

Massachusetts Department of Public Health

POSTED: JUNE 2022

Note to Readers: As previously published, Table 1 contains counts of opioid-related overdose deaths in the city/town of residence for the decedents among MA residents. Table 2 contains counts of opioid-related overdose deaths in the city/town of the death occurrence. The counts in Table 2 are different from Table 1 because they include counts based on location of death versus location of the decedent's residence (Table 1). Massachusetts residents who died in Massachusetts are included in both tables. Massachusetts residents who died outside of Massachusetts are included in the "Death Occurrence" table (Table 2) as "Outside of Massachusetts". Non-Massachusetts residents who died in Massachusetts are <u>not</u> included in the "Residence" table (Table 1).

Please note that 2017 to 2021 death data are preliminary and subject to updates. Case reviews of deaths are evaluated and updated on an ongoing basis. A large number of death certificates have yet to be assigned final cause of death codes. The information presented in this city/town table <u>only</u> includes confirmed cases. Data updated on 04/01/2022.

Please note that 2017 -2021 death data are preliminary and subject to updates. Case reviews of deaths are evaluated and updated on an ongoing basis. A large number of death certificates have yet to be assigned final cause of death codes. The information presented in this city/town table <u>only</u> includes confirmed cases. Data updated on 04/01/2022.

Technical Notes

- Opioids include heroin, illicitly manufactured fentanyl, opioid-based prescription painkillers, and other unspecified opioids.
- Beginning with the August 2019 report, DPH updated the case definition used to identify opioid-related overdose deaths to match the CDC's case definition. The following International Classification of Disease (ICD-10) codes for mortality were selected from the underlying cause of death field to identify poisonings/overdoses: X40-X44, X60-X64, X85, and Y10-Y14. All multiple cause of death fields were then used to identify an opioid-related overdose death: T40.0, T40.1, T40.2, T40.3, T40.4, and T40.6.
- This report tracks all opioid-related overdoses due to difficulties in reporting heroin-associated overdoses separately. Many deaths related to heroin are not specifically coded as such due to the fast metabolism of heroin into morphine.
- To maintain consistency with NCHS reporting, DPH does not include the ICD-10 code F11.1, which may include opioid-related overdose deaths.
- Beginning with the May 2017 report, DPH started reporting opioid-related overdose deaths for all intents, which includes unintentional/undetermined and suicide.
