Re: Pilgrim Nuclear Power Station – Application to Modify a Massachusetts Permit to Discharge
Pollutants to Surface Waters (Permit No. MA0003557, January 30, 2020)

Dear Ms. Fleming:

We have reviewed the comments submitted on behalf of Holtec Decommissioning International, LLC (“Holtec”), on August 31, 2023, regarding the Department of Environmental Protection’s Tentative Determination to Deny Holtec’s request to modify the surface water discharge permit referenced above. In those comments Holtec refers to a permit issued by the Division of Water Pollution Control on January 8, 1969. We would like to provide Holtec the opportunity to supplement its application for modification by supplying a copy of the permit it references and any other state or federal permits issued for wastewater discharges from Pilgrim Nuclear Power Station in 1971 or earlier that are reflected in Holtec’s records. Please send any such supplemental materials to my attention by November 13, 2023.

If you should have any questions regarding this matter, please feel free to contact me at lealdon.langley@mass.gov.

Thank you,

Lealdon Langley, Director
Division of Watershed Management
