

Slide 1: Implementation Council Discussion with CMS

The IC is committed to the initial One Care model which is based on the core tenets of transparency, rebalancing spending, operationalizing independent living and recovery principles, as well as reducing disparities and advancing equity.

Discussion Questions:

- How does CMS envision partnering with the One Care IC during the transition and ongoing implementation of the procured D-SNP One Care plans e.g. cadence of communication; Key staff contacts; continued/increased data sharing etc.
- Given the alignment between One Care and SCO how do you envision working with the IC and the SCO committee moving forward?
- What can the IC do to support efforts by CMS and MH to ensure One Care D-SNP reaches its full potential as a fully integrated plan – FIDE-SNP?
