

# Massachusetts Department of Public Health

## Office of Population Health

### Public Health Data Warehouse (PHD) Partners

October 2018

---

PHD supports a unique collaboration between public, private, and non-profit organizations to analyze population health trends with a focus on fatal and non-fatal opioid overdoses, and other public health priorities.

In late 2017, policy makers, program planners and clinicians used the findings of these analyses to develop an action plan that included several prevention, intervention, treatment, recovery support, and budget and legislative initiatives to address the opioid epidemic.

We thank our data contributors and research partners for engaging in this critical collaboration. Without their help we would have never been able to assemble such a valuable tool to expand our understanding of the opioid epidemic.
