

## Goals and Objectives

### Improve Access, Safety, and Mobility for All

- ▶ Enhance the safety of the transportation system for all users.
- ▶ Facilitate access to transit options.
- ▶ Balance travel delays for all roadway users, prioritizing non-auto modes.
- ▶ Protect the integrity of the I-90 corridor and parallel railroad tracks as major east-west regional connections.
- ▶ Leverage and improve upon the transportation system to close social and economic equity gaps.

### Reconnect Newton's Neighborhoods

- ▶ Reconnect neighborhoods currently isolated by the Newton Corner interchange.
- ▶ Improve safety, convenience, and comfort for pedestrian, bicycle, and transit travel.
- ▶ Capitalize on the presence of existing regional pedestrian and bicycle facilities and recreational resources.
- ▶ Create direct regional north/south connections for all users.
- ▶ Promote placemaking/placekeeping opportunities and support a welcoming urban environment through the lens of equity.

### Enhance Quality of Life

- ▶ Ensure that the benefits of the corridor's transportation assets and related resources are distributed equitably.
- ▶ Take care to minimize impacts to residential neighborhoods from the externalities of I-90 transportation demands.
- ▶ Minimize public health and environmental impacts and take opportunities to improve related outcomes.
- ▶ Enhance economic opportunities within the study area aligned with local, regional, and statewide goals.
- ▶ Support local, regional, and statewide land use and open space plans.

### Promote Sustainable Transportation Solutions

- ▶ Create solutions that include climate change mitigation measures.
- ▶ Improve resilience of the transportation network to localized risks associated with worsening impacts of climate change.
- ▶ Further the transition to clean transportation modes to mitigate climate change while enabling improved community health indicators and greater health equity.
- ▶ Align the project with local climate mitigation initiatives as well as the Commonwealth's '2050 Decarbonization Roadmap' and associated 'Clean Energy and Climate Plan for 2025 and 2030', and '2023 ResilientMass Plan'.

### Develop Actionable Recommendations

- ▶ Create solutions that have demonstrated support from the public and host communities.
- ▶ Identify projects that are cost-effective based on return on investment relating to the other study goals and objectives.
