

# MEOC-1/MEOC-2 Mobile Emergency Operations Center Trailers

MEMA has two field response support trailers, named Mobile Emergency Operations Centers (MEOC-1 and MEOC-2). The MEOC's are fully outfitted and are ready for deployment at a moments notice for responses and planned events where a command post is needed. These trailers can be requested by **any** community or agency in the Commonwealth through either the MEMA Regional offices or MEMA Headquarters for use in emergencies, planned events, and disasters. The MEOC trailers provides a variety of on scene capabilities, including a command and control environment or a public registration area if needed. Internet and voice connectivity through both cellular and satellite services are available, along with a variety of both mobile and portable radios for immediate use in the field. Each of the MEOC trailer's work areas have a conference table to accommodate up to ten people, and an additional two workstations for up to another five people. There are also on-board color plotters for use in printing large scale field maps, and multi-function printers/copier/scanners on board to create a fully functional office environment in the field. Situational awareness is achieved through both satellite and off-air television along with recordable cameras that are mounted on 42' retractable masts. The images on the cameras can also be streamed live to a website address if needed for remote viewing. The MEOC's have ADA compliant handicap accessible ramps, and Wi-Fi capability providing internet throughout the incident or event scene. In addition, the trailers have a unique 10' total height to allow for bridge/tunnel travel statewide.

**THE MEOC's CONTAIN THE FOLLOWING EQUIPMENT:**

- (4) MOTOROLA XTL VHF/UHF/800 MHz RADIOS**
- (12) MOTOROLA XTS2500 800 MHz CACHE RADIOS**
