

# Working Group Meeting #4

February 7, 2019

5:00 PM to 7:00 PM

MassDOT District 1 Conference Room

270 Main Street, Lenox

# Meeting Agenda

- Welcome and Introductions
- Travel Demand Model Results
  - Demographic Projections
  - Zoning
  - Background Growth
  - Traffic Diversion Mapping
- Updated Interchange Concepts
  - Impacts and Conceptual-Level Cost Estimates
- Other Business, Schedule and Next Steps

### Travel Demand Modeling

- Shows travel demand across study area in 2040 Build and 2040 No-Build conditions, developed from background traffic growth

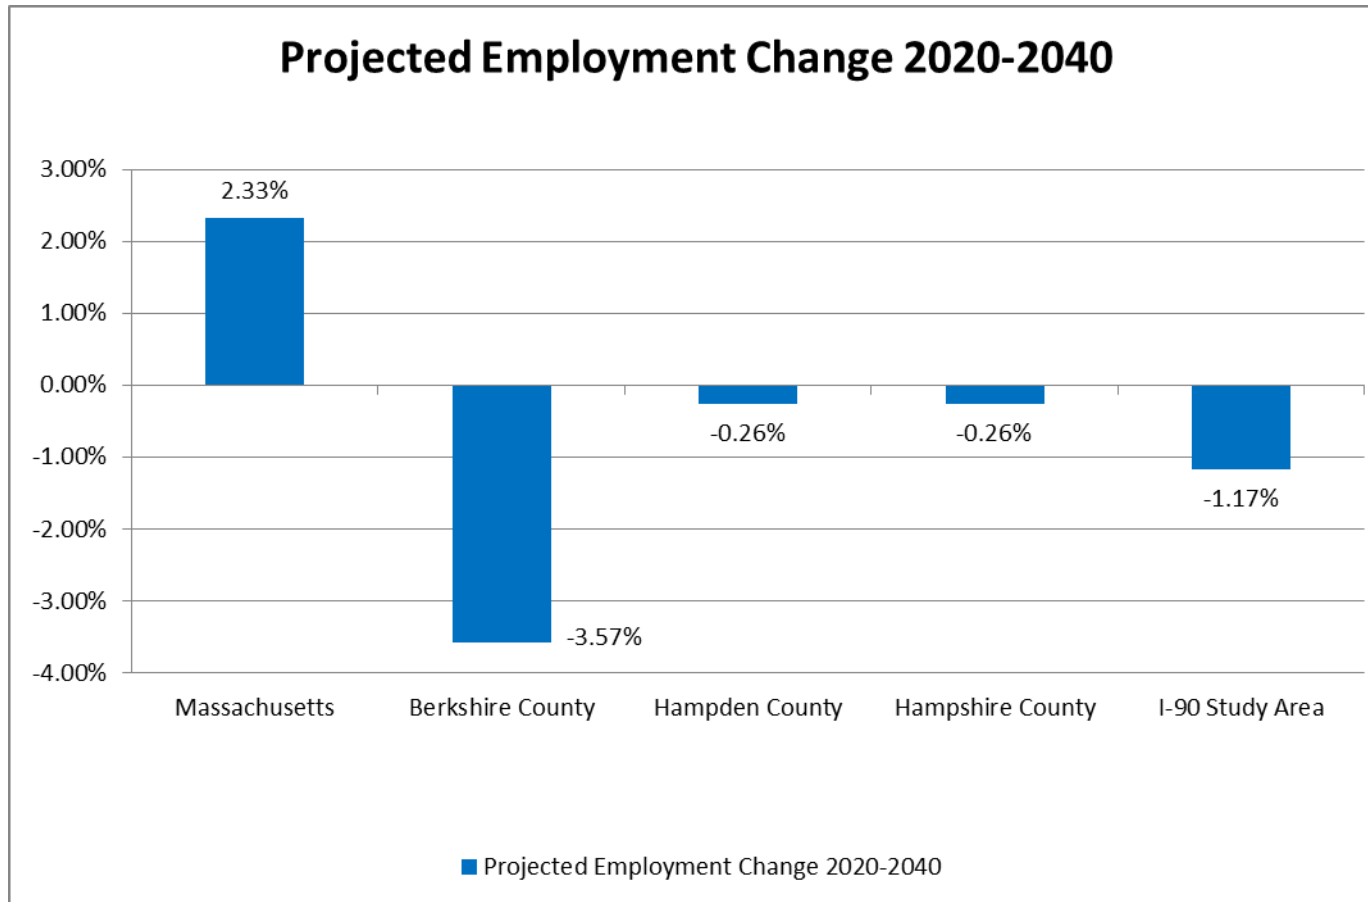

### Background Traffic Growth

- Includes growth at external (border) locations
- Based on demographic inputs
  - Uses new demographic data projections from Pioneer Valley PC and Berkshire Regional PC
- Also uses local zoning as a projection factor
  - Zoning throughout the study area is generally single-family housing on single lots, or single-family housing with agricultural uses
  - PVPC and BRPC have identified priority development areas that in some cases would require rezoning
  - Traffic modeling does not assume changes in zoning with potential interchange in place (community action required for this)

Travel Demand Modeling  
Demographic Projections

Source: CTPS/BRPC/PVPC/US Census Bureau

- Background Traffic Growth
  - Determines future traffic levels for the no-build and three build alternatives
  - Based on demographic inputs
  - Includes growth at external (border) locations
  - Also uses local zoning as a projection factor
    - With few exceptions, zoning throughout the study area allows single-family housing on single lots, or single-family housing with agricultural uses
    - PVPC and BRPC have identified priority development areas that in some cases would require rezoning
    - Traffic modeling does not assume changes in zoning with potential interchange in place (community action would be required for this)

# I-90 Interchange Study

## Travel Demand Modeling Local Zoning by General Type

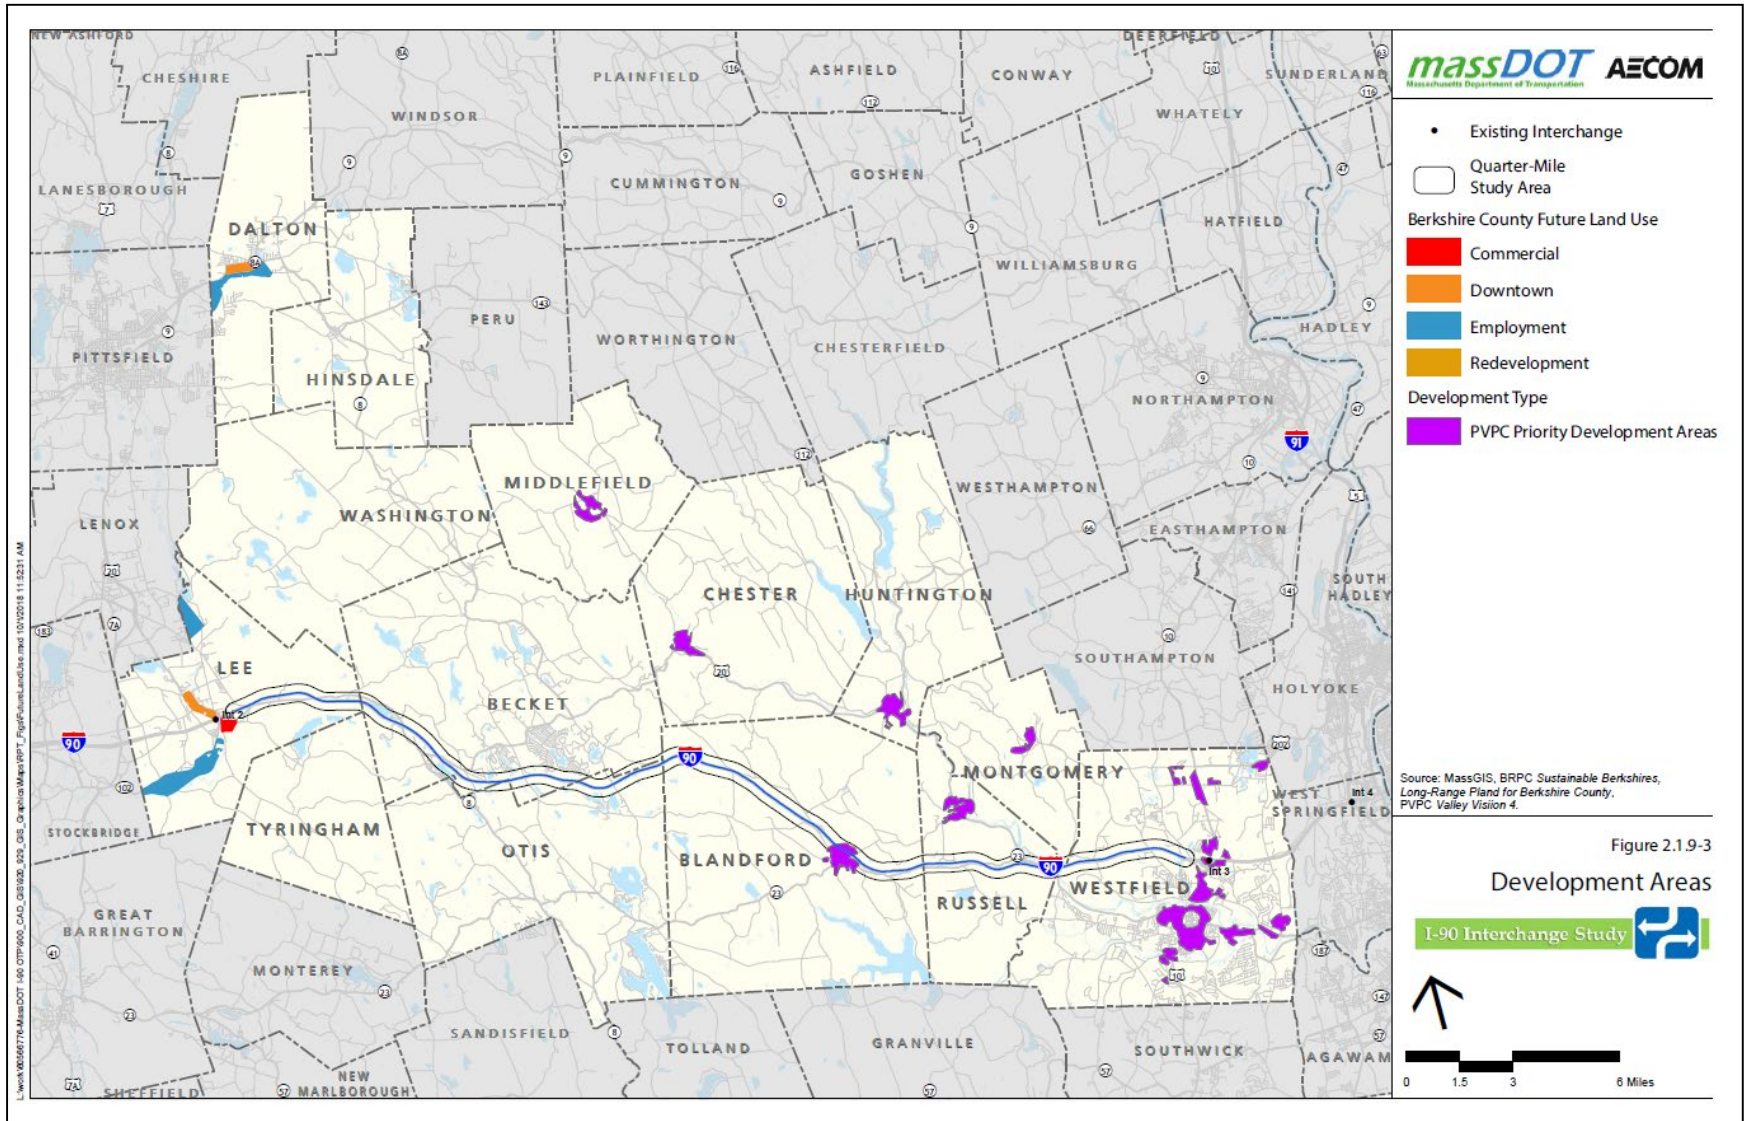

# I-90 Interchange Study

Travel Demand Modeling  
PVPC and BRPC Priority  
Development Areas

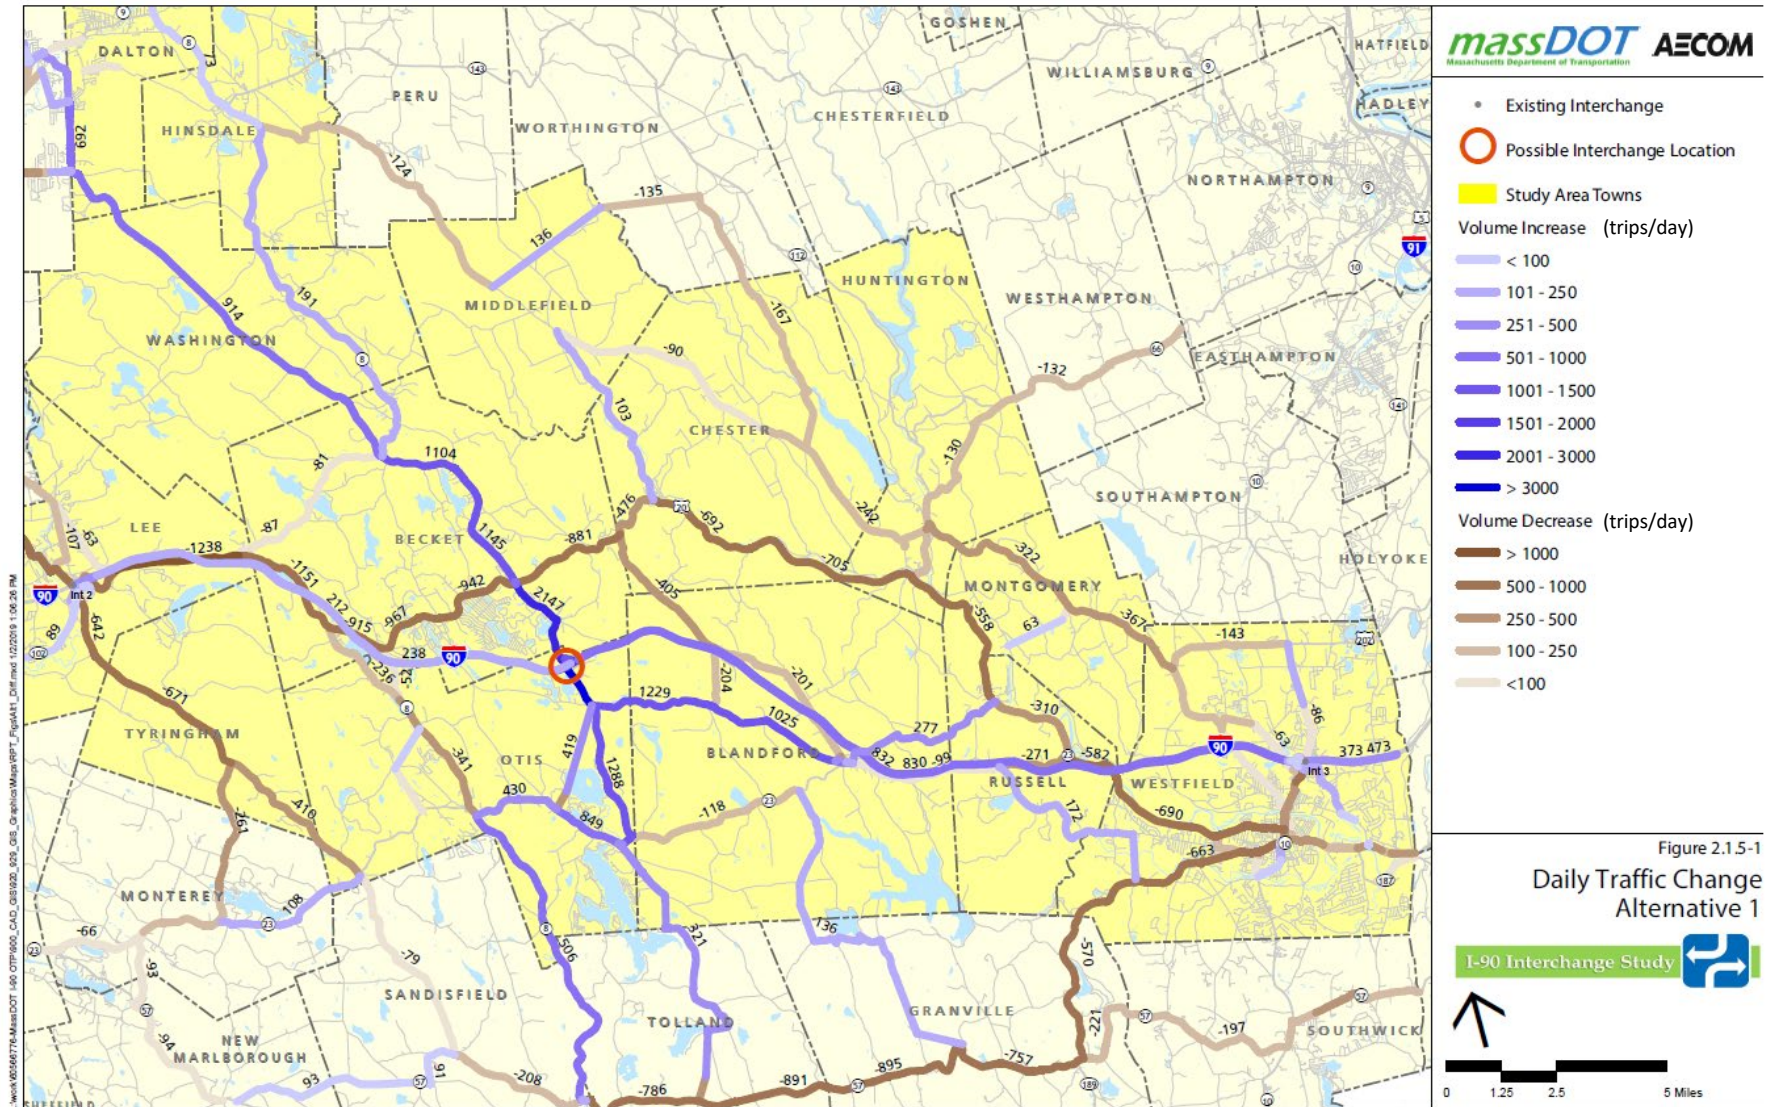

- Traffic Diversion
  - Modeling tells us how many cars and trucks would be on the roadway in 2040 (background growth)
  - For each alternative, the model reassigns routes based upon origins, destinations and travel time
  - With each alternative, some roadways will receive more traffic and others will lose traffic
    - Diversions tell us, to some extent, which roadways will be affected and to what level

# I-90 Interchange Study

Traffic Diversion  
Alternative 1  
Algerie Road, Otis

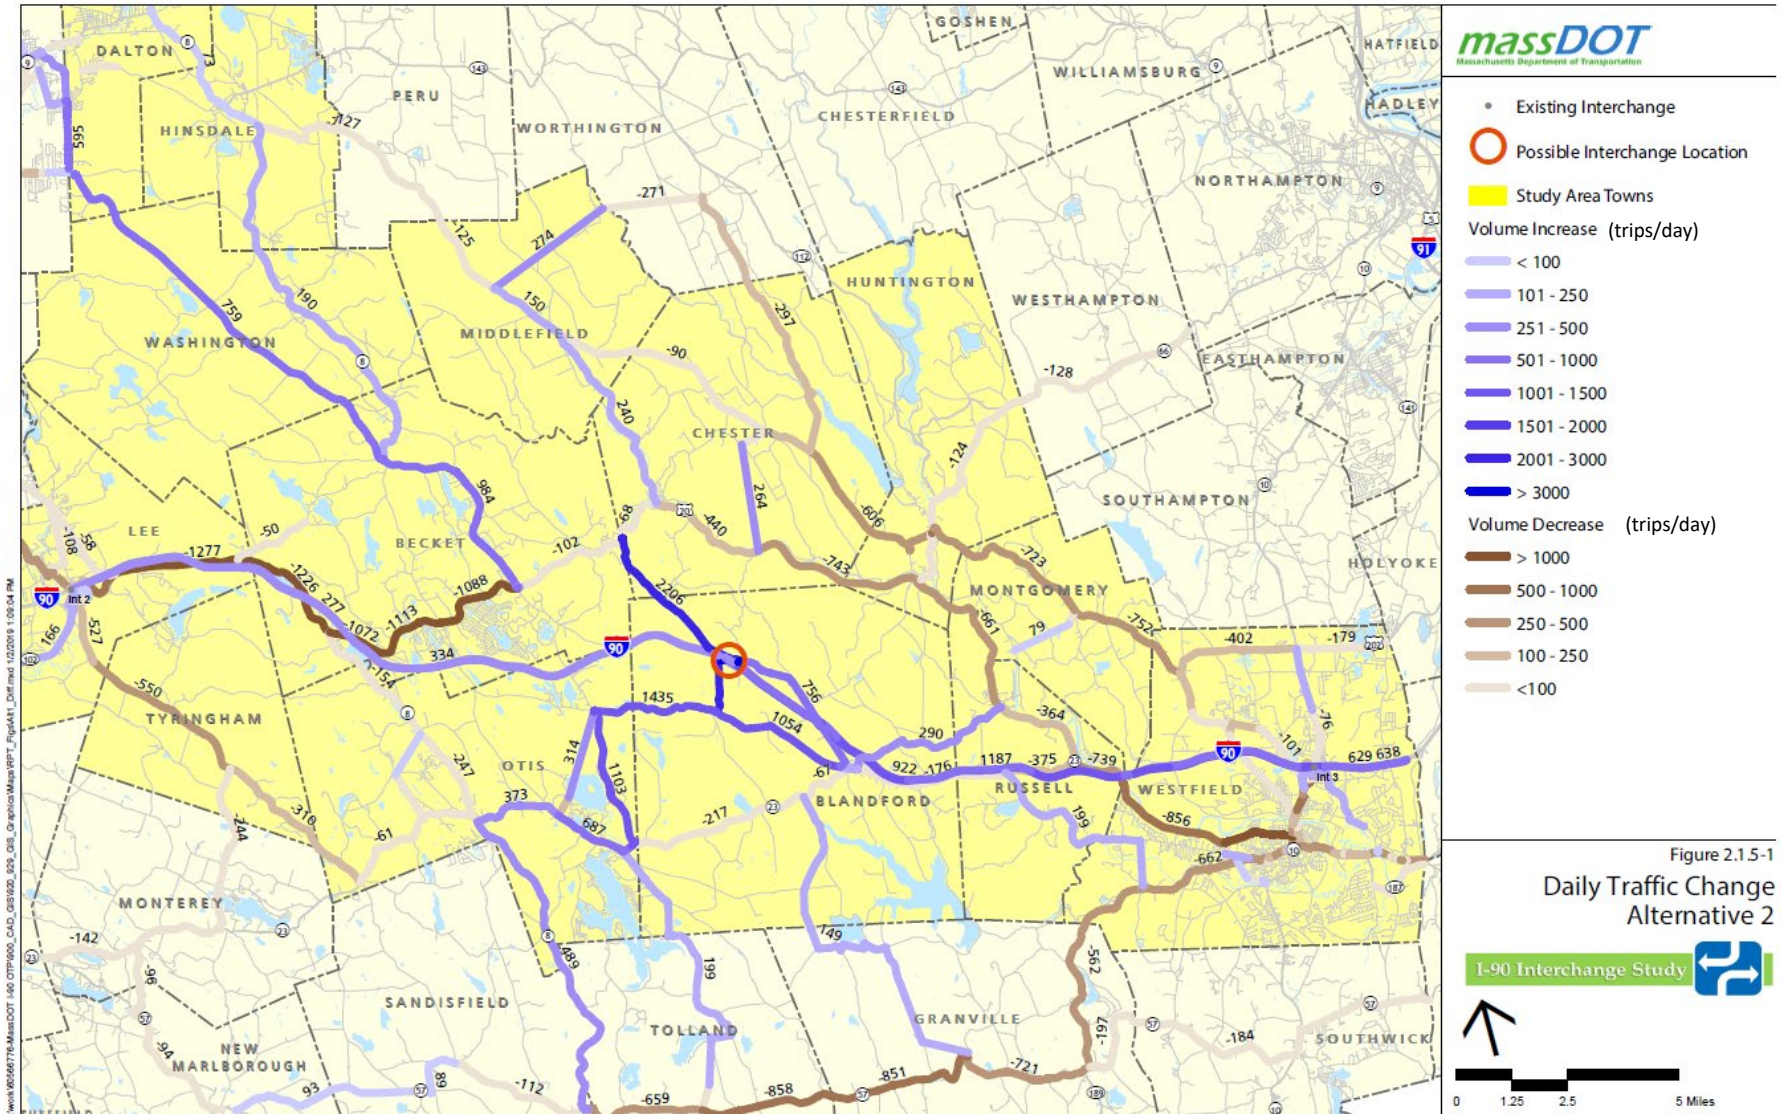

# I-90 Interchange Study

Traffic Diversion  
Alternative 2  
Blandford Maintenance Facility,  
Blandford

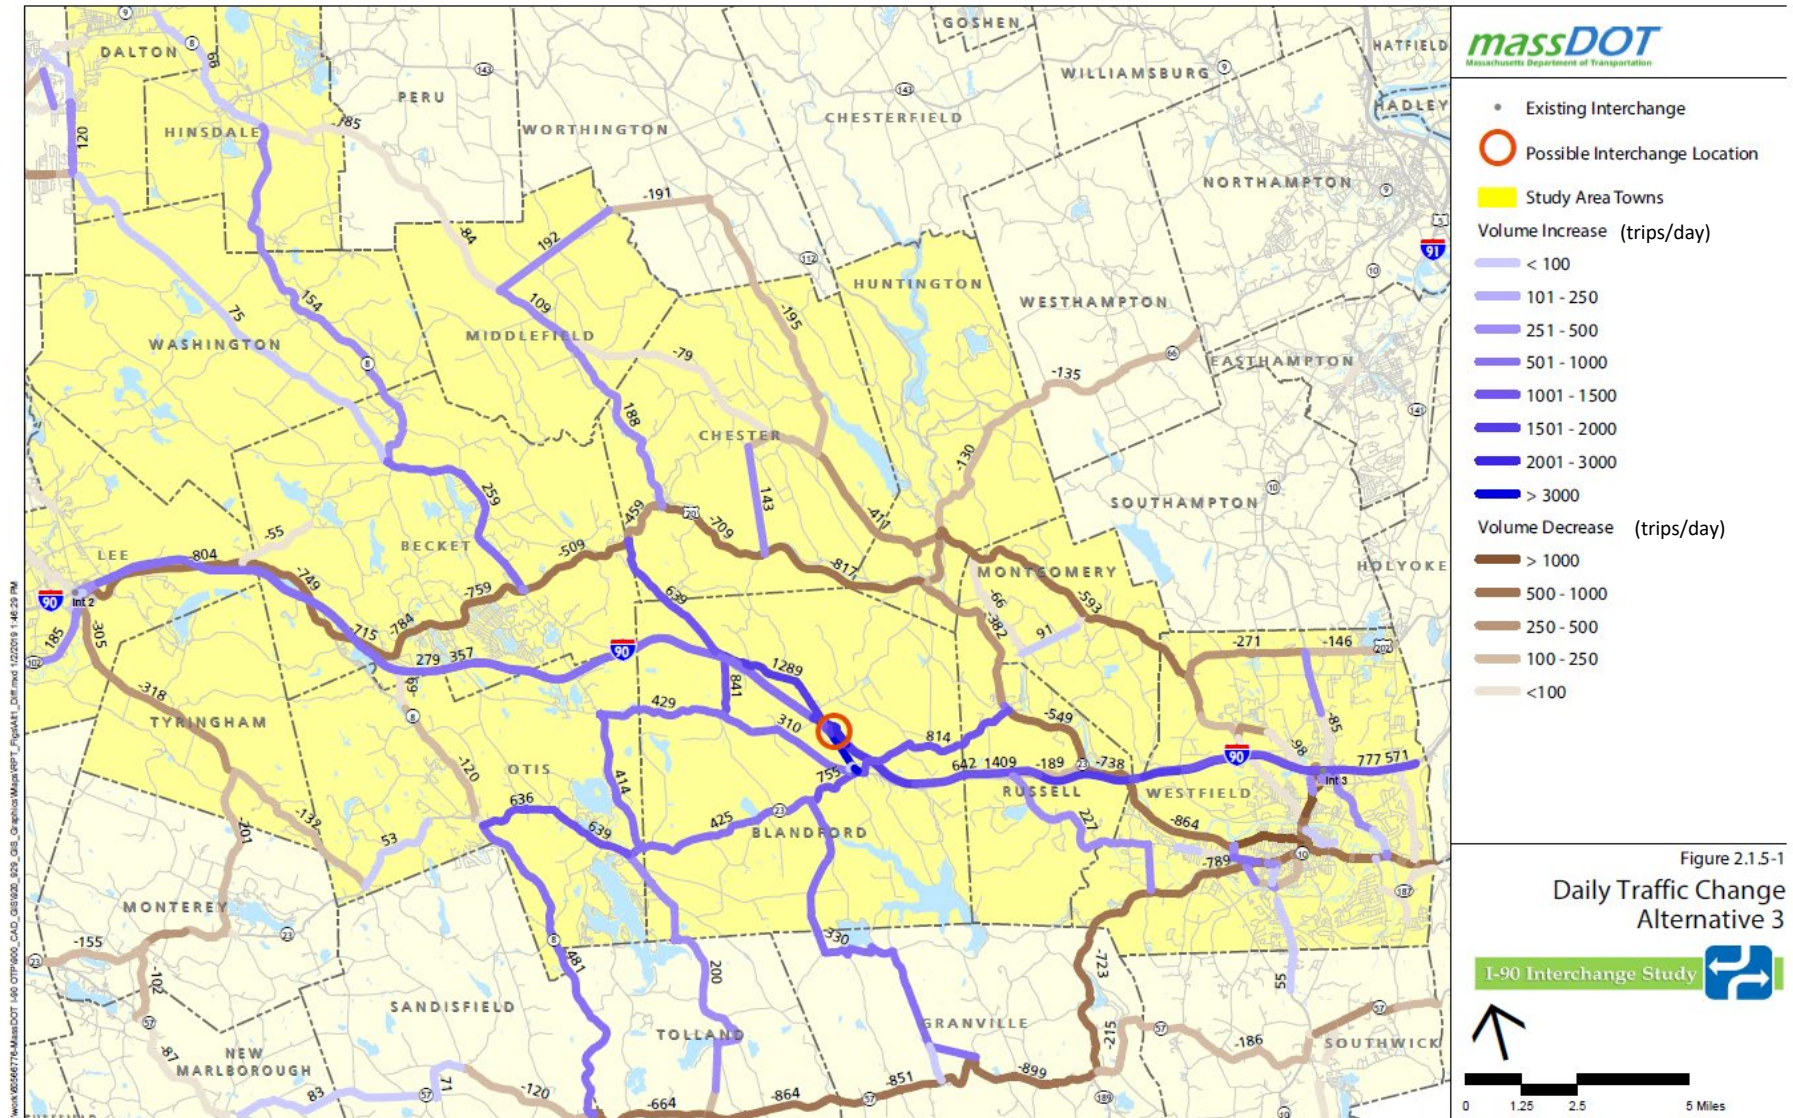

# I-90 Interchange Study

Traffic Diversion  
Alternative 3  
Blandford Service Plaza,  
Blandford

# I-90 Interchange Study

Traffic Diversion  
Alternative 1  
Algerie Road, Otis

# I-90 Interchange Study

Traffic Diversion  
Alternative 2  
Blandford Maintenance  
Facility, Blandford

## 2040 No-Build

## 2040 Build

## Change In Volumes

Exit 2

Blandford Maintenance Facility

Exit 3

# I-90 Interchange Study

Traffic Diversion  
Alternative 3  
Blandford Service Plaza,  
Blandford

## 2040 No-Build

## 2040 Build

## Change In Volumes

Exit 2

Blandford Service Plaza

Exit 3

- The proposed interchanges would attract 5,700 to 6,400 trips per day

# I-90 Interchange Study

## Traffic Modeling Summary

- Adjacent interchanges would experience traffic reductions
- Changes at Exits 2 and 3 are net reductions
- Traffic patterns will change on local roads and between existing interchanges and the new interchange
- New ramp volumes reflect combination of new I-90 users and existing users selecting different routes

|                        | Alt. 1 Algerie Road | Alt. 2 Blandford Maintenance Facility | Alt. 3 Blandford Service Plaza |
|------------------------|---------------------|---------------------------------------|--------------------------------|
| <b>Diversion to:</b>   | 5,771 trips/day     | 6,412 trips/day                       | 5,922 trips/day                |
| <b>Diversion from:</b> |                     |                                       |                                |
| Exit 2, Lee            | -64 trips/day       | -346 trips/day                        | -134 trips/day                 |
| Exit 3, Westfield      | -597 trips/day      | -1,044 trips/day                      | -1,433 trips/day               |

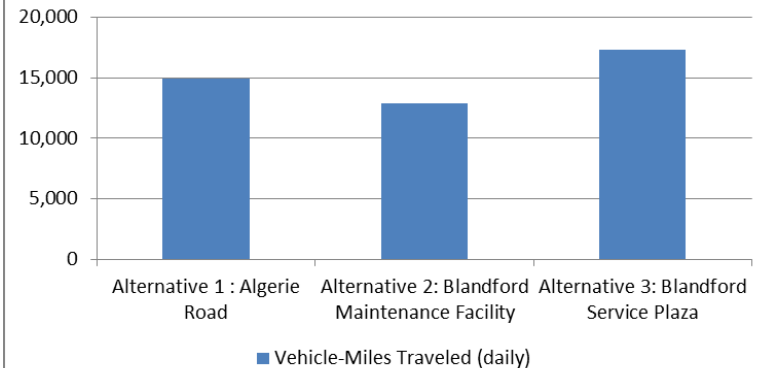

# I-90 Interchange Study

## Traffic Modeling Summary Changes in VMT and VHT

- Reductions in vehicle-miles traveled (VMT) of 12,500 to 17,500 miles/day
- Reductions in vehicle-hours traveled (VHT) of 900 to 1,300 hours/day
- Overall annual benefits
  - Fuel savings of 200,000 to 282,000 gallons/year (using EPA factors)
  - 328,000-475,000 fewer hours per year in vehicle travel time
  - Greenhouse gas reductions of 1,775 to 2,500 metric tons/year

**Regional Mileage Savings**

**Regional Travel Time Savings**

- Since last meeting, interchange concepts have been developed in further detail
  - Accuracy in the concepts aides in alternatives analysis
- On-screen walkthrough of interchange concepts using design software

# I-90 Interchange Study

Concept Design  
Alternative 1  
Algerie Road, Otis

- Finalized concept design
  - Wetland impacts:  
Less than 500 square feet (SF)
  - Open space/Article 97 impacts:  
Approximately 3,100 SF
  - ROW impacts:  
Approximately 17,000 SF
  - Residences within ¼ mile: 7
  - Potential property taking:  
4 parcels (2 Commonwealth of Massachusetts)

# I-90 Interchange Study

Emergency ramp from  
Algerie Road to I-90  
eastbound

Steep grade from Algerie  
Road onto existing I-90  
eastbound emergency ramp

**massDOT**  
Massachusetts Department of Transportation

**AECOM**

- Comments / attributes / cost estimate
  - Bridge piers are a constraint
  - High truck traffic component
  - Construction estimate (not including ROW takings):
    - Interchange: Approximately \$26.3 million
    - Local Road upgrades: Approximately \$11.5 million
      - Algerie Road: 5.5 miles from interchange to Route 23 and to Bonny Rigg Road
      - Bonny Rigg Road: 1.25 miles from Algerie Road to Route 8
    - Total: Approximately \$37.8 million

# I-90 Interchange Study

Concept Design  
Alternative 2  
Blandford Maintenance  
Facility, Blandford

- Finalized concept design
  - Wetland impacts: None
  - Water resources impacts:  
Approximately 180,000 SF
  - Open space/Article 97 impacts:  
Less than 300 SF
  - ROW impacts:  
Approximately 92,000 SF
  - Residences within ¼ mile: 18
  - Potential property taking:  
4 parcels

intersection of Chester  
Road / Old Chester Road

# I-90 Interchange Study

Concept Design  
Alternative 2  
Blandford Maintenance  
Facility, Blandford

- Comments / attributes / cost estimate
  - Condition of bridge over I-90
  - Integration with existing maintenance function
  - Construction estimate (not including ROW takings):
    - Interchange: Approximately \$19.4 million
    - Local Road upgrades: Approximately \$10.1 million
      - Old Chester Road: 4 miles from interchange to Route 23
      - Chester Road: 3.5 miles from interchange to Route 20
    - Total: Approximately \$29.5 million

# I-90 Interchange Study

Concept Design  
Alternative 3  
Blandford Service Plaza,  
Blandford

- Finalized concept design
  - Wetland impacts:  
Less than 500 SF
  - Water resources impacts:  
Approximately 106,000 SF
  - Open space/Article 97 impacts:  
None
  - ROW impacts:  
Approximately 21,000 SF
  - Residences within ¼ mile: 15
  - Potential property taking:  
2 parcels

Concept Design  
Alternative 3  
Blandford Service Plaza,  
Blandford

- Comments / attributes / cost estimate
  - Condition of North Street bridge over I-90
  - Integration with existing plaza functions
  - Construction estimate (not including ROW takings):
    - Interchange: Approximately \$20.4 million
    - Local Road upgrades: Approximately \$13.6 million
      - Chester Road: 6.8 miles from interchange to Route 20 via North Street and Chester Road
      - North Street: 1.3 miles from interchange to Route 23 via North Street
    - Total: Approximately \$34.0 million

# I-90 Interchange Study

Other Business

- Opportunity for public comment

- Next Steps
  - Complete remaining future conditions analyses
    - Local intersection analyses
    - Economic impact review
    - Health impact review
    - Mobility analysis
  - Develop recommendations
  - Complete draft feasibility report for review
  - Next Working Group meeting: Spring, 2019
  - Next Open House meeting: Spring, 2019

# I-90 Interchange Study

## Schedule

|   | 2018     |       |       |     |      |      |        |           |         |          |          |         |          |       | 2019  |     |  |  |
|---|----------|-------|-------|-----|------|------|--------|-----------|---------|----------|----------|---------|----------|-------|-------|-----|--|--|
|   | February | March | April | May | June | July | August | September | October | November | December | January | February | March | April | May |  |  |
| Task 1: Study Area, Goals and Objectives, Evaluation Criteria, and Public Participation |          |       |       |     |      |      |        |           |         |          |          |         |          |       |       |     |  |  |
| Study Area  |          |       |       |     |      |      |        |           |         |          |          |         |          |       |       |     |  |  |
| Goals and Objectives  |          |       |       |     |      |      |        |           |         |          |          |         |          |       |       |     |  |  |
| Evaluation Criteria   |          |       |       |     |      |      |        |           |         |          |          |         |          |       |       |     |  |  |
| Public Participation Plan   |          |       |       |     |      |      |        |           |         |          |          |         |          |       |       |     |  |  |
| Task 2: Existing Conditions, Future No-Build Conditions, and Issues Evaluation          |          |       |       |     |      |      |        |           |         |          |          |         |          |       |       |     |  |  |
| Existing Conditions and Data Collection   |          |       |       |     |      |      |        |           |         |          |          |         |          |       |       |     |  |  |
| Future Year Conditions  |          |       |       |     |      |      |        |           |         |          |          |         |          |       |       |     |  |  |
| Definition & Evaluation of Issues & Opportunities                                       |          |       |       |     |      |      |        |           |         |          |          |         |          |       |       |     |  |  |
