August 26, 2015

Dear Ms. Clark:

Thank you and the Department for the opportunity to comment regarding possible changes in the regulatory reporting requirements.

As we discussed at last Wednesday's meeting, small, municipal Cable TV providers sometimes find it difficult and expensive to comply with all of the regulatory requirements imposed on an industry dominated by larger corporations.

We would greatly appreciate some consideration, perhaps based on the size of the organization, in any new regulations proposed in the future.

As we also discussed, we would greatly appreciate your consideration in evaluating the DT&C reporting requirements to determine if some of the reports that have traditionally been required, including forms 200, 300, 400 and 500, and were needed in the past, might not be necessary in 2015.

The Norwood Municipal Light Dep't greatly appreciates your consideration of amending the regulations to lessen the reporting burden on companies that are regulated by The DT&C.

Sincerely,

James Collins, Superintendent
Norwood Municipal Light Department
