TECHNICAL APPENDICES	44

INTRODUCTION

INTRODUCTION

The Town of Rockport used funding from a “Massachusetts Downtown Initiative Technical Assistance Program” from the State Department of Housing and Community Development (DHCD) to prepare the Downtown Rockport Parking Plan. The Town staff provided oversight and review of the parking management plan, final report, and final presentation. In addition, Town businesses, residents, visitors, and employees provided insight and input into this study through a series of stakeholder meetings and a public open house held in October, 2018.

On behalf of DHCD and the Town of Rockport, the study team would like to thank all stakeholders and public participants for their constructive inputs.

INTRODUCTION | BACKGROUND & UNDERSTANDING

Your Town: Rockport

The Town of Rockport is located 40 miles northeast of Downtown Boston. Rockport is a historical New England town with a population of nearly 7,000. The Town is accessible via Route 127, and MBTA service is provided by the Rockport station on the Newburyport/Rockport commuter rail line.

Downtown Rockport consists of a dense, historic core including shops, galleries, restaurants, and cultural facilities, many of which have second and third story residences. The subdividing of existing units into multi-unit dwellings has put increasing pressure on an already limited parking supply. Historically, there has been a running debate and tension between the parking needs of the Downtown residents and local businesses.

The scarcity of spaces to park Downtown is most acute during the summer, resulting in parking saturation by mid-day into the evening, seven days a week. During the summer months the volume of vehicles downtown triples. The winter season has its own unique challenges with older, narrow streets requiring vehicles to relocate to accommodate road treatment and snow removal.

The Rockport Planning Board has been continually working on parking issues, most recently through the parking section of the 2011 Downtown Master Plan. Other ongoing efforts include the marketing and use of the Park & Ride lot at the Transfer Station, which provides free parking for tourists who ride the trolley to the Downtown area during the summer.

INTRODUCTION | STUDY GOALS

What is the Downtown Rockport Parking Plan trying to achieve?

As the Town continues to experience growth during the peak season, reevaluating the current parking system and adjusting it to create a new, structured parking management plan is of utmost importance for Downtown and the residents. Specific goals for the study include the following:

- **Implement a parking management strategy that will calm traffic and alleviate Downtown congestion**
- **Improve and provide better parking facilities to support future economic opportunities and relieve parking tension between residents and tourists**
- **Better accommodate tourist parking demand during peak seasons**

EXISTING CONDITIONS

EXISTING CONDITIONS

This section documents existing parking conditions within Downtown Rockport. Data was collected in the Summer of 2018 , including existing parking supply, regulations, levels of utilization, and the Town's current parking management strategies.

EXISTING CONDITIONS | STUDY AREA

To effectively measure parking usage across Downtown, the study team and Town identified a study area that generally includes King Street, Pools Lane, Broadway, High Street, and the Atlantic Ocean. This study area also includes the Rockport commuter rail station and Front Beach.

The study area also encompasses various private lots along Beach Street, Main Street, and Bearskin Neck that serve business patrons, employees, and residents. Businesses rely heavily on surface parking lots for customer and employee parking, as on-street parking in the Town Center is limited.

EXISTING CONDITIONS | PARKING INVENTORY

Within the Downtown study area, there is a total of 1,540 parking spaces. Of this inventory, 335 spaces are on-street and 1,205 spaces are off-street.

In order to gather the most accurate understanding of Rockport's existing parking, the team recorded regulations within the study area as they would be viewed by a "visitor" or Downtown Rockport "guest". A breakdown of parking supply by regulation is reflected in the tables below and to the right.

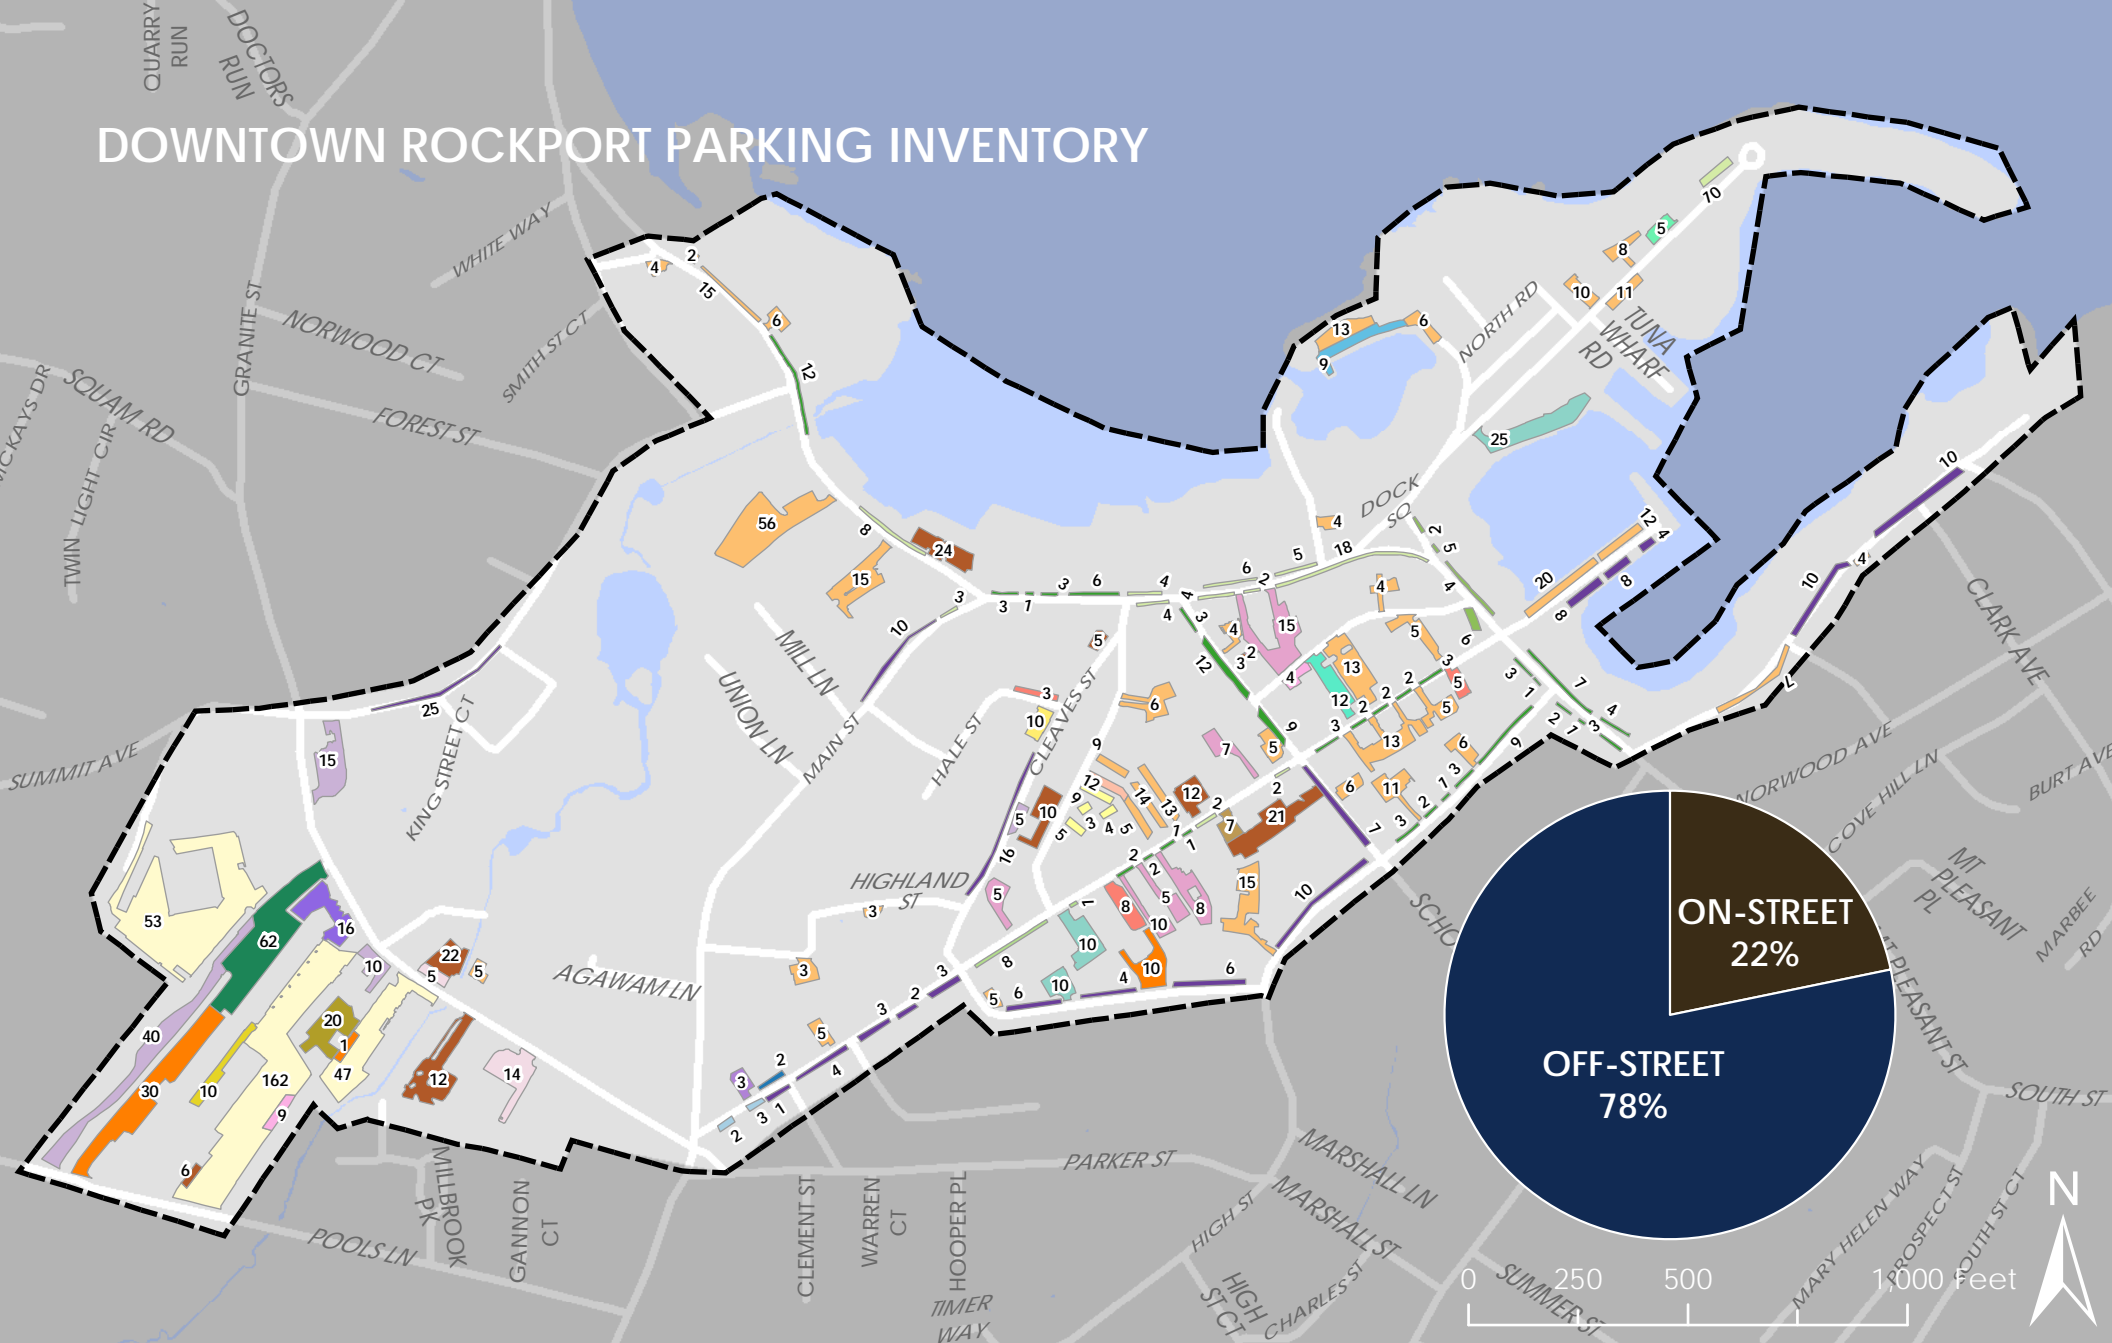

ON-STREET

Regulation	Definition	Parking Supply	Percentage
Unregulated	No regulation or signage	117	35%
Metered Kiosk Parking: 10am-6pm; Monday-Sunday; 4 Hour Limit; \$1/Hour	"\$1/hr, 4hr limit, 10am-6pm, Monday-Sunday" signage	105	31%
Metered Parking: 10am-6pm; Monday-Sunday; 4 Hour Limit; \$1/Hour	"\$1/hr, 4hr limit, 10am-6pm, Monday-Sunday" signage	67	20%
Residential Parking	"Resident parking only" signage	22	7%
Metered Parking: 10am-6pm; Monday-Sunday; 4 Hour Limit; \$1/Hour; 30 Minute Limit When Post Office Open	"\$1/hr, 4hr limit, 10am-6pm, Monday-Sunday, 30 minute limit when post office open" signage	9	3%
Metered Parking: 10am-6pm; Monday-Sunday; 4 Hour Limit; \$2/Hour	"No parking	8	2%
15 Minute Parking	"15 minute parking only" signage	5	1%
Drop-Off/Pick-Up Only	"Drop-off & Pick-up parking only" signage	2	1%

OFF-STREET

Regulation	Definition	Parking Supply	Percentage
Residential Parking	"Resident sticker parking only" signage	340	28%
1 Hour Parking, Customers Only	"1 hour parking for customers only" signage	262	22%
Reserved Parking	"Reserved parking only" signage	120	10%
Unregulated	No regulation or signage	91	8%
Commuter Rail Parking, 72 Hour Limit	"MBTA Commuter Rail parking only, 72 Hour Limit" signage	62	5%
Customer/Employee Parking Only	"Customer & employee parking only" signage	53	4%
Authorized Vehicles Only	"Authorized vehicle parking only" signage	41	3%
72 Hour Limit, No Public Parking, Resident Sticker Required	"Library patrons parking only" signage	25	2%
Town Hall Parking Only	"Town Hall parking only" signage	21	2%
Private Parking	"Private or reserved parking only" signage	20	2%
Post Office Parking Only	"Post office vehicle parking only" signage	20	2%
Customer Parking Only	"Customer parking only" signage	19	2%
Unregulated, No Parking After 9 AM	"No parking after 9AM" signage	16	1%
Motel Parking Only	"Motel guest parking only" signage	15	1%
Employee Parking Only	"Employee parking only" signage	13	1%
Employee/Resident Parking	"Employee & resident parking only" signage	12	1%
Library Parking Only	"Library patrons parking only" signage	12	1%
Metered Parking: 10am-6pm; Monday-Sunday; 4 Hour Limit; \$1/Hour	"\$1/hr, 4hr limit, 10am-6pm, Monday-Sunday" signage	10	1%
Loading Zone	"Loading zone only" signage	10	1%
Boat Owners Parking	"Boat owners parking only" signage	9	1%
Church Parking Only	"Church visitors parking only" signage	8	1%
Police and Fire Vehicles Only	"Emergency vehicle parking only" signage	8	1%
Hotel Guests Only	"Hotel guests parking only" signage	8	1%
10 Minute Parking	"10 minute parking only" signage	7	1%
Unregulated, No Overnight Parking	"No parking overnight" signage	3	0%

EXISTING CONDITIONS | PARKING UTILIZATION

Parking Utilization Process

Periodic counts of parking occupancy provided data for a time series of parking demand and patterns, at different times of a weekday and weekend in the study area. The team worked with the town to identify a busy summer weekday and weekend in order to capture peak demand in Downtown Rockport. To gather this data, the team counted parked cars along each on-street segment and every off-street facility in the study area, beginning at 8am on the weekday and 11am on the weekend.

Mapping the resulting parking utilization data helped to identify clear patterns of high and low usage, including the impact of regulations. Land usage, regulations, topography, and signage can drastically impact how neighboring parking assets are utilized.

To ensure efficient parking management operations, it is ideal to have at least one empty space on each block of street parking, to ensure easy customer access to businesses. This typically equates to about 1 out of 10 spaces free, or a target of 10% vacant or per block. Similarly a goal of at least 10% vacancy is considered ideal in off-street lots. If any facility has less availability, it is effectively at its functional capacity and drivers perceive a lack of availability. Facilities with lower utilization have excess capacity and can accommodate additional parked cars.

The study team conducted parking occupancy counts on a typical summer weekday and weekend. Based on meter revenue data, July and August are the busiest months of the year. Utilization counts were conducted on a Wednesday in August from 8am to 8pm, and a Saturday in August from 11am to 9pm.

Spatial Analysis of Parking Utilization: General Analysis

The utilization maps included in this report describe the overall occupancy and availability levels of all parking spaces within Downtown Rockport. Maps for all time periods can be found in the appendix.

Parking Utilization Rates

▲ Parking utilization rates are categorized in three groups, where 0-60% occupancy reflects low utilization, 60-80% is slightly busier, 80-90% is optimal, and 90%+ is at or over capacity

Monthly Parking Kiosk/Meter Revenues (2018)

▲ Based on kiosk/meter revenue from 2018, July and August are Downtown Rockport's busiest months

PARKING UTILIZATION | PEAK DOWNTOWN CORE WEEKDAY - 6:00 PM

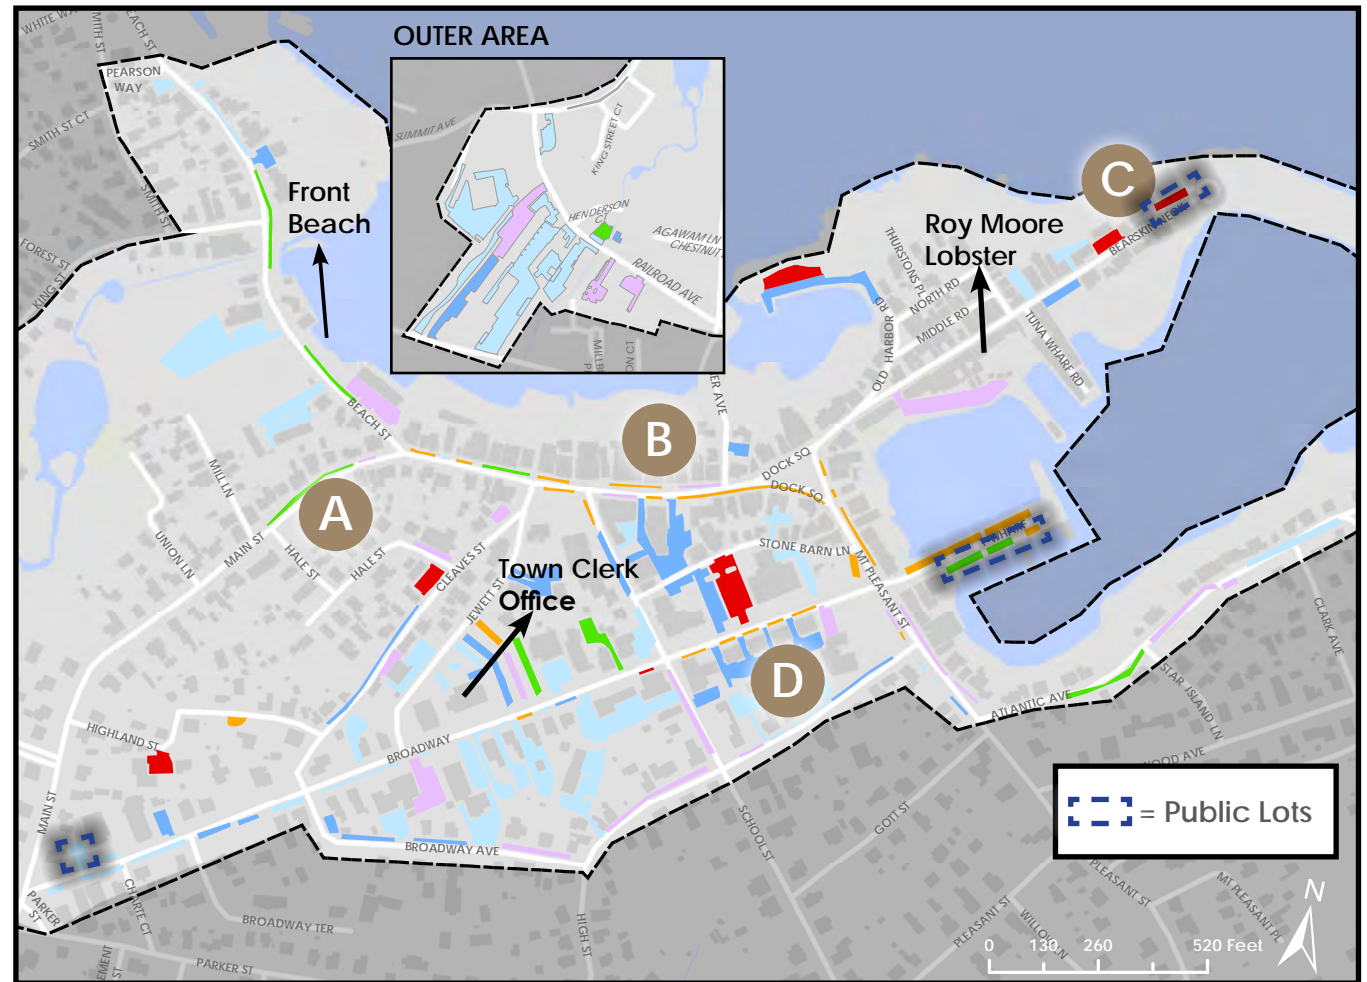

DOWNTOWN CORE

OUTER AREA

— = Optimal parking capacity

A Main Street well utilized

B Downtown parking is busy in the evening for dinner rush

C Bearskin Neck public lot and hotel parking over capacity

D Upper Broadway on-street spaces highly utilized

PARKING UTILIZATION | PEAK DOWNTOWN CORE WEEKEND - 3:00 PM

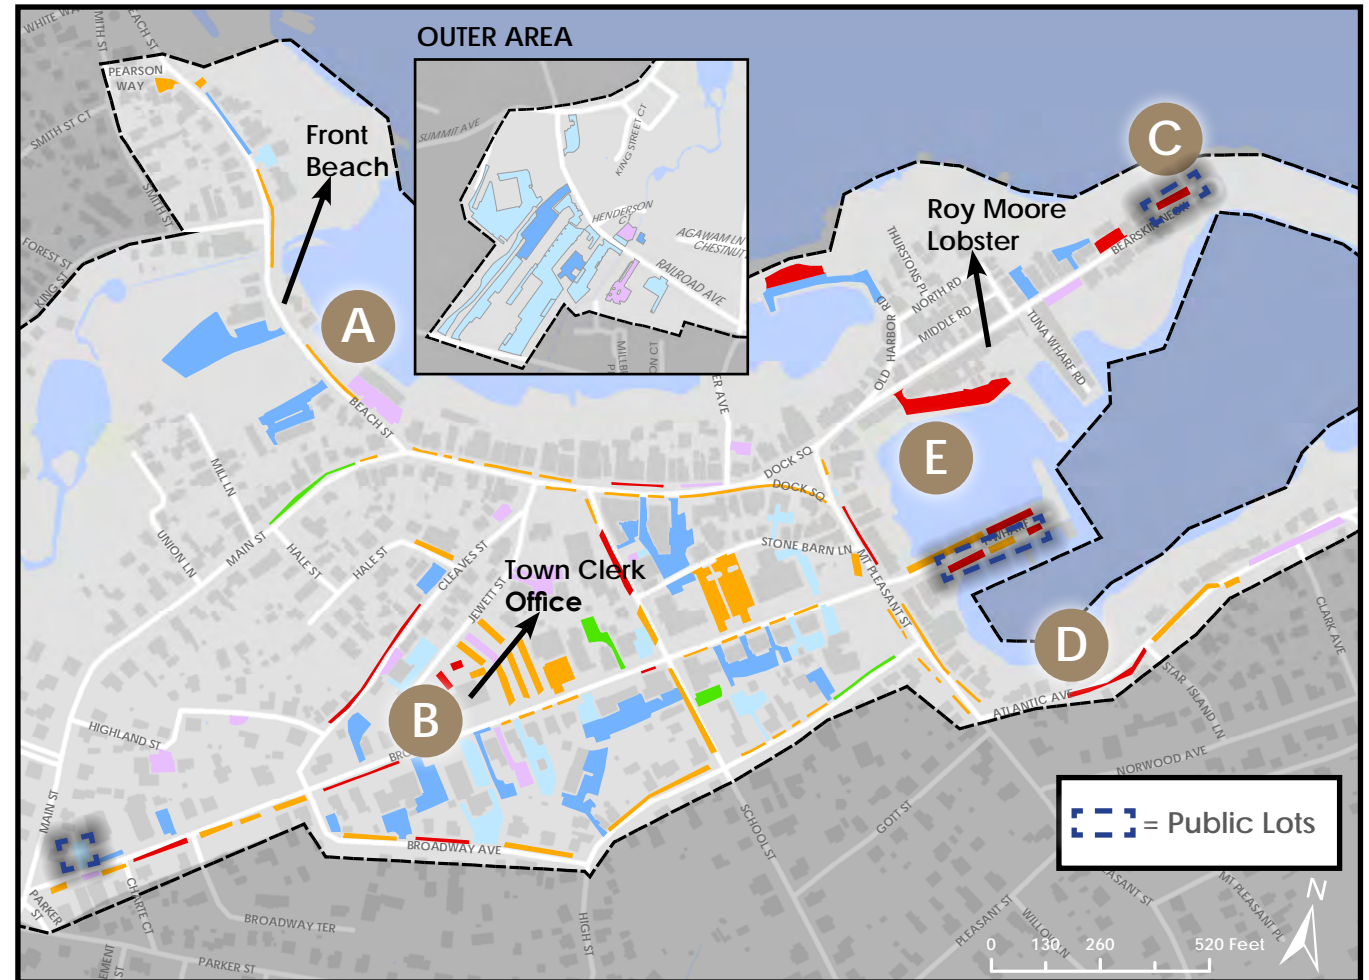

DOWNTOWN CORE

OUTER AREA

— = Optimal parking capacity

A Front Beach parking very full

C Public metered parking over capacity

E Resident only parking at Bradley Wharf over capacity

B Town Clerk Office & resident spaces at capacity

D Unregulated on-street parking very full

PARKING UTILIZATION | WEEKDAY FINDINGS

DOWNTOWN CORE

ON-STREET

- Peak Downtown core utilization at 6PM (around 50%)
- Outer area off-street spaces never above 40% utilized
- Peak on-street spaces at 12PM (around 70%) utilized
- Off-street spaces underutilized

OUTER AREA

OFF-STREET

DOWNTOWN CORE ON-STREET

PARKING UTILIZATION | WEEKEND FINDINGS

DOWNTOWN CORE

ON-STREET

- Downtown core peak utilization at 3PM (almost 80%)
- Periphery area off-street spaces are very underutilized
- Periphery on-street well used at peak
- On-street spaces and Downtown core on-street spaces at and exceeding capacity
- By brunch time, Downtown is over capacity

OUTER AREA

OFF-STREET

DOWNTOWN CORE ON-STREET

EXISTING CONDITIONS | OTHER PARKING ACTIVITY EVALUATION

Although not within the study area, the Town operates a remote parking lot during the summer months at the Transfer Station (Park & Ride lot). The Cape Ann Transportation Company (CATA), operates a shuttle funded by the Town that serves trips to and from the Park & Ride lot and Downtown. The shuttle runs every 15 minutes and costs \$1, although parking is free. This may disincentivize people from using this facility, since it costs the same price to park in downtown metered spaces. Increasing the price to park in the Downtown core from \$1 to \$2 yields around a \$20,000 increase in revenue (as seen in recommendation 1, page 32), which could potentially cover the cost of making the shuttle fare-free (as the shuttle received \$22,000 in fares in 2018). Some key findings from this evaluation includes:

- The busiest days in the Park & Ride lot reflect peak tourist weekends in July and August
- Parking patterns are heavily weather dependent on weekends, which necessitates a flexible system

Number of Cars Parking in Park & Ride lot by Day

◀ CATA shuttle brochure promoting the beach and Downtown shuttle service and free parking

EXISTING CONDITIONS | OTHER PARKING ACTIVITY INFORMATION

The study team conducted an additional analysis on parking kiosk/meter and ticket revenues from 2017-2018. Changes to parking management such as increased violation fees, parking control officers, and an extension to the pay-to-park season resulted in the following improvements:

- Meter revenue increased by almost 5% between 2017 and 2018. This is likely due to the replacement of some meters with pay-and-display kiosks, which do not allow people to use time left on a meter from a previous vehicle
- Parking ticket revenue increased by nearly 60% from 2017-2018. This is likely due to an increase in some violation fees and additional parking control staff.

Parking Kiosk/Meter & Ticket Revenues (2017 & 2018)

▲ Parking kiosk/meter and ticket revenues have increased in the past year

Key Findings

The comprehensive review of parking inventory and utilization provided an important baseline understanding for the study. In addition, this data is excellent background information for the Town as it considers changes such as new development or adjustments to roadway infrastructure.

Key findings from Downtown's parking inventory and utilization include observations around highly utilized, prime on-street spaces and surface lots in the Downtown core.

OVERALL

- High priced beach parking creates spillover into Downtown
- Periphery area on- and off-street experiences low utilization levels all day (60% and below)
- On-street spaces are in high demand
- The Park & Ride lot is free but the cost to ride the shuttle puts it at the same price point as Downtown parking, despite being less convenient

WEEKDAY

- Downtown core experiences 50% utilization most of the day
- Bearskin Neck and T-wharf are 80%+ utilized around 4PM
- Town Hall & resident parking area are underutilized (below 60% all day)

WEEKEND

- Downtown core highly utilized all day
- Off-street spaces are never above 45% utilization all day
- On-street spaces over capacity in Downtown area
- Off-street lots underutilized (0-30%) next to over utilized on-street spaces (90-100%) (especially at 7PM)
- Periphery on-street spaces well-used at peak

This page is intentionally left blank

PUBLIC PROCESS

PUBLIC PROCESS

Public outreach is integral to the parking study, helping to reveal how the parking system is used, perceived, and areas for potential improvement. The study team facilitated both targeted stakeholder interviews and a public open house in October 2018. These events provided valuable feedback from local residents, merchants, and the Chamber of Commerce.

PUBLIC PROCESS | STAKEHOLDER MEETINGS & PUBLIC WORKSHOP

On October 30, 2018, the study team and Town invited key community stakeholders including local merchants, residents, the Chamber of Commerce, Police Department, and the Traffic & Parking Committee to participate in stakeholder meetings to address and discuss parking issues and concerns. The public was then invited to the Community House the same night to participate in a hands-on “Open House” to give feedback and provide input on the parking study. The open house gave the parking study team an opportunity to markup maps and get a more detailed understanding of local parking challenges and opportunities.

Another stakeholder meeting took place on December 12th, 2018, where the study team presented findings on utilization data and draft recommendations.

Why stakeholder meetings?

Stakeholder meetings are an integral part of the parking study as they allow individual, confidential, pertinent conversations with key stakeholders identified by the Town to understand the perception of parking for various groups.

- Is there enough parking in Rockport?
- Any ideas on how to improve parking management?
- Share your concerns and ideas!

JOIN US FOR AN OPEN HOUSE

Tuesday, October 30
4:00 pm - 7:00 pm (drop in anytime)
Community House
58 Broadway

For more information, contact Richard Souza at rsouza@rockportma.gov

PUBLIC PROCESS | OPEN HOUSE PARKING COMMENTS SUMMARY

- A** Little parking signage in this general area
- B** Poor pedestrian conditions
- C** Informal street parking along Main St.
- D** Complete Streets project currently waiting for funding
- E** \$20/day informal parking
- F** Parking meters are broken
- G** No signage
- H** Small parking lot without clear regulations
- I** Shared parking opportunity

PUBLIC PROCESS | PARKING PRIORITY EXERCISE

At the open house, participants voted for their “top parking priorities.” Each participant had a set number of votes that they could assign to multiple priorities, with the option to put multiple or all of the votes on something about which they felt strongly.

WHAT ARE YOUR TOP PARKING PRIORITIES IN ROCKPORT?

Draft

<p>I WOULD LIKE IT TO BE EASIER TO USE PARKING PAYMENT TECHNOLOGY</p>	<p>I WOULD LIKE CLEARER INFORMATION ON PARKING IN DOWNTOWN</p>	<p>I WOULD LIKE BETTER ACCESS TO PARKING IN THE DOWNTOWN AREA</p>	<p>I WOULD LIKE TO PARK ONCE AND WALK TO ALL OF MY DESTINATIONS</p>
<p>I WOULD LIKE MORE BICYCLE ACCOMMODATIONS IN THE DOWNTOWN AREA</p>	<p>I WOULD LIKE TO SEE MORE WAYFINDING SIGNAGE IN THE DOWNTOWN AREA</p>	<p>I DON'T MIND PARKING A LITTLE FARTHER AWAY IF IT MEANS I DON'T HAVE TO SEARCH FOR PARKING</p>	<p>WHAT ARE WE MISSING? WRITE YOUR IDEA HERE!</p>

★ Please place stickers in the parking spots to indicate your top parking priorities.

Key Findings

- A lot of unclear parking signage leads to confusion during the busy summer months
- **Resident stickers are difficult to see**
- There is a need for a valet system for larger events
- Need for improved signage:
 - Invest in signage along roadways like Blue Gate Lane to promote the Park & Ride lot at the Transfer Station
 - **Invest in wayfinding signage, specifically at the train station, Park & Ride lot and Downtown**
- Need for multimodal improvements:
 - Increase number of bike lanes
 - Implement a bike share system
 - Distribute safe biking map created by bike committee
 - Increase number of crosswalks
- Make better use of existing parking supply by encouraging informal shared parking agreements between different uses

A photograph of a street scene in a coastal town. On the left, there is a wooden building with a red door and a sign that says 'R.S.' with an anchor. A person is walking on the sidewalk. In the center, there is a parking sign that says 'P' and 'PAY AT KIOSK'. On the right, there is a white house and a silver car driving on the road. The word 'RECOMMENDATIONS' is overlaid in large white letters on a dark blue background in the bottom left corner.

RECOMMENDATIONS

RECOMMENDATIONS

There is room in Rockport's current parking system to create a more flexible, customer-friendly, and coordinated system. The following is an overview of recommended strategies:

1. Manage areas of high demand with pricing
2. Expand Cape Anne Transit Authority (CATA) shuttle service to remote parking and eliminate fare
3. Invest in outer area lots for beach parking and Downtown employees
4. Implement a residential "Super Permit"
5. Expand metered parking zone
6. Upgrade and promote the Park & Ride lot for Downtown visitors
7. Enhance signage and wayfinding
8. Use Parking Benefit District for multimodal improvements

Project Goals

- Implement a parking management strategy that **will calm traffic and alleviate** Downtown congestion
- Improve and provide better parking facilities to support future economic opportunities and relieve parking tension between residents and tourists
- Better accommodate tourist parking demand during peak seasons

1. MANAGE AREAS OF HIGH PARKING DEMAND WITH PRICING

It is recommended that the pricing in core areas of Downtown is adjusted to match demand. This means increasing pricing at on-street meters in areas of high demand and directing demand to lower-price spaces. This will help alleviate the perceived “parking crunch” that occurs during peak times. Creating a tiered parking system within Downtown Rockport will incentivize visitors and residents to park in less utilized on-street spaces on lower Broadway. The current parking demand illustrates that parking rates can be adjusted, as beachgoers are already paying a high price in private, off-street parking lots to be close to their destination. The following is recommended:

- Expand the metered area or “core” parking zone to include parking near Front Beach, the T-Wharf, and Atlantic Avenue (see Recommendation 5)
- Absorb the beach parking along Beach Street into the new core metered zone
- Increase weekend and weekday prices within the core
- Increase the periphery zone pricing system that has no time limit

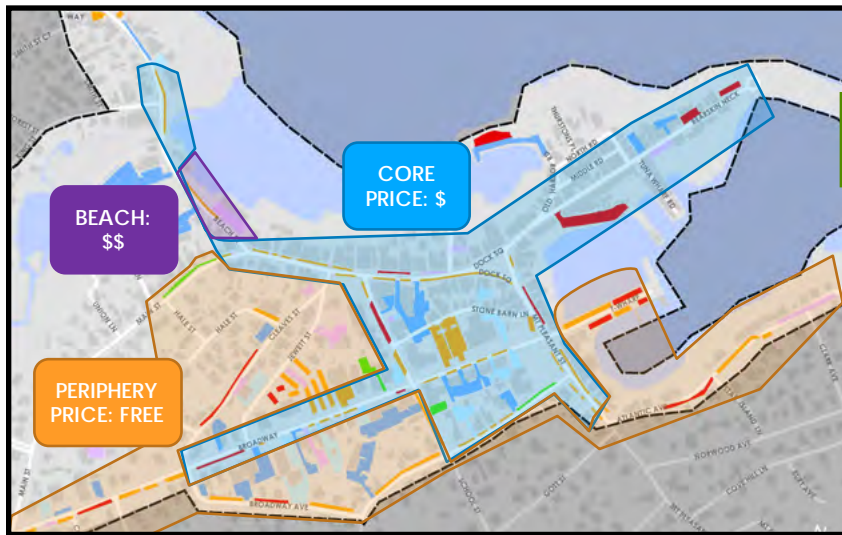

To properly set weekday and weekend prices in the core and periphery zones and achieve an overall target utilization rate of 85%, the Town can use baseline utilization data from this study to monitor changes, implement pay-by-phone to allow users to extend parking remotely, and provide pricing information on a centralized map on the Town website. Stantec’s estimates show that increasing the price in the core from \$1 to \$2 and pricing the “periphery” on-street

spaces (with the inclusion of T-Wharf and Atlantic Avenue as seen in Recommendation 5) could result in as much as a \$20,000 revenue increase for the Town over the course of one month in the highest season.

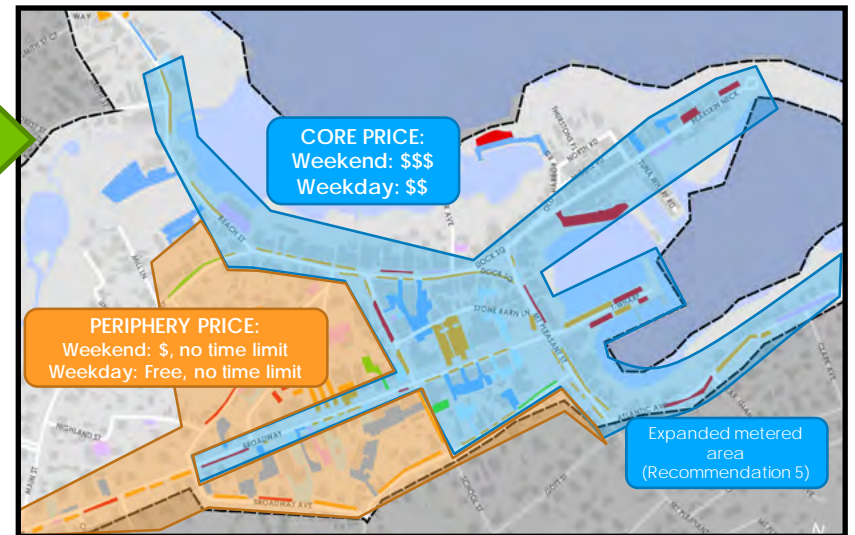

PHASE	PRICE CHANGES
1	<ul style="list-style-type: none">• Increase weekend price in Core• Peak season only (June-July-Aug)
2	<ul style="list-style-type: none">• Consider pricing periphery on weekends• Peak season only (June-July-Aug)• No time limits
3	<ul style="list-style-type: none">• Increase price in core for weekdays• All season
4	<ul style="list-style-type: none">• Price periphery on weekends• No time limits

▲ This phasing plan presents an approach to adjusting price to match demand in Downtown. The Town may consider making these adjustments in a different order.

EXISTING

PROPOSED

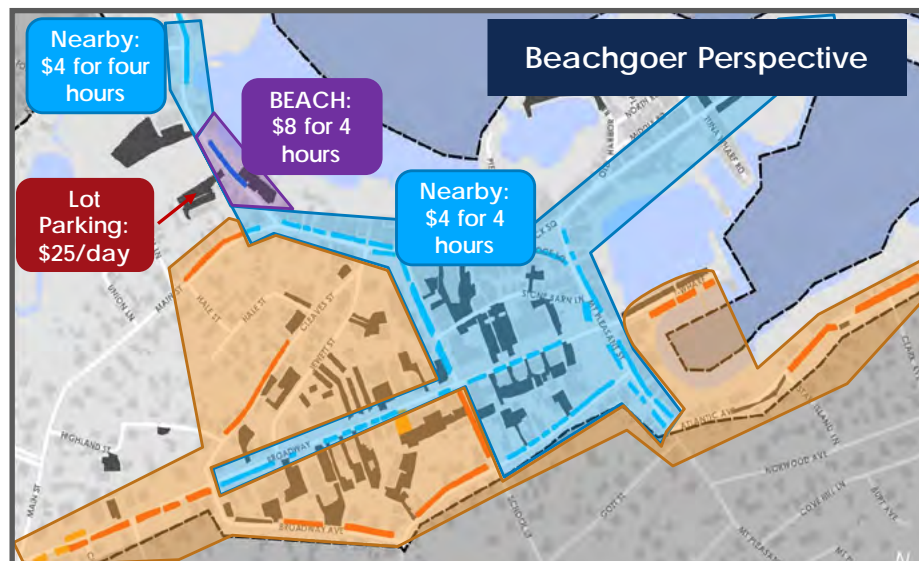

▲ Current parking pricing does not reflect parking demand during peak season (peak weekend utilization shown)

▲ The future pricing system can help alleviate the "parking crunch" experienced during the peak summer season (peak weekend utilization shown)

▲ Informal beach parking for \$25/day at the Peg Leg Inn lot

▲ The Peg Leg Inn Lot is full during the day on weekends, supporting the idea that people will pay more (even if up to \$25/day) for convenience

2. EXPAND CAPE ANNE TRANSIT AUTHORITY (CATA) SHUTTLE SERVICE TO REMOTE PARKING AND ELIMINATE FARE

Improved CATA shuttle service will provide better access to parking in the periphery zone, the Park & Ride Lot at the Transfer Station and the MBTA Commuter Rail stop. Increasing the route loops and stops will encourage visitors to park in a lot further away, which will shift parkers from highly utilized lots in the Downtown core to larger lots like the Park & Ride lot.

Providing a free shuttle service also incents visitors to use the Park & Ride lot. To cover the loss of the shuttle fare revenue, the Town can use the new peak month net parking revenue of approximately \$20,000 from raising the Downtown core parking prices (as seen in Recommendation 1).

RECOMMENDED CATA ROUTES

The CATA shuttle that currently runs through Downtown Rockport

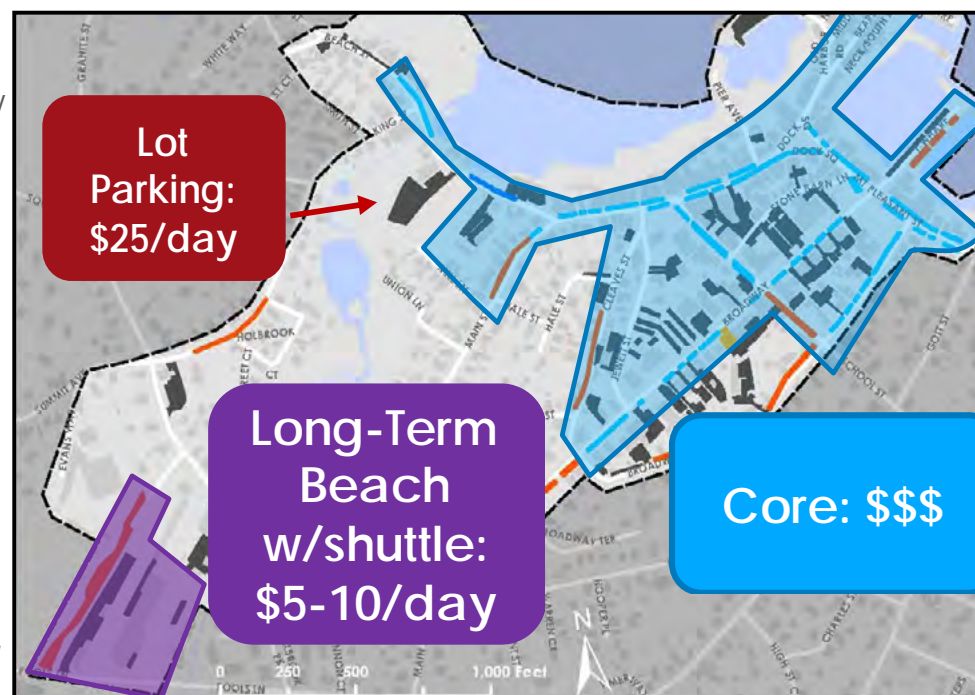

Two shuttle routes can run on a loop to access the beaches, MBTA Station, Park & Ride lot, and Downtown businesses.

3. INVEST IN MBTA AREA LOTS FOR BEACH PARKING AND DOWNTOWN EMPLOYEES

Incenting long-term parkers out of the Downtown core will help to alleviate parking congestion and give short-term parkers such as customers and visitors the opportunity to park closer to their destination. To attain this, the Town should explore using the MBTA and Park & Ride lots as remote parking for beachgoers and Downtown employees.

Pursuing shared parking agreements between the Town, business owners, and MBTA can be a way to open up underutilized parking in the Park & Ride lots to the public. In particular, the MBTA and Peg Leg Inn lots can be used as long-term beach parking facilities that charge approximately \$5-10/day and give parkers the ability to access Downtown through the shuttle service.

To incentivize participation in shared parking agreements, the Town can provide in-kind services, such as plowing, maintenance, improved walking connections to Downtown and signage in exchange for property owners allowing the public to use their parking. Including a revenue sharing agreement also acts as an incentive for owners to give the public access to their parking facilities, especially during the peak season.

▲ Surface lots in the MBTA Commuter Rail stop area can serve as parking for long-term beachgoers and Downtown visitors who will walk farther from their destination for a lower price to park

4. IMPLEMENT A RESIDENTIAL “SUPER PERMIT”

Providing residents with a “super permit” that allows them privileges to parking in particular areas such as Broadway and School Street will give the Town the ability to allow residents to run errands, access Downtown, and potentially reduce the number of resident-only parking spaces in the Downtown core area. Targeted lots that currently house resident area parking and experience high utilization levels during the week and weekend include spaces within the T-Wharf, the Town Hall lot, Bradley Wharf, and the Old Harbor Road lot.

The super permit can include the following benefits:

- Access to specific streets: periphery area / near town hall
- 2 hours free at meters
- Easy kiosk payment methods though the use of a super permit personal code

WEEKDAY

WEEKEND

The surface lots outlined above are for resident sticker parkers only. These lots are located in popular areas, which when full, push Downtown visitors out of prime parking locations

The current resident only surface lots (as outlined in the graphic above) show high utilization rates during both the weekday and weekend

5. EXPAND METERED PARKING ZONE

T Wharf and Atlantic Avenue both experience high levels of parking demand and congestion. It is recommended that the metered area is expanded to include these areas to help reduce pressure for limited spaces.

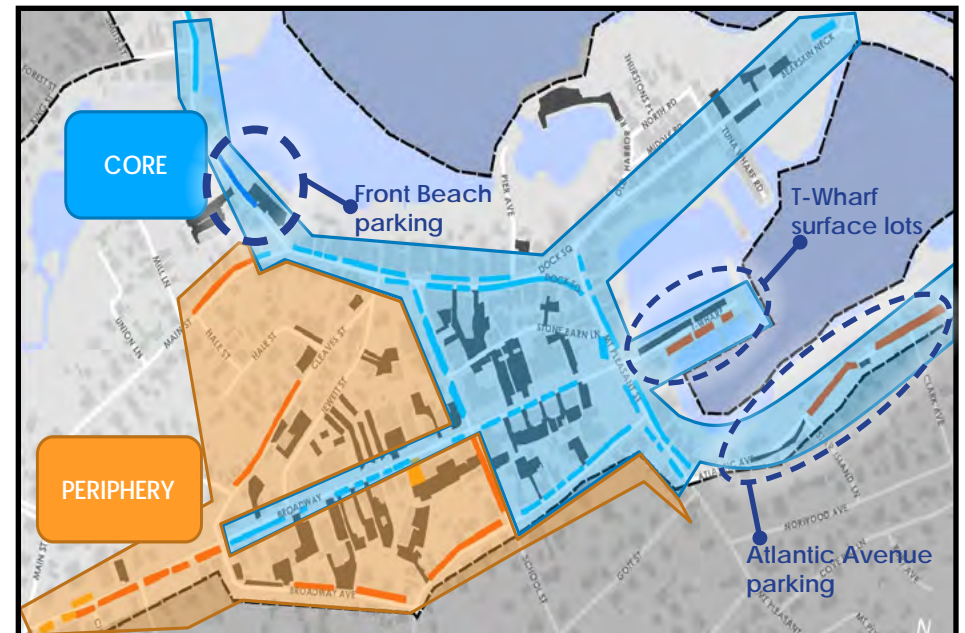

The plan recommends expanding the existing metered zone to include:

- On-street spaces on Atlantic Avenue
- Surface lots on T-Wharf
- Streamline Front Beach parking into core zone

EXISTING METERED ZONE

PROPOSED METERED ZONE

6. UPGRADE AND PROMOTE THE PARK & RIDE LOT FOR DOWNTOWN VISITORS

Improving infrastructure at key public lots incentivizes Downtown Rockport visitors to park in off-street spaces as opposed to crowding on-street parking resources. Providing the public with a safe and upgraded public parking lot will help foster a park once environment in the study area, which encourages people to travel between destinations on foot instead of making multiple trips by car.

Investments in the Park & Ride Lot might include:

- Improved landscaping and fencing
- Permanent, real-time availability signage (When lot is closed, display "CLOSED")
- Upgrading sidewalk infrastructure
- Increased shuttle hours for employee parking
- Creating a safe shuttle center stop for CATA riders where real-time shuttle information is displayed
- Bikeshare accommodations and bicycle accommodations

▲ Estimated cost of a real time parking sign is approximately \$15,000 (Source: Parking Logix India: https://twitter.com/Parkinglogix_in/status/844107997441921025)

7. ENHANCE SIGNAGE AND WAYFINDING

Many Public Open House participants ranked wayfinding and signage as a high priority improvement. Creating signage with clear guidance for patrons unfamiliar with the area will help to create a visitor-friendly environment.

Wayfinding signage should highlight on and off-street parking options. The signage should clearly indicate where the public is allowed to park. Additionally, wayfinding signage should:

- Define clear parking rules
- Identify public parking, including free and long-term parking (both on-and off-street, especially unregulated spaces)
- Identify major points of interest
- Guide people walking to destinations Downtown – and importantly back to parking locations

The Town should use wayfinding and signage to:

- Intercept vehicle traffic before it reaches Downtown
- Direct people to different locations Downtown
- Provide estimated walk times
- Help customers return to their vehicles
- Implement a voluntary program for business owners where the Town covers payment and installation of private parking lot signage along public sidewalks
- Work with private landowners to create standardized signage. The Town can offer this as a voluntary program, which will help private landowners who otherwise may

not be able to place signs on the sidewalk or public way.

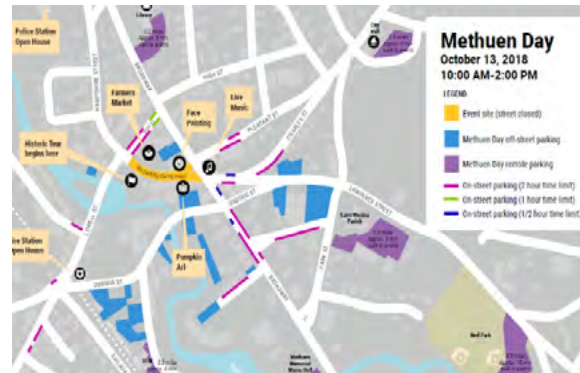

- Direct parkers to parking that is less easy to find and at a distance from Downtown destinations
- The Town should also publish a user-friendly parking map on the Town website to describe available parking resources and help visitors easily find the right parking.

Free parking wayfinding sign in Woodstock, VT that helps visitors hunting for parking find the remote but cheaper option. *Source: Google Maps*

Customer parking sign concept design that clearly exhibits parking facilities for visitors

Created for a Downtown “Methuen Day” in Methuen, MA, this parking map clearly delineates parking locations and regulations in a public-friendly format

8. USE PARKING BENEFIT DISTRICT FOR MULTIMODAL IMPROVEMENTS

Downtown Rockport's existing Parking Benefit District (PBD) gives the Town a head start on investing in the improvements described in this report. With a PBD it is also easier for stakeholders to see the benefits of increased parking rates which can be re-invested in public domain improvements.

Through enhanced PBD legislation, the Parking Committee can identify priority investments in Downtown including:

- Free shuttle to remote parking at the Park & Ride lot / increased shuttle hours
- Improved crosswalks, sidewalks, etc.
- Wayfinding and signage (real-time availability signs in remote parking lots)
- Additional multimodal improvements (such as better bicycle infrastructure)

▲ A PBD gives municipalities the opportunity to use parking revenue for community improvements

This page is intentionally left blank

DOWNTOWN PARKING STRATEGY RECOMMENDATIONS PRIORITIZATION PLAN

The table to the right summarizes recommendations in the short, medium, and long-term. The matrix also illustrates how each recommendation addresses the goals of the Downtown Rockport Parking Plan goals.

Impact on achieving goals

N/A = Does not meet this goal

= Low

= Medium

= High

	Goals Met		
	Implement a parking management strategy that will calm traffic and eliminate Downtown congestion	Improve and provide better parking facilities to support future economic opportunities and relieve parking tension between residents and tourists	Better accommodate tourist parking demand during peak seasons
Manage areas of high demand with pricing (P)			
Expand Cape Anne Transit Authority (CATA) shuttle service to remote parking and eliminate fare (S)			
Enhance signage and wayfinding (W)			
Invest in outer area lots for beach parking and Downtown employees (B)			

Years 1-2	Years 2-4	Years 5+
<p>P1. Establish an on-street availability goal of 85% through municipal code or other official means</p> <p>P2. Adjust core pricing, including “beach parking,” to higher price. Consider raising the price on weekends only at first.</p> <p>P3. Absorb T-Wharf and Atlantic Ave parking into Core</p>	<p>P4. Using baseline data from this study, monitor utilization levels and adjust pricing as necessary to meet availability target</p> <p>P5. Consider pricing periphery area on weekends. Depending on utilization levels, move T-Wharf and Atlantic Ave to periphery (instead of Core pricing)</p> <p>P6. Raise core pricing on both weekdays and weekends during peak season</p>	<p>P7. Using baseline data from this study, monitor utilization levels and adjust pricing as necessary to meet availability target</p> <p>P8. Price periphery area on both weekdays and weekends during peak season</p> <p>P9. Consider eliminating time limits and using price to control demand</p>
<p>S1. Make shuttle from Park & Ride lot fare-free to encourage use</p> <p>S2. Add signage at Dock Square stop to heighten visibility</p> <p>S3. Pending outcome of B1, below, work with CATA to implement shuttle route directly from beach parking to beach</p>	<p>S4. Continue shuttle routes to serve remote beach parking lot</p> <p>S5. Co-market shuttle from beach parking with MBTA Commuter Rail \$10 weekend fares if possible</p>	<p>S6. Monitor and adjust</p>
<p>W1. Add shuttle signage at Dock Square to raise visibility</p> <p>W2. Pursue real-time availability signage for lot / Downtown parking</p> <p>W3. Continue to maintain “diamond” Downtown wayfinding program</p>	<p>W4. Implement real-time availability signage for lot / Downtown parking</p> <p>W5. Pursue real-time arrival information for shuttle at lot and Dock Square</p> <p>W6. Consider enhancing wayfinding signage to include walk times, esp. to remote parking options</p> <p>W7. Consider Town-wide (or Downtown-wide) wayfinding program</p>	<p>W8. Implement Town-wide wayfinding, including parking, cultural destinations, and shops. Signage should be for both people driving (directing to parking) and people walking.</p>
<p>B1. Work with private property owners near MBTA station to create revenue sharing agreement / beach parking. Charge approximately \$10/day</p>	<p>B2. Monitor and adjust pricing as necessary</p> <p>B3. As utilization picks up, offer in-kind services (maintenance, striping, etc.) to private property owners</p>	<p>S1. Monitor and adjust</p>

DOWNTOWN PARKING STRATEGY RECOMMENDATIONS PRIORITIZATION PLAN

Impact on achieving goals

N/A = Does not meet this goal

 = Low

 = Medium

 = High

	Goals Met		
	Implement a parking management strategy that will calm traffic and eliminate Downtown congestion	Improve and provide better parking facilities to support future economic opportunities and relieve parking tension between residents and tourists	Better accommodate tourist parking demand during peak seasons
Expand metered parking zone (M)			
Implement a residential "super-permit" (R)			
Upgrade and promote the Park & Ride lot for Downtown visitors (A)			
Use Parking Benefit District for multimodal improvements (PB)			

Years 1-2

Years 2-4

Years 5+

- M1. Absorb T-Wharf and Atlantic Ave parking into Core
- M2. Monitor and adjust

- M3. Depending on utilization levels, move T-Wharf and Atlantic Ave to periphery (instead of Core pricing)
- M4. Monitor and adjust

- M5. Monitor and adjust

- R1. Determine with kiosk vendor if could issue code / use plates to allow residents to access discount parking
- R2. Convene resident groups to discuss potential "Residential Super Permit"

- R3. Implement pilot "Super Permit" that allows residents to park for free for short periods of time (for example 2 hours) at kiosks/ meters (if technology allows). Weekdays only.
- R4. Monitor "resident only" lots in core for utilization
- R5. Continue meeting with resident advisory group

- R6. If pilot is successful, open "resident only" lots in core to all
- R7. Consider extending "Super Permit" to weekends

- A1. Make shuttle from Park & Ride lot fare-free to encourage use. Fund, if necessary, using surplus from new core pricing.
- A2. Add shuttle signage at Dock Square to raise visibility
- A3. Consider increasing shuttle hours for employee parking
- A4. Pursue real-time availability signage for lot / Downtown parking

- A5. Implement real-time availability signage for lot / Downtown parking
- A6. Pursue real-time arrival information for shuttle at lot and Dock Square
- A7. Consider multi-modal improvements such as landscaping and/or additional bathrooms

- R1. Monitor and adjust price as necessary

- PB1. Consider using established PBD parking revenues to fund additional multimodal improvements, starting with shuttle to Park & Ride lot
- PB2. Develop prioritized list of potential multimodal improvements for PBD to fund

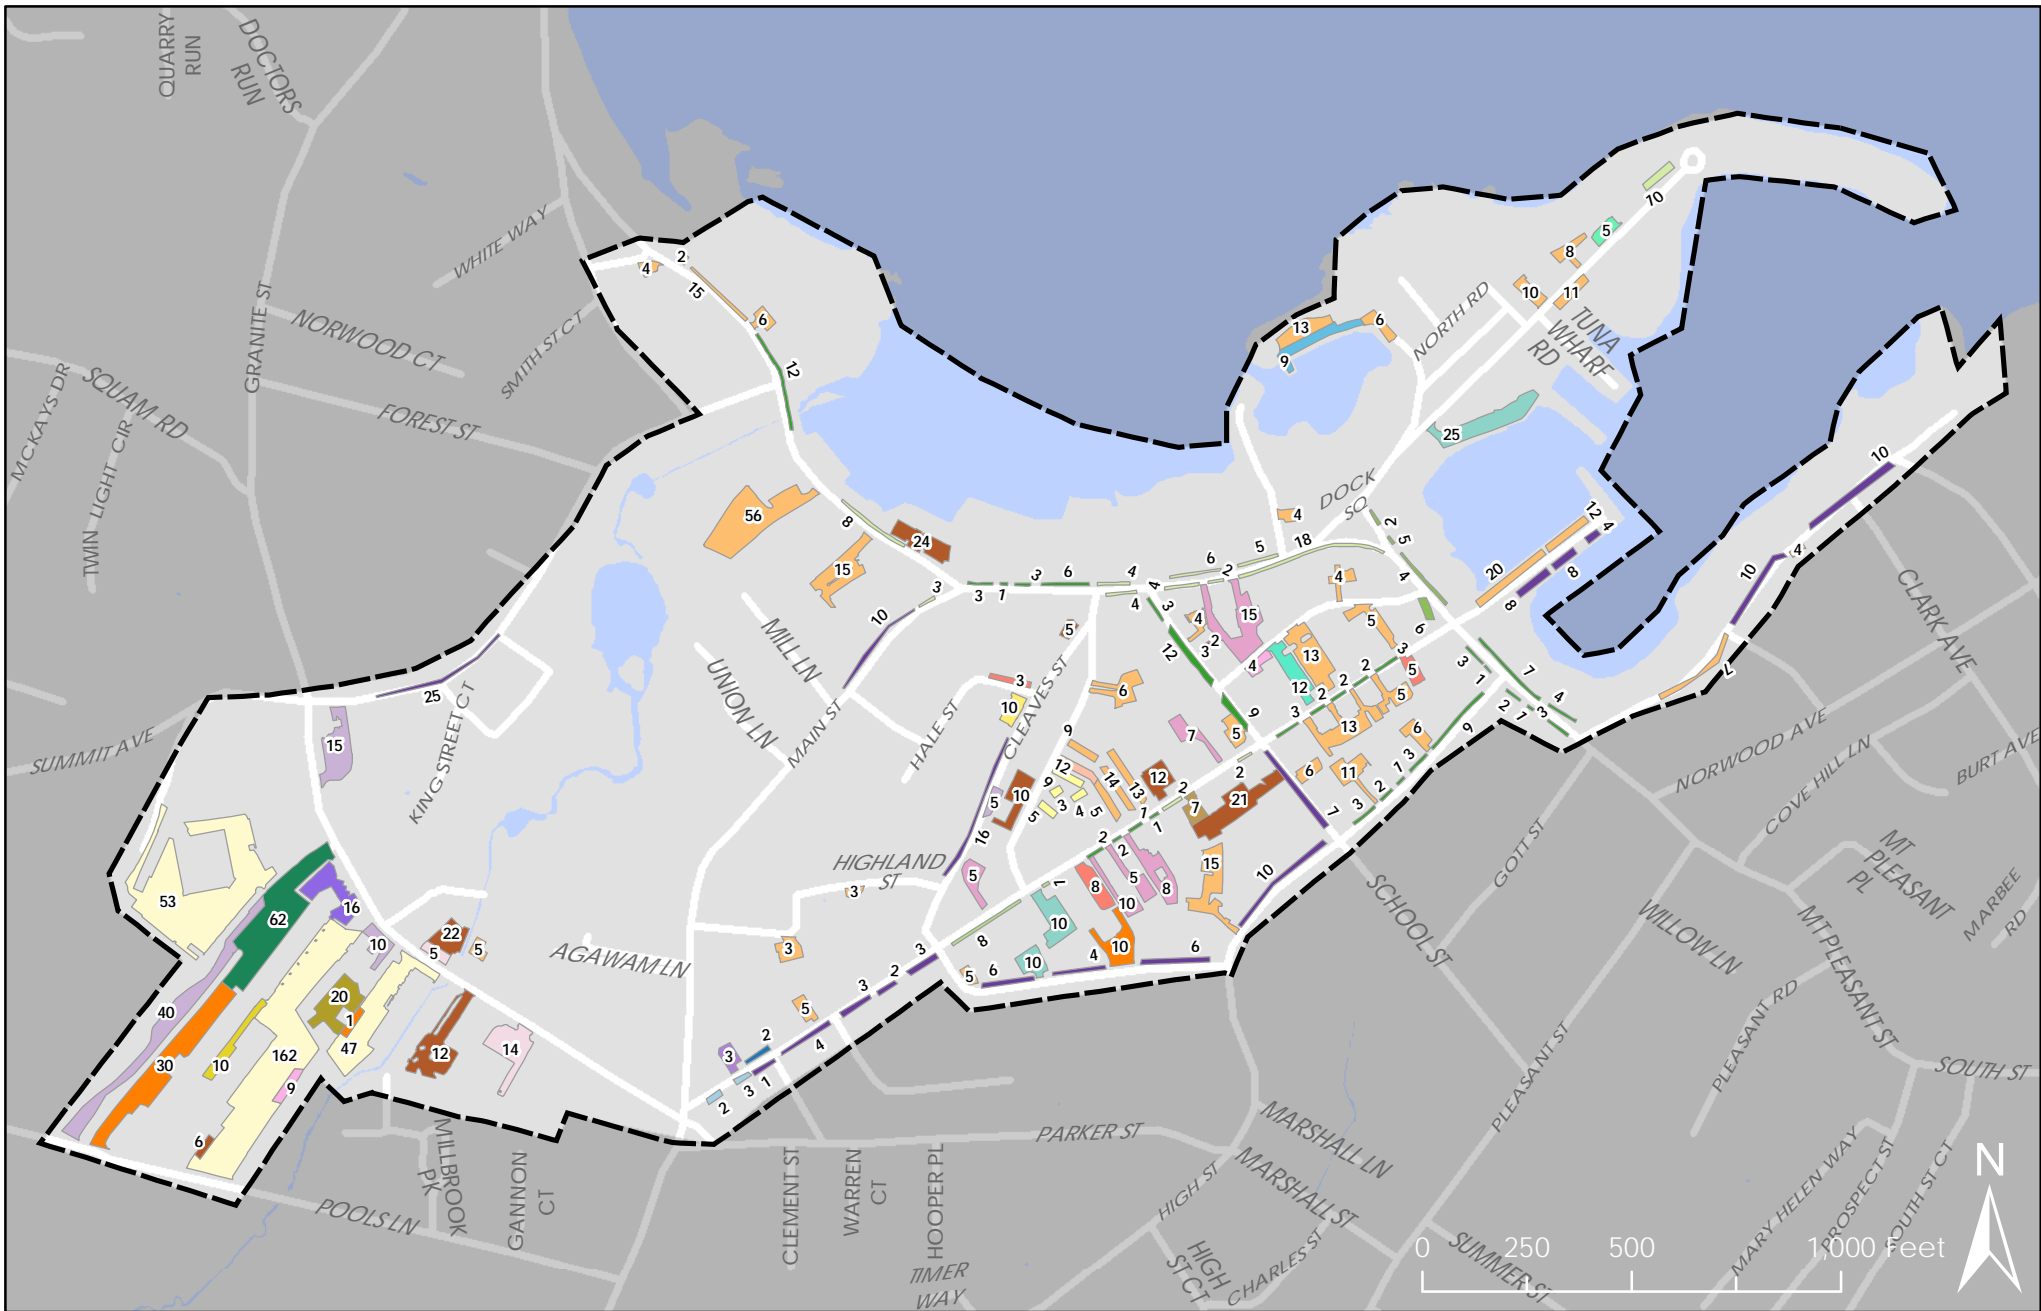

- PB3. As revenues increase, use PBD funds to support improvements
- PB4. Advertise PBD on meters/kiosks - "Your Parking Dollars at Work"
- PB5. Consider meeting with Downtown merchants/residents to gather their input on PBD funding initiatives

- PB6. As revenues increase, use PBD funds to support improvements

A scenic view of a harbor with several boats docked, a red barn, and a light blue car in the foreground. The scene is set in a coastal town with houses and a clear blue sky. A light blue car is parked on the left, and a red barn is visible in the background. The harbor is filled with various boats, including a large white boat and several smaller fishing boats. The water is calm, and the sky is clear.

PARKING INVENTORY

PARKING INVENTORY: CATEGORIZATION

Recorded and analyzed from the perspective of a “visitor”

Examples:

REGULATION	DEFINITION
10 Minute Parking	“10 minute parking only” signage
Customer/Employee Parking Only	“Customer & employee parking only” signage
Metered Kiosk Parking: 10am-6pm; Monday-Sunday; 4 Hour Limit; \$1/Hour	Paid space (kiosk for payment) with price & time limits
Private Parking	“Private parking” signage
Reserved Parking	“Private parking”, or “Reserved parking” or signage
Unregulated	No regulation or signage (visitor unclear if parking is public)

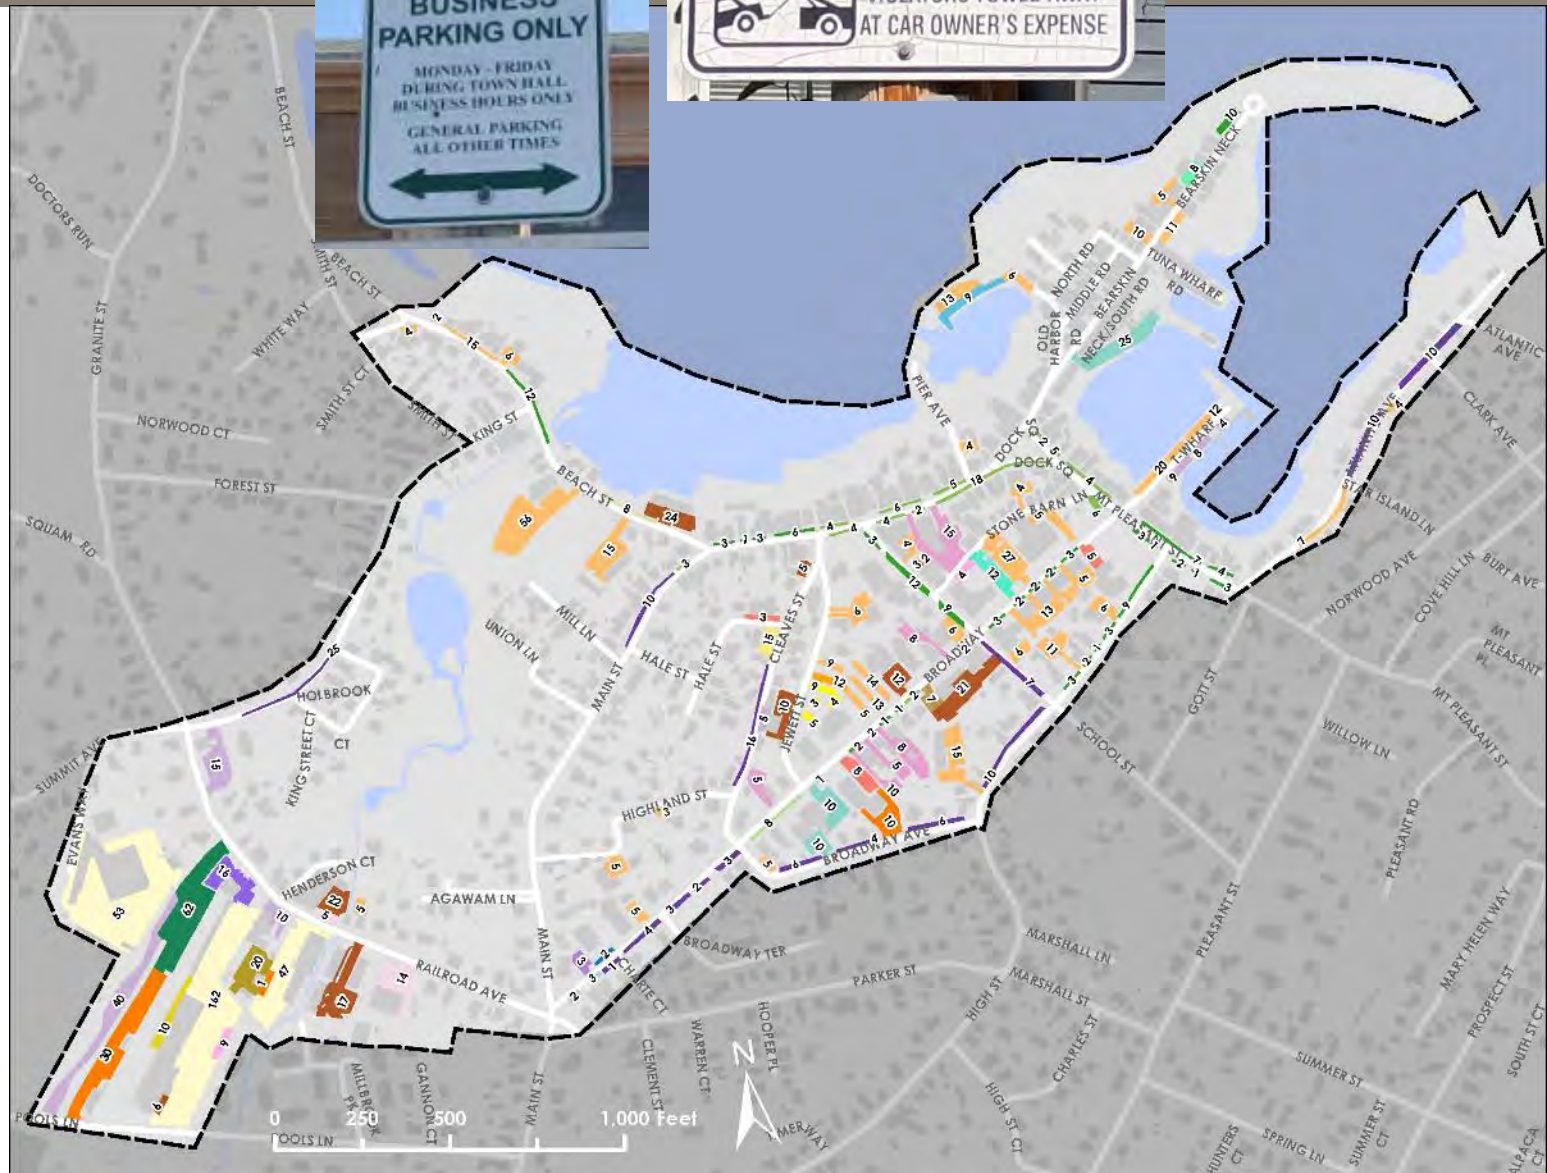

PARKING INVENTORY

On-Street Regulations

- 15 Minute Parking
- Drop-Off/Pick-Up Only
- Metered Kiosk Parking: 10am-6pm; Monday-Sunday; 4 Hour Limit; \$1/Hour
- Metered Parking: 10am-6pm; Monday-Sunday; 4 Hour Limit; \$1/Hour
- Metered Parking: 10am-6pm; Monday-Sunday; 4 Hour Limit; \$1/Hour; 30 Minute Limit When Post Office Open
- Metered Parking: 10am-6pm; Monday-Sunday; 4 Hour Limit; \$2/Hour
- Residential Parking
- Unregulated

Off-Street Regulations

- 1 Hour Parking, Customers Only
- 10 Minute Parking
- 72 Hour Limit, No Public Parking, Resident Sticker Required
- Authorized Vehicles Only
- Boat Owners Parking
- Church Parking Only
- Commuter Rail Parking, 72 Hour Limit
- Customer Parking Only
- Customer/Employee Parking Only
- Employee Parking Only
- Employee/Resident Parking
- Hotel Guests Only
- Library Parking Only
- Loading Zone
- Metered Parking: 10am-6pm; Monday-Sunday; 4 Hour Limit; \$1/Hour

PARKING UTILIZATION FINDINGS: WEEKDAY

DOWNTOWN CORE

ON-STREET

DOWNTOWN CORE ON-STREET

OUTER AREA

OFF-STREET

- Peak downtown core utilization at 12PM (around 50%)
- Periphery area off-street spaces never above 40% utilized
- Peak on-street spaces at 12PM (around 70%) utilized
- Off-street spaces underutilized

PARKING UTILIZATION FINDINGS: WEEKEND

DOWNTOWN CORE

ON-STREET

DOWNTOWN CORE ON-STREET

OUTER AREA

OFF-STREET

- Downtown core peak utilization at 3PM (almost 80%)
- Periphery area off-street spaces are very underutilized
- Periphery on-street well used at peak
- On-street spaces and downtown core on-street spaces at and exceeding capacity
- Morning rush in downtown over capacity

PARKING INVENTORY & UTILIZATION FINDINGS

Overall

- Parking pricing system for beach parking creates spillover into downtown
- Periphery area on- and off-street experiences low utilization levels all day (60% and below)
- On-street spaces are more attractive and popular

Weekday

- Downtown core experiences consistent utilization all day (around 50%)
- Bearskin Neck and T-wharf 80%+ utilized around 4PM
- Town Hall & resident parking area underutilized (below 60% all day)

Weekends

- Downtown core highly utilized all day
- Off-street spaces are not fully utilized
- On-street spaces over capacity in downtown area
- Off-street lots underutilized (0-30%) next to over utilized on-street spaces (90-100%) (especially at 7PM)
- Periphery on-street spaces well-used at peak

PUBLIC PROCESS

Stakeholder Meetings, October 30, 2018

- Hear from key stakeholders (Chamber of Commerce, Traffic & Parking Committee, Police Chief, downtown residents)

Public Open House, October 30, 2018

- Vote on parking priorities
- Map comments on issues and opportunities

Findings and Draft Recommendations

- Review utilization data
- Present draft parking improvement strategies

PUBLIC PROCESS | PARKING PRIORITY EXCERSIZE

WHAT ARE YOUR TOP **PARKING PRIORITIES** IN ROCKPORT?

Draft

I WOULD LIKE IT TO BE EASIER TO USE PARKING PAYMENT TECHNOLOGY

I WOULD LIKE CLEARER INFORMATION ON PARKING IN DEDHAM SQUARE

I WOULD LIKE IT TO BE EASIER/ SAFER TO WALK IN DEDHAM SQUARE

I WOULD LIKE TO PARK ONCE AND WALK TO ALL OF MY DESTINATIONS

I WOULD LIKE DEDICATED EMPLOYEE PARKING

I WOULD LIKE TO SEE MORE ACTIVITY IN THE DEDHAM SQUARE

I DON'T MIND PARKING A LITTLE FARHER AWAY IF IT MEANS I DON'T HAVE TO SEARCH FOR PARKING

WHAT ARE WE MISSING? WRITE YOUR IDEA HERE!

Please place stickers in the parking spots to indicate your top parking priorities.

Town of Rockport
ROCKPORT TOWN CENTER
PARKING STUDY

I would like to use an app showing available parking

I would like more bicycle accommodations in the downtown area

I would like better access to parking in the downtown area

I would like clearer information on parking Downtown

I don't mind parking a little farther away if it means I don't have to search for parking

I would like it to be easier to use parking payment technology

I would like to park once and walk to all of my desitnations

I would like to see more wayfinding signage in the downtown area

PUBLIC PROCESS | PUBLIC COMMENTS SUMMARY

PUBLIC PROCESS | KEY FINDINGS

Town of Rockport | Downtown Rockport Parking Plan

Parking Signage is Unclear

- A lot of unclear parking signage leads to confusion during the busy summer months
- Rockport needs to install wayfinding signage around town, specifically at the train station and downtown parking corridors
- Resident stickers are difficult to see

Enhance Access to Park & Ride Lot

- Little park and ride signage
- Implement a valet system for larger events
- Enhance the system to make it appealing
- Advertise the lot address: 7 Bluegate Lane

Increase Biking Options

- Increase number of bike lanes in town
- Implement a bike share system
- Distribute safe biking map created by bike committee

Other

- Increase number of crosswalks
- Utilize informal parking agreements and open opportunities for new ones

MULTIMODAL CONDITIONS

MULTIMODAL CONDITIONS

- Minimal / Confusing signage
- Unclear road markings
- Unsafe walking conditions for pedestrians in busy downtown
- No easy way to find available parking for both residents and visitors alike

Unclear road regulations

Improper curb cut on crosswalk

No road markings or signage for street parking along Atlantic Ave

Dangerous intersection for pedestrians

Poor walking conditions

No wayfinding signage for rear lots

Unclear parking regulations along Main St

No wayfinding signage, difficult to find parking

Separation of parking lots unclear

No clear parking regulations

Poor pedestrian conditions along High St

No road markings or signage for street parking

No parking signage at entrance of shopping plaza/ commuter rail

PARKING ACTIVITY EVALUATION

PARKING ACTIVITY EVALUATION

Cars Parked: Remote Lot

RECOMMENDATIONS

RECOMMENDATIONS CONTEXT

- Rockport has implemented a lot of best practices!
 - Parking ambassadors
 - Price differential to manage demand
 - Focus on walking routes
 - Remote parking / shuttle
 - Customer-friendly payment technology

RECOMMENDATION 1 Adjust Price Downtown | Future

RECOMMENDATION 1 Adjust Price Downtown | Phases/Options

Phase	Price Changes
1	<ul style="list-style-type: none">• Increase weekend price in Core• Peak season only (June-July-Aug)?
2	<ul style="list-style-type: none">• Consider pricing Periphery on weekends• Peak season only (June-July-Aug)?• No time limits
3	<ul style="list-style-type: none">• Increase price in Core for weekdays• All season?
4	<ul style="list-style-type: none">• Price Periphery• No time limits

Supporting Strategies

Use baseline data from this study to monitor changes

Implement pay-by-phone

Allows users to extend parking remotely

Provide pricing information on centralized map on website

RECOMMENDATION 2 | Beach Parking Shuttle

Station Square
turnaround

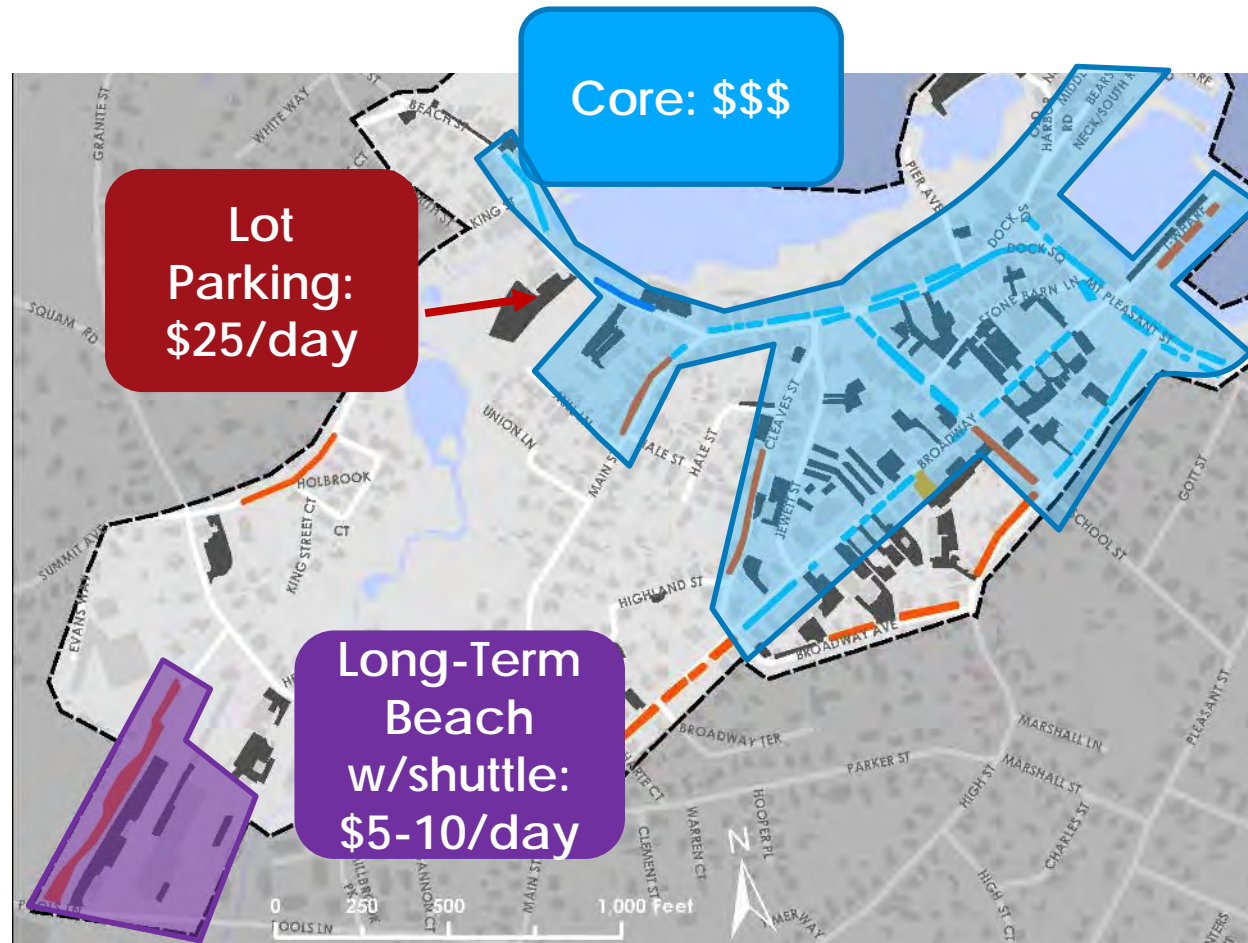

Option to run
with one bus –
2 orange trips :
1 blue trip

Also allows
MBTA access
(\$10 weekend
pass)

To Transfer Station (199 spaces)

RECOMMENDATION 3 | Remote Parking at MBTA Area

- Pull beach users (long-term parkers) out of downtown core
- Use MBTA / other lots for remote parking
- Work with owners to develop shared parking
 - Revenue sharing agreement

RECOMMENDATION 4 Residential "Super Permit"

Allow residents to run errands,
access downtown

Potential to reduce # of resident-
only spaces in the core lot

Access to specific streets:
periphery area / near town hall

2 hours free at meter

Plate based – use
a code at kiosks

Meters – TBD

Consider weekdays only?

RECOMMENDATION 4 | Residential Super Permit

WEEKDAY

WEEKEND

RECOMMENDATION 5 Increase Metered Area | Current

RECOMMENDATION 5 Increase Metered Area | Future

RECOMMENDATION 6 Invest in Remote Lot

- Eliminate shuttle fee
 - Use \$\$ from increased core pricing to fund shuttle
- Multimodal improvements
- Real-time availability – permanent
 - When closed, display “CLOSED”
- Increase shuttle hours for employee parking
- Provide real-time shuttle information
 - At lot and downtown

Estimated cost ~\$15,000

*(Parking Logix India:
https://twitter.com/Parkinglogix_in/status/844107997441921025)*

RECOMMENDATION 7 Signage and Wayfinding

- Use wayfinding to:
 - Intercept vehicle traffic
 - Direct people to other locations downtown
 - Provide estimated walk times
 - Help customers return to their vehicles
 - Help people on bikes find their way to/through downtown destinations
- Make shuttle more visible, esp. downtown
 - “Shuttle to Free Parking”
 - Real-time arrival information

RECOMMENDATION 8 Parking Benefit District

- Increase in price will lead to increase in revenue
- Through PBD legislation, additional funds can support:
 - Free shuttle to remote parking / increased shuttle hours
 - Improved crosswalks, sidewalks, etc.
 - Wayfinding and signage (real-time!)
 - Additional multimodal improvements (bicycle amenities)
- Parking Committee: prioritize & fund improvements

**ARLINGTON CENTER
BUSINESS OWNERS**

Join Us For a Meeting about
**NEIGHBORHOOD IMPROVEMENTS
from parking meter income**
Wednesday March 1st at 8:30 am
Regent Underground, 7 Medford Street

meeting March 30th at 6pm

DRAFT RECOMMENDATIONS

1. Increase and streamline price to park in downtown core metered spaces
 1. Implement seasonal parking
 2. Implement weekend pricing
 3. Use parking meter revenue to pay for trolley user fee
2. Change CATA shuttle route to include MBTA lot
 1. Improve multimodal connections from MBTA commuter rail & mall area to downtown
3. Invest in MBTA area lots for beach access
 1. Wayfinding
 2. Shared parking / revenue sharing
4. Introduce a residential “super-permit” pilot
 1. Allow free or discount parking for 2-hours in metered zones
5. Increase metered zone
 1. Extend to Atlantic Ave to diffuse parking problem in core spaces
6. Invest in remote lot for downtown access
 1. Multimodal improvements
 2. Real-time availability
 3. Eliminate shuttle fee
7. Signage and wayfinding
8. Use Parking Benefit District for multimodal improvements

THANK YOU!
