#### INSTRUCTIONS FOR FILING FERC Form No. 1-F

#### GENERAL INFORMATION

## 1. Purpose

FERC Forms 1-F and 3-Q are designed to collect financial and operational information from nonmajor public utilities and licensees subject to the jurisdiction of the Federal Energy Regulatory Commission

## I. Who Must Submit

Each Nonmajor Public Utility or Licensee, as classified in the Commission's Uniform System of Accounts Prescribed for Public Utilities

and Licensees Subject to the Provisions of the Federal Power Act (18 CFR Part 101 (U.S. of A.) must submit FERC Form 1-F (18 C.F.R. § 141.2) Filers required to submit FERC Form 1-F must also submit FERC Form 3-Q (18 C.F.R. § 141.400).

Each Nonmajor public utility or licensee classified as Class C or Class D prior to January 1, 1984, may continue to file only the basic financial statements -Parts III, IV and V.

Note: Nonmajor means having total annual sales of 10,000 megawatt-hours or more in the previous calendar year and not classified as "Major."

#### GENERAL INFORMATION (Continued)

III.What and Where to Submit

Submit an original and one (1) copy of this form to: (a)

> Office of the Secretary Federal Energy Regulatory Commission 888 First Street, N E. Washington, DC 2042

For the CPA certification, submit with the original submission or within 30 days after the filing date of FERC Form 1-F, a letter or report (not applicable to respondents classified as Class C or Class D prior to January 1, 1984):
1. Attesting to the conformity, in all material aspects, of

the below listed (schedules and) pages with the Commission's applicable Uniform Systems of Accounts (including applicable notes relating thereto and the Chief Accountant's published

accounting releases), and (III) Signed by independent certified public accountants or an independent licensed public accountant, certified or licensed by a regulatory authority of a State or other political subdivision of the U.S. (See 18 C.F.R. §§ 41.10 41.12 for specific qualifications.)

#### <u>Schedules</u>

Comparative Balance Sheet Statement of Income Statement of Retained Earnings Statement of Cash Flows Notes to Financial Statements

The following format must be used for the CPA Certification Statement for the letter or report unless unusual circumstances or conditions, explained in the letter or report, demand that it be varied. Insert parenthetical phrases only when exceptions are reported.

In connection with our regular examination of the financial statements of for the year ended on which we have reported separately under date of we have also reviewed schedules of Form 1-F for the year filed with the Federal Energy Regulatory Commission, for conformity in all material respects with the requirements of the Federal Energy Regulatory Commission as set forth in its applicable Uniform System of Accounts and published accounting releases. Our review for this purpose included such tests of the accounting records and such other auditing procedures as we considered necessary in the circumstances.

Based on our review, in our opinion the accompanying schedules Indicate negative amounts by enclosing the figures in parenthesis (), identified in the preceding paragraph (except as noted below) conform in all material respects with the accounting requirements of the Federal Energy Regulatory Commission as set forth in its applicable Uniform System of Accounts and published accounting releases.

The letter or report must state which, if any, of the pages above do not conform to the Commission's requirements. Describe the discrepancies that exist.

Federal, State and Local Governments and other authorized users may obtain blank copies of the FERC Form 1-F free of charge from http://www.ferc.gov/docs-filing/hard-fil.asp.

When to Submit Submit FERC Form 1-F on or before April 18th of the year following the calendar year covered by this report (18 C.F.R. § 141.2). Submit FERC Form 3-Q within 70 days from the end of the reporting quarter (18 C.F.R. § 141.400).

Where to Send Comments on Public Reporting Burden

The public reporting burden for this collection of information is estimated to average 116 hours per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. Send comments regarding this burden estimate or any aspect of this collection of information, including suggestions for reducing this burden, to the Federal Energy Regulatory Commission, 888 First Street NE., Washington, DC 20426 (Attention: Michael Miller, Cl-1; and to the Office of Management and Budget, Washington, DC 20503 (Attention: Desk Officer for the Federal Energy Regulatory Commission).

#### GENERAL INSTRUCTIONS

Report data as outlined in the U.S. of A. (18 C.F.R. Part 101) as designed for "Nonmajor" electric utilities. If the "Major" designated accounts are maintained, then the following schedules may be substituted:

Nonmajor Accounts Part Number	Major Accounts Schedul Page (FERC Form No. 1)			
III	110-113			
IV	114-117			
V	118-119			
XII	219			
XVI	300-301			
XVII	320-323			
XVIII	310-311			
XIX	326-327			
XX	200-201, 204-207			

Enter in whole dollars only.

except where otherwise noted (debit or credit).

When making revisions, resubmit only those pages that have been changed from the original. Include with your resubmission Part I, Identification and Part II, Attestation.

Use Part XXII, Footnote Data, to footnote any entry made to parts II through XXI.

Enter Not applicable whenever a particular part is not applicable.

SPECIFIC INSTRUCTIONS Item No.Instruction All Refer to the form. All items are self-explanatory.

Nantucket Electric Company	(2) A Resubmission	11	2011/Q4
	FOOTNOTE DATA		

## Schedule Page: 17 Line No.: 5 Column: a

On December 30, 2009, the Massachusetts Department of Public Utilities ("DPU") approved the request of Massachusetts Electric Company and Nantucket Electric Company d/b/a National Grid (the Company) for the recovery of deferred Standard Offer Service ("SOS") costs through a SOS adjustment factor to become effective on January 1, 2010. The Company's request was submitted in compliance with a settlement agreement in Docket Nos. DTE 02-79, 03-124, and 03-126 (the Settlement).

## Schedule Page: 17 Line No.: 7 Column: a

Default Service Cost Reclassification Adjustment Provision, M.D.P.U. No. 1178. This mechanism allows for a credit to distribution rates and a surcharge to basic service rates for the recovery of commodity-related administrative costs embedded in the Company's prior distribution rates. Both the credit to distribution rates and the surcharge to basic service rates are subject to reconciliation under this mechanism to ensure the correct amount was credited and charged, respectively. This ended as of December 31, 2009.

## Schedule Page: 17 Line No.: 9 Column: a

Pursuant to D.P.U. 06-106-A

## Schedule Page: 17 Line No.: 11 Column: a

The Company is allowed recovery of the incremental costs associated with the operation of the Company's Arrearage Management Program ("AMP") offered to qualifying customers pursuant to Docket Nos. D.T.E. 05-86, D.T.E. 01-106-C, and D.P.U 08-4 and the discount provided to customers receiving retail delivery service under Residential Low Income Rate R-2 ("Rate R-2").

## Schedule Page: 17 Line No.: 13 Column: a

Pursuant to D.P.U. 09-39 the Company has been allowed to implement pension and PBOP mechanisms to collect non-capitalized pension and postretirement benefits other than pensions ("PBOP") through a separate billing factor referred to as the Pension and PBOP Adjustment Factor ("PAF"). A return on the average annual prepaid or unfunded pension and PBOP balance at the weighted average cost of capital will be recorded. Over or under collections will be surcharged or credited to customers over a three year period.

## Schedule Page: 17 Line No.: 15 Column: a

Pursuant to D.P.U. 09-39, the Company has been allowed to implement pension and PBOP mechanisms to collect non-capitalized pension and postretirement benefits other than pensions ("PBOP") through a separate billing factor referred to as the Pension and PBOP Adjustment Factor("PAF"). A return on the average annual prepaid or unfunded pension and PBOP balance at the weighted average cost of capital will be recorded. Over or under collections will be surcharged or credited to customers over a three year period.

## Schedule Page: 17 Line No.: 17 Column: a

	(1) An Original	(Mo, Da, Yr)	-		
Nantucket Electric Company	(2) A Resubmission	/ /	2011/Q4		
NOTES TO FINANCIAL STATEMENTS (Continued)					

# Note 1. Summary of Significant Accounting Policies

# A. Nature of Operations

Nantucket Electric Company (the "Company," "we," "us," and "our") is an electric retail distribution company providing electric service to approximately 13,000 customers on the Island of Nantucket.

The Company is a wholly-owned subsidiary of National Grid USA ("NGUSA"), a public utility holding company with regulated subsidiaries engaged in the generation of electricity and the transmission, distribution and sale of both natural gas and electricity. NGUSA is an indirectly-owned subsidiary of National Grid plc, a public limited company incorporated under the laws of England and Wales.

The Company has evaluated subsequent events and transactions through March 29, 2012, and concluded that there were no events or transactions that require adjustment to, or disclosure in the notes to, the financial statements.

# B. Basis of Presentation

The financial statements are prepared in accordance with accounting requirements of the Federal Energy Regulatory Commission ("FERC") as set forth in its applicable Uniform System of Accounts. This is a comprehensive basis for accounting other than accounting principles generally accepted in the United States ("GAAP"). The significant differences consist of the following:

- for FERC reporting, deferred tax assets and liabilities are presented on a gross basis and are classified as non-current. For GAAP reporting, deferred tax assets and liabilities are presented on a net basis, with current and non-current amounts segregated.
- for FERC reporting, regulatory assets and liabilities are classified as non-current. For GAAP reporting, regulatory assets and liabilities are segregated between current and non-current classifications.
- for FERC reporting, the liability for uncertain tax positions related to temporary differences is not recognized pursuant to FERC guidance and deferred taxes are recognized based on the difference between positions taken in filed tax returns and amounts reported in the financial statements. For GAAP reporting, the liability for uncertain tax positions related to temporary differences is recognized and deferred taxes are recognized based on the difference between the positions taken in filed tax returns adjusted for uncertain tax positions related to temporary differences and amounts reported in the financial statements.
- the accumulated reserve for depreciation for estimated removal costs is included in the accumulated provision for depreciation for FERC reporting and as a regulatory liability or asset retirement obligation for GAAP reporting.
- current and long-term debt is classified in the balance sheet as all long-term debt in accordance with regulatory treatment, while GAAP presentation reflects current and long-term debt separately.
- the intercompany accounts are not netted for FERC reporting but are netted together for GAAP reporting.

The preparation of financial statements in conformity with FERC requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting periods. Actual results could differ from those estimates.

# C. Regulatory Accounting

The FERC and the Massachusetts Department of Public Utilities ("DPU") provide the final determination of the rates the Company charges its customers. In certain cases, the actions of the FERC and DPU to determine the rates the Company charges its customers would result in an accounting treatment different from that used by non-regulated companies. In these cases, the Company would be required to recognize costs (regulatory assets) or to recognize obligations (regulatory liabilities) if it is probable that these amounts will be recovered or refunded through the rate-making process, which would result in a corresponding increase or decrease in future rates.

In the event the Company determines that its net regulatory assets are not probable of recovery, it would no longer apply the

	(1) An Original	(Mo, Da, Yr)	·		
Nantucket Electric Company	(2) A Resubmission	1 1	2011/Q4		
NOTES TO FINANCIAL STATEMENTS (Continued)					

principles of the current accounting guidance for rate-regulated enterprises and would be required to record an after-tax, non-cash charge against income for any remaining regulatory assets and liabilities. The impact could be material to the Company's reported financial condition and results of operations.

# D. Revenue Recognition

The Company bills its customers on a monthly basis at approved tariffs based on energy delivered, a minimum service charge, and, in some instances, their demand on the electric system. Revenues include unbilled amounts related to the estimated electric usage that occurred from the most recent meter reading to the end of each month. The Company also records the distribution component of revenue for electricity delivered but not yet billed.

The Company defers for future recovery from or refunds to electric customers the difference between revenue and expenses from, default service, transmission service, and contract termination charges.

For each of the years ended December 31, 2011 and December 31, 2010, 70% of the Company's revenue from the sale and delivery of electricity was derived from residential customers and 30% from commercial customers.

## E. Utility Plant

Utility plant is stated at original cost. The cost of additions to utility plant and replacements of retired units of property are capitalized. Costs include direct material, labor, overhead, and allowance for funds used during construction ("AFUDC"). The cost of renewals and betterments that extend the useful life of utility plant are also capitalized. The cost of repairs, replacements, and major maintenance projects, which do not extend the useful life or increase the expected output of the asset, are expensed as incurred. Whenever utility plant is retired, its original cost, together with the cost of removal, less salvage, is charged to accumulated depreciation. Depreciation is generally computed over the estimated useful life of the asset using the composite straight-line method. Depreciation studies are conducted periodically to update the composite rates and are approved by the state regulatory bodies.

The composite rates and weighted average life for the years ended December 31, 2011 and December 31, 2010 are as follows:

	December 31,		
	2011	2010	
Composite rates	4.2%	4.1%	
Weighted average life	24	24	

In accordance with applicable regulatory accounting guidance, the Company records AFUDC, which represents the estimated debt and equity costs of capital funds necessary to finance the construction of new regulated facilities. Both the debt and equity components of AFUDC are non-cash amounts within the statements of income. AFUDC is capitalized as a component of the cost of utility plant, with an offsetting credit to other income for the equity component and other interest for the debt component in the accompanying statements of income. After construction is completed, the Company is permitted to recover these costs through inclusion in the rate base and the corresponding depreciation expense.

#### Goodwill

Goodwill, which is included under the utility plant in the accompanying balance sheets, represents the excess of the purchase price of a business combination over the fair value of tangible and intangible assets acquired, net of the fair value of liabilities assumed and the fair value of any non-controlling interest in the acquisition. The Company tests goodwill for impairment on an annual basis and, on an interim basis, when certain events or circumstances exist.

The goodwill impairment analysis is comprised of two steps. In the first step, the Company compares the fair value of each reporting

FERC FORM NO. 1 (ED. 12-88)	Page 123.2	

Name of Respondent	This Report is:	Date of Report	Year/Period of Report	
	(1) An Original	(Mo, Da, Yr)	·	
Nantucket Electric Company	(2) A Resubmission	/ /	2011/Q4	
NOTES TO FINANCIAL STATEMENTS (Continued)				

unit to its carrying value. If the fair value of the reporting unit exceeds the carrying value of the net assets assigned to that unit, goodwill is not considered impaired and no further analysis is required to be performed. If the carrying value of the net assets assigned to the reporting unit exceeds the fair value, then a second step is performed to determine the implied fair value of the reporting unit's goodwill. If the carrying value of a reporting unit's goodwill exceeds its implied fair value, then an impairment charge equal to the difference is recorded.

For the purpose of first step analysis, determination of reporting unit's fair value is typically based on combination of an income-based approach using projected discounted cash flows and a market-based approach using valuation multiples of comparable companies to determine fair value. The resulting fair value of the annual analyses determined that no adjustment of the goodwill carrying value was required for our continuing operations at December 31, 2011 and December 31, 2010.

# F. Cash and Cash Equivalents

The Company classifies short-term investments that are highly liquid and have maturities of three months or less at the date of purchase as cash equivalents. These short-term investments are carried at cost which approximates fair value.

# G. Special Deposits

Special deposits represent restricted cash that the Company is required to have for property, health insurance, and worker's compensation insurance.

#### H. Income Taxes

Income taxes have been computed utilizing the asset and liability approach that requires the recognition of deferred tax assets and liabilities for the tax consequences of temporary differences by applying enacted statutory tax rates applicable to future years to differences between the financial statement carrying amounts and the tax basis of existing assets and liabilities.

Deferred income taxes reflect the tax effect of net operating losses, capital losses and general business credit carryforwards, and the net tax effects of temporary differences between the carrying amount of assets and liabilities for financial statement and income tax purposes, as determined under enacted tax laws and rates. The financial effect of changes in tax laws or rates is accounted for in the period of enactment. Deferred investment tax credits are amortized over the useful life of the underlying property.

## I. Comprehensive Income (Loss)

Comprehensive income (loss) is the change in the equity of a company, not including those changes that result from shareholder transactions. While the primary component of comprehensive income (loss) is reported net income or loss, the other component includes unrealized gains and losses associated with certain investments held as available for sale, deferred gains and losses on derivative contracts associated with hedging activities, and deferred pension and postretirement plans benefit.

#### J. Employee Benefits

The Company follows the provisions of the Financial Accounting Standards Board ("FASB") accounting guidance related to the accounting for defined benefit pension and postretirement plans which requires employers to fully recognize all postretirement plans' funded status on the balance sheet as a net liability or asset and requires an offsetting adjustment to accumulated other comprehensive income in shareholder's equity upon implementation or, in the case of regulated enterprises, to regulatory assets or liabilities. Consistent with past practice, and as required by the guidance, the Company values its pension and postretirement benefits other than pensions ("PBOP") assets using the year-end market value of those assets. Benefit obligations are also measured at year-end.

# K. Fair Value Measurements

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market

Name of Respondent	This Report is:	Date of Report	Year/Period of Report		
	(1) An Original	(Mo, Da, Yr)	-		
Nantucket Electric Company	(2) A Resubmission	11	2011/Q4		
NOTES TO FINANCIAL STATEMENTS (Continued)					

participants at the measurement date. The following is the fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value into three levels as follows:

Level 1 — quoted prices (unadjusted) in active markets for identical assets or liabilities that a company has the ability to access as of the reporting date;

Level 2 — inputs other than quoted prices included within Level 1 that are directly observable for the asset or liability or indirectly observable through corroboration with observable market data; and

Level 3 — unobservable inputs, such as internally-developed forward curves and pricing models for the asset or liability due to little or no market activity for the asset or liability with low correlation to observable market inputs.

The asset or liability's fair value measurement level within the fair value hierarchy is based on the lowest level of any input that is significant to the fair value measurement. Valuation techniques used maximize the use of observable inputs and minimize the use of unobservable inputs.

# L. Plant Materials and Operating Supplies

Plant materials and operating supplies are stated at the lower of cost or market value with cost determined on an average weighted cost basis and expensed as used or capitalized into specific capital additions as utilized. The Company's policy is to write off obsolete inventory.

#### M. Recent Accounting Pronouncements

#### Fair Value Measurements

In April 2011, the FASB issued accounting guidance that substantially amended existing guidance with respect to the fair value measurement topic ("the Topic"). The guidance seeks to amend the Topic in order to achieve common fair value measurement and disclosure requirements in GAAP and International Financial Reporting Standards. Consequently, the guidance changes the wording used to describe many of the requirements in GAAP for measuring fair value and for disclosing information about fair value measurements as well as changing specific applications of the Topic. Some of the amendments clarify the FASB's intent about the application of existing fair value measurement requirements. Other amendments change a particular principle or requirement for measuring fair value or for disclosing information about fair value measurements including, but not limited to, fair value measurement of a portfolio of financial instruments, fair value measurement of premiums and discounts, and additional disclosures about fair value measurements. This guidance is effective for financial statements issued for annual periods beginning after December 15, 2011. The early adoption of this guidance for non-public companies is permitted but only for interim periods beginning after December 15, 2011. The Company is currently determining the potential impact of the guidance on its financial position, results of operations, and cash flows.

## Goodwill Impairment

In September 2011, the FASB issued accounting guidance related to goodwill impairment testing whereby, an entity has the option to first assess qualitative factors to determine whether the existence of events or circumstances leads to a determination that it is more likely than not that the fair value of a reporting unit is less than its carrying amount. If, after assessing the totality of events or circumstances, an entity determines it is not more likely than not that the fair value of a reporting unit is less than its carrying amount, then performing the two-step impairment test is unnecessary. Otherwise, the entity is required to perform the two-step impairment test. This guidance is effective for annual and interim goodwill impairment tests performed for fiscal years beginning after December 15, 2011. Early adoption is permitted. The Company does not expect adoption of this guidance to have an impact on the Company's financial position, results of operations, or cash flows.

	(1) An Original	(Mo, Da, Yr)	·	
Nantucket Electric Company	(2) A Resubmission	/ /	2011/Q4	
NOTES TO FINANCIAL STATEMENTS (Continued)				

#### Offsetting Assets and Liabilities

In December 2011, the FASB issued accounting guidance requiring enhanced disclosure related to offsetting assets and liabilities. Under the amendments in this Update, entities will be required to disclose both gross information and net information about both instruments and transactions eligible for offset in the statement of financial position and instruments and transactions subject to an agreement similar to a master netting agreement. This scope would include items such as derivatives. This guidance is effective for fiscal years, and interim periods within that year, beginning after January 1, 2013, and is to be applied retrospectively. As this guidance relates to disclosure only, the adoption of this guidance will not have an impact on the Company's financial position, results of operations, or cash flows.

#### N. Reclassifications

Certain prior period data in the cash flow statement has been reclassified between operating, investing and financing activities to conform with the current presentation. These reclassifications had no effect on the results of operations and the statement of financial condition.

# Note 2. Rates and Regulatory

The following table presents the Company's regulatory assets and regulatory liabilities at December 31, 2011 and December 31, 2010:

	December 31,			,
	2	2011	2	2010
		(in thousand	ls of dol	lars)
Other regulatory assets:				
Long-term portion of standard offer under-recovery	\$	1,973	\$	1,978
Second cable deferral		358		1,830
Pension expenses		2,829		3,445
Regulatory deferred tax assets - FAS 109		200		200
Other				(21)
Total other regulatory assets	\$	5,360	\$	7,432
Other regulatory liabilities:				
Regulatory deferred tax liabilities - FAS 109	\$	821	\$	823
Postretirement benefits		15		36
Other		(19)		2
Total other regulatory liabilities	\$	817	\$	861

The regulatory items above are not included in the utility rate base at the time the expense is incurred or the revenue is billed. The Company records carrying charges, as appropriate, on the regulatory items for which cash expenditures have been made and are subject to recovery or for which cash has been collected and is subject to refund. Carrying charges are not recorded on items for which expenditures have not yet been made. The Company anticipates recovering these costs in the rates concurrently with future cash expenditures. If recovery is not concurrent with the cash expenditures, the Company will record the appropriate level of carrying charges.

#### Rate Matters

Rates for services rendered by the Company are subject to approval by the DPU. In May 2009, the Company with its affiliate, Massachusetts Electric Company ("Massachusetts Electric"), filed an application to increase electric base distribution rates. In April 2010, the DPU issued a final order approving an overall increase in base distribution revenue of approximately \$43.9 million based

FERC FORM NO. 1 (ED. 12-88)	Page 123.5	
		<u> </u>

Name of Respondent	This Report is:	Date of Report	Year/Period of Report		
	(1) An Original	(Mo, Da, Yr)	-		
Nantucket Electric Company	(2) A Resubmission	/ /	2011/Q4		
NOTES TO FINANCIAL STATEMENTS (Continued)					

upon a 10.35% rate of return on equity and a 49.99% equity ratio. Approximately \$6.0 million of the increase relates to storm costs associated with restoration of service following an ice storm in December 2008. New rates went into effect January 1, 2010.

In addition, the DPU approved, with modification, a revenue decoupling mechanism ("RDM") proposed by the Company, as well as the reconciliation of commodity-related bad debt and working capital, and pension and PBOP costs to actual costs. In November 2010, and subsequently revised in February 2011, the Company and Massachusetts Electric filed an application for approval under its RDM to refund \$3.4 million to customers. The DPU approved the rates to go into effect subject to further investigation, and in March 2011, the DPU opened a proceeding, as requested by the Massachusetts Attorney General's Office, for an independent audit of the Company's 2009 capital investment which, in part, formed the basis for the Company's RDM rate adjustment. On July 7, 2011, the DPU issued its decision related to the scope of the audit and directed the Company to engage an independent auditor to provide audit services consistent with the requirements of this order. The Company is awaiting the Department's order on the draft request for proposal ("RFP") submitted on July 28, 2011.

In November 2011, and subsequently updated in February 2012, the Company and Massachusetts Electric filed for approval of its annual RDM to collect \$9.6 million from customers with the factor to go into effect March 1, 2012. The resulting rates were approved subject to reconciliation and further investigation.

The rate case order also allowed for the recovery of non-capitalized pension and PBOP costs outside of base rates through a separate factor. As a result, the Company is authorized to recover all pension and PBOP expenses from its customers. The difference in the costs of the Company's pension and PBOP plans from the amounts billed through this separate factor is deferred as a regulatory asset to be recovered or refunded over the following three years. Consequently in 2010, the Company reclassified accumulated other comprehensive income of \$1.2 million and related accumulated deferred income taxes of \$0.8 million to regulatory assets.

As part of their last general rate case, the Company and Massachusetts Electric received approval from the DPU to recover approximately \$65.7 of incremental costs associated with a December 2008 winter storm ("December 2008 Storm") subject to further DPU review, reconciliation and demonstration by the Company and Massachusetts Electric that they reasonably and prudently incurred the costs. On April 1, 2011, the Company and Massachusetts Electric filed an audit performed by PricewaterhouseCoopers LLC of costs incurred to restore electric service following the December 2008 Storm. On December 7, 2011, the DPU issued an interlocutory order requiring the companies to file testimony in support of the reasonableness and prudency of the costs. On March 1, 2012, the companies filed testimony consistent with the requirements of the interlocutory order and reduced their request for recovery to \$64.9 million. This docket is ongoing at the DPU.

# Other Regulatory Matters

In the general rate case involving the Company's Massachusetts gas distribution affiliates, the DPU opened an investigation to address the allocation and assignment of costs to the gas affiliates by the National Grid service companies. In June 2011, the Attorney General's Office requested that the DPU expand the scope of the audit to address the allocation and assignment of costs to the Company by the NGUSA service companies and to review the NGUSA's cost allocation practices. The Company has agreed to expand the scope of the audit to its Massachusetts electric distribution companies. On March 12, 2012, the DPU issued an order confirming that the scope of the audit would include the Massachusetts electric distribution companies and directing the Company to revise its draft RFP consistent with the DPU's order and refile it within seven days. The Company cannot currently predict the outcome of this proceeding.

In January 2011, the DPU opened an investigation into the Company and Massachusetts Electric's preparation and response to a December 2010 winter storm. The DPU has the authority to issue fines not to exceed approximately \$0.3 million for each violation for each day that the violation persists. On September 22, 2011, the DPU approved a settlement between the Company and the Attorney General that included a \$1.2 million refund to customers. The DPU is currently investigating the Company and Massachusetts Electric's response to Tropical Storm Irene and the October 29, 2011 snow storm in a consolidated proceeding. The maximum fine may not exceed \$20 million for any related series of violations for each storm.

In November 2008, the FERC commenced an audit of NGUSA, including its service companies and other affiliates in the National Grid holding company system. The audit evaluated our compliance with: 1) cross-subsidization restrictions on affiliate transactions;

Name of Respondent	This Report is:	Date of Report	Year/Period of Report	
	(1) An Original	(Mo, Da, Yr)	·	
Nantucket Electric Company	(2) A Resubmission	/ /	2011/Q4	
NOTES TO FINANCIAL STATEMENTS (Continued)				

2) accounting, recordkeeping and reporting requirements; 3) preservation of records requirements for holding companies and service companies; and 4) Uniform System of Accounts for centralized service companies. The final audit report from the FERC was received in February 2011. In April 2011, NGUSA replied to the FERC and outlined its plan to address the findings in the report, which we are currently in the process of implementing. None of the findings had a material impact on the consolidated financial statements of the Company.

In addition to the rates and tariffs put into effect following the rate case, the Company continues to be authorized to recover costs associated with the procurement of electricity for its customers, all transmission costs, and costs charged by the Company's affiliate New England Power ("NEP"), for stranded costs associated with NEP's former electric generation investments.

# Energy Efficiency

Pursuant to the 2008 Green Communities Act ("GCA"), the Massachusetts Legislature mandated large scale and innovative ideas for implementing renewable and alternative energy resources, as well as increased energy efficiency spending. The Company's first three-year energy efficiency plan (offered as a single combined program with Massachusetts Electric) covers calendar years 2010 through 2012 and significantly expands energy efficiency programs for customers with a concomitant increase in spending. The budget for the two electric companies in Massachusetts for calendar years 2010 through 2012, is \$572.8 million. In addition to cost recovery, the Company has the opportunity to earn a performance incentive. The Company also has requested recovery of lost base revenues for calendar year 2009.

In May 2010, the Company and Massachusetts Electric announced that they entered into a 15-year power purchase agreement ("PPA") with Cape Wind Associates, LLC to purchase half of the energy, capacity and renewable energy credits generated by the proposed 468 MW offshore wind project at an adjusted price of 18.7 cents per kilowatt hour beginning in 2013 (escalated for inflation by 3.5% thereafter). In November 2010, the DPU approved the PPA including the Company's proposed cost recovery mechanism. The Supreme Judicial Court of Massachusetts affirmed the DPU Order approving the PPA on December 28, 2011.

## **Note 3. Employee Benefits**

The Company participates with certain other NGUSA subsidiaries in non-contributory defined benefit plans ("Pension Plans") and the PBOPs (together with the Pension Plans the "Plans"). The Pension Plans are comprised of both qualified and non-qualified plans. The qualified pension plans provide substantially all employees hired before January 1, 2011 with a retirement benefit. The non-qualified pension plans provide additional defined pension benefits to certain eligible executives. PBOPs provide health care and life insurance coverage to eligible retired employees. Eligibility is based on age and length of service requirements and in most cases, retirees must contribute to the cost of their coverage.

The Plan assets are commingled and cannot be allocated to an individual company. The Plans' costs are allocated to the Company. The Company is subject to certain deferral accounting requirements mandated by the DPU for pension and PBOP expense. Any variation between actual costs and amounts used to establish rates are deferred as a regulatory asset or a regulatory liability and collected from or refunded to customers in subsequent periods. Any deferral is recorded as either a regulatory asset or regulatory liability in the accompanying balance sheets.

At December 31, 2011 and December 31, 2010, the pension plans of NGUSA have a net underfunded obligation of \$339.1 million and \$377.7 million, respectively. The PBOP plans of NGUSA have a net underfunded obligation of \$340.8 million and \$429.1 million as of December 31, 2011 and December 31, 2010, respectively.

Deferred investment tax credits	\$	2	\$	4

<sup>(1)</sup> There were no valuation allowances for deferred tax assets at December 31, 2011 or December 31, 2010.

The Company is a member of the National Grid Holding Inc. ("NGHI") and subsidiaries consolidated federal income tax return. The Company has joint and several liability for any potential assessments against the consolidated group.

The Company adopted the provisions of FASB guidance which clarifies the accounting for uncertain tax positions as modified by FERC Docket AI07-2-000. FASB guidance provides that the financial effects of a tax position shall initially be recognized when it is more likely than not, based on the technical merits, that the position will be sustained upon examination, assuming the position will be audited and the taxing authority has full knowledge of all relevant information. FERC Docket AI07-2-000 issues supplementary guidance requiring entities to continue to recognize deferred income taxes for Commission accounting and reporting purposes based on the difference between positions taken in tax returns filed or expected to be filed and amounts reported in the financial statements.

As of December 31, 2011 and December 31, 2010, the Company did not have any unrecognized tax benefits.

The following table reconciles the changes to the Company's unrecognized tax benefits for the years ended December 31, 2011 and December 31, 2010:

	Years Ended December 31,			
	2	2011	20	010
		(in thousands	of dollars	)
Balance at the beginning of the year	\$	2,569	\$	-
Additions based on tax positions related to the prior years		27		-
Additions based on tax positions related to the current year		62		2,569
		2,658		2,569
Less: unrecognized tax benefits on temporary differences		2,658		2,569
Balance at the end of the year	\$	-	\$	-

Name of Respondent	This Report is:	Date of Report	Year/Period of Report			
	(1) An Original	(Mo, Da, Yr)				
Nantucket Electric Company	(2) A Resubmission	/ /	2011/Q4			
NOTES TO FINANCIAL STATEMENTS (Continued)						

As of December 31, 2011 and December 31, 2010, the Company has accrued for interest related to unrecognized tax benefits of \$0.09 million and \$0.04 million, respectively. During the years ended December 31, 2011 and December 31, 2010, the Company recorded interest expense of \$0.05 million and \$0.04 million, respectively. The Company recognizes accrued interest related to unrecognized tax benefits in other interest expense and related penalties, if applicable, in non-operating expenses. No penalties were recognized during the years ended December 31, 2011 and December 31, 2010.

Federal income tax returns have been examined and all issues have been agreed with the Internal Revenue Service ("IRS") and the NGHI consolidated filing group through March 31, 2004. During the year ended December 31, 2010, the NGHI consolidated group reached an agreement with the IRS that contained a settlement of the majority of the income tax issues related to the years ended March 31, 2005 through March 31, 2007 as well as an acknowledgment that certain discrete items remained disputed.

The Company is in the process of appealing certain disputed issues with the IRS Office of Appeals relating to its tax returns for March 31, 2005 through March 31, 2007. The Company does not anticipate a change in its unrecognized tax positions in the next twelve months as a result of filing the appeals. During the calendar year, the IRS began a new audit examination cycle covering the fiscal years ended March 31, 2008 and March 31, 2009. The fiscal years ended March 31, 2010 and March 31, 2011 remain subject to examination by the IRS.

The Company is a member of the NGUSA Service Company Massachusetts unitary group since December 2010. Prior to filing as a member of this unitary group, the Company filed on a separate basis. The tax returns for the fiscal years ended March 31, 2009 through March 31, 2011 remain subject to examination by the State of Massachusetts.

#### **Note 6. Fair Value Measurements**

Available for sale securities are primarily in equities and are investments based on quoted market prices and municipal and corporate bonds based on quoted prices of similar traded assets in open markets.

The following table presents assets and liabilities measured and recorded at fair value on the Company's balance sheet on a recurring basis and their level within the fair value hierarchy as of December 31, 2011 and December 31, 2010:

	December 31, 2011							
	Le	Level 1 Level 2 Level 3 Total						otal
			(in	ı thousand	s of dollar	s)		
Assets:								
Available for sale securities	\$	277	\$	377	\$		\$	654
Total assets	\$	277	\$	377	\$	_	\$	654
			J	December	31, 2010	)		
	Le	vel 1	Le	vel 2	Lev	el3	Т	otal
			(in	ı thousand	s of dollar	s)		
Assets:								
Available for sale securities	\$	263	\$	347	\$		\$	610
Total assets	\$	263	\$	347	\$	_	\$	610

A transfer into Level 3 represents existing assets or liabilities that were previously categorized at a higher level for which the inputs became unobservable. A transfer out of Level 3 represents assets and liabilities that were previously classified as Level 3 for which the inputs became observable based on the criteria discussed previously for classification in Level 2. These transfers, which are recognized at the end of each period, result from changes in the observability of forward curves from the beginning to the end of each reporting period. There were no transfers between Level 1 and Level 2 during the years ended December 31, 2011 and December 31, 2010.

Name of Respondent	This Report is:	Date of Report	Year/Period of Report				
(1) An Original		(Mo, Da, Yr)	-				
Nantucket Electric Company	(2) A Resubmission	/ /	2011/Q4				
NOTES TO FINANCIAL STATEMENTS (Continued)							

## Long-term Debt

The Company's balance sheets reflect the long-term debt at carrying value. The fair value of this debt at December 31, 2011 and December 31, 2010 is approximately \$53.5 million. The fair value is based on quoted market prices where available or calculated prices based on the remaining cash flows of the underlying bond discounted at the Company's incremental borrowing rate.

#### Note 7. Debt

Short-term Debt

The Company has regulatory approval from the FERC to issue up to \$15 million of short-term debt. The Company had no short-term debt outstanding to third-parties at December 31, 2011 and December 31, 2010, respectively. Long-term Debt

Long-term debt at December 31, 2011 and December 31, 2010 is as follows:

			Decem	ber 31
	Rate	Maturity	2011	2010
			(in thousand.	s of dollars)
2004 MDFA Tax Exempt (progressive annual sinker)	Variable	March 1, 2016	\$ 1,525	\$ 1,755
2004 MDFA Tax Exempt	Variable	March 1, 2039	10,000	10,000
2005 MDFA Tax Exempt	Variable	December 1, 2040	28,000	28,000
2007 MDFA Tax Exempt	Variable	August 1, 2042	13,300	13,300
Unamortized discounts				(42)
Total long-term debt			\$ 52,825	\$ 53,013

At December 31, 2011, the Company had approximately \$52.8 million of tax exempt Electric Revenue Bonds in commercial paper mode with variable maturity dates ranging from 2016 through 2042 and variable interest rates ranging from 0.3% to 0.9% during the year ended December 31, 2011. The bonds were issued by the Massachusetts Development Finance Agency in connection with the Company's financing of its first and second underground and submarine cable projects. Sinking fund payments of \$0.2 million was made during the year ended December 31, 2011.

On December 31, 2010, the Company had a Standby Bond Purchase Agreement ("SBPA") of \$58 million, which was due to expire in November 2011. On November 22, 2011, the Company amended the SBPA to have a limit of \$54.7 million and expiring on November 20, 2012. This agreement was available to provide liquidity support for \$52.8 million of the Company's long-term bonds in tax-exempt commercial paper mode. The Company has classified this debt as long-term due to its intent and ability to refinance the debt on a long-term basis if it is not able to remarket them. In addition, NGUSA has provided a letter of support which, in the event the SBPA is not in place, provides a sufficient means of refinancing on a long-term basis. At December 31, 2011 and December 31, 2010, there were no bond purchases by the banks under this agreement.

Massachusetts Electric, an affiliated entity, unconditionally guarantees the full and prompt payment of the principal, premium, if any, and interest on certain tax exempt bonds issued by the Massachusetts Development Finance Agency in connection with the Company's financing of its first and second underground and submarine cable projects. Massachusetts Electric would be required to make any principal, premium, or interest payments if the Company failed to pay.

2015	330
2016	365
Thereafter	 51,300
Total	\$ 52,825

#### **Note 8. Commitments and Contingencies**

#### Legal Matters

The Company is subject to various legal proceedings arising out of the ordinary course of its business. The Company does not consider any of such proceedings to be material, individually or in the aggregate, to its business or likely to result in a material adverse effect on its results of operations, financial condition, or cash flows.

## **Environmental Matters**

The normal ongoing operations and historic activities of the Company are subject to various federal, state and local environmental laws and regulations. Under federal and state Superfund laws, potential liability for the historic contamination of property may be imposed on responsible parties jointly and severally, without fault, even if the activities were lawful when they occurred.

The Massachusetts Department of Environmental Protection has named the Company as a potentially responsible party for remediation of a site at which hazardous waste is alleged to have been disposed. The Company believes that obligations imposed on it because of environmental laws will not have a material impact on its results of operations or financial position.

# **Note 9. Related Party Transactions**

## Intercompany Money Pool

NGUSA and certain affiliates, including the Company, participate in money pools to more effectively utilize cash resources and to reduce outside short-term borrowings. The money pool in which this Company participates is administered by the NGUSA Service Company as the agent for the participants. Short-term borrowing needs are met first by available funds of the moneypool participants. Borrowings from the money pool bear interest in accordance with the moneypool agreement. Companies that invest in the pool share the interest earned on a basis proportionate to their average monthly investment in the money pool. Funds may be withdrawn from or repaid to the pool at any time without prior notice. The Company had a short-term money pool investment of \$17.8 million and \$11.3 million at December 31, 2011 and December 31, 2010, respectively, which is included as notes receivable from associated companies in the accompanying balance sheets. The average interest rate for the money pool was 0.18% and 0.26% for the years ended December 31, 2011 and December 31, 2010, respectively.

## Accounts Receivable From/Payable to Associated Companies

The Company engages in various transactions with NGUSA and its affiliates. Certain activities and costs, such as executive and administrative, financial (including accounting, auditing, risk management, tax, and treasury/finance), human resources, information technology, legal, and strategic planning are shared between the companies and charged to each company appropriately. In addition, the Company has a tax sharing agreement with NGHI, a NGUSA affiliate, in filing consolidated tax returns. The

	(1) An Original	(Mo, Da, Yr)	·					
Nantucket Electric Company	(2) A Resubmission	1 1	2011/Q4					
NOTES TO FINANCIAL STATEMENTS (Continued)								

Company's share of the tax liability is allocated resulting in a payment to or refund from NGHI.

The Company records short-term payables to and receivables from certain of its affiliates in the ordinary course of business. The amounts payable to and receivable from its associates do not bear interest. At December 31, 2011 and December 31, 2010, the Company had outstanding receivable and payable positions as follows:

		counts Rec			Accounts Payable To Associated Companies				
	December 31,		December 31,		December 31,		Decer	nber 31,	
		2011		(in thousand				010

Other		87		296		-		127	
Total	\$	4,727	\$	3,856	\$	1,732	\$	328	

#### Service Company Charges

The affiliated service companies of NGUSA provide certain services to the Company at their cost. The service company costs are generally charged to associated companies through a tiered approach. First and foremost, costs are directly charged to the benefited company whenever practicable. Secondly, in cases where direct charging cannot be readily determined, costs are typically allocated using cost/causation principles linked to the relationship of that type of service, such as meters, square footage, number of employees, etc. Lastly, all other costs are allocated based on a general allocator. These costs include operating and capital expenditures of \$1.8 million and \$1 million for the year ended December 31, 2011 and \$2.1 million and \$1.2 million for the year ended December 31, 2010, respectively.

#### Related Party Reimbursement

In accordance with the Credit and Operating Support Agreement dated March 26, 1996, Massachusetts Electric will reimburse the Company an amount equal to the difference between the Company's actual net income for the year and the net income necessary for the Company to earn a return on equity ("ROE") equivalent to the Company's DPU approved weighted average allowed ROE for the year, currently 10.35%. If the Company's actual ROE for the year exceeds the Company's allowed ROE, the Company reimburses to Massachusetts Electric the excess amount of the earnings. This reimbursement shall constitute an additional increase/decrease of revenue to the Company and an increase/decrease of expense to Massachusetts Electric. For the years ended December 31, 2011 and December 31, 2010, Massachusetts Electric reimbursed the Company approximately \$4.6 million and \$2.5 million, respectively.

# Note 10. Restrictions on Payment of Dividends

Pursuant to the provisions of the long-term note agreement, payment of dividends on common stock would not be permitted if, after giving effect to such payment of dividends, common equity becomes less than 30% of total capitalization. At December 31, 2011 and December 31, 2010 common equity was 40% and 39%, respectively, of total capitalization. Under these provisions, none of the Company's retained earnings at December 31, 2011 and December 31, 2010 were restricted as to common dividends.

		SALI	ES FOR RESALE (Account 44	7)				
power for er Purci 2. E any c 3. In follow RQ - supp must LF - reaso from defin earlie than SF - one y LU - of se IU -	. Report all sales for resale (i.e., sales to purchasers other than ultimate consumers) transacted on a settlement basis other than one exchanges during the year. Do not report exchanges of electricity (i.e., transactions involving a balancing of debits and credits or energy, capacity, etc.) and any settlements for imbalanced exchanges on this schedule. Power exchanges must be reported on the Purchased Power schedule (Page 326-327).  2. Enter the name of the purchaser in column (a). Do note abbreviate or truncate the name or use acronyms. Explain in a footnote my ownership interest or affiliation the respondent has with the purchaser.  3. In column (b), enter a Statistical Classification Code based on the original contractual terms and conditions of the service as ollows:  30. For requirements service. Requirements service is service which the supplier plans to provide on an ongoing basis (i.e., the supplier includes projected load for this service in its system resource planning). In addition, the reliability of requirements service must be the same as, or second only to, the supplier's service to its own ultimate consumers.  5. For tong-term service. "Long-term" means five years or Longer and "firm" means that service cannot be interrupted for economic easons and is intended to remain reliable even under adverse conditions (e.g., the supplier must attempt to buy emergency energy rom third parties to maintain deliveries of LF service). This category should not be used for Long-term firm service which meets the lefinition of RQ service. For all transactions identified as LF, provide in a footnote the termination date of the contract defined as the sarriest date that either buyer or setter can unilaterally get out of the contract.  1F. For intermediate-term firm service. The same as LF service except that "intermediate-term" means longer than one year but Less han five years.  3F. For short-term firm service from a designated generating unit. "Long-term" means five years or Longer. The availability and reliabili

### OPERATING REVENUES (Accounts 261, 262, 263, 265)

(Not Applicable)

- 1. Report below an anlysis of the changes during the year for each of the above-named reserves.
- 2. Show name of reserve and account number, balance beginning of year, credits, debits, and balance at end of year. Credit amounts should be shown in black, debit amounts enclosed by parentheses.
- 3. Each credit and debit amount should be described as to its general nature and the contra account debited or credited shown. Combine the amounts of monthly accounting entries of the same general nature. If respondent has more than one utility department, contra accounts debited or credited should indicate the utility department affected.
- 4. For Accounts 261, Property Insurance Reserve, 262, Injuries and Damages Reserve, explain the nature of the risks covered by the reserve.

5. For Account 265, Miscellaneous Operating Reserves, report separately each reserve composing the account and explain breifly its purpose.

#### CHARGES FOR OUTSIDE SERVICES

- 1. Report the information specified below for all charges made during the year included in any account (including plant accounts) for outside services, such as services concerning rates, management, construction, engineering, research, financial, valuation, legal, accounting, purchasing, advertising, labor relations, and public relations, rendered the respondent under written or oral arrangement, for which aggregate payments during the year to any corporation, partnership, organization of any kind, or individual (other than for services as an employee or for payments made for medical and related services) amounted to 5% or more of total charges for outside professional and other consultative services, including payments for legislative services except those which should be reported in Account 426.4, Expenditures for Certain Civic, Political and Related Activities:
  - (a) Name and address of person or organization rendering services,
  - (b) description of services received during year and project or case to which services relate,
  - (c) basis of charges,
  - (d) total charges for the year, detailing utility department and account charges.
- 2. For aggregate payments to any one individual, group, partnership, corporation or organization of any kind in excess of \$25,000 (not included in No. 1), there shall be reported the name of the payee, the predominant nature of the services performed and the amount of payment. Amounts charged to plant accounts shall be reported separately.
- 3. All charges not reported under No. 1 or 2 shall be aggregated by the type of service and each type shall show the amount charged. Amounts charged to plant accounts shall be reported separately for each type.
- 4. For any such services which are of a continuing nature give date and term of contract and date of Commission authorization, if contract received Commission approval.
- 5. Designate associated companies.

1 2 3	(a) National Grid USA Service Company (Associated Company) 40 Sylvan Road, Waltham, Massachusetts 02451
4	(b) The following services are rendered:
5 6	Servicing Division:
7 8	Purchasing, Stores, Rates, Advertising, Employee Relations,
