donations are out of reach. If chosen for the commission I would challenge myself and my fellow members to keep the poor in mind as we move forward with the wording of the coming amendment. I firmly believe that every citizen of the Commonwealth, and of the United States, deserves an equal say in their governance, as well as equal access to their elected officials, and that future generations will look back on this as being one of the defining moments in American politics. Statement of Interest       I spent the better part of a decade working as a cable technician living paycheck to paycheck and having my pay and benefits slowly chipped away by a fortune 500 company that spent millions lobbying members of my government, while my voice went virtually unheard. In a political system where money equals influence, poverty leads to lack of representation. And as we move forward with the intent of Ballo Question 2, I think it is vitally important that part of that conversation be the unique challenges that come with being poor when it comes to political engagement. At the heart of the question is the idea that ordinary people with small donations can't compete with huge donations from billionaires and corporations. But what if fails to address is those for whome even small donations are out of reach. # NATHANIEL G. WARING

# Summary

Computer scientist with a background in politics looking to bring a host of technical and communication skills to the political realm. Is as at home doing web development, hands on IT work, media relations, or managing a team of staff and volunteers – sometimes all at once. As a former candidate for State Representative, co-chair of the Pioneer Valley DSA's Electoral Working group, and a political commentator on WHMP radio, Nathaniel already has the working relationships with the movers and shakers in western Massachusetts to hit the ground running and build a local grassroots organization to support a national campaign.
