

## Minimum Heating Guidelines

Massachusetts General Law Section 113, Chapter 149 requires that adequate heat be provided from October 15 through May 15:

“Every factory, workshop, manufacturing, mechanical and mercantile establishment, railroad freight house, railway express terminal, public garages and premises used by express, trucking, and transportation companies, and any other building in which a person is employed, other than a building under construction, shall be well lighted, well ventilated, and kept free from unsanitary conditions. The work rooms therein in actual use shall be properly heated during the period from October 15 to May 15, according to reasonable rules and regulations adopted by the Department establishing minimum requirements with reference thereto;”

Thermal comfort can depend upon the type of activity conducted by employees, humidity, indoor and outdoor temperature differences, radiant heat, and ventilation. Industry design guidelines establish the following temperatures for employee comfort:

### Minimum Heat Guidelines<sup>1</sup>

<b>Factories</b>	<b>60-68 °F depending on activities</b>
<b>Foundries</b>	<b>50 °F</b>
<b>Machine Shops</b>	<b>60 °F</b>
<b>Offices</b>	<b>66-68 °F</b>
<b>Restaurants</b>	<b>62 °F</b>
<b>Schools</b>	<b>66-68 °F in classrooms</b>
<b>Stores</b>	<b>66-68 °F</b>
