ADULT MOSQUITO SURVEILLANCE

If you have an adult mosquito surveillance program, please fill out the section below, else skip ahead to the next section.

Describe the purpose of this program: The purpose of adult mosquito surveillance is to monitor for the outbreak of endemic arbovirus in the Pioneer Valley. In Massachusetts, the primary arboviruses of interest are Eastern Equine Encephalitis and West Nile Virus, both of which have significant public health implications. By monitoring for these arbovirus, it allows for an early warning to communities if an outbreak of either virus. Additionally, surveillance allows for the collection of data to determine abundance of nuisance or vector mosquitoes as well as monitoring for invasive species.

What months is this program active? June to October

EDUCATION, OUTREACH & PUBLIC RELATIONS

If you have an education/outreach program, please fill out the section below, else skip ahead to the next section.

Describe the purpose of this program: The main goal of the PVMCD after the conclusion of the 2019 surveillance season was to begin recruiting new communities to join the district. In preparation for an outreach campaign in 2020, the PVMCD Coordinator began making brochures and fact sheets to provide to interested communities. Additionally, outreach via email was conducted to health agents in Pioneer Valley communities in late December to schedule meetings with community representatives to discuss the district.

What time frame during the year is this method employed? After surveillance concludes, the district shifts its focus to building up our capacity by recruiting interested communities.
