NOTICE OF FINAL AGENCY ACTION

SUBJECT: MassHealth: Payment for Chronic Disease and Rehabilitation Hospital Services effective October 15, 2021

AGENCY: Massachusetts Executive Office of Health and Human Services (EOHHS)

SUMMARY OF FINAL ACTION

Pursuant to the provisions of M.G.L. c. 118E, § 13A, rates and terms of payment for services rendered by chronic disease and rehabilitation hospitals to patients entitled to medical assistance under M.G.L. c. 118E, § 1 *et seq.* are established by contract between the MassHealth program and participating hospitals. This notice describes the methods and standards for the establishment of payment methods and rates by contract for rate year (RY) 2022 which begins October 15, 2021, between the Executive Office of Health and Human Services (EOHHS) and participating chronic disease and rehabilitation (CDR) hospitals.

DESCRIPTION OF FINAL METHODS AND STANDARDS

EOHHS establishes a comprehensive inpatient per diem rate for each participating hospital, covering both routine and ancillary services provided to inpatients. EOHHS derives the inpatient per diem rate from the 2019 operating and capital cost information for each hospital. An efficiency standard is applied to inpatient capital costs; the efficiency standard is the median base year unit cost, determined and applied separately for a chronic disease hospital group and a rehabilitation hospital group. The operating and capital costs are updated from fiscal year 2019 (base year) using a composite index comprised of two cost categories: labor and non-labor. These categories are weighted according to the weights used by the Center for Medicare & Medicaid Services (CMS) for Inpatient Rehabilitation Facilities (IRF).

The MassHealth program has established a facility-specific rate for short-stay administrative days (AD) (short-stay AD rate), and a statewide standard rate for long-stay administrative days (long-stay AD rate), each derived from a common AD base rate. The AD base rate is comprised of a statewide AD routine per diem amount and a statewide AD ancillary per diem amount. The statewide AD routine per diem is derived from the weighted average Medicaid rate in calendar year 2003 for nursing facility case mix category T (10). The statewide AD ancillary per diem amount is the weighted average ancillary add-on amount derived from hospital ancillary claims data for AD patients in hospital fiscal year (HFY) 2003. The sum of the statewide AD routine per diem and ancillary add-on amount equals \$513.05. This sum is then inflated by 6.95%, resulting in an AD base rate of \$548.71.

For each participating hospital, the RY 2022 short-stay AD rate is the AD base rate increased by 64% of the difference between each hospital's rate year inpatient per diem rate and the AD base rate of \$548.71.

The RY 2022 long-stay AD rate is the AD base rate of \$548.71, increased by 35%, for a single statewide rate of \$740.75.

The MassHealth program established two quality performance incentive payments paid in two or more installments for certain CDR Hospitals that serve Medicaid members on an inpatient basis, and that meet a quality performance threshold that is based on CMS's 2021 Inpatient Rehab Facility Compare and Long Term Care Hospital Compare measure as designated by EOHHS and as described herein. The MassHealth program also uses a hospital-specific cost-to-charge ratio for outpatient services that is derived from historical cost and charge information. The cost-to charge ratio is applied to the hospital's usual and customary charges on file with the Center for Health Information and Analysis (CHIA), as of July 1, 2017, for outpatient services.

The methods and standards described herein establish rates and payments by contract that accurately reflect the efficient and economic provision of chronic disease services and/or comprehensive rehabilitation services. The methods and standards described herein are projected to result in a 10% increase in annual aggregate expenditures in RY 2022. The actual change in aggregate expenditures is estimated to be \$6,000,000 but may vary depending on actual utilization of services.

Included with this notice are the rates of payment, effective October 15, 2021. To request copies of any written comments regarding this notice, please contact

STATUTORY AUTHORITY:

M.G.L. c.118E; 42 USC 1396

Related Regulations:

42 CFR Part 447

**Executive Office of Health and Human Services
Chronic Disease and Rehabilitation Hospitals
Final Methods and Standards
For Rates Effective October 15, 2021**

The following sections describe the final methods and standards to be used by the Executive Office of Health and Human Services (EOHHS) to establish rates of payment by contract, to be effective October 15, 2021, for services rendered by chronic disease and rehabilitation hospitals to patients entitled to medical assistance under M.G.L. c. 118E, § 1 *et seq.*

Section 1: Inpatient Per Diem Rate

The Inpatient Per Diem Rate is an all-inclusive daily rate paid for any, and all, inpatient care and services provided by a hospital to a MassHealth member, with the exception of any, and all, Administrative Days (see Section 3). The Inpatient Per Diem Rate is derived using the following method: (a) the sum of a hospital's base year inpatient operating costs (Section 1, paragraph B) and the allowable capital costs (Section 1, paragraph C) divided by a hospital's patient days in the year subsequent to the base year.

A. Data Sources.

1. The base year for inpatient costs is Hospital Fiscal Year (HFY) 2019. The MassHealth program uses the costs, statistics, and revenue reported in the HFY 2019 CHIA D403 cost report.
2. Inpatient costs include only costs incurred or to be incurred in the provision of hospital care and services, supplies and accommodations and determined in accordance with the Principles of Reimbursement for Provider Costs under 42 U.S.C. §§1395 *et seq.* as set forth in 42 CFR 413 *et seq.* and the Provider Reimbursement Manual, the HURM Manual, and Generally Accepted Accounting Principles. All references to specific schedules, columns, and lines refer to the CHIA D403 report filed with and reviewed by the Center for Health Information and Analysis (CHIA). Except where noted, all references are to the HFY 2019 version of the CHIA D403.
3. The calculations use each hospital's costs and statistics, as adjusted as a result of prior audits or reviews conducted by CHIA. The MassHealth program may also request additional information, data, and documentation from a hospital or CHIA as necessary to calculate rates.
4. If the specified data source is unavailable or inadequate, the MassHealth program will determine and use the best alternative data source and/or it may perform a statistical analysis to ensure comparability of data. If required information is not furnished by a hospital within the applicable time period, it may not receive any increase to its rate.

B. Determination of Base Year Inpatient Operating Costs.

Base Year Inpatient Operating Costs are the sum of Inpatient Direct Routine Costs, Inpatient Direct Ancillary Costs, and Inpatient Overhead Costs as described below.

1. Inpatient Direct Routine Costs. Inpatient Direct Routine Costs are a hospital's Total Inpatient Routine Costs derived from the CHIA D403.
2. Inpatient Direct Ancillary Costs. Inpatient Direct Ancillary Costs are calculated as follows:
Inpatient Direct Ancillary Costs are calculated by multiplying each hospital's chronic and rehabilitation inpatient ancillary expenses times the ratio of Total Direct Ancillary Expenses to Total Ancillary Expenses (including overhead). The resulting product constitutes the Total Inpatient Direct Ancillary Cost.

3. Total Inpatient Overhead. Total Inpatient Overhead Costs are calculated as follows.
 - a. Inpatient Routine Overhead cost is calculated by subtracting Inpatient Direct Routine Cost from Inpatient Routine Cost after step-down of overhead.
 - b. Inpatient Ancillary Overhead Cost is calculated by subtracting the Total Inpatient Direct Ancillary Cost determined in Section 1, paragraph B.2.a from the Total Chronic and Rehabilitation Inpatient Ancillary Expenses reported on the CHIA D403.
 - c. The Allowable Chronic Disease and Rehab Inpatient Overhead Expense is then determined by adding together the amounts in a. and b. (above).

C. Allowance for Inpatient Capital.

1. Each hospital's base year capital costs consist of the hospital's actual HFY 2019 patient care capital requirement for historical depreciation for building and fixed equipment; reasonable interest expenses; amortization and; leases and rental of facilities.
2. The limitations applicable to base year capital costs are:
 - a. Interest expense attributable to balloon payments on financed debt is excluded. Balloon payments are those in which the Final payment on a partially amortized debt is scheduled to be larger than all preceding payments.
 - b. Where there was a change of ownership after July 18, 1984, the basis of the fixed assets used in the determination of depreciation and interest expense is the lower of the acquisition cost to the new owner or the basis allowed for reimbursement purposes to the immediate prior owner. The depreciation expense is calculated using the full useful lives of the assets.
 - c. All costs (including legal fees, accounting, and administrative costs, travel costs, and the costs of feasibility studies) attributable to the negotiation or settlement of the sale or purchase of any capital asset after July 18, 1984 (by acquisition or merger), for which payment has previously been made by any payer, and which have been included in any portion of prior years' rates, are subtracted from capital costs.
3. Each hospital's base year inpatient unit capital cost equals the base year inpatient capital cost divided by the routine patient days in the year subsequent to the base year.
4. The Inpatient Unit Capital amounts of all chronic hospitals in the Chronic Disease Hospital Group (below) are calculated and the median is set as the efficiency standard, which serves as the Chronic Disease Hospital Allowance for Inpatient Capital. Each chronic hospital in the Chronic Disease Hospital Group will be paid the lower of their actual costs or the Chronic Disease Hospital Allowance for Inpatient Capital.

The Chronic Disease Hospital Group consists of Curahealth Hospital Stoughton, New England Sinai Hospital, Vibra Hospital of Western Mass, and Spaulding Hospital-Cambridge.

5. The Inpatient Unit Capital amounts of all rehabilitation hospitals in the Rehabilitation Hospital Group (below) are calculated and the median is set as the efficiency standard, which serves as the Rehabilitation Hospital Allowance for Inpatient Capital. Each rehabilitation hospital in the Rehabilitation Hospital Group will be paid the lower of their actual costs or the Rehabilitation Hospital Allowance for Inpatient Capital.

The Rehabilitation Hospital Group consists of Encompass Health of Braintree Rehabilitation, Fairlawn Rehabilitation Hospital, Vibra Hospital New Bedford, Encompass Health Rehabilitation Hospital of New England, Spaulding Hospital-Cape Cod, Encompass Health Rehabilitation Hospital of Western Massachusetts, Spaulding Rehabilitation Hospital-Boston, Whittier Rehabilitation Hospital-Bradford, and Whittier Rehabilitation Hospital-Westborough.

- D. Adjustment to Base Year Operating and Capital Costs. Total Base Year Inpatient Operating Costs and Capital Costs are updated using a composite index comprised of two cost categories: labor and non-labor. The categories are weighted according to the weights used by CMS for Inpatient Rehabilitation Facilities (IRF) hospitals.

Section 2: Determination of Inpatient Rate for New Hospitals (i.e., Newly Licensed as Chronic Disease or Rehabilitation Hospitals after October 1, 2021)

- A. The allowable overhead, routine and ancillary per diem costs will be established at the median of HFY 2019 per diem costs reported by chronic and rehabilitation hospitals.
- B. The allowable capital per diem costs will be established at the efficiency standards as calculated pursuant to Section 1, paragraph C.

Section 3: Determination of Rate for Administrative Day Patients

A hospital will be paid for Administrative Days using either a facility-specific short-stay or statewide standard long-stay Administrative Day Per Diem Rate (AD Rate). AD Rates are all-inclusive daily rates.

The short-stay and long-stay AD Rates are based on an AD Base Per Diem Rate comprised of the statewide AD routine per diem amount and the statewide AD ancillary per diem amount. The statewide AD routine per diem amount is derived from the weighted average Medicaid payment rate for case mix category T (10) patients in nursing facilities in 2003. The statewide AD ancillary per diem amount is derived from the statewide weighted average Medicaid ancillary payment for AD patients in Chronic Disease and Rehabilitation Hospitals in FY 2003. The sum of the routine per diem and ancillary add-on amount equals \$513.05 which is then inflated by 6.95%, resulting in an AD base per diem rate of \$548.71.

For RY 2022, the short-stay AD per diem rate is the AD base per diem rate of \$548.71 increased by 64% of the difference between each hospital's Inpatient Per Diem Rate and the AD base per diem rate.

For RY 2022, the long-stay AD per diem rate is the AD base per diem rate of \$548.71 increased by 35%, for a single statewide per diem rate of \$740.75.

Section 4: Determination of Outpatient Rate

- A. The base year for outpatient costs is (HFY) 2014. The MassHealth program uses the costs, statistics, and revenue reported in the HFY 2014 CHIA D403 cost report.
- B. A hospital will be paid for Outpatient Services using a hospital-specific Outpatient Cost-to-Charge Ratio. The Outpatient Cost-to-Charge Ratio is a fixed percentage that is applied to a hospital's Usual and Customary Charges for Outpatient Services, based on charges filed with the CHIA as of July 1, 2017. Payment for a particular Outpatient Service will be equal to the product of the Cost-to-Charge Ratio times the hospital's Usual and Customary Charge for the Outpatient Service in effect as of July 1, 2017. Any such payment will not exceed the hospital's Usual and Customary Charge.
- C. The Cost-to-Charge Ratio for a specific hospital is calculated by dividing its outpatient costs (Schedule XVIII) by its outpatient service revenue (Schedule VI), as derived from the CHIA D403.

Section 5: Quality Performance Incentive Payments to CDR Hospitals other than Pediatric CDR Hospitals

- I. Subject to legislative authorization, compliance with all applicable federal statutes, regulations, state plan provisions, the availability of funds, and full federal financial participation, in RY 2022 EOHHS will make a total aggregate amount of \$3 Million available for Quality Performance Incentive Payments to qualifying CDR Hospitals, as described below.

A. Qualification.

In order to qualify for a Quality Performance Incentive Payment for RY 2022, a CDR Hospital must meet the following criteria:

1. Be a CDR Hospital (other than a Pediatric CDR Hospital) located in Massachusetts that serves MassHealth members; and
2. Have recorded performance on the following Centers for Medicare & Medicaid Services (CMS) 2021 Inpatient Rehabilitation Facility Compare and Long Term Care Hospital Compare measure, as reported by CMS and updated as of September 1, 2021:

Quality Measure: Rate of successful return to home and community from LTCH/IRF (discharge to community). (Measure Period: 10/1/2017 – 9/30/2019; Improvement Base Period: 10/1/2016 – 9/30/2018)

B. Quality Performance Measurement Methodology.

A CDR Hospital's performance on the selected quality measure will be calculated using a quality point system. CDR Hospitals may earn points based on where the CDR Hospital's Measure Rate falls, relative to the Attainment and Benchmark thresholds for the applicable Measure Period, and may earn points for improvement from the applicable Improvement Base Period for the Quality Measure.

The Benchmark Threshold is the mean of the 10th percentile scores for all hospitals in the national database, during the Measure Period as applicable to the Quality Measure. The Attainment Threshold is the national median score during the Measure Period as applicable to the Quality Measure.

1. Attainment Point Scale. CDR Hospitals will be awarded Attainment Points as follows:
 - a. 10 points if the Hospital's recorded performance is above the Benchmark Threshold;
 - b. 0.5–9.5 points if the Hospital's recorded performance is above the Attainment Threshold, but at or below the Benchmark Threshold; and,
 - c. Zero (0) points if performance is at or below the Attainment Threshold.
2. Attainment Point Calculation. The number of attainment points a CDR hospital receives is determined by the ratio of the difference between the CDR hospital's Measure Rate and the Attainment Threshold divided by the difference between the Benchmark Threshold and the Attainment Threshold. That ratio is then multiplied by 9 and the product is increased by 0.5.

CDR Hospital's Attainment Points Earned =
$$[((\text{Attainment Threshold} - \text{hospital measure rate}) / (\text{Attainment Threshold} - \text{Benchmark})) \times 9] + 0.5.$$

3. Improvement Point Scale. CDR Hospitals will be awarded Improvement Points based on how much the CDR hospital's recorded performance on the Quality Measure has improved from the applicable Improvement Base Period. A CDR hospital will be awarded between 0 and 10 points if performance improves over the previous year.

4. Improvement Point Calculation. The number of improvement points a CDR Hospital receives is determined by the ratio of the difference between the CDR Hospital's recorded performance and the previous year's recorded performance, as applicable to the Quality Measure, divided by the difference between the Benchmark Threshold and the previous year's recorded performance. This ratio is multiplied by 10 and the product is decreased by 0.5.

CDR Hospital's Improvement Points Earned =

$$(((\text{CDR Hospital's recorded performance} - \text{Previous Year's recorded performance}) / (\text{Benchmark Threshold} - \text{Previous Year's recorded performance})) \times 10] - 0.5.$$

C. Calculation of the Quality Performance Incentive Payment.

EOHHS will calculate the amount of each qualifying CDR Hospital's Quality Incentive Payment as follows.

1. For each CDR Hospital, the Hospital's point total is the sum of 75% of the Hospital's Attainment Point score and 25% of the Hospital's Improvement Point score.
2. For each CDR Hospital, an adjusted point total is calculated by multiplying the point total by the hospital's Medicaid days, excluding Medicaid MCO days.
3. The CDR Hospital's payment equals the ratio of the hospital's adjusted point total divided by the statewide sum of the adjusted point total for all eligible hospitals, times \$3 million.

D. Payment. EOHHS will issue the RY 2022 Quality Performance Incentive Payment to qualifying CDR Hospitals in one installment during RY2022 as follows: April 2022.

II. EOHHS is introducing Discharge Planning Centered (DPC) Quality Performance Incentive Payments to qualifying CDR hospitals in RY2022 as described below. The criteria for receiving a quality incentive payment are as follows:

1. Qualification: In order to qualify for a DPC Quality Performance Incentive Payment in RY2022, a CDR hospital must meet the following criteria:
 - a. Be a CDR Hospital other than: a Pediatric CDR Hospital or nonacute chronic hospital with no fewer than 500 licensed beds as of June 30, 2005, with no fewer than 150,000 Medicaid patient days in the state fiscal year ended June 30, 2006 and with an established geriatric teaching program for physicians, medical students, and other health professionals;
 - b. Be a CDR Hospital located in Massachusetts and serving MassHealth members;
 - c. Demonstrate to EOHHS that CDR hospital made appropriate efforts to discharge MassHealth member(s) in accordance with criteria as designated by EOHHS;
 - d. Bill for unpaid administrative days using appropriate billing codes as designated by EOHHS.

2. Payment

Subject to legislative authorization, compliance with all applicable federal statutes, regulations, state plan provisions, the availability of funds, and full federal financial participation EOHHS will make available \$700 to each qualifying CDR Hospital for each patient day on which the hospital meets the criteria designated pursuant to **Section 1** for a MassHealth member, for up to a maximum of 45 qualifying patient days per member. Payment will be issued as described below:

- a. EOHHS will issue the RY22 Discharge Planning Centered Quality Performance Incentive Payments to qualifying CDR Hospitals in quarterly installments in RY22 according to a schedule prescribed by EOHHS.

Chronic Disease and Rehabilitation Hospital
Final Medicaid Inpatient and Outpatient Per Diem Rates and Outpatient Cost/Charge Ratios
October 15, 2021 - September 30, 2022

Facility	Inpatient Per Diem	Inpatient short-Stay AD Per Diem	Outpatient Cost/Charge Ratio
Braintree Rehabilitation Hospital	984.87	827.85	66.58%
Fairlawn Hospital	1037.25	861.37	78.11%
Vibra Hospital of Southeastern MA	1272.33	1011.82	51.92%
Encompass New England Rehabilitation	1117.86	912.96	80.48%
New England Sinai Hospital	1219.64	978.10	65.39%
Curahealth Hospital Stoughton	1614.88	1231.06	39.48%
Vibra Hospital of Western MA	1265.30	1007.33	N/A
Spaulding Hospital-Cape Cod	1644.20	1249.82	38.96%
Encompass Rehab Hospital Western MA	1010.04	843.96	83.13%
Spaulding Rehab Hospital-Boston	1893.01	1409.06	44.08%
Whittier Rehab-Bradford	1337.29	1053.40	46.51%
Whittier Rehab-Westborough	1304.00	1032.09	36.95%
Spaulding Hospital-Cambridge	2051.17	1510.28	90.63%
