

The image above shows an overview of proposed striping changes on Charles River Dam Road / Craigie Bridge between Land Boulevard and Leverett Circle, as presented for comment in the public meeting on May 1, 2019. The plans include new bicycle accommodations through the limits, with flex posts for most of the length except where too narrow to include, new bicycle signals at Land Boulevard and Leverett Circle, five vehicular travel lanes, Don't Block The Box markings at the Museum of Science and State Police Barracks driveways, 25MPH speed signs and other signage. These illustrative draft plans are posted as reference for public comment and do not represent a final plan for construction.

Charles Dam River Road (Craigie Bridge)
