COMPLIANCE CHECKLIST
OP12 Endoscopy Facilities

The following checklist is intended to be used in the plan review applications for health care facilities submitted to the Massachusetts Department of Public Health. This checklist summarizes and references the applicable requirements from the Licensure Regulations and the 2018 Edition of the FGI Guidelines for Design and Construction of Outpatient Facilities. Applicants must verify compliance of the plans submitted to the Department with all referenced requirements from the Licensure Regulations and FGI Guidelines when completing this Checklist. A separate Checklist must be completed for each nursing unit, hospital or clinic department, or clinical suite.

Other jurisdictions, regulations and codes may have additional requirements which are not included in this checklist, such as:
- State Building Code (780 CMR)
- Accreditation requirements of The Joint Commission
- CDC Guidelines for Preventing the Transmission of Mycobacterium Tuberculosis in Health Care Facilities
- USP 797 & Regulations of the Massachusetts Board of Registration in Pharmacy
- Occupational Safety & Health Standards (OSHA)
- Accessibility Guidelines of the Americans with Disabilities Act (ADA)
- Architectural Access Board Regulations (521 CMR)
- Local Authorities having jurisdiction.

Instructions:
1. All requirement lines must be completed according to the following instructions and included in the plan submissions for Self-Certification Process or Abbreviated Review Process.
2. This checklist must be completed by the project architect or engineer based on the design actually reflected in the plans at the time of completion of the checklist.
3. Each requirement line (___) of this Checklist must be completed exclusively with one of the following marks, unless otherwise directed in the checklist. If a functional space is not affected by a renovation project, the mark “E” may be indicated on the requirement line (___) before the name of the functional space (associated requirements on indented lines below that name, or associated MEP requirements do not have to be completed in this case). If more than one functional space serves a given required function (e.g. patient room or exam room), that clarification should be provided in the Project Narrative, and the requirement lines are understood to only address the functional spaces that are involved in the project.

X = Requirement is met, for new space, for renovated space, or for existing direct support space for an expanded service.

E = Requirement relative to an existing suite or area that has been licensed for its designated function, is not affected by the construction project and does not pertain to a required direct support space for the specific service affected by the project. “E” must not be used for an existing required support space associated with a new patient care room or area.

Check box under section titles or individual requirements lines for optional services or functions that are not included in the project area.

W = Waiver requested for specific section of the Regulations or FGI Guidelines, where hardship in meeting requirement can be demonstrated (a Physical Plant Waiver Form must be completed for each waiver request). An explicit floor plan or plan detail must be attached to each waiver request.

4. All room functions marked with “X” must be shown on the plans with the same name labels as in this checklist.
5. Mechanical, electrical & plumbing requirements are only partially mentioned in this checklist. The relevant section of the FGI Guidelines must be used for project compliance with all MEP requirements and for waiver references.
6. Oxygen, vacuum, medical air, waste anesthesia gas disposal and instrument air outlets (if required) are identified respectively by the abbreviations "OX", "VAC", "MA", "WAGD" & "IA".
7. Requirements referenced with “FI” result from formal interpretations from the FGI Interpretations Task Group.
8. The location requirements including asterisks (*) refer to the definitions of the Glossary in the beginning section of the FGI Guidelines and reproduced in this checklist.

### 2.9 ENDOSCOPY FACILITIES

#### APPLICATION

- **2.9-1.1** Outpatient facilities or portions thereof where endoscopy procedures are performed

#### FACILITY LAYOUT

- **2.9-1.4.1** Main Functional Areas:
  - **2.9-1.4.1.1** procedure rooms
  - **2.9-1.4.1.2** endoscope processing room
  - **2.9-1.4.1.3** pre- & post-procedure patient care area

- **2.9-1.4.2** Endoscopy procedure suite designed to facilitate movement of patients & personnel into through & out of defined areas in suite

#### CIRCULATION

- **2.9-2**

#### ACCOMMODATIONS FOR CARE OF PATIENTS OF SIZE

- **2.1-2.1.2**
  - ☐ check if not included in project (only if a Patient Handling & Movement Assessment that determines that the outpatient service does not have a need for expanded-capacity lifts & architectural details that support movement of patients of size in patient areas is attached to the Project Narrative)

- **2.1-2.1.2 Location:**
  - ____ spaces designated for care of or use by patients of size are provided in locations to accommodate population expected to be served by facility

- **2.1-2.5**
  - ____ Handwashing stations
  - **2.1-2.5.2** ____ downward static force required for handwashing stations designated for patients of size accommodates maximum patient weight of patient population

- **2.1-2.6**
  - ____ Patient toilet room
    - **2.1-2.6.1** expanded-capacity toilet
      - ____ mounted min. 36 inches from finished wall to centerline of toilet on both sides (for caregiver assistance with lifts)
    - **2.1-2.6.2** regular toilet
      - ____ mounted min. 44 inches from centerline of toilet on both sides to finished walls to allow for positioning of expanded-capacity commode over toilet
  - **2.1-2.6.3** rectangular clear floor area min. 46” wide extends 72” from front of toilet

### Ventilation:

- **2.1-2.6.3**
  - ____ Min. 10 air changes per hour
  - **Table 8.1**
    - ____ Exhaust
    - ____ Negative pressure
    - ____ No recirculating room units
Architectural Requirements

2.1-2.7
☐ Single-patient exam/observation room
☐ check if not included in project

2.1-2.7.1
Space Requirements:
2.1-2.7.1.1(1)
☐ min. 5'-0" clearance at foot of expanded-capacity exam table
(2)
☐ min. 3'-0" clearance on non-transfer side of expanded-capacity exam table

2.1-2.7.1.2
☐ min. 5'-0" on transfer side of expanded-capacity exam table with ceiling- or wall-mounted lift
or
☐ min. 7'-0" on transfer side of expanded-capacity exam table in rooms without ceiling- or wall-mounted lift

2.1-2.8
☐ Equipment & supply storage

2.1-2.9
☐ Waiting areas
2.1-2.9.1
☐ seating for persons of size be provided in waiting areas in outpatient facilities
2.1-2.9.2
☐ waiting areas be sized to accommodate expanded-capacity furniture required for patients & visitors of size

2.1-2.10.1
☐ All plumbing fixtures, handrails, grab bars, patient lift, equipment, built-in furniture & other furnishings designed to accommodate maximum patient weight

2.1-2.10.2
Door Openings:
2.1-2.10.2.1
☐ all door openings used for path of travel to public areas & areas where care will be provided for patients of size have min. clear width of 45.5"
2.1-2.10.2.2
☐ door openings to toilet rooms designated for patients of size have min. clear width of 45.5"

2.9-3
PATIENT CARE & DIAGNOSTIC AREAS
2.9-3.1
☐ Single-patient examination room
☐ check if not included in project

Space Requirements:
2.9-3.1.1
☐ min. clear floor area of 80 sf
☐ room size allows min. clearance 2'-8" at each side & at foot of exam table or recliner

Ventilation:
☐ Min. 4 air changes per hour Table 8.1

Lighting:
☐ Portable or fixed exam light 2.1-8.3.4.3(1)

Power:
☐ Min. 8 receptacles Table 2.1-1
☐ 4 convenient to head of exam table or gurney
Architectural Requirements

2.9-3.2 Endoscopy procedure room
2.1-3.2.2(2)(a) procedure room meets requirements of semi-restricted area

2.9-3.2.2 Space Requirements:
2.9-3.2.2.1 min. clear floor area 180 sf
2.9-3.2.2.2(1) min. clearance 5’-0” at each side of patient gurney/table
2.9-3.2.2.2(2) min. clearance 3’-6” at head & foot of patient gurney/table

2.1-3.2.2.3 documentation area
(1) accommodations for written or electronic documentation
(2) allows for direct observation of patient when in use

2.1-3.2.2.4 provisions for patient privacy

2.1-3.2.2.5(1) handwashing station
or
2.1-3.2.2.5(2) hand scrub station
     ____ directly accessible* to procedure room

2.9-3.2.6 Emergency Communication System:
____ push activation of emergency call switch

2.9-3.3 Pre- & post-procedure patient care areas
2.1-3.7.1.1 patient care stations accommodate lounge chairs, gurneys or beds
____ patient care stations accommodate seating space for family/visitors

2.1-3.7.1.3(1)(a) Layout:
____ combination of pre- & post-procedure patient care stations in one patient care area
     ____ patient care stations combined in same area meet most restrictive requirements of areas to be combined
     or
(b) separate pre-procedure patient care area & post-procedure recovery area
     or
(c) three areas: pre-procedure patient care area, Phase I post-anesthesia care unit (PACU) & Phase II recovery area

Building Systems Requirements

Ventilation:
____ Min. 6 air changes per hour Table 8.1
____ No recirculating room units

Power:
____ Min. 12 receptacles Table 2.1-1
____ 8 convenient to table placement
____ At least 1 on each wall

Nurse Call System:
____ Staff assistance station Table 2.1-3
____ Emergency call station

Medical Gases:
____ 1 OX, 1 VAC (may be portable) Table 2.1-2
### Architectural Requirements

#### 2.1-3.7.1.4 Number of Patient Care Stations:

1. **(1)**
   - **pre- & post-procedure patient care stations combined in one area**
   - **at least one patient care station provided for each procedure room**
   - **check if not included in project**

2. **(2)**
   - **separate pre-procedure & recovery areas**
   - **check if not included in project**

#### 2.1-3.7.3

- **pre-procedure patient care room or area provides min. of one patient care station per procedure room**

#### 2.1-3.7.5

- **Phase II recovery room or area provides min. one Phase II patient care station per procedure room**

#### 2.1-3.7.2.2 Space Requirements:

1. **(2)**
   - **patient care bays**
   - **check if not included in project**
   - **min. clearance 5'-0" between sides of patient beds/gurneys/lounge chairs**
   - **min. clearance 3'-0" between sides of patient beds/gurneys/lounge chairs & adjacent* walls or partitions**
   - **min. clearance 2'-0" between foot of patient beds/gurneys/lounge chairs & cubicle curtain**

2. **(b)**
   - **patient care cubicles**
   - **check if not included in project**
   - **min. clearance 3'-0" between sides of patient beds/gurneys/lounge chairs & adjacent* walls or partitions**
   - **min. clearance 2'-0" between foot of patient beds/gurneys/lounge chairs & cubicle curtain**

3. **(c)**
   - **bays or cubicles face each other**
   - **check if not included in project**
   - **aisle with min. clearance 8'-0" independent of foot clearance between patient stations or other fixed objects**

### Building Systems Requirements

#### Ventilation:

- **Min. 6 air changes per hour**
- **No recirculating room units**

#### Power:

- **Min. 4 receptacles**
- **Convenient to gurney, lounge chair, or bed**

#### Nurse Call System:

- **Patient station**
- **Staff assistance station**
- **Emergency call station**

---

*Table 8.1, Table 2.1-1, Table 2.1-3*
## Architectural Requirements

1. **single-patient rooms**
   - check if **not** included in project
2. **min. clearance 3'-0"** between sides & foot of beds/gurneys/ lounge chairs & adjacent* walls or partitions

2.1-3.7.2.4 __ Provisions made for patient privacy

2.1-3.7.2.5 __ Handwashing stations

2.1-3.8.7

2.1-3.8.7.1 __ located in each room where hands-on patient care is provided

2.1-3.8.7.3 __ handwashing station serves multiple patient care stations
   - check if **not** included in project

(1) __ at least one handwashing station for every 4 patient care stations or fewer & for each major fraction thereof

(2) __ handwashing stations evenly distributed based on arrangement of patient care stations

2.9-3.3.2 __ Documentation area
   - accommodations for written and/or electronic documentation

2.9-3.8 **Support Areas for Endoscopy Procedure Area & Other Patient Care Areas:**

2.9-3.8.2 __ Nurse or control station

2.9-3.8.2.2 __ located to permit visual observation of all traffic entering patient care & diagnostic areas

2.1-3.8.2.1 __ work counter

2.1-3.8.2.2 __ means for facilitating staff communication

2.1-3.8.2.3 __ space for supplies

2.1-3.8.2.4 __ accommodations for written or electronic documentation

2.1-3.8.2.5 __ hand sanitation dispenser

2.9-3.8.8 __ Medication safety zone

2.1-3.8.8.1(2) **Design Promoting Safe Medication Use:**

(a) __ medication safety zones located out of circulation paths

(b) __ work space designed so that staff can access information & perform required tasks

(c) __ work counters provide space to perform required tasks

## Building Systems Requirements

**Ventilation:**

- Min. 6 air changes per hour Table 8.1

**Power:**

- Min. 4 receptacles Table 2.1-1

**Nurse Call System:**

- Patient station
- Staff assistance station
- Emergency call station
Architectural Requirements

(e) __ sharps containers placed at height that allows users to see top of container

2.1-3.8.8.2

(1) __ medication preparation room

(a) __ work counter

☐ handwashing station

☐ lockable refrigerator

☐ locked storage for controlled drugs

☐ sharps containers

☐ check if not included in project

(b) __ self-contained medication dispensing units

☐ check if not included in project

__ room designed with space to prepare medications

or

(2) __ automated medication-dispensing unit

(a) __ located at nurse station, in clean workroom or in alcove

(b) __ handwashing station or hand sanitation dispenser provided next to stationary medication-dispensing units

(c) __ countertop or cart provided adjacent* to stationary medication-dispensing units

Building Systems Requirements

Ventilation:

__ Min. 4 air changes per hour

Table 8.1

Lighting:

__ Task lighting

2.1-3.8.8.1(2)(d)

2.9-3.8.12

__ Soiled workroom

2.9-3.8.12.3 (may be shared with other clinical services in same outpatient facility)

2.9-3.8.12.2 __ physically separated from all other areas of facility

2.1-3.8.12.1 __ no direct connection with clean workrooms or clean supply rooms

2.1-3.8.12.2(1)

(a) __ handwashing station

(b) __ flushing-rim clinical service sink or equivalent flushing-rim fixture

(c) __ work counter

(d) __ space for separate covered containers for waste & soiled linen

Ventilation:

__ Min. 10 air changes per hour

__ Exhaust

__ Negative pressure

__ No recirculating room units

2.1-3.8.12.2(2) __ check if not included in project

(a) __ electrical & plumbing connections that meet manufacturer requirements

(b) __ space for docking station

## Building Systems Requirements

### Ventilation:
- Min. 6 air changes per hour  
- Table 8.1
- Exhaust
- Negative pressure
- No recirculating room units

### Supply diffuser

---

MDPH/DHCFLC  12/19  OP12
Architectural Requirements

or

--- clean endoscope storage separate from clean work area
--- adjacent* to procedure room

Building Systems Requirements

2.9-5
2.9-5.3.1 (3) Environmental services room
2.1-5.3.1.1(3) (may serve more than one clinical service area on same floor)
2.1-5.3.1.1(1) min. one ES room per floor
2.1-5.3.1.1(2) additional ES rooms provided on floor according to needs of areas served
2.1-5.3.1.2(1) service sink or floor-mounted mop sink
2.1-5.3.1.2(2) provisions for storage of supplies & housekeeping equipment
2.1-5.3.1.2(3) handwashing station or hand sanitation dispenser

BUILDING SUPPORT FACILITIES

VENTILATION:

--- Min. 10 air changes per hour Table 8.1
--- Exhaust
--- Negative pressure
--- No recirculating room units

2.9-6.2
2.1-6.2.1 Vehicular drop-off & pedestrian entrance
2.1-6.2.1.1 min. of one building entrance reachable from grade level
2.1-6.2.1.2 building entrances used to reach outpatient services be clearly marked
2.1-6.2.1.3 building entrances used to reach outpatient services located so patients need not go through other activity areas (except for shared lobbies in multi-occupancy buildings)

PUBLIC AREAS

2.1-6.2.2 Reception
--- reception & information counter, desk or kiosk provided either at main entry or at each clinical service

2.1-6.2.3 Waiting area
2.1-6.2.3.2 visible from staff area either by camera or direct staff sight line

2.1-6.2.4 Public toilet room
2.1-6.2.4.2 (may be located off public corridor in multi-tenant building)
2.1-6.2.4.1 readily accessible* from waiting area without passing through patient care or staff work areas

2.1-6.2.5 Provisions for telephone access
--- access to make local phone calls

2.1-6.2.6 Provisions for drinking water

2.9-6.3
2.9-6.3.2 Interview space
--- (may be combined with Multipurpose Room)
2.9-6.3.3 Office
2.9-6.3.4 Multipurpose room
Architectural Requirements

2.9-6.3.5

___ Medical records space

___ provisions be made for securing medical records of all media types used by facility

2.1-6.3.5.1

___ location restricted to staff access to maintain confidentiality of record

2.1-6.3.5.2

Space Requirements:

(1) ___ space provided for medical records management

(2) ___ physical space for electronic storage of forms or documents

2.9-6.4

SUPPORT AREAS FOR STAFF

2.9-6.4.1

___ Staff storage facilities

___ special storage including locking drawers and/or cabinets for personal effects of administrative staff

*LOCATION TERMINOLOGY:

Directly accessible: Connected to the identified area or room through a doorway, pass-through, or other opening without going through an intervening room or public space

Adjacent: Located next to but not necessarily connected to the identified area or room

Immediately accessible: Available either in or adjacent to the identified area or room

Readily accessible: Available on the same floor or in the same clinic as the identified area or room

Architectural Details & MEP Requirements

2.1-7.2.2

ARCHITECTURAL DETAILS

2.1-7.2.2.1

CORRIDOR WIDTH:

IBC 1018.2

___ Min. 44”

or

___ Detailed code review incorporated in Project Narrative

421 CMR 6.00

___ Corridors include turning spaces for wheelchairs

(2) ___ Corridors used for stretcher & gurney transport have min. corridor or aisle width of 6'-0”

2.1-7.2.2.2

CEILING HEIGHT:

(2) ___ Min. height 7'-0” in radiography, procedure, operating rooms from floor to lowest protruding element of equipment or fixture in stowed position

(4) ___ Min. height 7'-6” above floor of suspended tracks, rails & pipes located in traffic path

___ Min. ceiling height 7'-10” in other areas

2.1-7.2.2.3

DOORS & DOOR HARDWARE:

(1) Door Type:

(a) ___ doors between corridors, rooms, or spaces subject to occupancy swing type or sliding doors

(b) ___ sliding doors

☐ check if not included in project manual or automatic sliding doors comply with NFPA 101

___ detailed code review incorporated in Project Narrative

___ no floor tracks

(2) Door Opening:

(a) ___ min. 34” clear door width

___ min. 83.5” clear door height

(b) Rooms with Gurney Access:

___ 41.5” min. clear door width

___ 79.5” min. clear door height

(3) Door Swing:

(a) ___ doors do not swing into corridors except doors to non-occupiable spaces & doors with emergency breakaway hardware
2.1-7.2.2.8 HANDWASHING STATIONS:

(3)(a) Handwashing station countertops made of porcelain, stainless steel, solid-surface materials or impervious plastic laminate assembly

(3)(b) Countertops substrate
☐ check if not included in project
marine-grade plywood (or equivalent material) with impervious seal

(4) Handwashing station casework
☐ check if not included in project
designed to prevent storage beneath sink

(5) Provisions for drying hands
☐ check if not included in project

2.1-7.2.2.9 GRAB BARS:

(1) Grab bars anchored to sustain concentrated load 250 pounds

(3) Ends of grab bars constructed to prevent snagging clothes of patients staff & visitors

2.1-7.2.2.10 HANDRAILS:

☐ check if not included in project

(2) Rail ends return to wall or floor

(3) Handrail gripping surfaces & fasteners are smooth with 1/8-inch min. radius

(4) Handrails have eased edges & corners

(5) Handrail finishes are cleanable

2.1-7.2.3 SURFACES
2.1-7.2.3.1 FLOORING & WALL BASES:

(1) Flooring surfaces cleanable & wear-resistant for location

(3) Smooth transitions provided between different flooring materials

(4) Flooring surfaces including those on stairways are stable, firm & slip-resistant

(5) Floors & wall bases of all areas subject to frequent wet cleaning are constructed of materials that are not physically affected by germicidal or other types of cleaning solutions

(6)(a) Floors are monolithic & integral
closed wall bases are at least 6" high & tightly sealed to wall in rooms listed below
- endoscope processing room

2.1-7.2.3.2 WALLS & WALL PROTECTION:

(1)(a) Wall finishes are washable

(1)(b) Wall finishes near plumbing fixtures are smooth, scrubable & water-resistant

(2) Wall surfaces in areas routinely subjected to wet spray or splatter (e.g. environmental services rooms) are monolithic or have sealed seams that are tight & smooth

(4) Wall protection devices & corner guards durable & scrubable

2.1-7.2.3.3 CEILINGS:

(1) Ceilings provided in all areas except mechanical, electrical & communications equipment rooms

(a) Ceilings cleanable with routine housekeeping equipment

(b) Acoustic & lay-in ceilings where used do not create ledges or crevices

(2) Semi-Restricted Areas:

(a) Ceiling finishes are scrubbable, non absorptive, non perforated, & capable of withstanding cleaning with chemicals

(b) Lay-in ceilings

☐ gasketed or each ceiling tile weighs at least 1 Lbs/sq. ft.

☐ no perforated regular

☐ serrated or highly textured tiles in semi-restricted areas

B or

☐ ceilings of monolithic construction

2.1-7.2.4.3 Privacy curtains in patient care areas are washable
### FURNISHINGS

#### 2.9-7.2.4.2  COUNTERTOPS & CASEWORK IN INSTRUMENT PROCESSING ROOMS

1. All countertops and casework in instrument processing room be made of materials that are impervious to staining & cleaning chemicals

2. Backsplashes min. 12 inches high

### HEATING VENTILATION & AIR-CONDITIONING (HVAC) SYSTEMS

#### Part 3/6.1 UTILITIES:

- Heating & Cooling Sources:
  - heat sources & essential accessories sufficient to accommodate facility needs (reserve capacity) even when any one of heat sources or essential accessories is not operating due to breakdown or routine maintenance
  - capacity of remaining source or sources is sufficient to provide heating for operating rooms & recovery rooms

- Central cooling systems greater than 400 tons (1407 kW) peak cooling load
  - check if not included in project
  - cooling sources & essential accessories sufficient to support facility operation plan upon breakdown or routine maintenance of any one of cooling sources

#### Part 3/6.2 AIR-HANDLING UNIT (AHU) DESIGN:

- AHU casing is designed to prevent water intrusion, resist corrosion & permit access for inspection & maintenance

#### Part 3/6.3 OUTDOOR AIR INTAKES & EXHAUST DISCHARGES:

- Outdoor Air Intakes:
  - located min. of 25'-0" from cooling towers & all exhaust & vent discharges
  - outdoor air intakes located such that bottom of air intake is at least 6'-0" above grade
  - air intakes located away from public access
  - all intakes are designed to prevent entrainment of wind-driven rain

- intakes on top of buildings
  - check if not included in project
  - located with bottom of air intake min. of 3'-0" above roof level

- intake in areaway
  - check if not included in project
  - bottom of areaway air intake opening is at least 6'-0" above grade
  - bottom of air intake opening from areaway into building is at least 3'-0" above bottom of areaway

#### Part 3/6.4 FILTRATION:

- One filter bank MERV 7

#### Part 3/6.7 AIR DISTRIBUTION SYSTEMS:

- Maintain pressure relationships required in tables 7.1 in all modes of HVAC system operation
- Spaces that have required pressure relationships are served by fully ducted return systems or fully ducted exhaust systems
- Recovery rooms are served by fully ducted return or exhaust systems

#### Part 3/6.8 ENERGY RECOVERY SYSTEMS:

- check if not included in project
- Energy recovery systems with leakage potential
  - check if not included in project
  - arranged to minimize potential to transfer exhaust air directly back into supply airstream
  - designed to have no more than 5% of total supply airstream consisting of exhaust air
  - not used from these exhaust airstream sources: waste anesthesia gas disposal, endoscope cleaning, soiled or decontamination room
Part 3/7 SPACE VENTILATION:
Part 3/7.1.a Complies with Table 8.1
    □ Air movement is from clean to less-clean areas
Part 3/7.1.a.1 Min. number of total air changes required for positive pressure rooms is provided by total supply airflow
    □ Min. number of total air changes required for negative pressure rooms is provided by total exhaust airflow
Part 3/7.1.a.2 Entire minimum outdoor air changes per hour required by Table 8.1 for each space meet filtration requirements of Section 6.4
Part 3/7.1a.5 Air recirculation through room unit
    □ check if not included in project
    □ complies with Table 8.1
    □ room unit receive filtered & conditioned outdoor air
    □ serve only a single space
    □ provides min. MERV 6 filter located upstream of any cold surface so that all of air passing over cold surface is filtered

2.1-8.3 ELECTRICAL SYSTEMS
2.1-8.3.2 ELECTRICAL DISTRIBUTION & TRANSMISSION
2.1-8.3.2.2 Panelboards:
(1) □ all panelboards accessible to health care tenants they serve
(2) □ panelboard serving critical branch circuits serve floors on which they are located
(3) □ panelboards serving life safety branch circuits serve floors on which they are located & floors immediately above & below
(4) □ panelboards not located in exit enclosures or exit passageways

2.1-8.3.3 POWER-GENERATING & -STORING EQUIPMENT
2.1-8.3.3.1 □ Essential electrical system or emergency electrical power
(1) □ essential electrical system complies with NFPA 99
(2) □ emergency electrical power complies with NFPA 99

2.1-8.3.5 ELECTRICAL EQUIPMENT
2.1-8.3.5.1 □ Handwashing sinks & scrub sinks that depends on building electrical service for operation are connected to essential electrical system
    □ check if not included in project

2.1-8.4 ELECTRICAL RECEPTACLES
2.1-8.4.6 □ Receptacles in patient care areas are provided according to Table 2.1-1

2.1-8.4 PLUMBING SYSTEMS
2.1-8.4.2 Plumbing & Other Piping Systems:
2.1-8.4.2.1(3) □ no plumbing piping exposed overhead or on walls where possible accumulation of dust or soil may create cleaning problem

2.1-8.4.2.5 Heated Potable Water Distribution Systems:
(2) □ heated potable water distribution systems serving patient care areas are under constant recirculation
(3)(a) □ non-recirculated fixture branch piping length max. 25'-0"
(3)(b) □ any installation of dead-end piping (except for empty risers mains & branches for future use)
    □ check if not included in project
(4)(a) □ water-heating system supplies water at following range of temperatures: 105–120°F

2.1-8.4.2.6 Drainage Systems:
2.1-8.4.2.6(1)(a) drainage piping installed above ceiling of or exposed in rooms listed below piping have special provisions to protect space below from leakage & condensation
    • procedure rooms
    • electronic data processing areas
    • electrical rooms
(1)(b) □ drip pan for drainage piping above ceiling of sensitive area
    □ check if not included in project
    □ accessible
    □ overflow drain with outlet located in normally occupied area that is not open to restricted area

Floor Drains:
2.1-8.4.2.6(2)(a) □ no floor drains in procedure rooms
(b) □ floor drain in dedicated cystoscopy procedure room
    □ check if not included in project
    □ recessed floor sink w/ automatic trap primer
### PLUMBING FIXTURES

#### 2.1-8.4.3.1(1)
Materials used for plumbing fixtures are non-absorptive & acid-resistant

#### 2.1-8.4.3.2
Handwashing Station Sinks:
1. Sinks are designed with basins that will reduce risk of splashing to areas where direct patient care is provided
2. Sink basins have nominal size of no less than 144 square inches
3. Sink basins have min. dimension 9 inches in width or length
4. Sink basins are made of porcelain, stainless steel or solid-surface materials
5. Water discharge point min. 10" above bottom of basin
6. Anchored so that allowable stresses are not exceeded where vertical or horizontal force of 250 lbs. is applied
7. Sinks used by staff, patients, & public have fittings that can be operated without using hands (may be single-lever or wrist blade devices)
   - a. Check if not included in project
   - b. Blade handles at least 4 inches in length provide clearance required for operation
8. Sensor-regulated water fixtures
   - a. Check if not included in project
   - b. Meet user need for temperature & length of time water flows designed to function at all times and during loss of normal power

#### 2.1-8.4.3.5
Clinical Flushing-Rim Sinks:
1. Trimmed with valves that can be operated without hands
   - a. May be single-lever or wrist blade devices
2. Handles are at least 6 in. long
3. Integral trap wherein upper portion of water trap provides visible seal

#### 2.1-8.4.3.6
Scrub Sinks:
1. Freestanding scrub sinks are trimmed with foot, knee or electronic sensor controls
2. No single-lever wrist blades

### MEDICAL GAS & VACUUM SYSTEMS

#### 2.1-8.4.4
Station outlets provided as indicated in Table 2.1-2

### CALL SYSTEMS

#### 2.1-8.5.1
Nurse call stations provided as required in Table 2.1-3

### ELEVATORS

#### 2.1-8.7
Check if not included in project
- Elevators are equipped with two-way automatic level-maintaining device with accuracy of ± 1/4 inch

#### 2.1-8.7.5
Elevator Controls:
- Elevator call buttons & controls not activated by heat or smoke
- Light beams if used for operating door reopening devices without touch are used in combination with door-edge safety devices & are interconnected with system of smoke detectors
- Elevator controls, alarm buttons & telephones are accessible to wheelchair occupants & usable by the blind
