## Norfolk County Mosquito Control District: Narrative Memo Highlighting Justification of the FY 2025 Proposed Budget Request May, 2024 update

**FY 2025:** The Norfolk County Mosquito Control District is proposing an FY 2025 2.5% budget increase over FY2024, to \$2,220,199.

Despite a reasonably healthy rollover going into 2025, looking ahead, there are multiple concerns that lead NCMCD to request a modest budget increase.

Primary factors contributing to this proposed budget request are as follows:

- 1) The District has been down, up to 2.5 FTE's over the past couple years and this has led to reduced overall expenditures in this category. The District has now backfilled all open positions as of May, 2024. There are no additional hires projected for FY 2025. Total FTE count will be 12 in FY2025. Costs associated with full employment, a COLA, and possible increases to the District pay scale will lead to increased pressure on the budget in the coming fiscal years.
- 2) The District continues fulfilling an ongoing Fleet Management Plan that involves replacing older and high mileage vehicles each fiscal year. The Fleet Management Plan has seen the planned ongoing replacement of aging vehicles from FY 2013 through FY2023. The Commonwealths EV First policy will likely see us purchasing electric vehicles in the coming years to replace older ICE vehicles, and these EV vehicles currently are more expensive than ICE vehicles. An EV vehicle purchase did not happen in FY2024, and there are ongoing issues revolving around infrastructure for charging EV's, availability of EV's and the need for The District to continue to purchase ICE vehicles for specific roles in the fleet. The need to replace older vehicles is backing up and may pose a challenge to budgeting in coming years when multiple vehicles need to be replaced in a short time frame.
- 3) Retirement costs:

The unfunded liability of the Norfolk County Retirement System (NCRS) grew substantially since 2010, principally due to the 2008/2009 financial crisis. For the NCRS to maintain the

2031 funding schedule, The NCMCD has absorbed large percent direct cost increases that continued into FY 2023. The FY 2020 retirement increase was around 6%. FY 2021 rate increase was 6.6%. FY2022 was 7%. FY 2023 rates increased by 7.26%. The FY2024 appropriation is \$232,145 which is actually a reduction from FY 2023. FY2025 retirement costs are down slightly to \$224,936 and these costs will start to actually decrease at a greater increment as the NCRS approaches full funding status in 2030. The current cost is still high.

- 4) The District attempts to keep a significant rollover amount each year in anticipation of potential floodplain aerial larvicide applications and other unexpected situations. Forecasters are predicting higher than normal Atlantic storms this summer.
- 5) We had been told over the last few years to expect product costs to rise in response to inflationary cost increases at all levels of the supply chain, though pesticide prices seem to have not risen significantly. We continue to hedge against this concern.
