ANNOUNCING The Path Forward

DDS is introducing a new person-centered assessment tool that measures support needs.

The Supports Intensity Scale® *Adult Version*, 2nd Ed. (SIS-A®) is a **standardized assessment** that measures what supports a person with autism or an intellectual disability needs to **meaningfully participate in community life**.

The SIS-A (2nd Ed.) identifies the support needs of individuals from a **strength-based** approach and in a **person-centered format**.

To learn more about the SIS-A (2nd Ed.) at DDS, scan the QR code or click [here](#).

Creating more equitable service delivery for all.
