

Participant	Question	Answer
Victoria Masone	For disasters with many projects that take many years to obligate, can the Town submit for intermittent management costs?	You cannot submit for management costs on projects that are not obligated, and FEMA will only pay up to 5% of all costs of projects obligated. You unfortunately cannot get any advance, think of this policy as an incentive to get your projects in, so that FEMA can obligate it and you can in turn recoup some of the management costs.
Michelle Corbin	Can you please go into examples of indirect cost?	Preliminary Disaster Assessments, Office Supplies certain office supplies may not be eligible at the onset of a disaster, but were necessary for a specific project, or for response to the incident.
Michelle Papanicolaou	When you state that you submit Management Costs in Category Z and not on Grants Portal where does one access that software and or document?	It would take place through the portal in your sub-recipient, streamlined application. Cat Z, is the category of project that FEMA will write for management costs, when you request management costs in the streamlined application.
