

Our Changing Precipitation Webinar Series

*A conversation on the science of precipitation and planning
for the future*

September - October 2021

NOAA's [Climate Program Office](#) and [National Centers for Environmental Information](#), in partnership with the [Water Research Foundation](#), are pleased to announce a five-part webinar series on Our Changing Precipitation. The webinars will take place on Tuesday afternoons (Eastern). Join us to learn more about some of

the considerations and methods for working with available precipitation science and information to advance resilience planning.

Attendees will hear in lay terms, and help advance the conversation about, our current ability to project precipitation at temporal and spatial scales relevant for local water infrastructure decision making. You will also learn about some practical ways to take action to build resilience to climate change.

Session 1: Focus on Science

September 14, 2021, 2-3:30 pm EDT

Session 2: From Science to Application - Climate Science, Hydrology, and Planning - Part 1

September 14, 2021, 2-3:30 pm EDT

Session 3: From Science to Application - Climate Science, Hydrology, and Planning - Part 2

September 28, 2021, 2-4 pm EDT

Session 4: What's on the Horizon for Science and Application of Climate Change Information for Water Infrastructure Managers

October 5, 2021, 1:30-3 pm EDT

**Session 5: Peer Examples - Evaluating Changing
Precipitation Trends for Managing Water Infrastructure**

October 12, 2021, 1:30-3:30 pm EDT
