru 26 as appropriate. Include these amounts in columns (c) and (d) totals.
8. Report amounts in account 414, Other Utility Operating Income, in the same manner as accounts 412 and 413 above.
9. Use page 122 for important notes regarding the statement of income for any account thereof.
10. Give concise explanations concerning unsettled rate proceedings where a contingency exists such that refunds of a material amount may need to be made to the utility's customers or which may result in material refund to the utility with respect to power or gas purchases. State for each year effected the gross revenues or costs to which the contingency relates and the tax effects together with an explanation of the major factors which affect the rights of the utility to retain such revenues or recover amounts paid with respect to power or gas purchases.
11. Give concise explanations concerning significant amounts of any refunds made or received during the year resulting from settlement of any rate proceeding affecting revenues received or costs incurred for power or gas purchases, and a summary of the adjustments made to balance sheet, income, and expense accounts.
12. If any notes appearing in the report to stockholders are applicable to the Statement of Income, such notes may be included at page 122.
13. Enter on page 122 a concise explanation of only those changes in accounting methods made during the year which had an effect on net income, including the basis of allocations and apportionments from those used in the preceding year. Also, give the appropriate dollar effect of such changes.
14. Explain in a footnote if the previous year's/quarter's figures are different from that reported in prior reports.
15. If the columns are insufficient for reporting additional utility departments, supply the appropriate account titles report the information in a footnote to this schedule.

STATEMENT OF RETAINED EARNINGS

1. Do not report Lines 49-53 on the quarterly report.
2. Report all changes in appropriated retained earnings, unappropriated retained earnings, and unappropriated undistributed subsidiary earnings for the year.
3. Each credit and debit during the year should be identified as to the retained earnings account in which recorded (Accounts 433, 436-439 inclusive). Show the contra primary account affected in column (b).
4. State the purpose and amount for each reservation or appropriation of retained earnings.
5. List first Account 439, Adjustments to Retained Earnings, reflecting adjustments to the opening balance of retained earnings. Follow by credit, then debit items, in that order.
6. Show dividends for each class and series of capital stock.
7. Show separately the State and Federal income tax effect of items shown for Account 439, Adjustments to Retained Earnings.
8. Explain in a footnote the basis for determining the amount reserved or appropriated. If such reservation or appropriation is to be recurrent, state the number and annual amounts to be reserved or appropriated as well as the totals eventually to be accumulated.
9. If any notes appearing in the report to stockholders are applicable to this statement, attach them at page 122.

STATEMENT OF CASH FLOWS

1. Codes to be used:(a) Net Proceeds or Payments;(b)Bonds, debentures and other long-term debt; (c) Include commercial paper; and (d) Identify separately such items as investments, fixed assets, intangibles, etc.
2. Information about noncash investing and financing activities must be provided in the Notes to the Financial statements. Also provide a reconciliation between "Cash and Cash Equivalents at End of Period" with related amounts on the Balance Sheet.
3. Operating Activities - Other: Include gains and losses pertaining to operating activities only. Gains and losses pertaining to investing and financing activities should be reported in those activities. Show in the Notes to the Financials the amounts of interest paid (net of amount capitalized) and income taxes paid.
4. Investing Activities: Include at Other (line 31) net cash outflow to acquire other companies. Provide a reconciliation of assets acquired with liabilities assumed in the Notes to the Financial Statements. Do not include on this statement the dollar amount of leases capitalized per the USofA General Instruction 20; instead provide a reconciliation of the dollar amount of leases capitalized with the plant cost.

MASSACHUSETTS ELECTRIC COMPANY
NOTES TO THE FINANCIAL STATEMENTS

1. NATURE OF OPERATIONS AND BASIS OF PRESENTATION

Massachusetts Electric Company ("the Company") is an electric retail distribution company providing electric service to approximately 1.4 million customers in Massachusetts. The properties of the Company consist principally of substations and distribution lines interconnected with transmission and other facilities of New England Power Company ("NEP"), an affiliated entity.

The Company is a wholly owned subsidiary of National Grid USA ("NGUSA" or the "Parent"), a public utility holding company with regulated subsidiaries engaged in the generation of electricity and the transmission, distribution, and sale of both natural gas and electricity. NGUSA is a direct wholly owned subsidiary of National Grid North America Inc. ("NGNA") and an indirect wholly owned subsidiary of National Grid plc, a public limited company incorporated under the laws of England and Wales.

Pursuant to a settlement agreement associated with NGUSA's purchase of Nantucket Electric Company ("Nantucket Electric") in 1996, which was approved by the Massachusetts Department of Public Utilities ("DPU"), the Company and its affiliate, Nantucket Electric, are considered as one regulated entity for the purpose of recovering costs and establishing rates assessed to customers, with the exception of the recovery of Nantucket Electric's investment in two undersea electric cables. In the recovery of certain regulatory assets, funding of the recovery is from the customers of both companies. The mechanism by which recovery is ultimately achieved, however, is through a single regulatory asset recorded on the balance sheet of the Company. Nantucket Electric's share of these costs and recoveries is reflected through a return on equity ("ROE") mechanism between the Company and Nantucket Electric, as discussed in Note 13, "Related Party Transactions."

The accompanying financial statements are prepared in accordance with accounting requirements of the Federal Energy Regulatory Commission ("FERC") as set forth in its applicable Uniform System of Accounts. This is a comprehensive basis of accounting other than accounting principles generally accepted in the United States of America ("U.S. GAAP"). The primary differences consist of the following:

- For FERC reporting, the non-service cost portion of net periodic benefits is classified as operating expense. For U.S. GAAP reporting, the non-service cost portion of net periodic benefits is classified as other income (deductions).
- For FERC reporting, regulatory assets and liabilities are classified as non-current. For U.S. GAAP reporting, regulatory assets and liabilities are classified as current or long-term as applicable. Additionally, the portion of regulatory assets related to an equity return is included for FERC reporting and derecognized for U.S. GAAP reporting.
- The accumulated amounts collected in rates for cost of removal over spending are included within accumulated depreciation for FERC reporting, but are presented as a regulatory liability for U.S. GAAP reporting.
- All debt is classified as long-term in the balance sheet for FERC reporting. Under U.S. GAAP, the presentation reflects current and long-term debt separately.
- For FERC reporting, the debt issuance costs related to term loans are presented in the balance sheet within deferred charges and other assets. Under U.S. GAAP, this is presented in the balance sheet as a direct deduction from the carrying value of debt.
- Goodwill is included within utility plant for FERC reporting, but is presented as other non-current assets for U.S. GAAP reporting.
- For FERC reporting, the liability for uncertain tax positions related to temporary differences is not recognized pursuant to FERC guidance, and deferred taxes are recognized based on the difference between positions taken in filed tax returns and amounts reported in the financial statements. For U.S. GAAP reporting, the liability for uncertain tax positions related to temporary differences is recognized, and deferred taxes are recognized based on the difference between positions taken in filed tax returns adjusted for uncertain tax positions related to temporary differences and amounts reported in the financial statements.
- For FERC reporting, deferred tax assets and liabilities are presented on a gross basis. For U.S. GAAP reporting, deferred tax assets and liabilities are presented on a net basis.
- For FERC reporting, certain revenues and expenses are classified as either utility or non-utility in nature. For U.S. GAAP reporting, no distinction between utility and non-utility is made.non-utility is made.

Supplemental disclosures:		
Interest paid	\$ (75,865)	\$ (75,865)
Income taxes refunded (paid)	96,350	(11,974)
Supplemental disclosure of non-cash financing and investing activities:		
Capital-related accruals included in accounts payable	12,843	10,540
Parent tax loss allocation	—	2,509

The Company has evaluated subsequent events and transactions through March 28, 2024, the date of issuance of these financial statements, and concluded that there were no events or transactions that require adjustment to, or disclosure in, the financial statements as of and for the year ended December 31, 2023, with the exception of items otherwise disclosed in these financial statements.

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Use of Estimates

In preparing financial statements that conform to FERC requirements, the Company must make estimates and assumptions that affect the reported amounts of assets, liabilities, revenues, and expenses, and the disclosure of contingent assets and liabilities included in the financial statements. Such estimates and assumptions include the impact of the ongoing COVID-19 pandemic and are reflected in the accompanying financial statements. Actual results could differ from those estimates.

Regulatory Accounting

The FERC and the DPU regulate the rates the Company charges its customers. In certain cases, the rate actions of the FERC and the DPU can result in accounting that differs from non-regulated companies. In these cases, the Company defers costs (as regulatory assets) or recognizes obligations (as regulatory liabilities) if it is probable that such amounts will be recovered from, or refunded to, customers through future rates. In accordance with Accounting Standards Codification ("ASC") 980, "Regulated Operations," regulatory assets and liabilities are reflected on the balance sheet consistent with the treatment of the related costs in the ratemaking process. As of December 31, 2023 and 2022 there was derecognized allowance on shareholders' investment for ratemaking purposes of \$5.5 million and \$2.0 million, respectively.

Revenue Recognition

Revenues are recognized for electric distribution services billed on a monthly cycle basis, together with unbilled revenues for the estimated amount of services rendered from the time meters were last read to the end of the reporting period. See Note 3, "Revenue," for additional details.

Income Taxes

Federal and state income taxes have been computed utilizing the asset and liability approach that requires the recognition of deferred tax assets and liabilities for the tax consequences of temporary differences by applying enacted statutory tax rates applicable to future years to differences between the financial statement carrying amounts and the tax basis of existing assets and liabilities. Deferred income taxes also reflect the tax effect of net operating losses, capital losses, and general business credit carryforwards. The Company assesses the available positive and negative evidence to estimate whether sufficient future taxable income of the appropriate tax character will be generated to realize the benefits of existing deferred tax assets. When the evaluation of the evidence indicates that the Company will not be able to realize the benefits of existing deferred tax assets, a valuation allowance is recorded to reduce existing deferred tax assets to the net realizable amount.

The effects of tax positions are recognized in the financial statements when it is more likely than not that the position taken, or expected to be taken, in a tax return will be sustained upon examination by taxing authorities based on the technical merits of the position. The financial effect of changes in tax laws or rates is accounted for in the period of enactment. Deferred investment tax credits are amortized over the useful life of the underlying property.

NGNA files consolidated federal tax returns including all of the activities of its subsidiaries. Each subsidiary determines its tax provision based on the separate return method, modified by a benefits-for-loss allocation pursuant to a tax sharing agreement between NGNA and its subsidiaries. The benefits of consolidated tax losses and credits are allocated to the NGNA subsidiaries giving rise to such benefits in determining each subsidiary's tax expense in the year that the loss or credit arises. In a year that a consolidated loss or credit carryforward is utilized, the tax benefit utilized in consolidation is paid proportionately to the subsidiaries that gave rise to the benefit, regardless of whether those subsidiaries would have utilized the benefit. The tax sharing agreement also requires NGNA to allocate its parent tax losses, excluding deductions from acquisition indebtedness, to each subsidiary in the consolidated federal tax return with taxable income. The allocation of NGNA's parent tax losses to its subsidiaries is accounted for as a capital contribution and is performed in conjunction with the annual intercompany cash settlement process following the filing of the federal tax return.

Other Taxes

The Company collects taxes and fees from customers, such as sales taxes, other taxes, surcharges, and fees that are levied by state or local governments on the sale or distribution of electricity. The Company accounts for taxes that are imposed on customers (such as sales taxes) on a net basis (excluded from revenues).

The Company's policy is to accrue for property taxes on a calendar year basis.

Cash and Cash Equivalents

Cash equivalents consist of short-term, highly liquid investments with original maturities of three months or less. Cash and cash equivalents are carried at cost, which approximates fair value.

Special Deposits

Special deposits consist of collateral paid to the Independent System Operator – New England (“ISO-NE”) in connection with the ISO-NE’s market participant financial assurance requirement.

Plant Materials and Operating Supplies

Plant materials and operating supplies are stated at weighted average cost, which represents net realizable value, and are expensed or capitalized into utility plant as used. There were no significant write-offs of obsolete plant materials and operating supplies for the years ended December 31, 2023 and 2022. The Company had plant materials and operating supplies of \$68.4 million and \$35.2 million and purchased renewable energy certificates (“RECs”) of \$62.1 million and \$70.4 million as of December 31, 2023 and 2022, respectively.

Renewable Energy Certificate Obligations

RECs are stated at cost and are used to measure compliance with state renewable energy standards. The Company is required to comply with the Renewable Energy Portfolio Standard, which requires retail sellers of electricity to obtain a certain minimum percentage or amount of their power supply from renewable energy sources. RECs support new renewable generation resources and are held primarily to be utilized in fulfillment of the Company’s compliance obligations under the Renewable Energy Portfolio Standard. As of December 31, 2023 and 2022, the Company recorded renewable energy certificate obligations of \$138.7 million and \$164.6 million, respectively.

Power Purchase Agreements

Certain of the Company’s subsidiaries enter into power purchase agreements (“PPAs”) to procure electricity to serve their electric service customers. The Company first evaluates whether such agreements contain a lease. In performing this evaluation, the Company considers whether the terms of the PPA provide the Company with the right to direct use of the generating facility and if the Company has the right to obtain substantially all of the economic benefits derived from use of the facility. In determining whether the Company has the right to direct use of the facility, the Company will consider which rights have the most significant impact on the economic benefits to be derived from the asset; for example, dispatch rights or the right to be involved in the facility’s design. If the PPA is determined to contain a lease, the Company assesses whether it should be classified as a finance lease or an operating lease.

If the PPA does not contain a lease, the Company next assesses whether the contract is a derivative or includes one or more embedded derivatives. In making this determination, the Company assesses whether the PPA includes a notional amount or payment provision through the contract’s delivery requirements or terms of default. If the PPA is a derivative or contains one or more embedded derivatives, the Company will assess whether the requirements for election of the normal purchases and normal sales scope exception are met. If the requirements for the election are not met or the election is not made, the Company reports the derivative at fair value on the consolidated balance sheet. If the election is made, the Company accounts for the PPA as an executory contract whereby costs are recognized as electricity is purchased. If the contract does not contain a lease and is not a derivative, the Company accounts for the PPA as an executory contract.

The Company also assesses whether the PPA is a variable interest in a variable interest entity (“VIE”). In determining whether the PPA is a variable interest, the Company assesses whether the contract absorbs certain risks, such as commodity price risk, that the VIE was designed to pass on to its interest holders. If the PPA is determined to be a variable interest in a VIE, the Company determines whether it is the primary beneficiary.

Distributed Generation Advances

Distributed generation refers to electricity that is generated from sources located near the point of use instead of centralized generation sources. Customers wishing to connect a power-generating facility to the Company’s electric power system are responsible for all review and study costs, interconnection equipment costs, and system modification costs reasonably incurred by the Company that are attributable to the proposed interconnection project. The Company bills customers for the costs that it expects to incur, and customers must pay these costs before the Company performs any work. The Company records such customer contributions that have not yet been spent within the distributed generation liability on the balance sheet. As of December 31, 2023 and 2022, the Company’s distributed generation liability was \$55.1 million and \$56.8 million, respectively, which is included within miscellaneous current and accrued liabilities.

Fair Value Measurements

The Company measures securities and pension and postretirement benefit other than pension (“PBOP”) plan assets at fair value. Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The following is the fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value:

- Level 1: quoted prices (unadjusted) in active markets for identical assets or liabilities that a company has the ability to access as of the reporting date;
- Level 2: inputs other than quoted prices included within Level 1 that are directly observable for the asset or liability or indirectly observable through corroboration with observable market data;
- Level 3: unobservable inputs, such as internally developed forward curves and pricing models for the asset or liability due to little or no market activity for the asset or liability with low correlation to observable market inputs; and
- Not categorized: investments in funds that meet certain conditions of ASC 820 are not required to be categorized within the fair value hierarchy. These investments are typically in commingled funds or limited partnerships that are not publicly traded and have ongoing subscription and redemption activity. As a practical expedient, the fair value of these investments is the Net Asset Value per fund share.

The asset or liability’s fair value measurement level within the fair value hierarchy is based on the lowest level of any input that is significant to the fair value measurement. The Company uses valuation techniques that maximize the use of observable inputs and minimize the use of unobservable inputs.

Utility Plant

Utility plant is stated at original cost. The capitalized cost of additions to utility plant includes costs such as direct materials, labor and benefits, and an allowance for funds used during construction (“AFUDC”). The cost of repairs and maintenance is charged to expense, and the cost of renewals and betterments that extend the useful life of utility plant is capitalized.

Depreciation is computed over the estimated useful life of the asset using the composite straight-line method. Depreciation studies are conducted periodically to update the composite rates and are approved by the FERC and the DPU. The average composite rate for each of the years ended December 31, 2023 and 2022 were 3.1%.

Depreciation expense includes a component for the estimated cost of removal, which is recovered through rates charged to customers.

Allowance for Funds Used During Construction

The Company records AFUDC, which represents the debt and equity costs of financing the construction of new utility plant. The equity component of AFUDC is reported in the accompanying statement of income as non-cash income in other income. The debt component of AFUDC is reported as a non-cash offset to interest expense. After construction is completed, the Company is permitted to recover these costs through their inclusion in rate base. The Company recorded AFUDC related to equity of \$3.5 million and \$9.9 million, and AFUDC related to debt of \$8.5 million and \$3.8 million, for the years ended December 31, 2023 and 2022, respectively. The average AFUDC rates for the years ended December 31, 2023 and 2022 were 6.0% and 7.1%, respectively.

Impairment of Long-Lived Assets

The Company tests the impairment of long-lived assets when events or changes in circumstances indicate that the carrying amount of the asset (or asset group) may not be recoverable. If such an event or change in circumstances is identified, the recoverability of an asset is determined by comparing its carrying value to the estimated undiscounted cash flows that the asset is expected to generate. If the comparison indicates that the carrying value is not recoverable, an impairment loss is recognized for the excess of the carrying value over the estimated fair value. For the years ended December 31, 2023 and 2022, there were no impairment losses recognized for long-lived assets.

Goodwill

The Company tests goodwill for impairment annually on October 1, or more frequently if events occur or circumstances exist that indicate it is more likely than not that the fair value of the Company is below its carrying amount. The goodwill impairment test requires a recoverability test based on the comparison of the Company’s estimated fair value with its carrying value, including goodwill. If the estimated fair value exceeds the carrying value, goodwill is not considered impaired. If the carrying value exceeds the estimated fair value, the Company is required to recognize an impairment charge for such excess, limited to the carrying amount of goodwill.

The Company applies two valuation methodologies to estimate its fair value, principally discounted projected future net cash flows and market-based multiples, commonly referred to as the income approach and market approach. Key assumptions include, but are not limited to, estimated future cash flows, multiples of earnings, and an appropriate discount rate. In estimating future cash flows, the Company incorporates current market information and historical factors. The determination of fair value incorporates significant unobservable inputs, requiring the Company to make significant judgments, whereby actual results may differ from assumed and estimated amounts. For the year ended December 31, 2023, the Company applied a 50/50 weighting for each valuation methodology, as it believes that each approach provides equally valuable and reliable information regarding the Company’s estimated fair value.

The Company performed its latest annual goodwill impairment test as of October 1, 2023, at which time the Company’s estimated fair value significantly exceeded the carrying value. The Company did not recognize any goodwill impairment during the years ending December 31, 2023 or 2022.

Employee Benefits

The Company participates with other NGUSA subsidiaries in defined benefit pension plans and PBOP plans for its employees, administered by NGUSA. The Company recognizes its portion of the pension and PBOP plans’ funded status on the balance sheet as a net liability or asset. The cost of providing these plans is recovered through rates; therefore, the net funded status is offset by a regulatory asset or liability. The pension and PBOP plans’ assets are commingled and allocated to measure and record pension and PBOP funded status at each year-end date. Pension and PBOP plan assets are measured at fair value, using the year-end market value of those assets.

Leases

The Company has various operating leases, primarily related to buildings, land, and fleet vehicles. Right-of-use (“ROU”) assets consist of the lease liability together with any payments made to the lessor prior to commencement of the lease (less any lease incentives) and any initial direct costs. ROU assets are amortized over the lease term. Lease liabilities are recognized based on the present value of the lease payments over the lease term at the commencement date. For any leases that do not provide an implicit rate, the Company uses an estimate of its collateralized incremental borrowing rate, based on the information available at the commencement date, to determine the present value of future payments. In measuring lease liabilities, the Company excludes variable lease payments, other than those that depend on an index or a rate, or those that are, in substance, fixed payments, and includes lease payments made at or before the commencement date. Variable lease payments were not material for the years ended December 31, 2023 and 2022. The Company does not reflect short-term leases and low value leases on the balance sheet. Expenses related to short-term leases and low value leases were not material for the years ended December 31, 2023 and 2022.

The Company recognizes lease expense based on a pattern that conforms to the regulatory ratemaking treatment.

New and Recent Accounting Guidance

Accounting Guidance Recently Adopted

Financial Instruments – Credit Losses

In June 2016, the FASB issued ASU No. 2016-13 “*Financial Instruments—Credit Losses (Topic 326): Measurement of Credit Losses on Financial Statements*” which requires a financial asset (or a group of financial assets) measured at amortized cost basis to be presented at the net amount expected to be collected. The accounting standard provides a new model for recognizing credit losses on financial instruments based on an estimate of current expected credit losses that replaces existing incurred loss impairment methodology requiring delayed recognition of credit losses. A broader range of reasonable and supportable information must be considered in developing estimates of credit losses. The allowance for credit losses is a valuation account that is deducted from the amortized cost basis of the financial asset(s) to present the net carrying value at the amount expected to be collected on the financial asset. Credit losses relating to available-for-sale debt securities should be recorded through an allowance for credit losses.

In May 2019, the FASB issued ASU 2019-05, “*Financial Instruments—Credit Losses (Topic 326): Targeted Transition Relief*”, permitting entities to irrevocably elect the fair value option for financial instruments that were previously recorded at amortized cost basis within the scope of Topic 326, except for held-to-maturity debt securities. In March 2022, the FASB issued ASU 2022-02, “*Financial Instruments—Credit Losses (Topic 326): Troubled Debt Restructurings and Vintage Disclosures*.” The update eliminates the accounting guidance for troubled debt restructurings by creditors and enhances the disclosure requirements for loan refinancing and restructurings made with borrowers experiencing financial difficulty.

The Company adopted this new guidance on April 1, 2023. The adoption of this new standard resulted in an increase to the Company’s allowance for credit losses as of April 1, 2023. See below “Accumulated Provision for Uncollectible Accounts” for further information.

Accounts Receivable and Accumulated Provision for Uncollectible Accounts

The Company recognizes an accumulated provision for uncollectible accounts to reflect certain financial assets (including accounts receivable, other accounts receivable, and unbilled accrued revenues) net of expected credit losses, at estimated net realizable value. Effective April 1, 2023, the current expected credit loss model was applied for purposes of calculating the accumulated provision for uncollectible accounts.

The accumulated provision for uncollectible accounts is determined based on a variety of factors, including, for each type of receivable, applying an estimated reserve percentage to each aging category, which takes into account historical collections, write-off experience, and management’s assessment of collectability from customers, as appropriate. Management continuously assesses the collectability of receivables and adjusts estimates accordingly if circumstances change and such adjustments are reasonable and supportable based on actual experience, current conditions, and forward-looking information as well as future expectations. Receivable balances are written-off against the allowance for doubtful accounts when the accounts are disconnected and/or terminated, and when such balances are deemed to be uncollectible. The Company recorded bad debt expense of \$50.0 million and \$49.0 million for the years ended December 31, 2023 and 2022, respectively, within operation expenses in the accompanying statement of income.

Accumulated Provision for Uncollectible Accounts

Accounts receivables and Unbilled revenue are recorded at amortized cost, net of a credit loss accumulated provision for uncollectible accounts. The adoption of the new accounting guidance on Financial Instruments – Credit Losses resulted in an increase of \$4.5 million in the accumulated provision for uncollectible accounts. The activity in the accumulated provision for uncollectible accounts for the nine months ended December 31, 2023 is as follows:

Nine Months Ended December 31, 2023				
(in thousands of dollars)				
	Customer Accounts Receivables	Other Accounts Receivables	Total Allowance	
Beginning balance as of April 1, 2023	\$ 205,123	\$ 3,802	\$ 208,925	
Impact of adoption of ASC Topic 326 on April 1, 2023	4,033	453	4,486	
Credit loss expense	70,883	(290)	70,593	
Write-offs	(77,295)	(2,364)	(79,659)	
Recoveries	11,968	2,008	13,976	
Ending balance	\$ 214,712	\$ 3,609	\$ 218,321	

Accounting Guidance Not Yet Adopted
3. REVENUE

The following table presents, for the years ended December 31, 2023 and 2022, revenue from contracts with customers, as well as additional revenue from sources other than contracts with customers, disaggregated by major source:

Years Ended December 31,			
2023		2022	
(in thousands of dollars)			
Revenue from contracts with customers:			
Electric services	\$ 2,767,548	\$ 2,640,552	
Total revenue from contracts with customers	2,767,548	2,640,552	
Revenue from regulatory mechanisms	(16,421)	(13,593)	
Other revenue	31,531	28,175	
Total operating revenues	\$ 2,782,658	\$ 2,655,134	

Electric services: The Company owns, maintains, and operates an electric distribution network in upstate Massachusetts. Distribution revenues are primarily from the sale of electricity and related services to retail customers. Distribution sales are regulated by the DPU, which is responsible for determining the prices and other terms of services as part of the ratemaking process. The arrangement where a utility provides a service to a customer in exchange for a price approved by a regulator is referred to as a tariff sales contract. Electric services revenues are derived from the regulated sale and distribution of electricity to residential, commercial, and industrial customers within the Company’s service territory under the tariff rates. The tariff rates approved by the regulator are designed to recover the costs incurred by the Company for the products and services provided, along with a return on investment.

The performance obligation related to these sales is to provide electricity to the customers on demand. The electricity supplied under the tariff represents a single performance obligation, as it is a series of distinct goods or services that are substantially the same. The performance obligation is satisfied over time because the customer simultaneously receives and consumes the electricity as the Company provides these services. The Company records revenues based upon the approved tariff rate and the volume delivered to the customers, which corresponds with the amount the Company has the right to invoice.

This revenue also includes estimated unbilled amounts, which represent the estimated amounts due from retail customers for electricity provided to customers by the Company but not yet billed. Unbilled revenues are determined by taking estimated unbilled sales volumes for the respective customer classes and then applying the applicable tariff rate to those volumes. Actual amounts billed to customers when the meter readings occur may be different from the estimated amounts. Certain customers have the option to obtain electricity from other suppliers. In those circumstances, revenue is only recognized for providing delivery of the commodity to the customer.

Additionally, the Company owns an electric transmission system in Massachusetts. Transmission systems generally include overhead lines, underground cables, and substations connecting generation and interconnectors to the distribution system. The Company’s transmission services are regulated by both the ISO-NE and the FERC. Additionally, the Company makes available its transmission facilities to NEP for operation and control pursuant to an integrated facilities agreement, Service Agreement No. 23. See Note 13, “Related Party Transactions,” for additional details. Transmission revenues arise under tariff/rate agreements and are collected primarily from the Company’s Massachusetts distribution customers.

Revenue from regulatory mechanisms: The Company records revenues in accordance with accounting principles for rate-regulated operations for arrangements between the Company and the regulator, which are not accounted for as contracts with customers. These primarily include deferral mechanisms and programs that qualify as Alternative Revenue Programs (“ARPs”). ARPs enable the Company to adjust rates in the future, in response to past activities or completed events. The Company’s electric distribution rates have a revenue decoupling mechanism (“RDM”) which allows for annual adjustments to the Company’s delivery rates as a result of the reconciliation between allowed revenue and billed revenue. The Company also has other ARPs related to the achievement of certain objectives, demand side management initiatives, and certain other rate making mechanisms. The Company recognizes ARPs with a corresponding offset to a regulatory asset or liability account when the regulatory specified events or conditions have been met, when the amounts are determinable, and are probable of recovery (or payment) through future rate adjustments within 24-months from the end of the annual reporting period.

Other revenue: Includes lease income and other transactions that are not considered contracts with customers.

4. REGULATORY ASSETS AND LIABILITIES

The Company records regulatory assets and liabilities that result from the ratemaking process. The following table presents the regulatory assets and regulatory liabilities recorded on the balance sheet:

December 31,				
		2023	2022	
		(in thousands of dollars)		
Other regulatory assets:				
COVID-19 delivery bad debt	\$	27,340	\$	27,340
Energy efficiency		—		10,088
Environmental response costs		69,335		68,110
Exogenous events		87,914		—
Net metering deferral		342,304		215,715
Grid modernization		29,085		15,195
Postretirement benefits		93,608		84,932

Rate adjustment mechanisms	116,195	87,454
Regulatory tax asset	30,749	31,624
Renewable energy certificates	76,567	94,225
Residential assistance adjustment factor	11,296	33,475
Revenue decoupling mechanism	28,039	9,802
Solar mass renewable target tariff	37,625	18,431
Storm costs	316,151	268,273
Transmission service	12,076	9,363
Other	34,668	23,333
Total	1,312,952	997,360
Other regulatory liabilities:		
Energy efficiency	45,783	—
Environmental response costs	14,965	16,188
Postretirement benefits	56,618	57,224
Rate adjustment mechanisms	5,143	17,121
Regulatory tax liability	316,281	327,323
Other	12,906	5,576
Total	\$ 451,696	\$ 423,432

As of December 31, 2023 and 2022, other than \$118.7 million (\$115.9 million of postretirement benefits and \$2.8 million of other costs) and \$44.8 million (\$42.9 million of postretirement benefits and \$1.9 million of other costs), respectively, of the regulatory assets summarized above, all regulatory assets earn a rate of return.

COVID-19 delivery bad debt: Represents the delivery-related uncollectible expense deferral, per D.P.U. 20-58 and 20-91, to defer the delivery bad debt expense as a result of COVID-19.

Energy efficiency: Represents the difference between revenue billed to customers through the Company's energy efficiency charge and the costs of the Company's energy efficiency programs, as approved by the state authorities.

Environmental response costs: The regulatory asset represents deferred costs associated with the Company's share of the estimated costs to investigate and perform certain remediation activities at sites with which it may be associated. The Company's rate plans provide for specific rate allowances for these costs, with variances deferred for future recovery from, or return to, customers. The Company believes future costs, beyond the expiration of current rate plans, will continue to be recovered through rates. The regulatory liability represents the excess of amounts received in rates over the Company's actual site investigation and remediation costs.

Exogenous events: The Property Tax Exogenous Event Long Term qualifies for the exogenous cost recovery under the Company's Performance-based Ratemaking Plan "PBR" plan. This mechanism defers the Accumulated Exogenous Impact for Property Taxes, as approved per DPU 23-55, resulting from the Department of Revenue change in property tax valuation methodology. In addition, the exogenous events represent the deferred costs associated with major storm threshold. In accordance with the PBR tariff, the recovery of incremental storm costs for those weather events that cause the Company to incur incremental costs exceeding \$30 million per event shall always be through a separate factor that will recover each amount requested for recovery over a five-year period. In order for incremental costs exceeding \$30 million per event be eligible for recovery pursuant to the provisions of this section, the total of (1) the balance of the Company's Storm Contingency Fund; and (2) the total incremental costs for all weather events where each event's incremental cost exceed \$30 million, must exceed \$75 million.

Grid modernization: Represents the deferred costs associated with the approved Grid modernization program approved per DPU 15-120. Under the mechanism, the Company is allowed to recover incremental grid modernization capital investment under the program and implements a reconciling mechanism to concurrently recover capital expenditures and related incremental operation and maintenance ("O&M") costs.

Net metering deferral: Represents the recovery mechanism for costs associated with customer-installed on-site generation facilities, including the costs of renewable generation credits. This surcharge provides the Company with a mechanism to recover such amounts.

Postretirement benefits: The regulatory asset represents the Company's unamortized non-cash accrual of net pension actuarial gains and losses, which is partially offset by the excess amounts received in rates over actual costs of the Company's pension plans. The regulatory asset will be recovered from customers in future periods. The regulatory liability represents the Company's unamortized non-cash accrual of net PBOP actuarial gains and losses, which will be passed back to customers in future periods.

Rate adjustment mechanisms: In addition to commodity costs, the Company is subject to a number of additional rate adjustment mechanisms, whereby an asset or liability is recognized resulting from differences between billed revenues and the underlying cost being recovered or differences between billed revenues and targeted amounts, as approved by the DPU.

Regulatory tax asset/liability: The regulatory asset represents under-recovered deferred taxes associated with state income tax rate changes and regulatory flow-through accounting treatment. The regulatory liability represents over-recovered federal deferred taxes associated with excess federal deferred taxes as a result of the Tax Cuts and Jobs Act of 2017 ("Tax Act") and regulatory flow-through accounting treatment.

Renewable energy certificates: Represents deferred costs associated with the Company's compliance with Massachusetts' Renewable Portfolio Standards ("RPS"). The RPS legislation was established to foster the development of new renewable energy sources. The regulatory asset will be recovered over the next year.

Residential assistance adjustment factor: The Company is allowed to recover the incremental costs associated with the operation of the Company's Arrearage Management Programs ("AMPs") offered to qualifying customers, along with the discount provided to customers receiving retail delivery service under Residential Low-Income Rate R-2. Discounts provided to eligible customers amount to 25% of the customers' total bill for service.

Revenue decoupling mechanism ("RDM"): As approved by the DPU, the Company has an electric RDM, which allows for an annual adjustment to the Company's delivery rates as a result of the reconciliation between allowed and billed revenues. Any difference is recorded as a regulatory asset or regulatory liability.

Solar mass renewable target tariff: Represents the deferred costs associated with Solar Massachusetts Renewable Target ("SMART") and the net over/under-recovery of program costs. Recoveries through the SMART deferral consist of revenues from customers and sales of RECs and energy from SMART facilities expenses consisted of payments made to SMART program participants and incremental O&M costs of the program.

Storm costs: The Company is allowed to recover qualifying storm costs from all retail delivery service customers. This balance reflects costs yet to be recovered. See Note 5, "Rate Matters," for additional information regarding the recovery of storm costs.

Transmission service: The Company arranges transmission service on behalf of its customers and bills the costs of those services to customers pursuant to the Company's Transmission Service Cost Adjustment Provision. Any over or under recoveries of these costs are passed on to customers receiving transmission service over the subsequent year. The Company records carrying charges on regulatory balances for which cash expenditures have been made and are subject to recovery, or for which cash has been collected and is subject to refund, as approved in accordance with the DPU. Carrying charges are not recorded on items for which expenditures have not yet been made.

5. RATE MATTERS

General Rate Case

On November 16, 2023, the Company and its affiliate, Nantucket Electric, filed an application for new base distribution rates to become effective October 1, 2024. The Company and Nantucket Electric's petition requests an overall net increase in base distribution revenue of approximately \$131 million based upon a 10.5% return on equity, and a capital structure of 53.48% equity, 46.47 % long-term debt, and 0.05% preferred stock. The proposed increase includes an increase in annual funding of the storm fund from \$16 million to \$53 million per year and \$7 million per year related to exogenous property tax expenses previously approved and deferred for future recovery.

Also included in the petition is the Company's five-year Comprehensive Performance and Investment Plan or "CPI Plan", which encompasses the Company's core investment plan, investments to deliver the clean energy transition, and performance metrics to hold the Company accountable to its CPI Plan. The CPI Plan includes two methods of cost recovery: (1) a five-year performance-based ratemaking for operating costs only ("PBR-O") plan, which adjusts non-capital related components of base distribution revenue annually based on a pre-determined formula, plus recovery of incremental capital-related operating expense, and exogenous event costs if applicable; and (2) an Infrastructure, Safety, Reliability and Electrification or "ISRE" mechanism for the annual recovery outside of base rates related to both core capital investment post-test year and any incremental costs associated with the Company's "Future Grid" plan to be reviewed by the Department in the separate Electric Sector Modification Plan proceeding. Both the PBR-O and ISRE recovery mechanisms include the potential to earn incentive revenues and/or penalties as determined annually by the Company's actual performance against a suite of symmetrical performance metrics. The PBR-O mechanism also includes recovery of exogenous events which meet a significance threshold of \$3.6 million, including separate recovery factors related to exogenous storm costs for single storm events greater than \$30 million as well as a new proposed exogenous debt cost recovery factor which would refund or collect from customers the difference between actual debt costs incurred and the level of debt cost recovery embedded in base distribution rates annually. The PBR-O proposal includes an earnings sharing mechanism, under which the Company would share 75% of its earnings that exceed 11.5% return on equity with customers. If approved, the Company would agree not to file for an effective change in base distribution rates outside of the annual PBR-O and ISRE mechanisms for a period of five years from the effective date of new rates.

In addition to the base request of \$131 million and CPI plan, the Company has petitioned for three additional proposals outside of its base distribution rates. The first is an extension of the storm fund replenishment factor through September 2029 as well as an increase of approximately \$13 million to the annual funding level. The Company has also petitioned to extend the term of its Vegetation Management Pilot through September 2029. Finally, the Company has proposed revisions to its current low-income discount rate structure for customers earning 60% of the state median income or less, from the current flat discount rate of 32% to a tiered structure with discounts ranging from 32% to 55%, depending on income and energy burden. The low-income proposal also includes a dedicated team to engage eligible customers through in-person events and a targeted outreach to increase program participation. Recovery of the increased discounts along with costs of increased education and outreach activities would occur through the Company's existing Residential Assistance Adjustment Factors once the program is implemented.

If approved by the DPU, a typical residential customer receiving basic service using 600 kWh per month, would experience an annual average increase of 2.2% per year over the rate plan period, or a \$4.86 average increase in a monthly bill. The increase would take effect starting October 1, 2024 for the first year of the rate term with a \$7.86 cent per month impact on an average residential customer bill – or 3.7% – with further increases averaging 1.8% per year for the remaining four years of the rate plan term. To ensure the Company invests, operates, and maintains its distribution system wisely, the proposal will undergo a prudency review by the Department over a statutory 10-month period and will provide for public input and comment. If approved, new base distribution rates would take effect October 1, 2024 and be reflected on customers' bills starting November 1, 2024.

PBR Plan Filing

On June 15, 2021, the Company and Nantucket Electric filed the second annual PBR plan filing for rates effective October 1, 2021. The PBR plan filing adjusts base distribution rates pursuant to a revenue cap formula, provides a credit to customers for any customer share of excess earnings pursuant to the earnings sharing mechanism, and recovers from or credits customers for the impact of costs in excess of a threshold associated with exogenous events, including storms having incremental costs in excess of \$30 million. On September 8, 2021, the Department allowed the Company's proposed PBR Adjustment and Capital Expenditure Adjustment for effect October 1, 2021, subject to further investigation and reconciliation. On February 23, 2022, the Department gave final approval to the Company's second annual PBR plan filing for rates that went into effect October 1, 2021, a total increase to base distribution revenue of 2.709%, or \$22.8 million.

On June 17, 2022, the Company and Nantucket Electric filed the third annual PBR plan filing for rates effective October 1, 2022. The Company and Nantucket Electric requested approval of a PBR adjustment of \$43.9 million, based on a PBR percentage of 4.94%. This adjustment reflects the implementation of the Company and Nantucket Electric's proposed voluntary one-time customer impact mitigation plan, which the Company proposed due to the extreme economic circumstances and high inflation rates currently impacting customers. On September 26, 2022, the DPU approved the Company and Nantucket Electric's proposed PBR adjustment and customer impact mitigation plan, effective October 1, 2022. The DPU also stated that it will conduct its review of the Company and Nantucket Electric's proposed amortization of the exogenous storm event with incremental costs in excess of \$30 million as part of the Company and Nantucket Electric's next PBR plan filing.

The Company made its fourth annual PBR filing on June 15, 2023. The filing requested a PBR Adjustment for effect October 1, 2023 of \$66.7 million, plus recovery of \$13.5 million annually over five years associated with an exogenous storm event in which the Company incurred incremental costs in excess of \$30 million, resulting in a total of \$80.2 million. The filing included a voluntary Customer Impact Mitigation Plan, that reduced what the Company would have otherwise requested under its PBR formula by \$14.7 million, from \$81.4 million to \$66.7 million (not inclusive of the storm event costs). The filing also included a request to approve the recovery method for increased local property taxes due to a change in the assessment methodology, which the DPU previously determined was an "exogenous event" under the PBR tariff, and to recover the ongoing yearly impacts of this change (\$5.9 million for the year ended March 31, 2021; \$7.4 million for the year ended March 31, 2022; and \$0.6 million for the year ended March 31, 2023). On September 28, 2023, the DPU approved the Company and Nantucket Electric's proposed PBR Adjustment and Customer Impact Mitigation Plan, as well as the proposed exogenous storm cost recovery factors, effective October 1, 2023. The DPU also approved recovery of the ongoing incremental property tax as requested pertaining to the years ended March 31, 2021 and March 31, 2022.

Recovery of Transmission Costs

The Company's transmission facilities are currently operated in combination with the transmission facilities of its New England affiliate, NEP, as a single integrated system, with NEP designated as the combined operator. In accordance with the provisions in the Integrated Facilities Agreement "IFA" between NEP and the Company, the Company is compensated for its actual monthly transmission costs, with its authorized maximum ROE of 11.74% on its transmission assets. The amounts remitted by NEP to the Company is included in NEP's Local and Regional Network Service rates for recovery from wholesale transmission customers. The amounts remitted by NEP to the Company for the years ended December 31, 2023 and 2022 were \$20.9 million and \$22.4 million, respectively, which are reflected as credits within operating expenses in the accompanying statements of income.

The ROE for transmission rates under the ISO-NE OATT is the subject of four complaints pending before the FERC. Under orders on the first complaint issued in 2014 and 2015, the FERC reset the base ROE applicable to transmission assets under the ISO-NE OATT to 10.57% effective as of October 16, 2014, and for a 15-month refund period beginning October 1, 2011, and established a maximum ROE of 11.74%. These orders were appealed by NEP and multiple other parties. On April 14, 2017, the U.S. Court of Appeals for the D.C. Circuit ("Court of Appeals") vacated and remanded the FERC's 2014 and 2015 orders lowering the base ROE of NEP and other New England transmission owners ("NETOs"). On October 16, 2018, the FERC initiated a paper hearing process on the ROE issues that were remanded by the Court of Appeals. NEP, along with other NETOs, filed a brief supporting a new ROE methodology and recommending a 10.41% base ROE. The FERC has not issued a final order on NEP's brief, and the base ROE in New England remains at 10.57% subject to adjustments back to the first complaint refund period and other prior periods when the FERC acts on the briefs submitted by NEP and other parties in this paper hearing.

In November 2019, the FERC issued an order in the Midcontinent Independent System Operator ("MISO") transmission owner ROE complaint dockets, changing the way it arrives at a just and reasonable ROE. Base ROEs were reduced from 10.32% to 9.88% when the FERC applied this revised methodology in two MISO ROE complaints. In the MISO order, the FERC made statements that it is setting new ROE policy nationwide. In December 2019, the NETOs filed a supplemental brief in the New England ROE complaint dockets, showing the FERC the detrimental effects on New England if the 2019 MISO order was applied to New England. In that brief, the NETOs asked the FERC to reopen the record in New England so that the NETOs could submit more testimony. Other stakeholders had an opportunity to reply to the NETOs' supplemental brief by January 21, 2020 and did so, arguing that the NETOs' request should be denied, and that the record in New England should not be reopened.

On May 21, 2020, the FERC, on rehearing, revised the methodology to determine MISO transmission owner ROEs. The FERC's November 2019 order proposed to create "zones of reasonableness" based on averages of two (rather than four) models to judge whether ROEs are just and reasonable in complaint cases. The May 2020 order relies on three models to estimate ROEs. The application of this new methodology increased base ROEs in the MISO complaints from 9.88% to 10.02%. On November 19, 2020, the FERC issued a further order on rehearing in the MISO complaint dockets, upholding the 10.02% base ROE. The FERC's MISO ROE orders are currently on appeal before the Court of Appeals. On August 9, 2022, the D.C. Court of Appeals issued its decision, which vacated the MISO transmission owner ROE complaint orders and remanded the matter to the FERC for further proceedings. As grounds for its decision, the D.C. Court of Appeals found that the FERC failed to offer a reasoned explanation for its decision to reintroduce the risk premium model to help calculate ROEs after initially rejecting it. The matter was returned to the FERC on September 30, 2022, but the FERC will not be under any particular deadline to act on the remand. It is likely that this development will also further delay any additional orders in the NETO ROE complaint cases.

On March 17, 2022, the FERC issued an order in a case addressing the base ROE for Pacific Gas and Electric Company ("PG&E"). The FERC applied the ROE methodology from the 2020 MISO ROE orders and found that 9.26% was the just and reasonable base ROE for PG&E in that proceeding. The FERC did not act on requests for a rehearing regarding its March 2022 PG&E order, so these requests for a rehearing were deemed to be denied by operation of law in May 2022. The FERC's orders on PG&E's base ROE are currently on appeal before a federal Court of Appeals but the appellate cases currently are being held in abeyance to allow for FERC to issue a substantive order addressing rehearing requests in the PG&E rate case.

The Company does not believe the outcomes of these complaints will have a material impact on the Company's financial condition, results of operations, or cash flows.

Tax Cuts and Jobs Act

On November 21, 2019, the FERC issued Order 864 to address ratemaking and regulatory reporting of excess or deficient accumulated deferred income taxes ("ADIT") related to the Tax Act. On June 29, 2020, NEP, on behalf of the Company, submitted a compliance filing to address the application of Order 864 in NEP's Tariff No. 1. The filing proposed changes to various revenue requirement calculations in the tariff for the inclusion of the rate adjustment and income tax allowance mechanisms. The filing also included the populated permanent ADIT worksheet, which will be provided with the issuance of final bills pursuant to the provisions of the tariff. NEP has proposed for the Company to amortize transmission-related, protected property-related excess or deficient ADIT associated with the 2017 Tax Act using the average rate assumption method, and a 21-year amortization period for unprotected property-related excess or deficient balances. Other unprotected excess or deficient ADIT is proposed to be amortized over five years, consistent with the time period approved in the DPU docket addressing the Tax Act. Following discussions with FERC staff, NEP made a supplemental compliance filing on the Company's behalf on July 19, 2022, in which it proposed adjustments to the initial filing to add greater clarity and transparency. NEP, on behalf of the Company, submitted a supplement to the amended compliance filing on October 3, 2022, based on further discussions with FERC staff. On October 25, 2022, FERC issued an order accepting the Company's compliance filings related to application of Order 864 in Tariff No. 1.

Grid Modernization Plan

On August 19, 2015, the Company, together with Nantucket Electric, filed its first proposed grid modernization plan ("GMP") with the DPU. On May 10, 2018, the DPU issued an order in this proceeding. The order approved \$82 million in grid-facing investments over three years (and subsequently, the DPU extended the GMP to a fourth year) in (1) conservation voltage reduction and volt/volt-amps reactive optimization; (2) advanced distribution automation; (3) feeder monitors; (4) communications and information/operational technologies; and (5) advanced distribution management/distribution supervisory control and data acquisition. The DPU allowed recovery of both O&M expenses and capital costs through a reconciling mechanism. The DPU did not approve any customer-facing (i.e., advanced metering infrastructure, or "AMI") investments; the DPU said it would address these in a further investigation (which it did in the Company's GMP for calendar years 2022-2025, see below). The Company has filed annual reports and cost recovery filings with the DPU for its GMP in 2019, 2020, 2021, 2022 and 2023.

The Company filed its proposed four-year GMP (for calendar years 2022–2025) on July 1, 2021, which included proposals to continue the previously-approved investments (designated as "Track 1" in the proceeding), invest in a distributed energy resource management system ("DERMS"), conduct two demonstration projects, and deploy AMI (all designated as "Track 2" in the proceeding). The Company requested authorization for \$316.3 million in grid-facing investments over four years, consisting of \$289.3 million for Track 1 investments, \$7.9 million for DERMS investments, \$6.4 million for the two demonstration projects, and \$12.7 million to support the implementation of FERC Order No. 2222. On October 7, 2022, the DPU issued its final order on Track 1, preauthorizing a \$300.8 million budget for the Company's continuing grid-facing investments in (1) monitoring and control (\$4.1 million); (2) volt/volt-amps reactive optimization (\$76.4 million); (3) advanced distribution automation (\$37.7 million); (4) an advanced distribution management system (\$61.0 million); (5) information/operational technology (\$18.8 million); and (6) communications (\$102.8 million) for the 2022–2025 GMP. On November 30, 2022, the DPU issued its Track 2 Order, preauthorizing \$35.4 million in new grid-facing investments for the years 2022-2025 grid modernization plan. Accelerated cost recovery for these investments will continue through the separate grid modernization factor. The DPU also has preauthorized \$391.1 million in spending for our AMI "core" investments for the years 2023-2027, and created a new AMI factor for accelerated cost recovery for these costs. The DPU separated some of the AMI investments into a new category of "supporting" AMI investments and provided preliminary approval for a budget of \$96.1 million for these investments. The Company will seek cost recovery for these supporting investments through annual AMI factor filings.

On April 1, 2022, the Company filed with the DPU its four-year Grid Modernization Term Report, which reports on the Company's implementation of its Grid Modernization Program for calendar years 2018-2021. The DPU also consolidated into this proceeding the Company's annual grid modernization cost recovery filings for calendar years 2018-2021, and is conducting a final review of the costs in this proceeding. Discovery and hearings have concluded and the proceeding is at the briefing stage, with briefing concluding in December 2023, and an order anticipated some time thereafter.

COVID-19 Moratorium on Utility Shut Offs

Between March 24, 2020 and February 26, 2021, the Chairman of the DPU declared a moratorium prohibiting all residential utility collection activities due to the COVID-19 pandemic until July 1, 2021. Effective July 1, 2021, the Company recommenced normal collections activities, which includes issuing notices of amounts in arrears and alerting customers that their service is subject to disconnection for non-payment. Transitional extended deferred payment arrangements were, however, in place through May 2022, and more flexible terms for the arrearage management program (e.g., an increase in arrearages forgiven from \$4,000 to \$12,000) are still in effect. The commercial and industrial moratorium was lifted effective September 1, 2020.

On December 31, 2020, the DPU approved the following implementation items related to the ratemaking treatment of the COVID-19 customer assistance programs on which the Massachusetts local distribution companies and the Massachusetts Attorney General's ("AG") office had reached consensus: (1) the distribution companies should be allowed to record, defer, and track their bad debt and other COVID-related expenses; (2) cost recovery should be limited to the incremental costs incurred; and (3) certain costs must be extraordinary to qualify for recovery. As of December 31, 2023 and March 31, 2023, the Company has deferred \$27.3 million of delivery bad debt (for both the Company and Nantucket Electric) and \$0.8 million of other COVID-related costs, as the Company believes that these amounts are probable of recovery.

The DPU decided that the contested issues, including the extent to which the distribution companies will be allowed to recover their COVID-19 costs, should be fully adjudicated in a new docket, D.P.U. 20-91. The AG opposes recovery by distribution companies with PBR plans (including the Company) of incremental COVID-related O&M expenses. The AG also opposes using the pre-tax overall weighted cost of capital for the calculation of carrying charges on bad debt, arguing that the short-term debt rate, or, in the alternative, an interest rate contemporaneous to two-year U.S. Treasury notes, is the correct rate. The AG also takes the position that the DPU should consider the significance of the distribution companies' net incremental O&M costs due to COVID-19 to determine whether they resulted in substantial harm to the distribution companies' financial position. The briefing phase has concluded, and the DPU's order is pending. The Order will likely be issued after August 2024 when the Distribution Companies submit their final report on bad debt levels through June 30, 2024. The Distribution Companies were required to track delivery-related bad-debt write-offs for two years, from July 1, 2020 through June 30, 2022, and filed a report on August 1, 2022, reporting incremental delivery-related net charge offs. The Companies are required to continue to track bad-debt write-offs for the two-year period of July 1, 2022 through June 30, 2024, with a report to be filed on August 1, 2024, depending on each utility's timing of base distribution rate case filings, and to submit filings to the DPU after that point to commence recovery of the demonstrated incremental amount.

Massachusetts Petition for Waiver of Jurisdiction Regarding the Rhode Island Sale

On May 3, 2021, PPL Energy Holdings, LLC assigned its right to acquire NECO to its wholly owned subsidiary, PPL Rhode Island, such that, upon closing, PPL Rhode Island owned 100% of the outstanding shares of common stock in NECO. The Department approved NGUSA's request for a waiver of G.L. c. 164, § 96(c), regarding the sale of NECO in July 2021. Following that approval there was an appeal process which concluded in May 2022 with a settlement agreement with the Attorney General and on May 25, 2022, NECO was sold to PPL Rhode Island.

On June 24, 2022, the Company submitted its compliance filing per directives in the Department's July 16, 2021, order as well as commitments in the AGO Settlement to issue a one-time bill credit to customers. On July 26, 2022, the Department approved the Company's bill credit proposal and compliance filing. On June 30, 2023, the Company made a filing on the annual report with the AG and DPU in accordance with Section 2.13 of the Settlement. The Company also provided information related to the annual report requirements as part of the Cost Mitigation Report submitted with the rate filing on November 16, 2023. Review of the cost mitigation report by the Department and AG will occur in the context of the rate case.

Storm Threshold Deferral Requests

On June 17, 2022, the Company and Nantucket Electric petitioned the DPU for authorization to defer for future recovery \$6.2 million in storm cost threshold amounts associated with four qualifying major storm events that occurred in calendar year 2021. On January 19, 2023, the Department issued an order allowing the Company to apply deferral accounting treatment to threshold amounts associated with three major storm events, totaling \$4.65 million. The Department disallowed \$1.55 million of threshold costs associated with the October 26, 2021 Wind/Rain event because it would be considered as an exogenous event. The Department will determine the appropriate level of recovery for the excess storm fund threshold amount (if any) in the Company's next base distribution rate case. On June 15, 2023, the Company and Nantucket Electric petitioned the DPU for authorization to defer for future recovery \$6.2 million in storm cost threshold amounts associated with four qualifying major storm events that occurred in calendar year 2022. Briefing concluded on October 24, 2023. On November 13, 2023, the DPU issued an order allowing the Company and Nantucket Electric to apply deferral accounting treatment to the four storm thresholds. The Company has sought recovery of deferred amounts in its current rate case petition. The DPU will determine what if any recovery is appropriate in its September 2024 rate case order.

Storm Cost Recovery

On September 26, 2019, Massachusetts Electric Company and Nantucket Electric submitted a cost recovery filing to the DPU for three storms from in 2017 and 2018 totaling \$102.5 million in incremental O&M costs pursuant to the storm fund. On November 27, 2023, the DPU issued an order approve \$99.7 million in requested costs, disallowing \$2.8 million due to insufficient documentation and unrelated storm costs. On January 11, 2024, the Company made a compliance filing to recalculate costs for storm fund recovery based on the revised capitalization methodology approved in D.P.U. 18-94-A and calculated consistent with D.P.U. 18-153. The total net incremental O&M deferred storm costs will be decreased by \$18.7 million, comprised of \$2.8 million of disallowances, \$16.1 million increase in capital exclusions, and a decrease of \$0.2 million in materials exclusions. Due to the calculation revisions, the originally sought amount \$102.5 million will be reduced to \$83.8 million, which will result in \$2.8 million of disallowances; the net increase to capital and materials exclusions will be recorded as a reclassification from the deferral account to property plant and equipment. The compliance filing was approved on February 12, 2024 without revision.

Municipal Fiscal Year 2022 Property Tax Exogenous Event Request

The Massachusetts Department of Revenue (DOR) has required municipalities to change the way they calculate property taxes, resulting in property tax increases to the Company. On October 18, 2022, the Company filed to be able to recover the costs of this change as an "exogenous event" under its performance-based ratemaking (PBR) plan, along with Nantucket Electric and Boston Gas Company. On May 17, 2023, the DPU approved the Company's request to recover incremental fiscal year 2022 property tax expenses due to certain municipalities changing their assessment methodology after DOR changed its certification standards. The approved amount was \$7.4 million for the Company and Nantucket Electric. The Company

CLEVELAND and BOSTON GAS COMPANY. On May 17, 2023, the DPU approved the Company's request to recover incremental fiscal year 2022 property tax expenses due to certain municipalities changing their assessment methodology after such changes to valuation standards. The approved amount was \$7.4 million for the Company and member electric. The Company was directed to propose a recovery method for the approved amounts in the next PBR filing due on June 15, 2023. After a favorable ruling in a separate case allowing Eversource to recover these type of incremental property taxes, the Company added a request to recover fiscal year 2021 incremental property taxes in the proceeding, but the DPU did not allow this request because it was not part of the initial filing and notice in the proceeding. The Company requested recovery of these fiscal year 2021 amounts and fiscal year 2023 incremental costs in its PBR filing made June 15, 2023. On September 28, 2023, the DPU approved the Company's recovery proposal pertaining to fiscal years 2021 and 2022 incremental property tax expense. Recovery of fiscal year 2023 incremental property tax expense was disallowed, as the annual incremental expense incurred of \$0.6 million did not meet the significance threshold for exogenous recovery under the current PBR provision. The Company sought approval to defer the recovery of \$40.0 million associated with the cumulative annual increase to its property taxes for fiscal years 2021 through 2023 and to recover \$8.0 million each year over a five-year period beginning on October 1, 2024. The DPU approved the Company's proposal, and consistent with the disallowance of the fiscal year 2023 incremental property tax costs above, reduced the amount of recovery to \$38.7 million or \$7.7 million each year. As of December 31, 2023, \$32 million was deferred to regulatory assets which resulted in the reduction of property taxes in current year.

6. UTILITY PLANT AND NONUTILITY PROPERTY

The following table summarizes utility plant and nonutility property at cost and operating leases, along with accumulated depreciation and amortization:

	December 31,	
	2023	2022
	(in thousands of dollars)	
Plant and machinery	\$ 5,634,047	\$ 5,561,779
Goodwill	1,062,533	1,062,533
Land and buildings	249,295	237,082
Assets in construction	316,699	327,861
Operating leases	101,813	98,949
Total utility plant and nonutility property	7,364,387	7,288,204
Accumulated depreciation and amortization	(2,183,349)	(2,207,049)
Operating lease accumulated depreciation	(46,589)	(43,366)
Utility plant and nonutility property, net	\$ 5,134,449	\$ 5,037,789

7. EMPLOYEE BENEFITS

The Company participates with other NGUSA subsidiaries in qualified and non-qualified non-contributory defined benefit pension plans (the "Pension Plans") and PBOP plans (the "PBOP Plans," together with the Pension Plans, the "Plans"), covering substantially all employees. As of April 1, 2021, NGUSA became the sponsoring company of the nonqualified pension arrangements the Company participated in and all assets and liabilities associated with those nonqualified arrangements were transferred to NGUSA. Plan assets are maintained for all of NGUSA and its subsidiaries in commingled trusts. In respect of cost determination, plan assets are allocated to the Company based on its proportionate share of the projected benefit obligations. The Plans' costs are first directly charged to the Company based on the Company's employees that participate in the Plans. Costs associated with affiliated service companies' employees are then allocated as part of the labor burden for work performed on the Company's behalf. The Company applies deferral accounting for pension and PBOP expenses associated with its regulated electric operations. Any differences between actual costs and amounts used to establish rates are deferred and collected from, or refunded to, customers in subsequent periods. Pension and PBOP costs are included within operation expenses in the accompanying statement of income. Portions of the net periodic benefit costs disclosed below have been capitalized as a component of utility plant.

Pension Plans

The Qualified Pension Plans are defined benefit plans which provide most union employees, as well as non-union employees hired before January 1, 2011, with a retirement benefit. Supplemental non-qualified, non-contributory executive retirement programs provide additional defined pension benefits for certain executives. During the years ended December 31, 2023 and 2022, the Company made contributions of approximately \$4.6 million and \$17.6 million, respectively, to the Qualified Pension Plans.

PBOP Plans

The PBOP Plans provide health care and life insurance coverage to eligible retired employees. Eligibility is based on age and length of service requirements, and, in most cases, retirees must contribute to the cost of their coverage. During the years ended December 31, 2023 and 2022, the Company made contributions of \$0.2 million and zero to the PBOP Plans.

Net Periodic Benefit Costs

The Company's total pension costs (benefits) for the years ended December 31, 2023 and 2022 were \$(2.7) million and \$8.3 million, respectively.

The Company's total PBOP benefits for the years ended December 31, 2023 and 2022 were (\$4.3) million and (\$1.2) million, respectively.

Amounts Recognized in Regulatory Assets and Accumulated Other Comprehensive Income

The following tables summarize the Company's changes in actuarial gains/losses and prior service costs recognized in regulatory assets and accumulated other comprehensive income ("AOCI") as of December 31, 2023 and 2022:

	Pension Plans	
	December 31,	
	2023	2022
	(in thousands of dollars)	
	\$ 16,136	\$ (54,746)
	(567)	(7,230)
Amortization of net actuarial losses	(3)	(4)
Amortization of prior service cost, net	\$ 15,566	\$ (61,980)
Total		
Change in regulatory assets	\$ 15,787	\$ (61,890)
Change in AOCI	(221)	(90)
Total	\$ 15,566	\$ (61,980)

	PBOP Plans	
	December 31,	
	2023	2022
	(in thousands of dollars)	
	\$ (2,216)	\$ (41,010)
	2,822	1,369
Amortization of net actuarial losses	\$ 606	\$ (39,641)
Total		
Change in regulatory liabilities	\$ 606	\$ (39,641)

Expected Benefit Payments

Based on current assumptions, the Company expects to make the following benefit payments subsequent to December 31, 2023:

(in thousands of dollars)	Pension Plans		PBOP Plans	
Years Ending December 31,				
2024	\$	39,949	\$	14,259
2025		41,312		14,736
2026		42,632		15,194
2027		43,886		15,673
2028		44,755		16,090
2029-2033		230,102		82,118
Total	\$	442,636	\$	158,070

Assumptions Used for Employee Benefits Accounting

	Pension Plans	
	Years Ended December 31,	
	2023	2022
Benefit obligations:		
Discount rate	4.85 %	3.65%/4.30%
Rate of compensation increase (non-union)	4.30 %	4.30 %
Rate of compensation increase (union)	4.25 %	4.25 %
Weighted average cash balance interest crediting rate	4.40 %	2.75 %
Net periodic benefit costs:		
Discount rate	3.65%/4.30%/4.85%	3.25%/3.65%/4.30%
Rate of compensation increase (non- union)	4.30 %	4.10 %
Rate of compensation increase (union)	4.25 %	4.05 %
Expected return on plan assets	5.25%/5.75%	5.50 %
Weighted average cash balance interest crediting rate	2.75 %	2.75 %
	PBOP Plans	
	Years Ended December 31,	
	2023	2022
Benefit obligations:		
Discount rate	4.85 %	4.30 %
Net periodic benefit costs:		
Discount rate	4.30%/4.85%	3.25%/3.65%/4.30%
Expected return on plan assets	5.00%/5.50%/6.25%/6.75%	5.00%/5.50%/6.00%

The Company selects its discount rate assumption based upon rates of return on highly rated corporate bond yields in the marketplace as of each measurement date. Specifically, the Company uses the Aon AA-Only Bond Universe Curve along with the expected future cash flows from the Company retirement plans to determine the weighted average discount rate assumption.

The expected rate of return for various passive asset classes is based on both analysis of historical rates of return and forward-looking analysis of risk premiums and yields. Current market conditions, such as inflation and interest rates, are evaluated in connection with the setting of the long-term assumptions. A small premium is added for active management of both

equity and fixed income securities. The rates of return for each asset class are then weighted in accordance with the actual asset allocation, resulting in a long-term return on asset rate for each plan.

Assumed Health Cost Trend Rate

	Years Ended December 31,	
	2023	2022
Health care cost trend rate assumed for next year		
Pre-65	6.40%	6.60%
Post-65	4.90%	5.30%
Prescription	7.10%	7.40%
Rate to which the cost trend is assumed to decline (ultimate)	4.50%	4.50%
Year that rate reaches ultimate trend		
Pre-65	2031+	2031+
Post-65	2031+	2031+
Prescription	2031+	2031+

Plan Assets

The Pension Plan is a trustee non-contributory defined benefit plan covering all eligible represented employees of the Company and eligible non-represented employees of the participating National Grid companies. The PBOP Plans are both a contributory and non-contributory, trustee, employee life insurance and medical benefit plan sponsored by NGUSA. Life insurance and medical benefits are provided for eligible retirees, dependents, and surviving spouses of NGUSA.

NGUSA, as the Plans' sponsor, manages the benefit plan investments for the exclusive purpose of providing retirement benefits to participants and beneficiaries and paying plan expenses. The benefit plans' named fiduciary is the Retirement Plans Committee ("RPC"). The RPC seeks to minimize the long-term cost of operating the Plans, with a reasonable level of risk. The investment objectives of the Plans are to maintain a level and form of assets adequate to meet benefit obligations to participants, achieve the expected long-term total return on the Plans' assets within a prudent level of risk, and maintain a level of volatility that is not expected to have a material impact on the Company's expected contributions and expenses or the Company's ability to meet plan obligations.

The RPC has established and reviews at least annually the Investment Policy Statement ("IPS"), which sets forth the guidelines for how plan assets are to be invested. The IPS contains a strategic asset allocation for each plan, which is intended to meet the objectives of the Plans by diversifying their funds across asset classes, investment styles, and fund managers. An asset/liability study is conducted periodically to determine whether the current strategic asset allocation continues to represent the appropriate balance of expected risk and reward for the plan to meet expected liabilities. Each study considers the investment risk of the asset allocation and determines the optimal mix of assets for the plan. The target asset allocation for 2023 reflects the results of such a pension study conducted and implemented in 2023. As a result of that asset liability analysis, the asset mix for several plans was changed. The Union PBOP were changed to further reduce investment risk given increased funded status of the plans. The asset mix for the National Grid Pension Plan was changed to further reduce investment risk given increased funded status of the plans and to better hedge the respective plan liabilities.

Individual fund managers operate under written guidelines provided by the RPC, which cover such areas as investment objectives, performance measurement, permissible investments, investment restrictions, trading and execution, and communication and reporting requirements. National Grid management, in conjunction with a third-party investment advisor, regularly monitors and reviews asset class performance, total fund performance, and compliance with asset allocation guidelines. This information is reported to the RPC at quarterly meetings. The RPC changes fund managers and rebalances the portfolio as appropriate.

Equity investments are broadly diversified across U.S. and non-U.S. stocks, as well as across growth, value, and small and large capitalization stocks. Likewise, the fixed income portfolio is broadly diversified across market segments and is mainly invested in investment-grade securities. Where investments are made in non-investment grade assets, the higher volatility is carefully judged and balanced against the expected higher returns. While the majority of plan assets are invested in equities and fixed income securities, other asset classes are utilized to further diversify the investments. These asset classes include private equity, real estate, and diversified alternatives. The objective of these other investments is enhancing long-term returns while improving portfolio diversification. For the PBOP Plans, since the earnings on a portion of the assets are taxable, those investments are managed to maximize after-tax returns, consistent with the broad asset class parameters established by the asset/liability study. Investment risk and return are reviewed by the plan investment advisors, National Grid management, and the RPC on a regular basis. The assets of the Plans have no significant concentration of risk in one country (other than the United States), industry, or entity.

The target asset allocations for the benefit plans as of December 31, 2023 and 2022 are as follows:

	Pension Plans		Union PBOP Plans		Non-Union PBOP Plans	
	December 31,		December 31,		December 31,	
	2023	2022	2023	2022	2023	2022
Equity	24%	30%	15%	39%	67%	70%
Diversified alternatives	7%	8%	5%	11%	0%	0%
Fixed income securities	60%	50%	80%	50%	33%	30%
Private equity	4%	5%	0%	0%	0%	0%
Real estate	3%	4%	0%	0%	0%	0%
Infrastructure	2%	3%	0%	0%	0%	0%
	100%	100%	100%	100%	100%	100%

Fair Value Measurements

The following tables provide the fair value measurement amounts for the pension and PBOP assets at the Plan level:

December 31, 2023

Pending transactions					3,850
Total net assets					\$ 527,118

The methods used to fair value pension and PBOP assets are described below:

Equity: Equity includes both actively and passively managed assets, with investments in domestic equity index funds as well as international equities.

Diversified alternatives: Diversified alternatives consist of holdings of global tactical asset allocation funds that seek to invest opportunistically in a range of asset classes and sectors globally.

Corporate bonds: Corporate bonds consist of debt issued by various corporations and corporate money market funds. Corporate bonds also include small investments in preferred securities, as these are used in the fixed income portfolios as yield-producing investments. In addition, certain fixed income derivatives are included in this category, such as credit default swaps, to assist in managing credit risk.

Government securities: Government securities include individual U.S. agency securities, U.S. Treasury securities, state and local municipal bonds, as well as a U.S. Treasury exchange-traded fund. The Plans hold a small amount of non-U.S. government debt, which is also captured here. U.S. government money market funds are also included. In addition, interest rate futures and swaps are included in this category as a tool to manage interest rate risk.

Private equity: Private equity consists of limited partnership investments where all the underlying investments are privately held. This primarily consists of buy-out investments, with smaller allocations to venture capital.

Real estate: Real estate consists of limited partnership investments, primarily in U.S. core open-end real estate funds as well as some core-plus closed-end real estate funds.

Infrastructure: Infrastructure consists of limited partnership investments that seek to invest in physical assets that are considered essential for a society to facilitate the orderly operation of its economy. Investments in infrastructure typically include transportation assets (such as airports and toll roads) and utility-type assets. Investments in infrastructure funds are utilized as a diversifier to other asset classes within the pension portfolio. Infrastructure investments are also typically income-producing assets.

Insurance contracts: Insurance contracts consist of trust-owned life insurance.

Pending transactions: These are short-term cash transactions that are expected to settle within a few days of the measurement date.

Defined Contribution Plans

NGUSA has defined contribution retirement plans that cover substantially all employees. For the years ended December 31, 2023 and 2022, the Company recognized an expense in the accompanying statement of income of \$4.8 million and \$4.5 million, respectively, for matching contributions.

8. CAPITALIZATION

Total capitalization for the Company at December 31, 2023 and 2022 is as follows:

			December 31,	
			2023	2022
			<i>(in thousands of dollars)</i>	
	<u>Interest Rate</u>	<u>Maturity Date</u>		
Senior note	1.73%	November 24, 2030	\$ 500,000	\$ 500,000
Senior note	5.90%	November 15, 2039	800,000	800,000
Senior note	4.00%	August 15, 2046	500,000	500,000
			<u>1,800,000</u>	<u>1,800,000</u>
Unamortized debt discount			(1,439)	(1,512)
Total debt (less unamortized debt discount)			<u>\$ 1,798,561</u>	<u>\$ 1,798,488</u>

Unamortized debt issuance costs as of December 31, 2023 and 2022 were \$10.4 million and \$8.8 million, respectively.

The aggregate maturities of long-term debt for the years subsequent to December 31, 2023 are as follows:

<i>(in thousands of dollars)</i>	<u>Maturities of Long-Term Debt</u>
December 31,	
2024	\$ —
2025	—
2026	—
2027	—
2028	—
Thereafter	1,800,000
Total	<u>\$ 1,800,000</u>

The Company's debt agreements and banking facilities contain general covenants, including those relating to the periodic and timely provision of financial information by the issuing entity, and financial covenants, such as restrictions on the level of indebtedness. Failure to comply with these covenants, or to obtain waivers of those requirements, could in some cases

trigger a right, at the lender’s discretion, to require repayment of some of the Company’s debt, and may restrict the Company’s ability to draw upon its facilities or access the capital markets. As of December 31, 2023 and 2022, the Company was in compliance with all such covenants.

Debt Authorizations

The Company has regulatory approval from the FERC to issue up to \$750 million of short-term debt internally or externally that expires on October 14, 2024. The Company had no external short-term debt as of December 31, 2023 and 2022. Refer to the Notes Receivable from and Notes Payable to Associated Companies (“Intercompany Money Pool”) section in Note 13, “Related Party Transactions,” for short-term debt outstanding with associated companies.

On August 31, 2020, the Company received approval from the DPU to issue up to \$1.1 billion of long-term debt in one or more transactions through August 31, 2023. On July 17, 2023, the Company received approval from the DPU to extend the issue up to \$1.1 billion of long-term debt in one or more transactions through August 31, 2024. In November 2020, the Company issued \$500 million of unsecured long-term debt at 1.73% with a maturity date of November 24, 2030. On February 26, 2024, the Company issued \$400 million of unsecured long-term debt at 5.87% with a maturity date of February 26, 2054, resulting in \$200 million of remaining authorization.

Dividend Restrictions

Pursuant to the Company’s preferred stock arrangement, as long as any preferred stock is outstanding, certain restrictions on the payment of common stock dividends would come into effect if the common stock equity was, or by reason of the payment of such dividends became, less than 25% of total capitalization. The Company was in compliance with this covenant, and, accordingly, the Company was not restricted as to the payment of common stock dividends under the foregoing provisions as of December 31, 2023 or 2022.

Cumulative Preferred Stock

The Company has certain issues of non-participating cumulative preferred stock outstanding, which can be redeemed at the option of the Company. There are no mandatory redemption provisions on the Company’s cumulative preferred stock. A summary of cumulative preferred stock is as follows:

Series	Shares Outstanding		Amount		Call Price
	December 31,		December 31,		
	2023	2022	2023	2022	
	(in thousands of dollars, except per share and number of shares data)				
\$100 par value - 4.44% Series	22,585	22,585	\$ 2,259	\$ 2,259	\$ 104.068

The Company did not redeem any preferred stock as of December 31, 2023 or 2022. The annual dividend requirement for cumulative preferred stock was \$0.1 million as of December 31, 2023 and 2022.

9. INCOME TAXES

Components of Income Tax Expense

	Years Ended December 31,	
	2023	2022
	<i>(in thousands of dollars)</i>	
Current tax benefit:		
Federal	\$ (6,268)	\$ (80,363)
State	(4,549)	(7,734)
Total current tax benefit	(10,817)	(88,097)
Deferred tax expense:		
Federal	40,349	94,763
State	22,151	18,035
Total deferred tax expense	62,500	112,798
Amortized investment tax credits ⁽¹⁾	(2,887)	(1,672)
Total deferred tax expense	59,613	111,126
Total income tax expense	\$ 48,796	\$ 23,029

⁽¹⁾ Investment tax credits (“ITC”) are accounted for using the deferral and gross-up method of accounting, and are amortized over the depreciable life of the property giving rise to the credits.

	Years Ended December 31,	
	2023	2022
	<i>(in thousands of dollars)</i>	
Total income taxes in the statement of income:		
Income taxes charged to operations	\$ 43,430	\$ 24,104
Income taxes credited to other income (deductions)	5,366	(1,075)
Total	\$ 48,796	\$ 23,029

Statutory Rate Reconciliation

The Company’s effective tax rates for the years ended December 31, 2023 and 2022 were 23.2% and 18.9%, respectively. The following table presents a reconciliation of income tax expense (benefit) at the federal statutory tax rate of 21.0% to the actual tax expense:

	Years Ended December 31,	
	2023	2022
	<i>(in thousands of dollars)</i>	
Computed tax	\$ 44,106	\$ 25,603
Change in computed taxes resulting from:		
State income tax, net of Federal benefit	13,905	8,136
Amortization of regulatory tax liability-net	(7,591)	(9,489)
Investment tax credits	(2,887)	(1,672)
R&D Credit	(90)	377
Other	1,353	74
Total changes	4,690	(2,574)
Total income tax expense	\$ 48,796	\$ 23,029

The Company is included in the NGNA and subsidiaries consolidated federal income tax return and Massachusetts unitary state income tax return. The Company has joint and several liability for any potential assessments against the consolidated group.

Inflation Reduction Act

On August 16, 2022, President Biden signed into law the Inflation Reduction Act (“IRA”), which may impact how the U.S. taxes certain large corporations. The IRA imposes a 15% corporate alternative minimum tax (“CAMT”) on the “adjusted financial statement income” of certain large corporations for tax years beginning after December 31, 2022. The Company expects to be subject to the new CAMT on its federal income tax return for the tax year ending March 31, 2024.

Deferred Tax Components

Deferred tax components

	December 31,	
	2023	2022
	(in thousands of dollars)	
Deferred tax assets:		
Accumulated provision for uncollectible accounts	\$ 59,645	\$ 58,472
Environmental remediation costs	19,609	19,498
Net operating losses	21,785	—
Regulatory liabilities – other	123,566	116,292
Renewable energy certificate obligations	37,882	44,976
Reserves not currently deducted	19,682	16,959
Other items	42,379	47,253
Total deferred tax assets	324,548	303,450
Deferred tax liabilities:		
Property-related differences	598,292	590,184
Regulatory assets - other	349,218	263,742
Other items - net	10,372	11,615
Total deferred tax liabilities	957,882	865,541
Net deferred income tax liabilities	633,334	562,090
Deferred investment tax credits	29,798	32,214
Deferred income tax liabilities, net	\$ 663,132	\$ 594,304

Net Operating Losses

The amounts and expiration dates of the Company's net operating losses carryforward as of December 31, 2023 are as follows:

	Carryforward Amount	Expiration Period
	(in thousands of dollars)	
Federal	\$ 78,068	Indefinite
Massachusetts	84,105	2044

Status of Income Tax Examinations

The following table indicates the earliest tax year subject to examination for each major jurisdiction:

Jurisdiction	Tax Year
Federal	March 31, 2021
Massachusetts	March 31, 2013

Uncertain Tax Positions

The Company adopted the provisions of FASB guidance which clarifies the accounting for uncertain tax positions as modified by FERC Docket AIO7-2-000. FASB guidance provides that the financial effects of a tax position shall initially be recognized when it is more likely than not, based on the technical merits, that the position will be sustained upon examination, assuming the position will be audited and the taxing authority has full knowledge of all relevant information. FERC docket AIO7-2-000 issues supplementary guidance requiring entities to continue to recognize deferred income taxes for Commission accounting and reporting purposes based on the difference between positions taken in tax returns filed or expected to be filed and amounts reported in the financial statements. As of December 31, 2023 and December 31, 2022, the Company did not have any unrecognized tax benefits on a FERC basis.

The Company recognizes interest related to unrecognized tax benefits, including affiliate interest, if applicable, net, in other interest expenses, and related penalties, if applicable, in other deductions, in the accompanying statement of income. As of December 31, 2023 and 2022, the Company has accrued for interest related to unrecognized tax benefits of \$0.1 million and \$0.1 million, respectively. During the years ended December 31, 2023 and 2022, the Company recorded interest expense of zero and \$0.4 million, respectively. No tax penalties were recognized during the years ended December 31, 2023 and 2022.

It is reasonably possible that other events will occur during the next twelve months that would cause the total amount of unrecognized tax benefits to increase or decrease. However, the Company does not believe any such increases or decreases would be material to its results of operations, financial position, or cash flows.

10. ENVIRONMENTAL MATTERS

The normal ongoing operations and historic activities of the Company are subject to various federal, state, and local environmental laws and regulations. Under federal and state Superfund laws, potential liability for the historic contamination of property may be imposed on responsible parties jointly and severally, without regard to fault, even if the activities were lawful when they occurred.

The United States Environmental Protection Agency ("EPA") and the Massachusetts Department of Environmental Protection ("DEP"), as well as private entities, have alleged that the Company is a potentially responsible party under state or federal law for the remediation of numerous sites. The Company's most significant liabilities relate to former Manufactured Gas Plant ("MGP") facilities, which were formerly owned or operated by the Company. The Company is currently investigating and remediating, as necessary, those MGP sites and certain other properties under agreements with the EPA and DEP. Expenditures incurred for the years ended December 31, 2023 and 2022 were \$7.4 million and \$5.5 million, respectively.

The Company estimated the remaining costs of environmental remediation activities were \$71.2 million and \$70.8 million as of December 31, 2023 and 2022, respectively. These costs are expected to be incurred over approximately 31 years, and these undiscounted amounts have been recorded as estimated liabilities on the balance sheet. However, remediation costs for each site may be materially higher than estimated, depending on changing technologies and regulatory standards, selected end use for each site, and actual environmental conditions encountered. The Company has recovered amounts from certain insurers and potentially responsible parties, and, where appropriate, the Company may seek additional recovery from other insurers and from other potentially responsible parties, but it is uncertain whether, and to what extent, such efforts will be successful.

The DPU has approved a settlement agreement that provides for rate recovery of remediation costs of former MGP sites and certain other hazardous waste sites located in Massachusetts. Under that agreement, qualified costs related to these sites are paid out of a special fund established as a regulatory liability on the balance sheet. Rate-recoverable contributions of approximately \$5.1 million are made, along with interest, lease payments, and any recoveries from insurance carriers and other third parties. Accordingly, as of December 31, 2023 and 2022, the Company has recorded environmental regulatory assets of \$69.3 million and \$68.1 million, respectively, and environmental regulatory liabilities of \$14.9 million and \$16.2 million, respectively. See Note 4, "Regulatory Assets and Liabilities," for additional details.

The Company believes that its ongoing operations, and its approach to addressing conditions at historic sites, are in substantial compliance with all applicable environmental laws. Where the Company has regulatory recovery, it believes that the obligations imposed on it because of environmental laws will not have a material impact on its results of operations or financial position.

11. COMMITMENTS AND CONTINGENCIES

Purchase Commitments

The Company has several contracts for the purchase of electric power. Substantially all of these contracts require power to be delivered before the Company is obligated to make payment.

The Company's commitments under these contracts for the years subsequent to December 31, 2023 are summarized in the table below:

(in thousands of dollars)	Energy Purchases	
December 31,		
2024	\$	490,711
2025		28,344
2026		—
2027		—
2028		—
Thereafter		—
Total	\$	519,055

Not included in the above are committed solar and wind contracts for which the payments are unknown at this time. In addition, any costs incurred by the Company will be recoverable.

Power Purchase Agreements for Renewable Energy Projects

Section 83A

On February 26, 2014, the DPU approved three long-term (20-year) contracts for the purchase of the electricity and renewable energy credits from three separate wind-powered generating facilities. The approval by the DPU allows the Company, along with Nantucket Electric (collectively “the Massachusetts Electric Companies”), to recover the costs incurred under the agreements, including 2.75% remuneration on the annual payments made under the contracts. One of these facilities, Wild Meadows Wind, terminated prior to achieving commercial operation. The remaining facilities, Oakfield Wind and Bingham Wind, consist of a combined total of approximately 332 megawatts (“MWs”) of total nameplate capacity. These remaining projects achieved commercial operation in 2015 and 2016, respectively. The Massachusetts Electric Companies have since purchased 45.9% of the output generated by the individual facilities, which in aggregate represents approximately 152.5 MWs of nameplate capacity.

Three-State Procurement: Section 83A

On June 15, 2018, the DPU approved ten long-term (20-year) contracts for the purchase of the electricity and renewable energy credits from ten separate generating facilities. The Massachusetts Electric Companies will purchase the actual output generated by the individual facilities, which in aggregate represents approximately 91 MWs of nameplate capacity. The Massachusetts Electric Companies entered into agreements after a three-state solicitation for renewable energy generation, pursuant to Section 83A of the Green Communities Act. The approval by the DPU allows the Massachusetts Electric Companies to recover the costs incurred under the agreements, including 2.75% remuneration on the annual payments made under the contracts. As of December 31, 2021, all projects have either become operational or terminated. Of the contracted 91 MWs, approximately 73 MWs are currently operational, and approximately 18 MWs have been terminated.

Clean Energy Procurement: Section 83D

On June 13, 2018, the Massachusetts Electric Companies entered into two separate agreements for the transportation and purchase of electricity and the related environmental attributes from hydroelectric facilities located in the Canadian province of Québec. The two agreements were entered into pursuant to Section 83D of the Green Communities Act. The first agreement is a 20-year power purchase agreement (“PPA”) with H.Q. Energy Services Inc. (“H.Q. Energy”) for the purchase of approximately 498 megawatt-hours of electricity and the related environmental attributes from a portfolio of hydroelectric facilities owned and operated by affiliates of H.Q. Energy. The second agreement is a 20-year transmission service agreement (“TSA”) with NECEC Transmission LLC (“NECEC”). This agreement was assigned to NECEC by Central Maine Power Company, with the consent of the Massachusetts Electric Companies. The TSA provides for the transmission of the electricity supplied by H.Q. Energy on a proposed new transmission line that will run from the United States border to Lewiston, Maine, where it will interconnect with the ISO-NE system. Both the TSA with NECEC and the PPA with H.Q. Energy are contingent on the successful development and construction of the underlying transmission line by NECEC. The anticipated commercial operations date of the transmission line is in August 2024, based on the contractual terms. The DPU approved the Section 83D contracts on June 25, 2019, and the Massachusetts Electric Companies will be able to recover the costs incurred under the agreements, including 2.75% remuneration on the annual payments made. NextEra Energy Resources, LLC filed an appeal of the DPU’s approval of the PPA with H.Q. Energy on July 12, 2019. On September 3, 2020, the Massachusetts Supreme Judicial Court upheld the DPU’s approval. On November 2, 2021, the citizens of Maine passed a referendum which rejected the construction of the NECEC transmission line. NECEC has halted construction at the request of Maine’s Governor while appeals are ongoing. In August 2022, the Maine Supreme Judicial Court ruled that the 2021 ballot initiative is unconstitutional, if NECEC can prove they have completed enough of the project to have earned “vested rights” in continuing with the project. This case was remanded to the Business and Consumer Court; on April 20, 2023, a jury unanimously ruled in favor of Central Maine Power. While this ruling is still subject to appeal, CMP is legally permitted to resume work on the project as of this ruling.

Offshore Wind Energy Procurement: Section 83C Round 1

On July 31, 2018, the Massachusetts Electric Companies entered into two separate 20-year PPAs with Vineyard Wind LLC (“Vineyard Wind”) for the purchase of 46.16% of the electricity and renewable energy credits generated by two offshore wind farms proposed by Vineyard Wind, with each individual wind farm having a capacity of up to 400 MWs. The contracts with Vineyard Wind were entered into pursuant to Section 83C of the Green Communities Act. On April 12, 2019, the DPU approved the contracts, and the Massachusetts Electric Companies will be able to recover the costs incurred under the agreements, including 2.75% remuneration on the annual payments made. Based on the terms of the contracts, the commercial operations date for the first wind farm was initially expected to be in January 2022, with the second wind farm anticipated in May 2022. On October 21, 2021, the DPU approved two amendments to the PPAs for both wind farms, which extend the critical milestone dates by twenty-four months, including the commercial operations dates. On November 7, 2023, Vineyard Wind notified the MA EDCs of their intent to utilize three (3) of the available six month critical milestone extensions in the Facility 1 PPA, and two (2) of the available six month critical milestone extensions in the Facility 2 PPA. As such, the new guaranteed commercial operations dates are July 15, 2025 for the first wind farm and May 31, 2025 for the second wind farm.

Offshore Wind Energy Procurement: Section 83C Round 2

On January 10, 2020, the Massachusetts Electric Companies entered into two separate 20-year PPAs with Mayflower Wind Energy LLC (“Mayflower Wind”) for the purchase of 45.41% of the electricity and renewable energy credits generated by two offshore wind farms proposed by Mayflower Wind, with the first wind farm having a capacity of up to 408 MWs and the second having a capacity of up to 396 MWs. The contracts with Mayflower Wind were entered into pursuant to Section 83C of the Green Communities Act. Based on the terms of the contracts, the commercial operations date for the first wind farm was initially expected to be in September 2025, with the second wind farm anticipated in December 2025. These contracts were filed with the DPU on February 10, 2020. On November 5, 2020, the DPU approved the contracts, and the Massachusetts Electric Companies will be able to recover the costs incurred under the agreements, including 2.75% remuneration on the annual payments made. The AG filed a motion for reconsideration on November 25, 2020, in which the AG asked the DPU for additional information regarding the DPU’s approval of 2.75% remuneration on the annual payments made. The AG’s motion was denied on June 23, 2021. On July 9, 2021, the decision became final and unappealable, and regulatory approval was achieved. On May 25, 2022, the Massachusetts Electric Companies filed an amendment to the PPAs for the DPU’s review and approval. The amendment extends the critical milestone dates by approximately eighteen months, including the commercial operations dates. On December 30, 2022, the DPU issued a stamp approval, approving the proposed amended contract.

Offshore Wind Energy Procurement: Section 83C Round 3

On April 8, 2022, the Massachusetts Electric Companies entered into a 20-year PPA with Commonwealth Wind LLC (“Commonwealth Wind”) for the purchase of 43.87% of the electricity and renewable energy credits generated by a proposed offshore wind farm with a nameplate capacity of 1,232 MWs. On April 15, 2022, the Massachusetts Electric Companies entered into a 20-year PPA with Mayflower Wind for the purchase of 38.003% of the electricity and renewable energy credits generated by a proposed offshore wind farm with a nameplate capacity of 480 MWs. Both PPAs were filed with the DPU for its review and approval on May 25, 2022. These contracts were entered into pursuant to Section 83C of the Green Communities Act. The Commonwealth Wind project has a commercial operations date of November 2027, and the Mayflower Wind project has a commercial operations date of March 2028.

On October 20, 2022, Avangrid, the developer of the Commonwealth Wind project, requested a one-month delay in the DPU’s review of the Commonwealth Wind contract to allow time for Avangrid to renegotiate the contracted electricity price. Avangrid cited the war in Ukraine, inflation, supply chain issues, and rising interest rates as factors in its decision to request what it describes as a modest increase in price. Mayflower Wind supported Avangrid’s motion for a delay and indicated that it wanted to renegotiate its own contracted electricity price. On November 4, 2022, the DPU issued an order rejecting Avangrid’s request for a delay. On November 7, 2022, Mayflower Wind filed a response to the DPU in which it withdrew its support for Avangrid’s motion to delay the proceedings and stated that it intends to move forward with the existing PPAs. On November 14, 2022, Avangrid filed its response to the DPU order, stating that “absent the relief that Commonwealth Wind has previously requested, the Department should not dismiss the [contract review] proceedings.” On December 30, 2022, the DPU issued an order approving both proposed contracts. On January 19, 2023, Commonwealth Wind filed a Petition to Appeal. Also on January 19, 2023, Mayflower Wind filed a motion petitioning for full participant status in the proceeding, and a request for an extension of the appeal period. On March 14, 2023, the DPU issued an order denying both requests.

Offshore Wind Energy Procurement: Termination of Section 83C Round 2 and 3

As noted above, both Commonwealth Wind and SouthCoast Wind (formerly Mayflower Wind) indicated that they were unable to build their projects under their awarded contract prices. After negotiations with the MA EDCs, both counterparties elected to request amendments to their contracts allowing for Termination and Release.

On July 13, 2023, the Massachusetts Electric Companies filed a First Amendment to the Commonwealth Wind Power Purchase Agreement which allows for Termination and Release of the Agreement. The primary terms of the amendment include a termination payment, payable to each distribution company, which will be returned to their customers; Commonwealth Wind is additionally required to file any necessary motions in order to withdraw their appeal of the DPU’s approval of the PPA with the MA Supreme Judicial Court. On August 23, 2023, the DPU issued its Stamp Approval of the Commonwealth Amendment. The contract was terminated as per the Effective Date of October 2, 2023.

On August 29, 2023, the Massachusetts Electric Companies filed Second Amendments to both phases of the SouthCoast Wind Round 2 and 3 Power Purchase Agreements, which allow for Termination and Release of the Agreements. The primary terms of the amendments include termination payments, payable to each distribution company, which will be returned to their customers. On September 29, 2023, the DPU issued its Stamp Approval of the SouthCoast Amendments. The contract was terminated as per the Effective Date of October 23, 2023.

As of November 1, 2023, the Company has received all termination payments, totaling approximately \$49 million. These payments were proposed to be returned customers through distribution rates in a regulatory filing which was submitted on January 16, 2024, and is pending DPU approval.

Legal Matters

The Company is subject to various legal proceedings arising out of the ordinary course of its business. The Company does not consider any of such proceedings to be material, individually or in the aggregate, to its business or likely to result in a material adverse effect on its results of operations, financial position, or cash flows.

Federal and Regulatory Investigations into Allegations of Fraud and Bribery

On June 17, 2021, five former employees of National Grid USA Service Company, Inc. in the downstate New York facilities department were arrested on federal charges alleging fraud and bribery. The five former employees subsequently pleaded guilty to the charges, pursuant to plea agreements. NGUSA was deemed a victim of the crimes. The DPU, the New York Public Service Commission (“NY PSC”), and the Rhode Island Public Utilities Commission have issued requests for information related to the alleged criminal conduct. The DPU has indicated that it will open an investigation into this matter after the conclusion of the NY PSC’s investigation. At this time, it is not possible to predict the outcome of the regulatory investigations. However, the Company does not expect this matter will have a material adverse effect on its results of operations, financial position, or cash flows.

Energy Efficiency Programs Investigations

National Grid is participating in regulatory proceedings regarding certain conduct associated with the energy efficiency programs operated by its affiliates. At this time, it is not possible to predict the outcomes or the amount, if any, of any liabilities that may be incurred in connection with it by National Grid and its affiliates. However, the Company does not expect this matter will have a material adverse effect on its results of operations, financial position or cash flows. The most recent updates were shared by the Company in D.P.U. 22-118 on June 8, 2023.

Financial Guarantees

The Company unconditionally guarantees the full and prompt payment of the principal, premium, if any, and interest on certain tax-exempt bonds issued by the Massachusetts Development Finance Agency in connection with Nantucket Electric’s financing of its first and second underground and submarine cable projects. The Company would be required to make any principal, interest, and premium payments if Nantucket Electric failed to pay. The carrying value of the debt guaranteed is approximately \$51.3 million as of December 31, 2023, and the debt has maturities extending through 2042. This guarantee is absolute and unconditional. As of the date of this report, the Company has not had a claim made against it for this guarantee and has no reason to believe that Nantucket Electric will default on its obligations.

12. LEASES

The Company has various operating leases, primarily related to buildings, land, and fleet vehicles used to support its electric operations, with real estate lease terms ranging between 1 and 31 years.

Operating lease ROU assets are included in utility plant, and operating lease liabilities are included in obligations under capital leases - current and obligations under capital leases - noncurrent on the balance sheet. As of December 31, 2023, the Company does not have any financing leases.

The expense related to operating leases was \$15.5 million and \$14.7 million for the years ended December 31, 2023 and 2022, respectively.

As of December 31, 2023, the Company does not have material rights or obligations under operating leases that have not yet commenced.

The following table presents the components of cash flows arising from lease transactions and other operating lease-related information:

The following table presents the components of cash flows arising from lease transactions and other operating lease related information.

	Years Ended December 31,			
	2023		2022	
	(in thousands of dollars)			
Cash paid for amounts included in lease liabilities				
Operating cash flows from operating leases	\$	15,547	\$	14,736
ROU assets obtained in exchange for new operating lease liabilities		18,645		16,613
Weighted average remaining lease term – operating leases		8 years		26 years
Weighted average discount rate – operating leases		3.6 %		2.7 %

The following table contains the Company's maturity analysis of its operating lease liabilities as of December 31, 2023, showing the undiscounted cash flows on an annual basis reconciled to the undiscounted cash flows of the operating lease liabilities recognized in the comparative balance sheet:

Year Ending December 31,	Operating Leases	
	(in thousands of dollars)	
2024	\$	13,574
2025		11,553
2026		10,117
2027		9,085
2028		7,155
Thereafter		17,942
Total future minimum lease payments		69,426
Less: imputed interest		9,136
Total	\$	60,290
Reported as of December 31, 2023:		
Obligations under capital leases - current	\$	11,670
Obligations under capital leases - noncurrent		48,620
Total	\$	60,290

There are certain leases in which the Company is the lessor. Revenue under such leases was immaterial for the years ended December 31, 2023 and 2022.

13. RELATED PARTY TRANSACTIONS

Accounts Receivable from and Accounts Payable to Associated Companies

NGUSA and its affiliates provide various services to the Company, including executive and administrative, customer services, financial (including accounting, auditing, risk management, tax, and treasury/finance), human resources, information technology, legal, and strategic planning, that are charged between the companies and charged to each company.

The Company records short-term receivables from and payables to certain of its affiliates in the ordinary course of business. The amounts receivable from and payable to its affiliates do not bear interest and are settled through the intercompany money pool. A summary of outstanding accounts receivable from associated companies and accounts payable to associated companies is as follows:

	Accounts Receivable from Associated Companies		Accounts Payable to Associated Companies	
	December 31,		December 31,	
	2023	2022	2023	2022
	(in thousands of dollars)			
Nantucket Electric Company	\$ 387	\$ 252	\$ 961	\$ 726
New England Power Company	6,429	5,996	61,890	80,450
NGUSA	1,912	—	6,938	2,253
NGUSA Service Company	13,293	12,852	96,052	62,285
Other Associated Companies	764	1,093	748	691
Total	\$ 22,785	\$ 20,193	\$ 166,589	\$ 146,405

As discussed in Note 5, "Rate Matters," NEP operates the pooled transmission facilities of the Company, NECO, and NEP as a single integrated system ("NEPOOL") under NEP's Tariff No. 1. These transmission services are regulated by both the ISO-NE and the FERC. NEP charges the ISO-NE for these transmission services. As NEP is the sole operator of the NEPOOL assets, ISO-NE revenues are remitted from NEP to the Company, representing the substantial portion of the accounts receivable due from NEP.

In turn, the ISO-NE charges the Company for Regional Network Service ("RNS"), with some of those charges being associated with the Company-owned transmission assets in the NEPOOL. \$37.5 million and \$47.1 million of the unpaid charges from the ISO-NE to the Company have been presented as a payable to NEP related to these Company-owned transmission assets as of December 31, 2023 and 2022, respectively. Additionally, NEP charges the Company for Local Network Service ("LNS"). The amounts paid to NEP for RNS and LNS for the years ended December 31, 2023 and 2022 were \$505.7 million and \$393.7 million, respectively. These amounts are presented within operation expenses in the accompanying statement of income.

Advances from Associated Companies

The Company has an agreement with NGUSA whereby the Company can borrow up to \$200 million from time to time for working capital needs. The advance is non-interest bearing. As of December 31, 2023 and 2022, the Company had no outstanding advances from associated companies.

Notes Receivable from and Notes Payable to Associated Companies ("Intercompany Money Pool")

The settlement of the Company's various transactions with NGUSA and certain associated companies generally occurs via the intercompany money pool in which it participates. The Company is a participant in the Regulated Money Pool and can both borrow and invest funds. Borrowings from the Regulated Money Pool bear interest in accordance with the terms of the Regulated Money Pool Agreement. As the Company fully participates in the Regulated Money Pool rather than settling intercompany charges with cash, all changes in the intercompany money pool balance are reflected as investing or financing activities in the accompanying statement of cash flows. For the purpose of presentation in the statement of cash flows, it is assumed all amounts settled through the intercompany money pool are constructive cash receipts and payments, and therefore are presented as such.

The Regulated Money Pool is funded by operating funds from participants. NGUSA has the ability to borrow up to \$3.0 billion from National Grid plc for working capital needs, including funding of the Regulated Money Pool, if necessary. The Company had short-term intercompany money pool borrowing of \$207.8 million and investments of \$66.6 million as of December 31, 2023 and 2022, respectively. The average interest rates for the intercompany money pool were 5.1% and 1.9% for the years ended December 31, 2023 and 2022, respectively.

Related Party Reimbursement

In accordance with the Credit and Operating Support Agreement dated March 26, 1996, the Company will reimburse Nantucket Electric an amount equal to the difference between Nantucket Electric's actual net income for the year and the net income necessary for Nantucket Electric to earn its DPU-approved ROE for the year, which is currently 9.6%. This reimbursement represents additional revenue to Nantucket Electric and expense to the Company. If Nantucket Electric's actual ROE for the year exceeds its allowed ROE, there is no reimbursement. For the years ended December 31, 2023 and 2022, the Company reimbursed Nantucket Electric \$7.9 million and \$8.3 million, respectively.

Service Company Charges

The affiliated service companies of NGUSA provide certain services to the Company at cost, without a mark-up. The service company costs are generally allocated to associated companies through a tiered approach. First and foremost, costs are directly charged to the benefited company whenever practicable. Secondly, in cases where direct charging cannot be readily determined, costs are allocated using cost/causation principles linked to the relationship of that type of service, such as number of employees, number of customers/meters, capital expenditures, value of property owned, and total transmission and distribution expenditures. Lastly, all other costs are allocated based on a general allocator determined using a 3-point formula based on net margin, net utility plant, and operation and maintenance expenses.

Charges from the service companies of NGUSA to the Company are mostly related to traditional administrative support functions. For the years ended December 31, 2023 and 2022, costs allocated to the Company using the second and third tiers noted above were \$498.2 million and \$416.8 million, respectively.

---	---	-------------------------------	---

ELECTRIC PLANT IN SERVICE (Account 101, 102, 103 and 106)

1. Report below the original cost of electric plant in service according to the prescribed accounts.
2. In addition to Account 101, Electric Plant in Service (Classified), this page and the next include Account 102, Electric Plant Purchased or Sold; Account 103, Experimental Electric Plant Unclassified; and Account 106, Completed Construction Not Classified-Electric.
3. Include in column (c) or (d), as appropriate, corrections of additions and retirements for the current or preceding year.
4. For revisions to the amount of initial asset retirement costs capitalized, included by primary plant account, increases in column (c) additions and reductions in column (e) adjustments.
5. Enclose in parentheses credit adjustments of plant accounts to indicate the negative effect of such accounts.
6. Classify Account 106 according to prescribed accounts, on an estimated basis if necessary, and include the entries in column (c). Also to be included in column (c) are entries for reversals of tentative distributions of the prior year reported in column (b). Likewise, if the respondent has a significant amount of plant retirements which have not been classified to primary accounts at the end of the year, include in column (d) a tentative distribution of such retirements, on an estimated basis, with appropriate contra entry to the account for accumulated depreciation provision. Include also in column (d) distributions of these tentative classifications in columns (c) and (d), including the reversals of the prior years tentative account distributions of these amounts. Careful observance of the above instructions and the texts of Accounts 101 and 106 will avoid serious omissions of the reported amount of respondent's plant actually in service at end of year.
7. Show in column (f) reclassifications or transfers within utility plant accounts. Include also in column (f) the additions or reductions of primary account classifications arising from distribution of amounts initially recorded in Account 102, include in column (e) the amounts with respect to accumulated provision for depreciation, acquisition adjustments, etc., and show in column (f) only the offset to the debits or credits distributed in column (f) to primary account classifications.
8. For Account 399, state the nature and use of plant included in this account and if substantial in amount submit a supplementary statement showing subaccount classification of such plant conforming to the requirement of these pages.
9. For each amount comprising the reported balance and changes in Account 102, state the property purchased or sold, name of vendor or purchase, and date of transaction. If proposed journal entries have been filed with the Commission as required by the Uniform System of Accounts, give also date.

FOOTNOTE DATA			

(a) Concept: ElectricPlantInService

On page 204, line 94, column (g), the Total Electric Plant in Service figure of \$6,195,186,554 excludes \$114,314,890 of operating lease right-of-use assets. For the purposes of this page, if the the right-of-use assets were included, this would result in a figure of \$6,309,501,444.

ACCUMULATED PROVISION FOR DEPRECIATION OF ELECTRIC UTILITY PLANT (Account 108)					
1. Explain in a footnote any important adjustments during year. 2. Explain in a footnote any difference between the amount for book cost of plant retired, Line 12, column (c), and that reported for electric plant in service, page 204, column (d), excluding retirements of non-depreciable property. 3. The provisions of Account 108 in the Uniform System of Accounts require that retirements of depreciable plant be recorded when such plant is removed from service. If the respondent has a significant amount of plant retired at year end which has not been recorded and/or classified to the various reserve functional classifications, make preliminary closing entries to tentatively functionalize the book cost of the plant retired. In addition, include all costs included in retirement work in progress at year end in the appropriate functional classifications. 4. Show separately interest credits under a sinking fund or similar method of depreciation accounting.

INVESTMENTS IN SUBSIDIARY COMPANIES (Account 123.1)

1. Report below investments in Account 123.1, Investments in Subsidiary Companies.
2. Provide a subheading for each company and list thereunder the information called for below. Sub-TOTAL by company and give a TOTAL in columns (e), (f), (g) and (h). (a) Investment in Securities - List and describe each security owned. For bonds give also principal amount, date of issue, maturity, and interest rate. (b) Investment Advances - Report separately the amounts of loans or investment advances which are subject to repayment, but which are not subject to current settlement. With respect to each advance show whether the advance is a note or open account. List each note giving date of issuance, maturity date, and specifying whether note is a renewal.
3. Report separately the equity in undistributed subsidiary earnings since acquisition. The TOTAL in column (e) should equal the amount entered for Account 418.1.
4. For any securities, notes, or accounts that were pledged designate such securities, notes, or accounts in a footnote, and state the name of pledgee and purpose of the pledge.
5. If Commission approval was required for any advance made or security acquired, designate such fact in a footnote and give name of Commission, date of authorization, and case or docket number.
6. Report column (f) interest and dividend revenues from investments, including such revenues from securities disposed of during the year.
7. In column (h) report for each investment disposed of during the year, the gain or loss represented by the difference between cost of the investment (or the other amount at which carried in the books of account if different from cost) and the selling price thereof, not including interest adjustment includible in column (f).
8. Report on Line 42, column (a) the TOTAL cost of Account 123.1.

FOOTNOTE DATA			

(a) Concept: DescriptionAndPurposeOfOtherRegulatoryAssets
Massachusetts state tax rate change.
(b) Concept: DescriptionAndPurposeOfOtherRegulatoryAssets
Includes amounts pertaining to the Company's Allowance for Funds Used During Construction, which are being amortized over the life of the book assets, as well as other items, as agreed with regulators for electric operations.
(c) Concept: DescriptionAndPurposeOfOtherRegulatoryAssets
In September 2006, the Financial Accounting Standards Board ("FASB") issued FAS 158, which required employers to recognize the overfunded or underfunded status of a defined benefit postretirement plan (other than a multiemployer plan) as an asset or liability in its statement of financial position and to recognize changes in that funded status in the year in which the changes occur through comprehensive income. However, because the Company has specific regulatory recovery of its pension and other post-employment benefit ("OPEB") costs, the establishment of a regulatory asset to defer charges to other comprehensive income ("OCI") that would otherwise result from the adoption of FAS 158 is appropriate.
Pursuant to the DPU's ruling in D.P.U. 09-39, the Company is allowed to recover actual, non-capitalized pension and postretirement benefit other than pension ("PBOP") expenses outside of base rates through a separate billing factor referred to as the Pension and PBOP Adjustment Factor. A return on the average annual prepaid or unfunded pension and PBOP balance at the weighted average cost of capital will be recorded. Over or under recovery of annual costs is surcharged or credited to customers over a three-year period.
(d) Concept: DescriptionAndPurposeOfOtherRegulatoryAssets
Pursuant to the DPU's ruling in D.P.U. 09-39, the Company is allowed to recover actual, non-capitalized pension and PBOP expenses outside of base rates through a separate billing factor referred to as the Pension and PBOP Adjustment Factor. A return on the average annual prepaid or unfunded pension and PBOP balance at the weighted average cost of capital will be recorded. Over or under recovery of annual costs is surcharged or credited to customers over a three-year period.
(e) Concept: DescriptionAndPurposeOfOtherRegulatoryAssets
Pursuant to the settlement in D.P.U. 93-194, the Company established a fund for hazardous waste clean up and liabilities. The fund pays for environmental response costs paid after June 30, 1993, but does not include costs or expenses related to properties acquired after the date the settlement was approved by the DPU. The settlement defines environmental response costs as reasonable and prudently incurred costs or expenses (excluding all fines or penalties) associated with the investigation, testing, remediation, or other liabilities attributable to the Company relating to gas manufacturing facility or disposal sites, or sites to which material may have migrated or at which manufactured gas waste may have been deposited as a result of the earlier operation or decommissioning of gas manufacturing facilities in Massachusetts, material regulated under the Comprehensive Environmental Response, Compensation, and Liability Act, Resource Conservation and Recovery Act, Massachusetts General Laws Chapters 21C and 21E, and any other laws, regulations, or orders by courts or governmental authorities, or resulting from claims or contentions arising in tort, breach of contract, or violation of law, including sites unrelated to Massachusetts gas manufacturing facilities deposited before 1980 on sites or migrating to sites as a result of the operations of the Company or its predecessor companies, and the costs and expenses associated with the purchase of property acquired as part of an overall mitigation and response plan associated with the sites described above.
(f) Concept: DescriptionAndPurposeOfOtherRegulatoryAssets
The balance consists of deferred charges for qualifying storm events occurring on or after October 1st, 2019. Per the Company's most recent base rate filing (MA D.P.U. 18-150), qualifying storm events are storms with restoration costs in excess of \$1.55 million, and the carrying charges are to be accrued on the average balance of deferred storm costs at the prime rate. For incremental costs in excess of the \$1.55 million threshold, the Company is allowed recovery through its Storm Fund, which was continued per its most recent base rate filing.
Per DPU Order 21-75, as of December 31, 2021, the Company is allowed to defer the storm fund costs associated with the \$1.55 million per storm threshold for nine 2020 storm fund-eligible events, or a total deferral of \$13.95 million. The Company calculated its \$13.95 million deferral request as follows: (1) from the 14 storm fund-eligible events that occurred in calendar year 2020, the Company subtracted the four representative level of storms approved for recovery of the threshold amount in base rates to arrive at a difference of ten storm events; (2) the Company then subtracted one storm event to account for variation in the representative level of storms to determine the number of storms (i.e. nine storm events) for which it seeks to defer threshold costs; and (3) the Company then multiplied the nine storms by the Company's \$1.55 million per storm threshold to derive the \$13.95 million deferral amount.
Similarly, the Company is allowed to defer the storm costs associated with the \$1.55 million per storm threshold for three 2021 and four 2022 storm fund-eligible events, or a total deferral of \$4.65 million and \$6.2 million respectively.
(g) Concept: DescriptionAndPurposeOfOtherRegulatoryAssets
Pursuant to D.P.U. 08-27, the Company is allowed to recover the cost of retiring an asset through base rates. Assets to be retired are deferred, and the deferred balance is reduced as the cost is recovered from customers.
(h) Concept: DescriptionAndPurposeOfOtherRegulatoryAssets
Per the Company's most recent base rate case (MA D.P.U. 18-150), the Company is allowed to defer its incurred rate case expense of \$2,790,731 and amortize it over a period of 5 years beginning October 2019.
(i) Concept: DescriptionAndPurposeOfOtherRegulatoryAssets
Pursuant to Massachusetts law and the DPU's order in D.P.U. 11-129, the Company is allowed to recover the following categories of smart grid pilot program-related costs: (1) capital costs for the installation of metering and communication technologies, software, and hardware at the Company's weighted average cost of capital; (2) capital costs associated with the installation of distribution grid technologies; and (3) incremental costs for expenses related to the operations, maintenance, customer education, and evaluation of the smart grid pilot. These costs are fully reconcilable, and any difference between costs and revenue will be reflected in the following year's recovery.
(j) Concept: DescriptionAndPurposeOfOtherRegulatoryAssets
The Company arranges transmission service on behalf of its customers. Pursuant to the Company's Transmission Service Cost Adjustment Provision, the Company is allowed to recover the cost it incurs in arranging that transmission service, as billed to the Company by its affiliate, NEP, any other transmission provider, the New England Power Pool, a regional transmission group, an independent system operator, or any other entity that is authorized to bill the Company directly for transmission services. Transmission service costs are fully reconcilable, and any over or under recoveries are passed on to customers receiving transmission service through the Company.
(k) Concept: DescriptionAndPurposeOfOtherRegulatoryAssets
Pursuant to the Company's Basic Service Adjustment Provision, the Company is allowed to recover costs associated with acquiring renewable energy certificates or remitting alternate compliance payments to comply with the renewable portfolio standards established in Massachusetts General Laws, Chapter 25A, §11F and the Department of Energy Resource's regulations codified in 225 C.M.R. 14.00 – 16.00 et seq.
(l) Concept: DescriptionAndPurposeOfOtherRegulatoryAssets
Pursuant to MA D.P.U. 07-50A and the Company's Revenue Decoupling Mechanism ("RDM") Provision, the Company is operating under an RDM by which its actual distribution revenue is measured against a target level of distribution revenue as established in the Company's most recent rate case, and the difference between actual distribution revenue and the revenue target is recovered from or credited to all customers. "Actual Billed Distribution Revenue" shall mean the amounts the Company has billed during the applicable calendar year for customer charges, distribution demand charges, distribution energy charges, Second Feeder Service charges, and any other charges or discounts that the Company records as base distribution revenue, but excluding the discount provided to Rate R-2 customers and the Residential Assistance Adjustment. Actual Billed Distribution Revenue shall exclude the RDM Adjustment Factor, as it is subject to its own reconciliation. "Annual Target Revenue" or "ATR" shall mean the class-specific revenue requirement as approved by the Department in the Company's most recent base distribution rate case adjusted annually pursuant to the Company's Performance-Based Ratemaking ("PBR") Provision, M.D.P.U. No. 1423, as may be amended from time to time, and as otherwise adjusted and approved by the Department, less a Streetlighting Sales adjustment pursuant to the Department's directive in D.P.U. 14-136-A.
(m) Concept: DescriptionAndPurposeOfOtherRegulatoryAssets
Pursuant to Massachusetts Laws c. 12, section 11E(b) and base rate case D.P.U. 09-39, the Company is allowed to recover the costs incurred by the Office of the Attorney General of Massachusetts for experts or consultants that have been engaged by the Attorney General in support of various proceedings before the Department, the use of which has been approved by the Department and billed to the Company.
(n) Concept: DescriptionAndPurposeOfOtherRegulatoryAssets

Pursuant to Massachusetts law and the Company's Energy Efficiency Provision, the Company administers an Energy Efficiency ("EE") plan and is allowed to recover the cost of that plan through a combination of a statutory EE charge per kWh plus (1) amounts generated by the Forward Capacity Market program administered by the Independent System Operator-New England; (2) cap and trade pollution control programs, including, but not limited to, not less than 80 percent of amounts generated by the carbon dioxide allowance trading mechanism established under the Regional Greenhouse Gas Initiative Memorandum of Understanding, and the NOx Allowance Trading Program; and (3) other funding as approved by the Department. The Company's annual Energy Efficiency Reconciling Factors ("EERFs") are designed to collect the estimated incremental costs of the Company's proposed EE programs for the year, which represents those costs that are in excess of the previously-mentioned expected funding. EE costs, including an allowance for performance-based shareholder incentives, are fully reconcilable, and any over or under recovery of costs is passed on to all customers.
(o) Concept: DescriptionAndPurposeOfOtherRegulatoryAssets
Pursuant to the Company's Basic Service Adjustment Provision, the Company is allowed to recover the costs, including administrative costs, incurred by the Company in arranging Basic Service, including uncollectible costs associated with the amounts the Company bills for Basic Service supply, the administrative costs of complying with the requirements of Renewable Energy Portfolio Standards pursuant to 225 CMR14, cash working capital and other administrative costs associated with arranging basic service. The recovery of these costs is fully reconcilable, with any over or under collection passed on to all customers.
(p) Concept: DescriptionAndPurposeOfOtherRegulatoryAssets
Per the Company's most recent base rate case, DPU 18-150, the company transferred the Storm Fund deficit balance as of September 30, 2019 to a separate regulatory asset account. Additionally the MA DPU ordered the company to continue its Storm Fund Replenishment Factor (SFRF) (first approved in DPU 13-59) and to apply recoveries through the SFRF to the Storm Fund deficit balance. As part of DPU 18-150 the MA DPU approved the continuation of the SFRF through August 2023 and set the annual recovery at \$16 million.
(q) Concept: DescriptionAndPurposeOfOtherRegulatoryAssets
Pursuant to Massachusetts law and the Company's Transition Cost Adjustment Provision, the Company is authorized to recover costs charged by the Company's affiliate, New England Power Company ("NEP"), for stranded costs associated with NEP's former electric generation investments. The transition charge is fully reconcilable, and any over or under recovery of costs is passed on to customers.
(r) Concept: DescriptionAndPurposeOfOtherRegulatoryAssets
Per the D.P.U Docket 18-150, the Company will defer and amortize over 5 years leading up to the next rate case EHR1 operating expenses incurred during the test year in addition to the remaining amounts from D.P.U 15-155, all totaling \$1.5 million.
(s) Concept: DescriptionAndPurposeOfOtherRegulatoryAssets
Per the D.P.U Docket 18-150, the Company will defer and amortize over 5 years leading up to the next rate case EHR1 operating expenses incurred during the test year in addition to the remaining amounts from D.P.U 15-155, all totaling \$1.5 million.
(t) Concept: DescriptionAndPurposeOfOtherRegulatoryAssets
Under the Company's Service Quality Plan, it may be penalized for performance in certain categories that fall below any historic average. Any penalties are credited to customers in a manner directed by the DPU. Service Quality penalty credit factors were implemented to refund customers for poor service. Any residual balance remaining after application of the credit shall be charged or credited to customers through the Company's Revenue Decoupling Mechanism Reconciliation. In the event that the Department's decision to impose the penalty is reversed or modified as the result of an appeal, the Company shall recover the amount of the reduction in such manner as proposed by the Company and approved by the Department.
(u) Concept: DescriptionAndPurposeOfOtherRegulatoryAssets
Per M.D.P.U. No. 1331, the purpose of the Net Metering Recovery Surcharge ("NMRS") is to recover the Net Metering Credits applied to customers and the non-reconciling distribution portion of revenue displaced by customers who have installed on-site generation facilities in accordance with G.L. c. 164, §§ 138 and 139. This surcharge provides the Company with a mechanism to recover such Credits and displaced revenue, and to reconcile actual NMRS revenue amounts recovered from customers with actual recoverable amounts.
(v) Concept: DescriptionAndPurposeOfOtherRegulatoryAssets
Per the Company's prior base rate case, MA D.P.U. 15-155, the Farm Discount recovery mechanism is intended to recover revenues lost as a result of a discount given to agriculture customers. The lost revenues are to be deferred and recovered as an amortization in the next base rate case.
(w) Concept: DescriptionAndPurposeOfOtherRegulatoryAssets
Per the most recent rate case, D.P.U. 18-150, the Department allowed the Company to recover \$51,422,726 from hardship-protected accounts. The amount is to be recovered over five years at \$10,284,545 annually. Accounts included in the balance are to be tracked and excluded from normal bad debt expense and any subsequent payments made by customers towards this balance are to be credited through the Residential Assistance Adjustment Factor (Department of Public Utilities' orders in D.T.E. 01-106-C, D.T.E. 05-86, and D.P.U 08-4).
The Hardship A/R current account represents hardship-protected accounts incurred after those allowed per the prior rate case, D.P.U. 15-155, and the most recent rate case, D.P.U. 18-150. The balance consists of total outstanding hardship-protected accounts greater than 360 days past due, less those balances being recovered per D.P.U. 18-150. The Company will seek recovery of these amounts in its next rate case in a similar fashion to hardship recoveries already allowed.
(x) Concept: DescriptionAndPurposeOfOtherRegulatoryAssets
The Company is allowed recovery of the incremental costs associated with the operation of the Company's Arrearage Management Program ("AMP") offered to qualifying customers pursuant to Docket Nos. D.T.E. 05-86, D.T.E.01-106-C, and D.P.U. 08-4, and the discount provided to customers receiving retail delivery service under Residential Low Income Rate R-2 ("Rate R-2"). Discounts provided to eligible customers are based on 25% of the customers' total bill for service, including charges for generation service, representing the level of discount received by these customers prior to March 1, 1998, pursuant to Massachusetts General Laws Chapter 164, § 1F.
Pursuant to the Company's prior base rate case, D.P.U. 15-155, the Company modified its Residential Assistance Adjustment Provision to include credits from subsequent payments or charge-offs of accounts receivable on the balances that the Company has amortized from the hardship arrears June 30, 2015 test year balances included in base rates (Exh. NG-RRP-1 at 52, D.P.U. 10-70 at 221). These credits ensure the Company is not recovering these balances twice; once through bases rates, and again through the subsequent cash received or balance charged off.
(y) Concept: DescriptionAndPurposeOfOtherRegulatoryAssets
The Company's Grid Modernization Plan was approved in DPU 15-120 on August 19, 2015. The Grid Mod program was pursuant to the Department's grid modernization orders, D.P.U. 12-76-B (2014) and D.P.U. 12-76-C (2014) to adopted a vision of a cleaner, more efficient and reliable electric grid, which would empower customers to manage and reduce their energy costs.
To kick start this project, the Department rolled out the Grid Modernization Plan, with a three-year pre-authorization of grid-facing investments for participating companies. These grid-facing investments will be meeting the grid modernization objectives by reducing outages and optimizing distribution system performance, optimizing system demand, and integrating distributed energy resources. The Company's Grid Modernization Plan was approved through D.P.U. 15-120. The Department preauthorizes a budget for each participating company in connection with investments in grid-facing technologies over three years (CY 2018, 2019, and 2020). This preauthorized budget acts as a spending cap. The Department determined that the companies could recover grid modernization capital investments only if they were prudently incurred, in service, and used and useful to ratepayers (D.P.U. 12-76-B at 24). The companies will implement a reconciling mechanism to concurrently recover capital expenditures and related incremental O&M costs. The O&M costs shall exclude pension and other post-retirement benefit costs. The Department will conduct a cumulative review of all grid modernization expenditures at the end of a three-year term. Capital investments will be eligible for inclusion in base rates after the Department has approved final cost recovery in a grid modernization proceeding at the end of a three-year term. The companies participating in this program are permitted to earn an authorized rate of return. The weighted average cost of capital approved in the Company's most recent distribution rate case is the appropriate return to be applied in calculating the Grid Mod Factors revenue requirement.
(z) Concept: DescriptionAndPurposeOfOtherRegulatoryAssets
Per the company's Advanced Metering Infrastructure Provision (AMI) M.D.P.U. No 1501 the company is allowed to recover incremental costs associated with the Company's implementation and deployment of AMI. Recovery of Eligible AMI Investment is limited to investments made over a five-year term during calendar years 2023 through 2027.
The Company's rates for retail Delivery Service are subject to adjustment to reflect the operation of this AMI tariff. The AMI Factor ("AMIF"), as defined herein, shall be applied to all retail delivery service kilowatt-hours ("kWhs") as determined in accordance with the provisions of Section 3.0 below. The AMIF shall be determined annually by the Company, subject to the Department's review and approval. The operation of this AMI tariff is subject to Chapter 164 of the General Laws.
(aa) Concept: DescriptionAndPurposeOfOtherRegulatoryAssets
The electric vehicle ("EV") programs collectively include Company facilitation of electric vehicle service equipment ("EVSE," also referred to as EV charging station) installations, a Marketing and Communications ("M&C") Plan, an Evaluation Plan, a Research and Development ("R&D") Plan associated with the Phase I EV Program, a residential Off-Peak Charging Rebate Program, a Fleet Advisory Services Plan, and an R&D Plan associated with the Phase II EV Program. The recovery of costs associated with the Company's (1) Electric Vehicle Market Development Program was approved in D.P.U. 17-13 ("Phase I EV Program") and (2) Phase II Electric Vehicle Program was approved in D.P.U. 18-150 ("Phase II EV Program") (together, "the EV Programs").
The Company's rates for Retail Delivery Service are subject to EV Program Factors ("EVPFs") designed to recover incremental costs associated with the implementation and operation of the EV Programs. Incremental capital costs shall include those costs approved by the Department whose primary purpose is to accelerate progress in achieving the objectives of the EV Programs. Incremental operation and maintenance ("O&M") costs shall include those costs approved by the Department that are demonstrated to be: (1) incremental to the representative level of O&M expenses recovered through base distribution rates and (2) solely attributable to preauthorized EV Program expenses.

(ab) Concept: DescriptionAndPurposeOfOtherRegulatoryAssets
As per M.D.P.U. No. 1343 and D.P.U. 17-92, the Company's Vegetation Management Pilot ("VMP") Provision provides for the recovery of incremental costs associated with the Company's Enhanced Vegetation Management Pilot ("VM Pilot"). The Company's VMP Provision includes the recovery of incremental allowed O&M expense incurred as a result of implementing the VM Pilot, and such recovery shall continue through this VMP Provision until such time as the Department may approve recovery of allowed O&M expense through base distribution rates.
The VM Pilot shall have a term of four years, commencing April 1, 2019 through March 31, 2023 ("VM Pilot Term"), unless the Department authorizes an extension of the term. Allowed O&M expense eligible for recovery consists of VM Pilot expenses incurred during the VM Pilot Term and condition assessment costs incurred prior to the VM Pilot Term. The Company shall file for recovery of calendar year allowed O&M expense, commencing with calendar year 2018 through calendar year 2023.
The Company's rates for Retail Delivery Service are subject to adjustment to reflect the operation of this VMP Provision. The Vegetation Management Factor ("VMF") and the Vegetation Management Reconciliation Factor ("VMRF") shall be applied to all retail delivery service customers through a per-kilowatt-hour ("kWh") charge, as determined in accordance with the provisions of Section 3.0. The VMF and VMRF shall be determined annually by the Company, subject to the Department's review and approval. The operation of this VMP Provision is subject to Chapter 164 of the General Laws.
(ac) Concept: DescriptionAndPurposeOfOtherRegulatoryAssets
As approved by the Department in D.P.U. 20-58-C, the Company is allowed to defer for future recovery the credits associated with COVID-19 related to its small commercial and industrial arrearage management and forgiveness program ("AFP"). The AFP is intended to encourage small commercial customers to enroll and successfully complete a payment plan. The goal of the AFP is to enhance assistance through economic relief that would reduce the accrued arrearage of the Company's small commercial customers that have gone into arrears during the COVID-19 state-of-emergency.
(ad) Concept: DescriptionAndPurposeOfOtherRegulatoryAssets
Per DPU Orders 20-58 and 20-91, the Company is allowed to defer the delivery-related uncollectible expense due to COVID-19. The amounts recorded for expense in excess of the baseline amount will be deferred as the proxy for future recovery. The baseline amount is the higher of the amount included in base distribution rates or the three-year average of the delivery-related net charge-offs for the years 2017, 2018, and 2019. The Company has been tracking bad-debt write-offs as of July 1, 2020, and will continue tracking them for two years, with a report to be submitted by August 1, 2022. This report will detail actual net charge-offs for the 24-month period in excess of the computed baseline, which is the amount that would be eligible for recovery.
(ae) Concept: DescriptionAndPurposeOfOtherRegulatoryAssets
The operation of the SMART Provision is pursuant to the Solar Massachusetts Renewable Target ("SMART") Program regulations in 225 CMR 20.00, promulgated pursuant to Chapter 75 of the Acts of 2016, as applicable to Solar Tariff Generation Units that have received a Statement of Qualification from the Massachusetts Department of Energy Resources. The SMART Provision provides for: (1) Incentive Payments for RPS Class I Renewable Generation Attributes and/or Environmental Attributes produced by a Solar Tariff Generation Unit; (2) Alternative On-Bill Credits for energy generated by an Alternative On-Bill Credit Generation Unit; (3) the basis upon which Incentive Payments and Alternative On-Bill Credits are determined; and (4) the recovery of any such Incentive Payments, Alternative On-Bill Credits, and incremental administrative costs associated with the implementation and operation of the SMART Program.
(af) Concept: DescriptionAndPurposeOfOtherRegulatoryAssets
Per the company's Renewable Energy Recovery Provision (RERP) M.D.P.U. No. 1304 the company is allowed to recover costs related to renewable energy contracts entered into by the company pursuant to section 83 and 83A "An Act Relative to Green Communities" (GCA). The Renewable energy recovery is calculated as (1) the difference between revenues received from sales of energy from the energy contracts and costs of procuring and selling the energy, (2) the difference between revenues received for Renewable Energy Certificates (RECs) procured under these energy contracts at the market price used to meet the Company's Renewable Portfolio Standards (RPS) and the cost of those RECs, (3) The remuneration paid to the Company associated with the procurement of renewable energy contracts, (4) the costs of legal fees associated with 83(c) and 83(d) contract costs, and (5) the reconciliation of the prior year's balance.
(ag) Concept: DescriptionAndPurposeOfOtherRegulatoryAssets
The purpose of this account should be used to track the recovery of costs directly related to the implementation and administration of the Company's Fee Free Credit and Debit Card Payment Option approved by the Department in D.P.U. 20-91.
(ah) Concept: DescriptionAndPurposeOfOtherRegulatoryAssets
Pursuant to the Company's exogenous cost provision under the performance-based ratemaking ("PBR") tariff, the Company is allowed to recover incremental costs associated with property tax expense incurred resulting from DOR's policy change in property tax valuation methodology.
(ai) Concept: DescriptionAndPurposeOfOtherRegulatoryAssets
Pursuant to the Company's exogenous cost provision under the performance-based ratemaking ("PBR") tariff, the Company is allowed to recover incremental costs associated with property tax expense incurred resulting from DOR's policy change in property tax valuation methodology.
This account records the cumulative annual increase to the Company's property taxes, comparing to amounts in base rates, for municipalities that adopted the hybrid method in FY2021 and 2022, as approved per the latest PBR filing DPU 23-55.
(aj) Concept: DescriptionAndPurposeOfOtherRegulatoryAssets
Pursuant to the Company's exogenous cost provision under the performance-based ratemaking ("PBR") tariff, the Company is allowed to recover incremental costs for exogenous storm events that incurred more than \$30 million incremental costs. The recovery of incremental storm costs for those weather events that cause the Company to incur incremental costs exceeding \$30 million per event shall always be through a separate factor that will recover each amount requested for recovery over a five-year period.

---	---	-------------------------------	---

LONG-TERM DEBT (Account 221, 222, 223 and 224)

- Report by Balance Sheet Account the details concerning long-term debt included in Accounts 221, Bonds, 222, Reacquired Bonds, 223, Advances from Associated Companies, and 224, Other Long-Term Debt.
- For bonds assumed by the respondent, include in column (a) the name of the issuing company as well as a description of the bonds, and in column (b) include the related account number.
- For Advances from Associated Companies, report separately advances on notes and advances on open accounts. Designate demand notes as such. Include in column (a) names of associated companies from which advances were received, and in column (b) include the related account number.
- For receivers' certificates, show in column (a) the name of the court and date of court order under which such certificates were issued, and in column (b) include the related account number.
- In a supplemental statement, give explanatory details for Accounts 223 and 224 of net changes during the year. With respect to long-term advances, show for each company: (a) principal advanced during year (b) interest added to principal amount, and (c) principal repaid during year. Give Commission authorization numbers and dates.
- If the respondent has pledged any of its long-term debt securities, give particulars (details) in a footnote, including name of the pledgee and purpose of the pledge.
- If the respondent has any long-term securities that have been nominally issued and are nominally outstanding at end of year, describe such securities in a footnote.
- If interest expense was incurred during the year on any obligations retired or reacquired before end of year, include such interest expense in column (m). Explain in a footnote any difference between the total of column (m) and the total Account 427, Interest on Long-Term Debt and Account 430, Interest on Debt to Associated Companies.
- Give details concerning any long-term debt authorized by a regulatory commission but not yet issued.

FOOTNOTE DATA			

(a) Concept: ClassAndSeriesOfObligationCouponRateDescription

On August 31, 2020, the Company received approval from the DPU to issue up to \$1.1 billion of long-term debt in one or more transactions through August 31, 2023. On July 17, 2023, the Company received approval from the DPU to extend the issue up to \$1.1 billion of long-term debt in one or more transactions through August 31, 2024. In November 2020, the Company issued \$500 million of unsecured long-term debt at 1.73% with a maturity date of November 24, 2030. On February 26, 2024, the Company issued \$400 million of unsecured long-term debt at 5.867% with a maturity date of February 26, 2054, resulting in \$200 million of remaining authorization.

FERC FORM No. 1 (ED. 12-96)

Name of Respondent: Massachusetts Electric Company		This report is: (1) ☒ An Original (2) ☐ A Resubmission	Date of Report: 03/28/2024	Year/Period of Report End of: 2023/ Q4
RECONCILIATION OF REPORTED NET INCOME WITH TAXABLE INCOME FOR FEDERAL INCOME TAXES				
1. Report the reconciliation of reported net income for the year with taxable income used in computing Federal income tax accruals and show computation of such tax accruals. Include in the reconciliation, as far as practicable, the same detail as furnished on Schedule M-1 of the tax return for the year. Submit a reconciliation even though there is no taxable income for the year. Indicate clearly the nature of each reconciling amount. 2. If the utility is a member of a group which files a consolidated Federal tax return, reconcile reported net income with taxable net income as if a separate return were to be filed, indicating, however, intercompany amounts to be eliminated in such a consolidated return. State names of group member, tax assigned to each group member, and basis of allocation, assignment, or sharing of the consolidated tax among the group members. 3. A substitute page, designed to meet a particular need of a company, may be used as long as the data is consistent and meets the requirements of the above instructions. For electronic reporting purposes complete Line 27 and provide the substitute Page in the context of a footnote.

Name of Respondent: Massachusetts Electric Company	This report is: (1) ☒ An Original (2) ☐ A Resubmission	Date of Report: 03/28/2024	Year/Period of Report End of: 2023/ Q4
FOOTNOTE DATA			

(a) Concept: DescriptionAndPurposeOfOtherRegulatoryLiabilities Excess accumulated deferred income taxes resulting from the remeasurement of the Company's deferred tax balances due to the enactment of the 2017 Tax Cuts and Jobs Act for electric transmission operations.
(b) Concept: DescriptionAndPurposeOfOtherRegulatoryLiabilities Excess accumulated deferred income taxes resulting from the remeasurement of the Company's deferred tax balances due to the enactment of the 2017 Tax Cuts and Jobs Act for electric distribution operations.
(c) Concept: DescriptionAndPurposeOfOtherRegulatoryLiabilities Includes amounts pertaining to Allowance for Funds Used During Construction given to the Company, which are being amortized over the life of the book assets, as well as other items, as agreed with regulators for electric operations.
(d) Concept: DescriptionAndPurposeOfOtherRegulatoryLiabilities In September 2006, the FASB issued FAS 158, which required employers to recognize the overfunded or underfunded status of a defined benefit postretirement plan (other than a multiemployer plan) as an asset or liability in its statement of financial position and to recognize changes in that funded status in the year in which the changes occur through comprehensive income. However, because the Company has specific regulatory recovery of its pension and OPEB costs, the establishment of a regulatory liability to defer credits to OCI that would otherwise result from the adoption of FAS 158 is appropriate. Pursuant to the DPU's ruling in D.P.U. 09-39, the Company is allowed to recover actual, non-capitalized pension and PBOP expenses outside of base rates through a separate billing factor referred to as the Pension and PBOP Adjustment Factor. A return on the average annual prepaid or unfunded pension and PBOP balance at the weighted average cost of capital will be recorded. Over or under recovery of annual costs is surcharged or credited to customers over a three-year period.
(e) Concept: DescriptionAndPurposeOfOtherRegulatoryLiabilities Pursuant to Section 1A(f) of Chapter 164 of the General Laws, as amended by the Green Communities Act, the prices for Retail Delivery Service contained in all of the Company's tariffs are subject to a Solar Cost Adjustment Factor ("SCAF") designed to reflect the recovery of the investment and ongoing maintenance costs of Solar Generation Facilities constructed, owned, and operated by the Company. Annually, the Company will file with the Department the annual revenue requirement associated with the Solar Generation Facilities as provided for in the Act not otherwise recovered through base distribution rates. Annual revenue requirement shall mean the return on rate base and associated income taxes relating to the Company's investment in the Solar Generation Facilities, along with accumulated depreciation and accumulated deferred taxes, depreciation expense, incremental operation and maintenance expense, property taxes, and amortization of investment tax credits. In addition, the Company shall also include in its annual filing the reconciliation of the annual revenue requirement approved by the Department in the prior year to the actual amount of revenue billed to customers through the SCAF plus any credits for (1) net proceeds associated with energy sales to the Independent System Operator of New England ("ISO-NE"), (2) either (a) net proceeds associated with sales of Renewable Energy Certificates ("RECs") or (b) the market value of RECs which were used to comply with the Renewable Portfolio Standards established in Mass. Gen. Laws c. 25A, §11F and 220 C.M.R. 14.00 – 16.00 et seq., and (3) net proceeds, if any, associated with bidding the capacity of the Solar Generating Facilities into the ISO-NE Forward Capacity Market, and the excess or deficiency, including interest at the interest rate paid on customer deposits, shall be used to adjust the subsequent year's SCAF.
(f) Concept: DescriptionAndPurposeOfOtherRegulatoryLiabilities Pursuant to the settlement DPU 93-194, the Company established a fund for hazardous waste clean-up and liabilities. The fund pays for Environmental Response Costs paid after June 30, 1993, but does not include costs or expenses related to properties acquired after the date the settlement was approved by the DPU. The settlement defines Environmental Response Costs as "reasonable and prudently incurred costs or expenses (excluding all fines or penalties) associated with the investigation, testing, remediation, or other liabilities attributable to the Company relating to gas manufacturing facility or disposal sites, or sites to which material may have migrated or at which manufactured gas waste may have been deposited as a result of the earlier operation or decommissioning of gas manufacturing facilities in Massachusetts, material regulated under the Comprehensive Environmental Response, Compensation, and Liability Act, Resource Conservation and Recovery Act, Massachusetts General Laws Chapters 21C and 21E, and any other laws, regulations, or orders by courts or governmental authorities, or resulting from claims or contentions arising in tort, breach of contract, or violation of law, including sites unrelated to Massachusetts gas manufacturing facilities deposited before 1980 on sites or migrating to sites as a result of the operations of the Company or its predecessor companies, and the costs and expenses associated with the purchase of property acquired as part of an overall mitigation and response plan associated with the sites described above.
(g) Concept: DescriptionAndPurposeOfOtherRegulatoryLiabilities Department policy with respect to gains on the sale of utility property is to "require return to ratepayers of the entire gain associated with the sale, if those assets were recorded above-the-line and supported by ratepayers." Further, "a gain (or loss) associated with the transfer of utility plant from a company's plant accounts should properly be reflected in rates regardless of the timing of the transfer relative to the test year." In the prior rate case, D.P.U. 15-155, the Company acknowledged this treatment, and the Department ordered a five-year amortization of this amount. As such, a regulatory liability has been established with an annual amortization (see the Company's response to Information Request AG-1-20 at Attachment AG-1-20). Per the most recent rate case, D.P.U. 18-150, the Company was ordered to amortize an additional amount for the gain on the sale of regulated properties since the last test year, for a total of \$791,458 to be included in base rates and amortized over five years thru the next rate case.
(h) Concept: DescriptionAndPurposeOfOtherRegulatoryLiabilities Pursuant to Massachusetts law and the Company's Energy Efficiency Provision, the Company administers an Energy Efficiency ("EE") plan and is allowed to recover the cost of that plan through a combination of a statutory EE Charge per kWh plus (1) amounts generated by the Forward Capacity Market program administered by the Independent System Operator-New England; (2) cap and trade pollution control programs, including, but not limited to, not less than 80 per cent of amounts generated by the carbon dioxide allowance trading mechanism established under the Regional Greenhouse Gas Initiative Memorandum of Understanding, and the NOx Allowance Trading Program; and (3) other funding as approved by the Department. The Company's annual Energy Efficiency Reconciling Factors ("EERFs") are designed to collect the estimated incremental costs of the Company's proposed EE programs for the year which represents those costs that are in excess of the expected funding above. EE costs, including an allowance for performance-based shareholder incentives, are fully reconcilable, and any over or under recovery of costs is passed on to all customers.
(i) Concept: DescriptionAndPurposeOfOtherRegulatoryLiabilities Under the Company's Service Quality Plan, it may be penalized for performance in certain categories that fall below any historic average. Any penalties are credited to customers in a manner directed by the DPU. Service Quality penalty credit factors were implemented to refund customers for poor service. Any residual balance remaining after application of the credit shall be charged or credited to customers through the Company's Revenue Decoupling Mechanism Reconciliation. In the event that the Department's decision to impose the penalty is reversed or modified as the result of an appeal, the Company shall recover the amount of the reduction in such manner as proposed by the Company and approved by the Department.
(j) Concept: DescriptionAndPurposeOfOtherRegulatoryLiabilities This account pertains to the regulatory liability related to the annual customer refunds of costs that have the potential to occur within the context of the reconciling rate mechanisms based on settlement agreement 21-60 with the MA Attorney General's Office as a result of the sale of the Rhode Island company. The regulatory liability will be refunded to customers through a separate factor. The \$5M regulatory liability was initially allocated between National Grid USA's MA operating companies (MECO/NANT, Boston & Colonial) based on the number of customers.
(k) Concept: DescriptionAndPurposeOfOtherRegulatoryLiabilities Pursuant to the Company's Basic Service Adjustment Provision, the Company is allowed to recover costs associated with providing Basic Service to its customers. The cost of providing Basic Service includes payments to Basic Service suppliers; payments to the ISO-NE for procuring Basic Service power; the cost of acquiring Renewable Energy Certificates ("RECs") or remitting Alternate Compliance Payments to comply with the renewable portfolio standards established in Mass. Gen. Laws c. 25A, § 11F and 220 C.M.R. 14.00 – 16.00 et seq.; the market value assigned to RECs generated by the Company's solar generation facilities constructed, owned, and operated pursuant to Mass. Gen. Laws c. 164, §1A(f), as amended by the Green Communities Act.; the market value assigned to RECs under renewable resource contracts entered into by the Company pursuant to § 83A of An Act Relative to Green Communities and used to comply with the Renewable Energy Portfolio Standards as approved by the Department, or credits representing the net proceeds received from the sale of RECs purchased under these contracts; the cost of acquiring Clean Energy Credits or remitting Alternative Compliance Payments to comply with the Clean Energy Standard pursuant to Mass. Gen. Laws c. 21N, the Global Warming Solutions Act, and 310 C.M.R. 7.75; and the FERC approved costs billed to the Company for the operation of the New England Power Pool ("NEPOOL") Generation Information System, which are billed to the Company as a result of its being subject to Attribute Laws, as defined in the NEPOOL cost allocation document. The recovery of these costs is fully reconcilable with any over or under collection passed on to all customers.

Electric Operating Revenues

- The following instructions generally apply to the annual version of these pages. Do not report quarterly data in columns (c), (e), (f), and (g). Unbilled revenues and MWH related to unbilled revenues need not be reported separately as required in the annual version of these pages.
- Report below operating revenues for each prescribed account, and manufactured gas revenues in total.
- Report number of customers, columns (f) and (g), on the basis of meters, in addition to the number of flat rate accounts; except that where separate meter readings are added for billing purposes, one customer should be counted for each group of meters added. The average number of customers means the average of twelve figures at the close of each month.
- If increases or decreases from previous period (columns (c),(e), and (g)), are not derived from previously reported figures, explain any inconsistencies in a footnote.
- Disclose amounts of \$250,000 or greater in a footnote for accounts 451, 456, and 457.2.
- Commercial and industrial Sales, Account 442, may be classified according to the basis of classification (Small or Commercial, and Large or Industrial) regularly used by the respondent if such basis of classification is not generally greater than 1000 Kw of demand. (See Account 442 of the Uniform System of Accounts. Explain basis of classification in a footnote.)
- See page 108, Important Changes During Period, for important new territory added and important rate increase or decreases.
- For Lines 2,4,5,and 6, see Page 304 for amounts relating to unbilled revenue by accounts.
- Include unmetered sales. Provide details of such Sales in a footnote.

SALES OF ELECTRICITY BY RATE SCHEDULES

1. Report below for each rate schedule in effect during the year the MWh of electricity sold, revenue, average number of customer, average Kwh per customer, and average revenue per Kwh, excluding date for Sales for Resale which is reported on Page 310.
2. Provide a subheading and total for each prescribed operating revenue account in the sequence followed in "Electric Operating Revenues," Page 300. If the sales under any rate schedule are classified in more than one revenue account, List the rate schedule and sales data under each applicable revenue account subheading.
3. Where the same customers are served under more than one rate schedule in the same revenue account classification (such as a general residential schedule and an off peak water heating schedule), the entries in column (d) for the special schedule should denote the duplication in number of reported customers.
4. The average number of customers should be the number of bills rendered during the year divided by the number of billing periods during the year (12 if all billings are made monthly).
5. For any rate schedule having a fuel adjustment clause state in a footnote the estimated additional revenue billed pursuant thereto.
6. Report amount of unbilled revenue as of end of year for each applicable revenue account subheading.

FOOTNOTE DATA			

(a) Concept: RevenueFromSalesOfElectricityByRateSchedules

Total revenue on this page corresponds to Total Sales to Ultimate Consumers on page 300-301, which does not include the impact of the Provision for Rate Refunds.

(b) Concept: RevenueFromSalesOfElectricityByRateSchedulesUnbilled

The Company's unbilled revenues have been deferred to Other Regulatory Assets and Other Regulatory Liabilities on the balance sheet, so there are no unbilled revenues reflected on this page.

FERC FORM NO. 1 (ED. 12-95)

Name of Respondent: Massachusetts Electric Company	This report is: (1) ☒ An Original (2) ☐ A Resubmission	Date of Report: 03/28/2024	Year/Period of Report End of: 2023/ Q4
---	---	-------------------------------	---

SALES FOR RESALE (Account 447)

1. Report all sales for resale (i.e., sales to purchasers other than ultimate consumers) transacted on a settlement basis other than power exchanges during the year. Do not report exchanges of electricity (i.e., transactions involving a balancing of debits and credits for energy, capacity, etc.) and any settlements for imbalanced exchanges on this schedule. Power exchanges must be reported on the Purchased Power schedule (Page 326).
2. Enter the name of the purchaser in column (a). Do not abbreviate or truncate the name or use acronyms. Explain in a footnote any ownership interest or affiliation the respondent has with the purchaser.
3. In column (b), enter a Statistical Classification Code based on the original contractual terms and conditions of the service as follows:
- RQ - for requirements service. Requirements service is service which the supplier plans to provide on an ongoing basis (i.e., the supplier includes projected load for this service in its system resource planning). In addition, the reliability of requirements service must be the same as, or second only to, the supplier's service to its own ultimate consumers.
- LF - for long-term service. "Long-term" means five years or Longer and "firm" means that service cannot be interrupted for economic reasons and is intended to remain reliable even under adverse conditions (e.g., the supplier must attempt to buy emergency energy from third parties to maintain deliveries of LF service). This category should not be used for Long-term firm service which meets the definition of RQ service. For all transactions identified as LF, provide in a footnote the termination date of the contract defined as the earliest date that either buyer or setter can unilaterally get out of the contract.
- IF - for intermediate-term firm service. The same as LF service except that "intermediate-term" means longer than one year but Less than five years.
- SF - for short-term firm service. Use this category for all firm services where the duration of each period of commitment for service is one year or less.
- LU - for Long-term service from a designated generating unit. "Long-term" means five years or Longer. The availability and reliability of service, aside from transmission constraints, must match the availability and reliability of designated unit.
- IU - for intermediate-term service from a designated generating unit. The same as LU service except that "intermediate-term" means Longer than one year but Less than five years.
- OS - for other service. use this category only for those services which cannot be placed in the above-defined categories, such as all non-firm service regardless of the Length of the contract and service from designated units of Less than one year. Describe the nature of the service in a footnote.
- AD - for Out-of-period adjustment. Use this code for any accounting adjustments or "true-ups" for service provided in prior reporting years. Provide an explanation in a footnote for each adjustment.
4. Group requirements RQ sales together and report them starting at line number one. After listing all RQ sales, enter "Subtotal - RQ" in column (a). The remaining sales may then be listed in any order. Enter "Subtotal-Non-RQ" in column (a) after this Listing. Enter "Total" in column (a) as the Last Line of the schedule. Report subtotals and total for columns (g) through (k).
5. In Column (c), identify the FERC Rate Schedule or Tariff Number. On separate Lines, List all FERC rate schedules or tariffs under which service, as identified in column (b), is provided.
6. For requirements RQ sales and any type of-service involving demand charges imposed on a monthly (or Longer) basis, enter the average monthly billing demand in column (d), the average monthly non-coincident peak (NCP) demand in column (e), and the average monthly coincident peak (CP) demand in column (f). For all other types of service, enter NA in columns (d), (e) and (f). Monthly NCP demand is the maximum metered hourly (60-minute integration) demand in a month. Monthly CP demand is the metered demand during the hour (60-minute integration) in which the supplier's system reaches its monthly peak. Demand reported in columns (e) and (f) must be in megawatts. Footnote any demand not stated on a megawatt basis and explain.
7. Report in column (g) the megawatt hours shown on bills rendered to the purchaser.
8. Report demand charges in column (h), energy charges in column (i), and the total of any other types of charges, including out-of-period adjustments, in column (j). Explain in a footnote all components of the amount shown in column (j). Report in column (k) the total charge shown on bills rendered to the purchaser.
9. The data in column (g) through (k) must be subtotaled based on the RQ/Non-RQ grouping (see instruction 4), and then totaled on the Last -line of the schedule. The "Subtotal - RQ" amount in column (g) must be reported as Requirements Sales For Resale on Page 401, line 23. The "Subtotal - Non-RQ" amount in column (g) must be reported as Non-Requirements Sales For Resale on Page 401, line 24.
10. Footnote entries as required and provide explanations following all required data.

Name of Respondent: Massachusetts Electric Company	This report is: (1) ☒ An Original (2) ☐ A Resubmission	Date of Report: 03/28/2024	Year/Period of Report End of: 2023/ Q4
---	---	-------------------------------	---

PURCHASED POWER (Account 555)

- Report all power purchases made during the year. Also report exchanges of electricity (i.e., transactions involving a balancing of debits and credits for energy, capacity, etc.) and any settlements for imbalanced exchanges.
- Enter the name of the seller or other party in an exchange transaction in column (a). Do not abbreviate or truncate the name or use acronyms. Explain in a footnote any ownership interest or affiliation the respondent has with the seller.
- In column (b), enter a Statistical Classification Code based on the original contractual terms and conditions of the service as follows:

RQ - for requirements service. Requirements service is service which the supplier plans to provide on an ongoing basis (i.e., the supplier includes projects load for this service in its system resource planning). In addition, the reliability of requirement service must be the same as, or second only to, the supplier's service to its own ultimate consumers.

LF - for long-term firm service. "Long-term" means five years or longer and "firm" means that service cannot be interrupted for economic reasons and is intended to remain reliable even under adverse conditions (e.g., the supplier must attempt to buy emergency energy from third parties to maintain deliveries of LF service). This category should not be used for long-term firm service firm service which meets the definition of RQ service. For all transaction identified as LF, provide in a footnote the termination date of the contract defined as the earliest date that either buyer or seller can unilaterally get out of the contract.

IF - for intermediate-term firm service. The same as LF service expect that "intermediate-term" means longer than one year but less than five years.

SF - for short-term service. Use this category for all firm services, where the duration of each period of commitment for service is one year or less.

LU - for long-term service from a designated generating unit. "Long-term" means five years or longer. The availability and reliability of service, aside from transmission constraints, must match the availability and reliability of the designated unit.

IU - for intermediate-term service from a designated generating unit. The same as LU service expect that "intermediate-term" means longer than one year but less than five years.

EX - For exchanges of electricity. Use this category for transactions involving a balancing of debits and credits for energy, capacity, etc. and any settlements for imbalanced exchanges.

OS - for other service. Use this category only for those services which cannot be placed in the above-defined categories, such as all non-firm service regardless of the Length of the contract and service from designated units of Less than one year. Describe the nature of the service in a footnote for each adjustment.

AD - for out-of-period adjustment. Use this code for any accounting adjustments or "true-ups" for service provided in prior reporting years. Provide an explanation in a footnote for each adjustment.
- In column (c), identify the FERC Rate Schedule Number or Tariff, or, for non-FERC jurisdictional sellers, include an appropriate designation for the contract. On separate lines, list all FERC rate schedules, tariffs or contract designations under which service, as identified in column (b), is provided.
- For requirements RQ purchases and any type of service involving demand charges imposed on a monthly (or longer) basis, enter the monthly average billing demand in column (d), the average monthly non-coincident peak (NCP) demand in column (e), and the average monthly coincident peak (CP) demand in column (f). For all other types of service, enter NA in columns (d), (e) and (f). Monthly NCP demand is the maximum metered hourly (60-minute integration) demand in a month. Monthly CP demand is the metered demand during the hour (60-minute integration) in which the supplier's system reaches its monthly peak. Demand reported in columns (e) and (f) must be in megawatts. Footnote any demand not stated on a megawatt basis and explain.
- Report in column (g) the megawatthours shown on bills rendered to the respondent, excluding purchases for energy storage. Report in column (h) the megawatthours shown on bills rendered to the respondent for energy storage purchases. Report in columns (i) and (j) the megawatthours of power exchanges received and delivered, used as the basis for settlement. Do not report net exchange.
- Report demand charges in column (k), energy charges in column (l), and the total of any other types of charges, including out-of-period adjustments, in column (m). Explain in a footnote all components of the amount shown in column (m). Report in column (n) the total charge shown on bills received as settlement by the respondent. For power exchanges, report in column (n) the settlement amount for the net receipt of energy. If more energy was delivered than received, enter a negative amount. If the settlement amount (m) include credits or charges other than incremental generation expenses, or (2) excludes certain credits or charges covered by the agreement, provide an explanatory footnote.
- The data in columns (g) through (n) must be totaled on the last line of the schedule. The total amount in columns (g) and (h) must be reported as Purchases on Page 401, line 10. The total amount in column (i) must be reported as Exchange Received on Page 401, line 12. The total amount in column (j) must be reported as Exchange Delivered on Page 401, line 13.
- Footnote entries as required and provide explanations following all required data.

FOOTNOTE DATA			

(a) Concept: NameOfCompanyOrPublicAuthorityProvidingPurchasedPower
New England Power Company is an affiliated entity.
(b) Concept: StatisticalClassificationCode
The Company purchases electricity from certain neighboring utilities pursuant to borderline agreements.
(c) Concept: StatisticalClassificationCode
This item represents all power charges billed directly from the New England Independent System Operator to the Company.
(d) Concept: OtherChargesOfPurchasedPower
This item represents the cost of renewable energy credits required for the Company to meet its renewable energy obligation per the renewable portfolio standards established in Massachusetts General Laws, Chapter 25A, § 11F and the Massachusetts Department of Energy Resource's regulations codified in 225 C.M.R. 14.00 – 16.00 et seq.
(e) Concept: OtherChargesOfPurchasedPower
This item represents deferrals associated with REC, Basic Service, Solar Massachusetts Renewable Target, Net Metering, Transition, Long Term Renewable Energy Contract programs.
(f) Concept: OtherChargesOfPurchasedPower
This item relates to contract termination charges, which resulted from New England Power Company's divestiture of its generation business.

TRANSMISSION OF ELECTRICITY BY ISO/RTOs

1. Report in Column (a) the Transmission Owner receiving revenue for the transmission of electricity by the ISO/RTO.
2. Use a separate line of data for each distinct type of transmission service involving the entities listed in Column (a).
3. In Column (b) enter a Statistical Classification code based on the original contractual terms and conditions of the service as follows: FNO – Firm Network Service for Others, FNS – Firm Network Transmission Service for Self, LFP – Long-Term Firm Point-to-Point Transmission Service, OLF – Other Long-Term Firm Transmission Service, SFP – Short-Term Firm Point-to-Point Transmission Reservation, NF – Non-Firm Transmission Service, OS – Other Transmission Service and AD- Out-of-Period Adjustments. Use this code for any accounting adjustments or "true-ups" for service provided in prior reporting periods. Provide an explanation in a footnote for each adjustment. See General Instruction for definitions of codes.
4. In column (c) identify the FERC Rate Schedule or tariff Number, on separate lines, list all FERC rate schedules or contract designations under which service, as identified in column (b) was provided.
5. In column (d) report the revenue amounts as shown on bills or vouchers.
6. Report in column (e) the total revenues distributed to the entity listed in column (a).

TRANSMISSION OF ELECTRICITY BY OTHERS (Account 565)

1. Report all transmission, i.e. wheeling or electricity provided by other electric utilities, cooperatives, municipalities, other public authorities, qualifying facilities, and others for the quarter.
2. In column (a) report each company or public authority that provided transmission service. Provide the full name of the company, abbreviate if necessary, but do not truncate name or use acronyms. Explain in a footnote any ownership interest in or affiliation with the transmission service provider. Use additional columns as necessary to report all companies or public authorities that provided transmission service for the quarter reported.
3. In column (b) enter a Statistical Classification code based on the original contractual terms and conditions of the service as follows:
FNS - Firm Network Transmission Service for Self, LFP - Long-Term Firm Point-to-Point Transmission Reservations. OLF - Other Long-Term Firm Transmission Service, SFP - Short-Term Firm Point-to-Point Transmission Reservations, NF - Non-Firm Transmission Service, and OS - Other Transmission Service. See General Instructions for definitions of statistical classifications.
4. Report in column (c) and (d) the total megawatt hours received and delivered by the provider of the transmission service.
5. Report in column (e), (f) and (g) expenses as shown on bills or vouchers rendered to the respondent. In column (e) report the demand charges and in column (f) energy charges related to the amount of energy transferred. On column (g) report the total of all other charges on bills or vouchers rendered to the respondent, including any out of period adjustments. Explain in a footnote all components of the amount shown in column (g). Report in column (h) the total charge shown on bills rendered to the respondent. If no monetary settlement was made, enter zero in column (h). Provide a footnote explaining the nature of the non-monetary settlement, including the amount and type of energy or service rendered.
6. Enter ""TOTAL"" in column (a) as the last line.
7. Footnote entries and provide explanations following all required data.

Depreciation and Amortization of Electric Plant (Account 403, 404, 405)

1. Report in section A for the year the amounts for: (b) Depreciation Expense (Account 403); (c) Depreciation Expense for Asset Retirement Costs (Account 403.1); (d) Amortization of Limited-Term Electric Plant (Account 404); and (e) Amortization of Other Electric Plant (Account 405).
2. Report in Section B the rates used to compute amortization charges for electric plant (Accounts 404 and 405). State the basis used to compute charges and whether any changes have been made in the basis or rates used from the preceding report year.
3. Report all available information called for in Section C every fifth year beginning with report year 1971, reporting annually only changes to columns (c) through (g) from the complete report of the preceding year.
- Unless composite depreciation accounting for total depreciable plant is followed, list numerically in column (a) each plant subaccount, account or functional classification, as appropriate, to which a rate is applied. Identify at the bottom of Section C the type of plant included in any sub-account used.
- In column (b) report all depreciable plant balances to which rates are applied showing subtotals by functional Classifications and showing composite total. Indicate at the bottom of section C the manner in which column balances are obtained. If average balances, state the method of averaging used.
- For columns (c), (d), and (e) report available information for each plant subaccount, account or functional classification listed in column (a). If plant mortality studies are prepared to assist in estimating average service Lives, show in column (f) the type of mortality curve selected as most appropriate for the account and in column (g), if available, the weighted average remaining life of surviving plant. If composite depreciation accounting is used, report available information called for in columns (b) through (g) on this basis.
4. If provisions for depreciation were made during the year in addition to depreciation provided by application of reported rates, state at the bottom of section C the amounts and nature of the provisions and the plant items to which related.

REGULATORY COMMISSION EXPENSES

1. Report particulars (details) of regulatory commission expenses incurred during the current year (or incurred in previous years, if being amortized) relating to format cases before a regulatory body, or cases in which such a body was a party.
 2. Report in columns (b) and (c), only the current year's expenses that are not deferred and the current year's amortization of amounts deferred in previous years.
 3. Show in column (k) any expenses incurred in prior years which are being amortized. List in column (a) the period of amortization.
 4. List in columns (f), (g), and (h), expenses incurred during the year which were charged currently to income, plant, or other accounts.
 5. Minor items (less than \$25,000) may be grouped.

RESEARCH, DEVELOPMENT, AND DEMONSTRATION ACTIVITIES

1. Describe and show below costs incurred and accounts charged during the year for technological research, development, and demonstration (R, D and D) project initiated, continued or concluded during the year. Report also support given to others during the year for jointly-sponsored projects.(Identify recipient regardless of affiliation.) For any R, D and D work carried with others, show separately the respondent's cost for the year and cost chargeable to others (See definition of research, development, and demonstration in Uniform System of Accounts).
2. Indicate in column (a) the applicable classification, as shown below:
Classifications:
- A. Electric R, D and D Performed Internally:

1. Generation

a. hydroelectric

i. Recreation fish and wildlife

ii. Other hydroelectric

b. Fossil-fuel steam

c. Internal combustion or gas turbine

d. Nuclear

e. Unconventional generation

f. Siting and heat rejection

2. Transmission

a. Overhead

b. Underground

3. Distribution

4. Regional Transmission and Market Operation

5. Environment (other than equipment)

6. Other (Classify and include items in excess of \$50,000.)

7. Total Cost Incurred

B. Electric, R, D and D Performed Externally:

1. Research Support to the electrical Research Council or the Electric Power Research Institute

2. Research Support to Edison Electric Institute

3. Research Support to Nuclear Power Groups

4. Research Support to Others (Classify)

5. Total Cost Incurred
3. Include in column (c) all R, D and D items performed internally and in column (d) those items performed outside the company costing \$50,000 or more, briefly describing the specific area of R, D and D (such as safety, corrosion control, pollution, automation, measurement, insulation, type of appliance, etc.). Group items under \$50,000 by classifications and indicate the number of items grouped. Under Other, (A (6) and B (4)) classify items by type of R, D and D activity.
4. Show in column (e) the account number charged with expenses during the year or the account to which amounts were capitalized during the year, listing Account 107, Construction Work in Progress, first. Show in column (f) the amounts related to the account charged in column (e).
5. Show in column (g) the total unamortized accumulating of costs of projects. This total must equal the balance in Account 188, Research, Development, and Demonstration Expenditures, Outstanding at the end of the year.
6. If costs have not been segregated for R, D and D activities or projects, submit estimates for columns (c), (d), and (f) with such amounts identified by ""Est.""
7. Report separately research and related testing facilities operated by the respondent.

DISTRIBUTION OF SALARIES AND WAGES				
Report below the distribution of total salaries and wages for the year. Segregate amounts originally charged to clearing accounts to Utility Departments, Construction, Plant Removals, and Other Accounts, and enter such amounts in the appropriate lines and columns provided. In determining this segregation of salaries and wages originally charged to clearing accounts, a method of approximation giving substantially correct results may be used.

COMMON UTILITY PLANT AND EXPENSES			
1. Describe the property carried in the utility's accounts as common utility plant and show the book cost of such plant at end of year classified by accounts as provided by Electric Plant Instruction 13, Common Utility Plant, of the Uniform System of Accounts. Also show the allocation of such plant costs to the respective departments using the common utility plant and explain the basis of allocation used, giving the allocation factors. 2. Furnish the accumulated provisions for depreciation and amortization at end of year, showing the amounts and classifications of such accumulated provisions, and amounts allocated to utility departments using the common utility plant to which such accumulated provisions relate, including explanation of basis of allocation and factors used. 3. Give for the year the expenses of operation, maintenance, rents, depreciation, and amortization for common utility plant classified by accounts as provided by the Uniform System of Accounts. Show the allocation of such expenses to the departments using the common utility plant to which such expenses are related. Explain the basis of allocation used and give the factors of allocation. 4. Give date of approval by the Commission for use of the common utility plant classification and reference to the order of the Commission or other authorization.

AMOUNTS INCLUDED IN ISO/RTO SETTLEMENT STATEMENTS

1. The respondent shall report below the details called for concerning amounts it recorded in Account 555, Purchase Power, and Account 447, Sales for Resale, for items shown on ISO/RTO Settlement Statements. Transactions should be separately netted for each ISO/RTO administered energy market for purposes of determining whether an entity is a net seller or purchaser in a given hour. Net megawatt hours are to be used as the basis for determining whether a net purchase or sale has occurred. In each monthly reporting period, the hourly sale and purchase net amounts are to be aggregated and separately reported in Account 447, Sales for Resale, or Account 555, Purchased Power, respectively.

Line No.	Description of Item(s) (a)	Balance at End of Quarter 1 (b)	Balance at End of Quarter 2 (c)	Balance at End of Quarter 3 (d)	Balance at End of Year (e)

PURCHASES AND SALES OF ANCILLARY SERVICES

Report the amounts for each type of ancillary service shown in column (a) for the year as specified in Order No. 888 and defined in the respondents Open Access Transmission Tariff. In columns for usage, report usage-related billing determinant and the unit of measure.

1. On Line 1 columns (b), (c), (d), and (e) report the amount of ancillary services purchased and sold during the year.
2. On Line 2 columns (b), (c), (d), and (e) report the amount of reactive supply and voltage control services purchased and sold during the year.
3. On Line 3 columns (b), (c), (d), and (e) report the amount of regulation and frequency response services purchased and sold during the year.
4. On Line 4 columns (b), (c), (d), and (e) report the amount of energy imbalance services purchased and sold during the year.
5. On Lines 5 and 6, columns (b), (c), (d), and (e) report the amount of operating reserve spinning and supplement services purchased and sold during the period.
6. On Line 7 columns (b), (c), (d), and (e) report the total amount of all other types ancillary services purchased or sold during the year. Include in a footnote and specify the amount for each type of other ancillary service provided.

FOOTNOTE DATA			

(a) Concept: AncillaryServicesPurchasedAmount		
ISO Schedule 5 NESCOE Expenses	\$	264,305
Blackstart Service		6,534,974
GIS Costs		48,902
	\$	6,848,181
ISO Schedule 5 is used to collect funds from transmission customers to cover New England State Committee on Electricity ("NESCOE") budgeted operating expenses. The New England Independent System Operator ("ISO") acts as the billing and collection agent for NESCOE for the recovery of amounts reflected in the annual NESCOE budget.		
Blackstart service is necessary to facilitate a stable and orderly restoration of the power system in the event of a partial or complete shutdown of the system. The ISO selects and compensates specific participating generators interconnected to the transmission or distribution system at strategic locations that can be called upon to re-energize the transmission system. These units must meet certain requirements, including having the ability to quickly restart without an outside electrical supply.		
The Generation Information System ("GIS") is an emissions reporting and tracking tool that monitors environmental attributes of generated electricity. For each megawatt-hour of electricity generated by individual units, a certificate is assigned that records the attributes of that power. These certificates are then used by electricity suppliers to differentiate their products for consumers, to provide the information required on energy disclosure labels, and to comply with state and regional renewable portfolio standards and emissions performance standards. The GIS costs represent the expenses incurred by the ISO for the vendor APX's administered GIS, along with associated charges from the project leader and other internal ISO staff members' time, as identified by the project leader. GIS cost settlement information is provided under the standard settlement reporting structure.

Steam Electric Generating Plant Statistics

1. Report data for plant in Service only.
2. Large plants are steam plants with installed capacity (name plate rating) of 25,000 Kw or more. Report in this page gas-turbine and internal combustion plants of 10,000 Kw or more, and nuclear plants.
3. Indicate by a footnote any plant leased or operated as a joint facility.
4. If net peak demand for 60 minutes is not available, give data which is available, specifying period.
5. If any employees attend more than one plant, report on line 11 the approximate average number of employees assignable to each plant.
6. If gas is used and purchased on a therm basis report the Btu content or the gas and the quantity of fuel burned converted to Mcf.
7. Quantities of fuel burned (Line 38) and average cost per unit of fuel burned (Line 41) must be consistent with charges to expense accounts 501 and 547 (Line 42) as show on Line 20.
8. If more than one fuel is burned in a plant furnish only the composite heat rate for all fuels burned.
9. Items under Cost of Plant are based on USofA accounts. Production expenses do not include Purchased Power, System Control and Load Dispatching, and Other Expenses Classified as Other Power Supply Expenses.
10. For IC and GT plants, report Operating Expenses, Account Nos. 553 and 554 on Line 25 "Electric Expenses," and Maintenance Account Nos. 553 and 554 on Line 32, "Maintenance of Electric Plant." Indicate plants designed for peak load service. Designate automatically operated plants.
11. For a plant equipped with combinations of fossil fuel steam, nuclear steam, hydro, internal combustion or gas-turbine equipment, report each as a separate plant. However, if a gas-turbine unit functions in a combined cycle operation with a conventional steam unit, include the gas-turbine with the steam plant.
12. If a nuclear power generating plant, briefly explain by footnote (a) accounting method for cost of power generated including any excess costs attributed to research and development; (b) types of cost units used for the various components of fuel cost; and (c) any other informative data concerning plant type fuel used, fuel enrichment type and quantity for the report period and other physical and operating characteristics of plant.

Hydroelectric Generating Plant Statistics				
1. Large plants are hydro plants of 10,000 Kw or more of installed capacity (name plate ratings). 2. If any plant is leased, operated under a license from the Federal Energy Regulatory Commission, or operated as a joint facility, indicate such facts in a footnote. If licensed project, give project number. 3. If net peak demand for 60 minutes is not available, give that which is available specifying period. 4. If a group of employees attends more than one generating plant, report on line 11 the approximate average number of employees assignable to each plant. 5. The items under Cost of Plant represent accounts or combinations of accounts prescribed by the Uniform System of Accounts. Production Expenses do not include Purchased Power, System control and Load Dispatching, and Other Expenses classified as "Other Power Supply Expenses." 6. Report as a separate plant any plant equipped with combinations of steam, hydro, internal combustion engine, or gas turbine equipment.

Pumped Storage Generating Plant Statistics				
1. Large plants and pumped storage plants of 10,000 Kw or more of installed capacity (name plate ratings). 2. If any plant is leased, operating under a license from the Federal Energy Regulatory Commission, or operated as a joint facility, indicate such facts in a footnote. Give project number. 3. If net peak demand for 60 minutes is not available, give that which is available, specifying period. 4. If a group of employees attends more than one generating plant, report on Line 8 the approximate average number of employees assignable to each plant. 5. The items under Cost of Plant represent accounts or combinations of accounts prescribed by the Uniform System of Accounts. Production Expenses do not include Purchased Power System Control and Load Dispatching, and Other Expenses classified as "Other Power Supply Expenses." 6. Pumping energy (Line 10) is that energy measured as input to the plant for pumping purposes. 7. Include on Line 36 the cost of energy used in pumping into the storage reservoir. When this item cannot be accurately computed leave Lines 36, 37 and 38 blank and describe at the bottom of the schedule the company's principal sources of pumping power, the estimated amounts of energy from each station or other source that individually provides more than 10 percent of the total energy used for pumping, and production expenses per net MWH as reported herein for each source described. Group together stations and other resources which individually provide less than 10 percent of total pumping energy. If contracts are made with others to purchase power for pumping, give the supplier contract number, and date of contract.

ENERGY STORAGE OPERATIONS (Large Plants)

1. Large Plants are plants of 10,000 Kw or more.
2. In columns (a) (b) and (c) report the name of the energy storage project, functional classification (Production, Transmission, Distribution), and location.
3. In column (d), report Megawatt hours (MWH) purchased, generated, or received in exchange transactions for storage.
4. In columns (e), (f) and (g) report MWHs delivered to the grid to support production, transmission and distribution. The amount reported in column (d) should include MWHs delivered/provided to a generator's own load requirements or used for the provision of ancillary services.
5. In columns (h), (i), and (j) report MWHs lost during conversion, storage and discharge of energy.
6. In column (k) report the MWHs sold.
7. In column (l), report revenues from energy storage operations. In a footnote, disclose the revenue accounts and revenue amounts related to the income generating activity.
8. In column (m), report the cost of power purchased for storage operations and reported in Account 555.1, Power Purchased for Storage Operations. If power was purchased from an affiliated seller specify how the cost of the power was determined. In columns (n) and (o), report fuel costs for storage operations associated with self-generated power included in Account 501 and other costs associated with self-generated power.
9. In columns (q), (r) and (s) report the total project plant costs including but not exclusive of land and land rights, structures and improvements, energy storage equipment, turbines, compressors, generators, switching and conversion equipment, lines and equipment whose primary purpose is to integrate or tie energy storage assets into the power grid, and any other costs associated with the energy storage project included in the property accounts listed.

ENERGY STORAGE OPERATIONS (Small Plants)

1. Small Plants are plants less than 10,000 Kw.
2. In columns (a), (b) and (c) report the name of the energy storage project, functional classification (Production, Transmission, Distribution), and location.
3. In column (d), report project plant cost including but not exclusive of land and land rights, structures and improvements, energy storage equipment and any other costs associated with the energy storage project.
4. In column (e), report operation expenses excluding fuel, (f), maintenance expenses, (g) fuel costs for storage operations and (h) cost of power purchased for storage operations and reported in Account 555.1, Power Purchased for Storage Operations. If power was purchased from an affiliated seller specify how the cost of the power was determined.
5. If any other expenses, report in column (i) and footnote the nature of the item(s).

---	---	-------------------------------	---

TRANSMISSION LINE STATISTICS

1. Report information concerning transmission lines, cost of lines, and expenses for year. List each transmission line having nominal voltage of 132 kilovolts or greater. Report transmission lines below these voltages in group totals only for each voltage. If required by a State commission to report individual lines for all voltages, do so but do not group totals for each voltage under 132 kilovolts.
2. Transmission lines include all lines covered by the definition of transmission system plant as given in the Uniform System of Accounts. Do not report substation costs and expenses on this page.
3. Exclude from this page any transmission lines for which plant costs are included in Account 121, Nonutility Property.
4. Indicate whether the type of supporting structure reported in column (e) is: (1) single pole wood or steel; (2) H-frame wood, or steel poles; (3) tower; or (4) underground construction. If a transmission line has more than one type of supporting structure, indicate the mileage of each type of construction by the use of brackets and extra lines. Minor portions of a transmission line of a different type of construction need not be distinguished from the remainder of the line.
5. Report in columns (f) and (g) the total pole miles of each transmission line. Show in column (f) the pole miles of line on structures the cost of which is reported for the line designated; conversely, show in column (g) the pole miles of line on structures the cost of which is reported for another line. Report pole miles of line on leased or partly owned structures in column (g). In a footnote, explain the basis of such occupancy and state whether expenses with respect to such structures are included in the expenses reported for the line designated.
6. Do not report the same transmission line structure twice. Report Lower voltage Lines and higher voltage lines as one line. Designate in a footnote if you do not include Lower voltage lines with higher voltage lines. If two or more transmission line structures support lines of the same voltage, report the pole miles of the primary structure in column (f) and the pole miles of the other line(s) in column (g).
7. Designate any transmission line or portion thereof for which the respondent is not the sole owner. If such property is leased from another company, give name of lessor, date and terms of Lease, and amount of rent for year. For any transmission line other than a leased line, or portion thereof, for which the respondent is not the sole owner but which the respondent operates or shares in the operation of, furnish a succinct statement explaining the arrangement and giving particulars (details) of such matters as percent ownership by respondent in the line, name of co-owner, basis of sharing expenses of the Line, and how the expenses borne by the respondent are accounted for, and accounts affected. Specify whether lessor, co-owner, or other party is an associated company.
8. Designate any transmission line leased to another company and give name of Lessee, date and terms of lease, annual rent for year, and how determined. Specify whether lessee is an associated company.
9. Base the plant cost figures called for in columns (j) to (l) on the book cost at end of year.

Line No.	DESIGNATION		VOLTAGE (KV) - (Indicate where other than 60 cycle, 3 phase)		Type of Supporting Structure	LENGTH (Pole miles) - (In the case of underground lines report circuit miles)		Number of Circuits	Size of Conductor and Material	COST OF LINE (Include in column (j) Land, Land rights, and clearing right-of-way)			EXPENSES, EXCEPT DEPRECIATION AND TAXES

SUBSTATIONS

1. Report below the information called for concerning substations of the respondent as of the end of the year.
 2. Substations which serve only one industrial or street railway customer should not be listed below.
 3. Substations with capacities of Less than 10 MVA except those serving customers with energy for resale, may be grouped according to functional character, but the number of such substations must be shown.
 4. Indicate in column (b) the functional character of each substation, designating whether transmission or distribution and whether attended or unattended. At the end of the page, summarize according to function the capacities reported for the individual stations in column (f).
 5. Show in columns (i), (j), and (k) special equipment such as rotary converters, rectifiers, condensers, etc. and auxiliary equipment for increasing capacity.
 6. Designate substations or major items of equipment leased from others, jointly owned with others, or operated otherwise than by reason of sole ownership by the respondent. For any substation or equipment operated under lease, give name of lessor, date and period of lease, and annual rent. For any substation or equipment operated other than by reason of sole ownership or lease, give name of co-owner or other party, explain basis of sharing expenses or other accounting between the parties, and state amounts and accounts affected in respondent's books of account. Specify in each case whether lessor, co-owner, or other party is an associated company.

Name of Respondent: Massachusetts Electric Company		This report is: (1) ☒ An Original (2) ☐ A Resubmission	Date of Report: 03/28/2024	Year/Period of Report End of: 2023/ Q4
TRANSACTIONS WITH ASSOCIATED (AFFILIATED) COMPANIES				
1. Report below the information called for concerning all non-power goods or services received from or provided to associated (affiliated) companies. 2. The reporting threshold for reporting purposes is \$250,000. The threshold applies to the annual amount billed to the respondent or billed to an associated/affiliated company for non-power goods and services. The good or service must be specific in nature. Respondents should not attempt to include or aggregate amounts in a nonspecific category such as "general". 3. Where amounts billed to or received from the associated (affiliated) company are based on an allocation process, explain in a footnote.				
Line No.	Description of the Good or Service (a)	Name of Associated/Affiliated Company (b)	Account(s) Charged or Credited (c)	Amount Charged or Credited (d)

Massachusetts Electric Company			

GENERAL INFORMATION - Continued

1. Corporate name of company making this report,
Massachusetts Electric Company

2. Date of organization,
July 6, 1887

3. Date of incorporation,
July 6, 1887

4. Give location (including street and number) of principal business office:--
2 Hanson Place, Brooklyn, NY 11217

5. Total number of stockholders, 9

6. Number of stockholders in Massachusetts, 1

7. Amount of stock held in Massachusetts, No. of shares, 2,398,111 \$ 59,952,775

8. Capital stock issued prior to June 5, 1894, No. of shares, 1,800 \$ 45,000

9. Capital stock issued with approval of Board
of Gas and Electric Light Commissioners
or Department of Public Utilities since
June 5, 1894, No. of shares, 2,418,896 \$ 62,166,275

Total*, 2,420,696 shares, see below for par value 62,211,275 outstanding December 31 of the calendar year

<u>Class</u>	<u>No. Shares</u>	<u>Par Value</u>	<u>Amount</u>
Preferred	22,585	\$100	\$ 2,258,500
Common	2,398,111	\$25	\$ 59,952,775
	2,420,696		\$ 62,211,275

*Includes capital stock issued prior to June 5, 1894.

10. If any stock has been issued during the last fiscal period, give the date and terms upon which such issue was offered to the stockholders, and if the whole or any part of the issue was sold at auction, the date or dates of such sale or sales, the number of shares sold and the amounts realized therefrom.

None

11. Management Fees and Expenses During the Year.

List all individuals, corporations or concerns with whom the company has any contracts or agreement covering management or supervision of its affairs, such as accounting, financing, engineering, construction, purchasing, operation, etc., and show the total amount paid to each for the year.

National Grid USA Service Company, Inc., pursuant to an agreement, a copy of which is on file with the Massachusetts Department of Public Utilities, rendered various services in 2023 as requested, at the actual cost thereof, pursuant to the rules and orders of the Federal Energy Regulatory Commission. See Page S18 for additional details.

OPERATING RESERVES (Accounts 228 & 229)

1. Report below an analysis of the changes during the year for each of the above-named reserves.
2. Show name of reserve and account number, balance beginning of year, credits, debits, and balance at end of year. Credit amounts should be shown in black, debit amounts enclosed by parentheses.
3. Each credit and debit amount should be described as to its general nature and the contra account debited or credited shown. Combine the amounts of monthly accounting entries of the same general nature. If respondent has more than one utility department, contra accounts debited or credited should indicate the utility department affected.
4. For accounts 228.1, Property Insurance Reserve, and 228.2, Injuries and Damages Reserve, explain the nature of the risks covered by the reserve.
5. For Account 228.4, Miscellaneous Operating Revenues, report separately each reserve composing the account and explain briefly its purpose.

CHARGES FOR OUTSIDE SERVICES

1. Report the information specified below for all charges made during the year included in any account (including plant accounts) for outside services, such as services concerning rates, management, construction, engineering, research, financial, valuation, legal, accounting, purchasing, advertising, labor relations, and public relations, rendered the respondent under written or oral arrangement, for which aggregate payments during the year to any corporation, partnership, organization of any kind, or individual (other than for services as an employee or for payments made for medical and related services) amounted to 5% or more of total charges for outside professional and other consultative services, including payments for legislative services except those which should be reported in Account 426.4, Expenditures for Certain Civic, Political and Related Activities:

- (a) Name and address of person or organization rendering services,
- (b) description of services received during year and project or case to which services relate,
- (c) basis of charges,
- (d) total charges for the year, detailing utility department and account charges.

2. For aggregate payments to any one individual, group, partnership, corporation or organization of any kind in excess of \$25,000 (not included in No. 1), there shall be reported the name of the payee, the predominant nature of the services performed and the amount of payment. Amounts charged to plant accounts shall be reported separately.

3. All charges not reported under No. 1 or 2 shall be aggregated by the type of service and each type shall show the amount charged. Amounts charged to plant accounts shall be reported separately for each type.

4. For any such services which are of a continuing nature give date and term of contract and date of Commission authorization, if contract received Commission approval.

5. Designate associated companies.

1. (a) National Grid USA Service Company, Inc. (Associated Company)
2 Hanson Place, Brooklyn, NY 11217

(b) The following services are rendered:

Servicing Division:

Purchasing, Stores, Rates, Advertising, Employee Relations,
Treasury, Accounting, Audit, Insurance, Taxes, Emergency
Service, Administrative and Budgeting.

Engineering and Construction Division:

Civil and Mechanical Engineering, Electrical and District
Engineering, Transmission Lines and Properties, Engineering
Supervision, Construction, Emergency and Miscellaneous.

(c) At cost, including interest on borrowed capital and a reasonable return on amount of capital necessary to perform services. Services performed by the Service Company for companies in the National Grid USA system will be rendered to them at cost in accordance with the service contracts between Service Company and its associate companies.

Massachusetts Electric Company
Electric Energy Burden Analysis - 2023

As directed by the Department of Public Utilities (the “Department”), in its Memorandum on Annual Returns to Include Utility Burden Index Analysis, dated February 9, 2023, the following chart provides a detailed household economic burden index analysis (“Burden Analysis”) evaluating residential energy electric utility customer bills as percentages of household income by county. The Burden Analysis provides the summary results of a detailed household burden index analysis by census block group, which is based on the total customer bill that includes net metering from solar, low-income discounts, and other bill impact factors.

The Burden Analysis further provides an analysis by household income for the statewide median household income and 50 percent, 100 percent, and 200 percent of the Federal Poverty Guidelines, to provide the Department with a clearer picture of specific areas in the Company’s service territory with higher-than-average energy burden.

For its analysis, the Company geocoded the customer coordinates and appended census level identifiers and related information. The Company then summarized its billing data to yield average bills by the census identifiers to conduct the Burden Analysis. The Company, furthermore, intends to use this information to develop more advanced and meaningful strategies to enhance customer engagement and support.

Field	Description
Census Block ID	The Census defined geographic ID for the block group.
Census Block Label	Text label from Census American Community Survey (ACS) tables describing the block group, linked up with frequently used political type boundaries.
County	Determined based on the Census Block Label.
Municipality(ies)	The towns associated with the block group; as some block groups span multiple towns in rural areas and odd large commercial areas like Logan Airport, included those multiple towns designated with a "," in the string.
Electric Utility	Service in the block group per geolocated account addresses from the 2023 active customer population. Some cases marked as Split where multiple Utilities provide service.
Census Block Group Median Income	The median income for the block group as reported by the 5 year ACS for the 2022 ACS cycle.
Census Block Group Households	The block group estimated households from the ACS data.
Census Tract Median Income	The median income for the census tract ID. This repeats and cannot be summed vertically. Provided as an alternative grain for census block groups where the number of households was too small for ACS to report out median income.
Census Tract Households	The ACS estimated number of households for the census tract ID. This repeats and cannot be summed vertically. Provided as an alternative grain for census block groups where the number of households was too small for ACS to report out median income.
Census Block/Tract Level Median Income	The Census block group median income except in cases where the number of households was too small at the Census block level for ACS to report in which case the tract level income was used as a proxy.
Statewide Median Income	The state's 5 year median income is \$96,505 from https://www.census.gov/quickfacts/fact/table/MA/INC110221 .
50% of Poverty	50% percent of a federal poverty level of \$26,500 for a family of 4: https://www.mass.gov/doc/fy-2022-liheap-income-eligibility-and-benefit-level-chart-march-2022/download
100% of Poverty	100% percent of a federal poverty level of \$26,500 for a family of 4: https://www.mass.gov/doc/fy-2022-liheap-income-eligibility-and-benefit-level-chart-march-2022/download
200% of Poverty	200% percent of a federal poverty level of \$26,500 for a family of 4: https://www.mass.gov/doc/fy-2022-liheap-income-eligibility-and-benefit-level-chart-march-2022/download
Electric Households included in Average Bill Calculation	Number of households included in the average electric bill analysis for the purposes of providing accurate county level data.
Average Annual Electric Bill	Average annual electric bill at the Census block level.
Electric Energy Burden based on Census Median Income	Electric energy burden calculated as the average electric bill compared to the median income at a Census block group or tract level.
Electric Energy Burden based on Statewide Median Income	Electric energy burden calculated as the average electric bill compared to the Statewide median income.
Electric Energy Burden based on 50% of Poverty	Electric energy burden calculated as the average electric bill compared to an income at 50% of the federal poverty level in a 4 person household.
Electric Energy Burden based on 100% of Poverty	Electric energy burden calculated as the average electric bill compared to an income at 100% of the federal poverty level in a 4 person household.
Electric Energy Burden based on 200% of Poverty	Electric energy burden calculated as the average electric bill compared to an income at 200% of the federal poverty level in a 4 person household.
