

I am writing to urge the Ocean Managment Task Force and Governor Romney to request the appropriate Federal authorities to suspend all reviews of the Cape Wind Project, until the Ocean Resource Management Act is in place and operating. I am deeply upset over the possibility that public lands (Nantucket Sound) are at risk to being made available for commercial development by private enterprises, not to mention the scarring of a natural resource. I feel that it is imperative that the Commonwealth of Massachusetts assert jurisdiction over this invaluable and treasured resource for the benefit of ALL residents.

Sincerely,
John Paone
Mashpee, MA
