Observations and Recommendations

- 1. The inmate population was 595 at the time of inspection.
- 2. The kitchen exhaust system was not in compliance with the provisions for inspection, cleaning and labeling required by 527 CMR 1.00, Chapter 50 Commercial Cooking Operations. The CSP recommends you contact the Department of Fire Services for further information.
- 3. The warewash machine was out-of-order at the time of inspection. Kitchen staff were using styrofoam trays and manually washing and sanitizing any additional equipment until repairs can be made.
- 4. During the inspection of the Work Release Kitchen and the CWP Building, the CSP observed no cleaning chemicals or sanitizing agents for food contact surfaces or for the 3-compartment sink. Although the Work Release and CWP food service areas were not in use at the time of inspection, the CSP stated their concerns with the lack of cleaning and sanitizing agents present and the inability for kitchen staff to properly clean and sanitize the food service areas.
