

RE: COMPASS MEDICAL

To assist patients of Compass Medical, P.C. that do not have remaining refills on their prescriptions, pharmacists may provide up to a 30-day supply of Schedule VI medications that do not require reporting to the PMP (i.e., federally controlled substances and gabapentin cannot be provided) to allow for patients to make alternate care arrangements.

Details on this process can be found in [Board policy](#).

Ensure that patients are aware that no further supplies can be dispensed beyond the 30-days. Patients requesting extra supplies should be referred to an urgent care facility.

Pharmacists should direct individuals in need of an immediate bridge prescription for Buprenorphine (Suboxone, Subutex) and/or linkage to care due to the closure of Compass Medical, to call the free MA Addiction Warmline 617-414-4175 for an immediate prescription and referral to ongoing care. For a referral to substance use disorders treatment, visit helpline.ma.org or call 1-800-327-5050.
