

Number of Opioid¹-Related Overdose Deaths, All Intents by City/Town, MA Residents January 2012- December 2016²

Massachusetts Department of Public Health

included in the town by town listing below with newly confirmed cases.

The table below lists the confirmed all intents opioid-related overdose deaths that occurred to residents from each community in Massachusetts between 2012 and 2016. For 2015-2016, additional cases are still being confirmed by the Office of the Chief Medical Examiner. This report will be updated quarterly and all new confirmed cases will be

¹Opioids include heroin, opioid-based prescription painkillers, and other unspecified opioids.

Technical Notes

- 1. Cases were defined using the International Classification of Disease (ICD-10) codes for mortality. The following codes were selected from the underlying cause of death field to identify poisonings/overdoses: X40-X49, X60-X69, X85-X90, Y10-Y19, and Y35.2. All multiple cause of death fields were then used to identify an opioid-related death: T40.0, T40.1, T40.2, T40.3, T40.4, and T40.6.
- 2. This report tracks all opioid-related overdoses due to difficulties in reporting heroin-associated overdoses separately. Many deaths related to heroin are not specifically coded as such due to the fast metabolism of heroin into morphine.
- 3. To maintain consistency with NCHS reporting, DPH does not include the ICD-10 code F11.1, which may include opioid-related overdose deaths.
- 4. Beginning with the May 2017 report, DPH started reporting opioid-related deaths for all intents, which includes unintentional/undetermined and suicide.

Source: Registry of Vital Records and Statistics, MDPH

²Please note that 2015-2016 death data are preliminary and subject to updates. Case reviews of deaths are evaluated and updated on an ongoing basis. A large number of death certificates have yet to be assigned final cause-of-death codes. The information presented in this report only includes confirmed cases. Data updated on 07/11/2017.
