

## OSCCAR Entered Employment-E

**Development Version:** Crystal Reports XI, Service Pack 2

**First Issuance Date:** 11/10/2006

**Modification:** N/A.

**Parameters:** Location Level (Site, Career Center, Region), Local Office, Career Center, Region, Fiscal Year, Report End Date, Days Between Last Service and Job Start, Type of Entered Employment Date.

**Parameter List of Values Updated Date:** 11/10/2006

**Key Features:** The OSCCAR Entered Employment report will match the OSCCAR Total Entered Employment number (usually exactly or within one job placement) if "data entry date" is chosen for the Type of Entered Employment Date parameter, and if "Show All Entered Employments (Match OSCCAR)" is chosen for the Days Between Last Service and Job Start parameter. **The OSCCAR Total Entered Employment number includes anyone who ever had a general or job service at the selected location (office, career center, region) and who had a job start recorded by any user in the state during the designated time period**, e.g., someone who attended a job fair at your center in 2000 and received no other services from your center since, but who had an entered employment recorded by someone in the system (not necessarily your center), would contribute to your entered employment number. Note that the entered employments for people with disabilities may be higher than that shown in the OSCCAR when the same criteria for entered employments are used as for all customers; it is unclear at this time what additional criteria might have been used which limited the number in the OSCCAR.

Because it may not make sense to consider entered employments as attributable to services received very long ago, this report also allows you to decide how large a time gap is allowable between the last service received (based on service date) and the job start date.

Depending upon whether you prefer to consider your performance based on service dates or data entry dates, you can choose the type of dates used to bring results into the report. If you want to see the number of job start dates that fell within the period, you can choose "job start date"; if you want to see how many entered employments were recorded during the period, you can choose "data entry date".

The report can be run by local office, career center, or region. The most recent service date will reflect the most recent service within the selected location level. Note however that this report is based on some data that is only periodically updated, and one of the fields that could become outdated is the most recent service date. This field also appears to capture dates from updating service records, so does not strictly show the most recent service date as might be expected.

At the end of report are tables that breakdown the entered employments by customer demographics (age, disability, education level, ethnicity, primary language, and residence) in descending order of frequency.

**Exporting:** If you wish to do further analysis on the report data, you can export the report to Excel (do NOT choose "data only" in this case), and in the export options screen, choose to set the field width based on the Group Header #1 section. The resulting export will have extra rows between data, but if you select all the data (EXCEPT the crosstabs at the bottom) and sort by the Name column, the extra rows will be eliminated.

**Report Run Times:** Three to five minutes.

**Report Feedback:** This report has been tested for accuracy; however, we encourage your feedback--if you get unexpected results or have other suggestions, please contact the report developer below.

**Report Developer:** Linda Bass, lbass@detma.org, 617-864-1570.

**OSCCAR Entered Employments**
