I am writing to comment on the Program Year 2026 Flat Incentive Rates. The STGU rate of \$.03/kWh is less than the value of Renewable Energy Certificates, or RECs. Customer's choosing SMART over RECs are missing out on about \$.01/kWh. That lower incentive rate, combined with SMART application fees, meter fees, meter installation, and application complexity will lead to no one participating in SMART if their system is under 25kW AC and they are not a Low Income STGU.

Thanks,

Kevin
