DETERMINATION OF NATURAL RESOURCE VALUE

PROJECT: Proposed Gile Road land disposition in the Town of Milton
MUNICIPALITY: Milton
EEA FILE NUMBER: A97_003_189
PROJECT PROPONENT: Town of Milton
DATE: June 14, 2024

Pursuant to M.G.L. c. 3, § 5A, in order to use for another purpose or otherwise dispose of land or an interest in land subject to Article 97 of the Amendments to the Constitution of the Commonwealth of Massachusetts (“Article 97”), a public entity must, *inter alia*, “identify replacement land or an interest in land, which is not already subject to said Article XCVII, in a comparable location and *that is of equal or greater natural resource value, as determined by the secretary of energy and environmental affairs . . .*” (emphasis added). This document provides the required determination of natural resource value as to the above-referenced proposal (“Project”).

This determination constitutes solely a determination of natural resource value pursuant to M.G.L. c. 3, § 5A(a)(ii) and does not indicate that the Secretary of Energy and Environmental Affairs takes any position on the Project or on whether it complies with the Executive Office of Energy and Environmental Affairs (“EEA”) Article 97 Land Disposition Policy. This determination reflects the independent analysis of EEA for advisory purposes and does not create any right, benefit, or duty, substantive or procedural, enforceable at law or equity by any party in any judicial or administrative matter.

Project Description:

The Project is described in pending legislation, S.2549, attached hereto as Appendix A, and in the Alternatives Analysis submitted by the Town of Milton, attached hereto as Appendix B (“Alternatives Analysis”). As described in Section 1 of the legislation and Section 4.3.2 of the Alternatives Analysis, the Project will involve the disposition of approximately 7.3 acres of land protected by Article 97, which is located off of Gile Road as shown on Figure 4.2 in Appendix B (“Impacted Land”).

As described in Sections 2(i), 2(ii), 2(iii), and 2(vi) and Section 3 of the legislation and in Section 4.4 of the Alternatives Analysis, the proponent has identified replacement land to be taken, acquired, or dedicated to Article 97 purposes, together totaling approximately 33.9 acres (“Replacement Land”). This

determination is based on analysis of the natural resource value solely of those parcels listed in the Alternatives Analysis and to be transferred to the Conservation Commission by Section 2(i), 2(ii), 2(iii), and 2(vi) and to the Parks and Recreation Department by Section 3 of the legislation. None of this land is already permanently protected under Article 97.

The legislation also provides for the transfer of care, custody, management and control of certain land that is or may be already subject to Article 97. This land, described in section 2(iv) and 2(v) of the legislation, is not listed in the Alternatives Analysis and may already be conserved in whole or part. As a result, this determination does not consider the natural resource value of these lands, and they play no role in the evaluation of the Project.

Information considered:

This determination is based on a review of the Alternatives Analysis, other materials submitted by the proponent, materials submitted by interested members of the public, and EEA's independent analysis. EEA analysis included visits to view the Impacted Land and Replacement Land in May 2022 and March 2023 and the use of GIS to characterize the natural resource value of the Impacted Land and Replacement Land. The full range of available natural resource information for the proposed disposition location was reviewed, including data pertaining to land cover, habitat, and water resources.

Characterization of Impacted Land:

The Impacted Land is wooded and possesses the natural resource values typical of that land cover type. Active recreation does not occur on the site, but it has potential for passive recreation. While the proposed disposition is in the vicinity of mapped Priority Habitat, depicted in yellow cross-hatching and labeled PH 1116 in Figure 1, it does not appear to directly impact that resource or wetlands and water resources associated with nearby Pine Tree Brook.¹ Therefore, the natural resource values that the Replacement Land must equal or exceed are those afforded by wooded land, including potential for passive recreation. A GIS image of the Project area is provided as Figure 1, with the red dot indicating the approximate location of the Impacted Land.

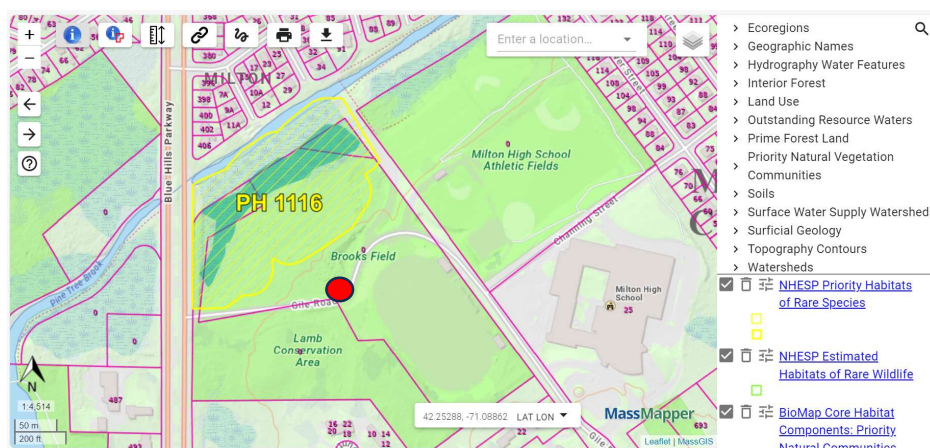

Figure 1: Natural Resource Value Assessment of the site of the Impacted Land utilizing MassMapper

¹ Should the Project proceed it will be subject to review and permitting under all applicable laws and regulations, including, if applicable, the Massachusetts Endangered Species Act and Wetlands Protection Act. This determination does not imply that the Commonwealth takes any position as to the applicability of any law or regulation as to the Project.

Characterization of Replacement Land:

The Replacement Land is wooded and possesses the natural resource values typical of that land cover type. Active recreation does not occur on the land, but the area has potential for passive recreation. A portion of the land appears to be Priority Habitat within PH1101, as depicted on Figure 3. Permanent conservation of each of these parcels would create larger blocks of conserved open space and some of the parcels would buffer wetland resources along Pine Tree Brook.

GIS images depicting the Replacement Land are provided as Figure 2 and Figure 3. The red dots indicate the specific parcels in Figure 2 and the approximate location in Figure 3 of the replacement land parcels.

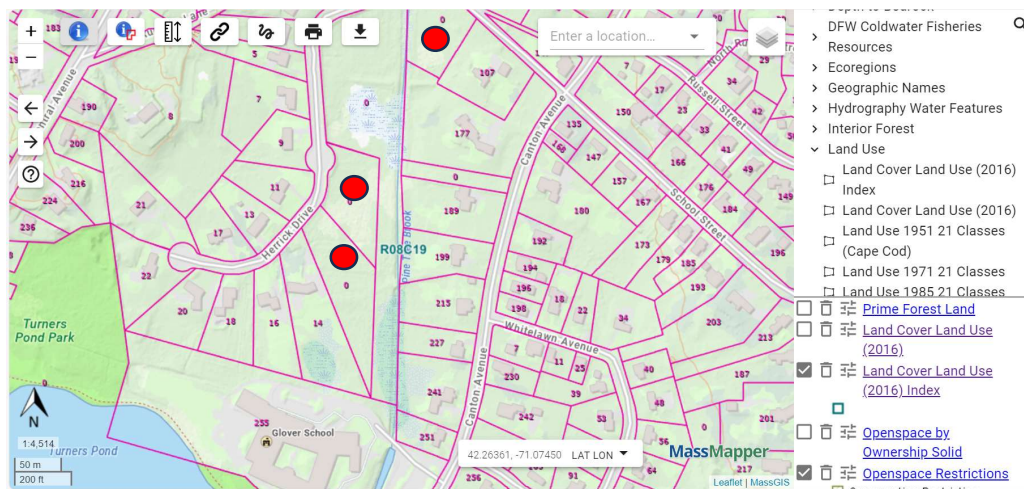

Figure 2: Natural Resource Value Assessment utilizing MassMapper of Replacement Land Parcels E17 34, E17 35, and E17 19

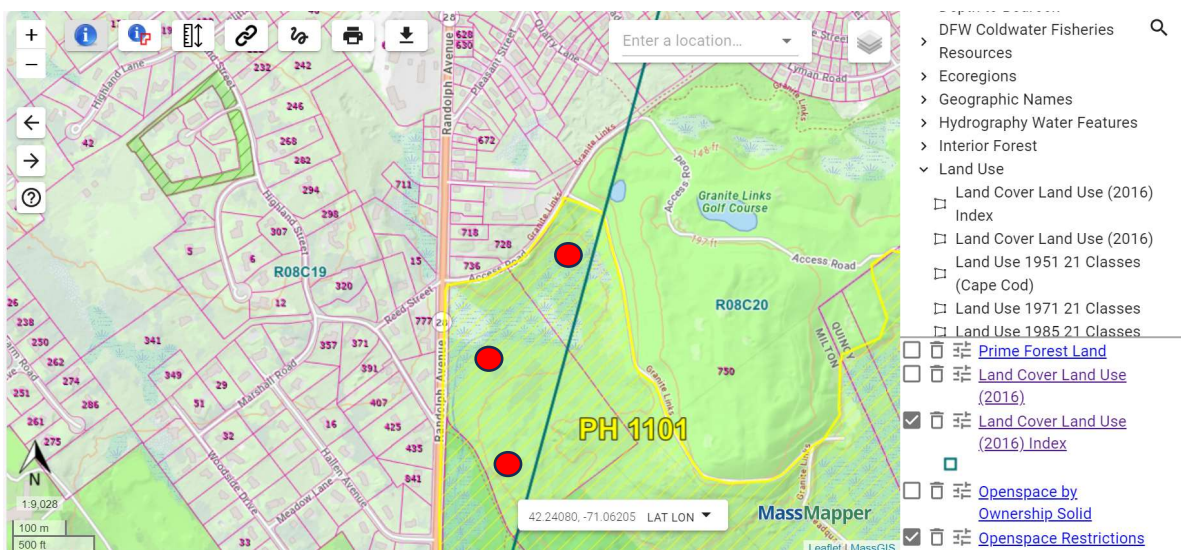

Figure 3: Natural Resource Value Assessment utilizing MassMapper of Replacement Land Parcels I-38D 10A, 38D Lot 6, 38D Lot 7, Block 38E Lot 2A-F and Block 38E Lot 3.

Determination:

The Replacement Land is of comparable or greater natural resource value as compared to the Impacted Land. Both the Impacted Land and Replacement Land have natural resource value consistent with wooded land cover type and are appropriate for passive recreation, and the acreage of the Replacement Land is greater than that of the Impacted Land. The Replacement Land additionally includes areas within Priority Habitat, and conservation of the Replacement Land parcels would create larger blocks of conserved open space and buffer wetland resources along Pine Tree Brook.

Appendix A

Senate Bill 2549: An Act authorizing the town of Milton to use certain property for school purposes.

SENATE No. 2549

The Commonwealth of Massachusetts

PRESENTED BY:

Walter F. Timilty

To the Honorable Senate and House of Representatives of the Commonwealth of Massachusetts in General Court assembled:

The undersigned legislators and/or citizens respectfully petition for the adoption of the accompanying bill:

An Act authorizing the town of Milton to use certain property for school purposes.

PETITION OF:

NAME:

Walter F. Timilty

DISTRICT/ADDRESS:

Norfolk, Plymouth and Bristol

SENATE No. 2549

By Mr. Timilty, a petition (accompanied by bill, Senate, No. 2549) of Walter F. Timilty (by vote of the town) for legislation to authorize the town of Milton to use certain property for school purposes. Municipalities and Regional Government. [Local Approval Received.]

The Commonwealth of Massachusetts

In the One Hundred and Ninety-Third General Court
(2023-2024)

An Act authorizing the town of Milton to use certain property for school purposes.

Be it enacted by the Senate and House of Representatives in General Court assembled, and by the authority of the same, as follows:

1 SECTION 1. The town of Milton may transfer to the care, custody, management and
2 control of the Select Board of the town of Milton for school purposes certain land owned by the
3 town of Milton and further described in subsection (b).

4 (b) The land to be used for school purposes pursuant to subsection (a) shall be:

5 (i) approximately 2.81 acres of land shown on the town of Milton Assessors' Map as Map
6 D, Block 65, Lot 6A, which is presently under the care, custody, management and control of the
7 town of Milton Conservation Commission, as evidenced by a Quitclaim Deed recorded in the
8 Norfolk County Registry of Deeds in Book 5553, Page 389 for conservation purposes; and

9 (ii) approximately 4.4 acres of land shown on the town of Milton Assessors' Map as Map
10 D, Block 65, Lot 6B, which is presently under the care, custody, management and control of the
11 Milton Parks and Recreation Department, as evidenced by a Quitclaim Deed recorded in the
12 Norfolk County Registry of Deeds in Book 5553, Page 391 for recreation purposes.

Said parcels are shown collectively as Parcel C on plan entitled “Approval Not Required Plan of Land Blue Hills Parkway in Milton, Massachusetts (Norfolk County) dated March, 2023, Scale 1”=60’, prepared by BSC Group 803 Summer Street, Boston, Massachusetts 02127, a copy of which is on file with the office of the town of Milton director of planning and community development.

SECTION 2. In consideration for the transfer of land pursuant to section 1, the town shall transfer the following parcels to the care, custody, management and control of the town of Milton Conservation Commission subject to restrictions under the provisions of Article 97 of the Amendments to the Constitution of the Commonwealth:

(i) approximately 6 acres of land located on Randolph Avenue, shown on the town of Milton Assessors’ Map as a portion of Map I, Block 38D, Lot 10A, which is presently under the care, custody, management, and control of the Milton Select Board as evidenced by an Order of Taking recorded in the Norfolk County Registry of Deeds in Book 6055, Page 474;

(ii) approximately 3 acres of land located on Herrick drive, shown on the town of Milton Assessors’ Map as Map E, Block 17, Lot 34 and Map E, Block 17, Lot 35 which is presently under the care, custody, management, and control of the Milton Select Board as evidenced by a Judgment Foreclosing Tax Lien Case recorded in the Norfolk County Registry of Deeds in Book 32064, Page 543;

(iii) approximately 1 acre of land located on School street, shown on the town of Milton Assessors’ Map as Map E, Block 17, Lot 19 which is presently under the care, custody, management, and control of the Milton Select Board as evidenced by a Judgment Foreclosing Tax Lien Case recorded in the Norfolk County Registry of Deeds in Book 32064, Page 543;

(iv) approximately 5 acres of land located at the corner of Highland street and Canton avenue, shown on the town of Milton Assessors' Map as Map K, Block 2, Lot 1A which is presently under the care, custody, management, and control of the Milton Select Board, as evidenced by a Judgment Foreclosing Tax Lien Case recorded in the Norfolk County Registry of Deeds in Book 4782, Page 338;

(v) approximately 41 acres of land located around and inclusive of Pope's pond, shown on the town of Milton Assessors' Map as Map C, Block 34A, Lot 4, a portion of which, not to exceed 4 acres, shall be transferred to the care, custody, management and control of the town of Milton Parks and Recreation Department to be used for a playground, which is presently under the care, custody, management, and control of the Milton Select Board, as evidenced by a Quitclaim Deed recorded in the Norfolk County Registry of Deeds in Book 4080, Page 379; and

(vi) approximately 18.94 acres of land off of Randolph avenue shown on the town of Milton Assessor's Map as Map I, Block 38E, Lot 2 and Map I, Block 38E, Lot 3 (A to F included), which is presently under the care, custody, management, and control of the Milton Select Board as evidenced by an Order of Taking recorded in the Norfolk County Registry of Deeds in Book 6055, Page 474.

SECTION 3. In further consideration for the transfer of land pursuant to section 1, the town shall transfer to the care, custody, management and control of the town of Milton by the Parks and Recreation Department, subject to the restrictions under said Article 97, approximately 4.86 acres of land off Randolph avenue in the town of Milton consisting of portions of land shown on the town of Milton Assessors' Map as Map I, Block 38D, Lot 6 and Map I, Block 38D, Lot 7 which is presently under the care, custody, management, and control of the Milton Select

Board as evidenced by an Order of Taking recorded in the Norfolk County Registry of Deeds in Book 6055, Page 474.

SECTION 4. The authority conferred by this act shall be conditioned upon compliance by the town with applicable laws and regulations regarding the disposition of land, including, but not limited to, section 5A of chapter 3 of the General Laws.

SECTION 5. If, not later than June 30, 2028, the town does not appropriate money for construction of a new school, then: (i) the parcel referenced in clause (i) of subsection (b) of section 1 shall be transferred back to the care, custody, management and control of the town of Milton Conservation Commission, to be subject to the provisions of Article 97 of the Amendments to the Constitution of the Commonwealth; and (ii) the parcel referenced in clause (ii) of said subsection (b) of said section 1 shall be transferred back to the care, custody, management and control of the town of Milton Parks and Recreation Department for recreation purposes.

SECTION 6. This act shall take effect upon its passage.

APPENDIX B	LETTER FROM STATE FORESTER

1 EXECUTIVE SUMMARY

The Town of Milton formed the School Building Committee (SBC) in the special town meeting in February 2019. The formation of this committee and the corresponding charge was to address the current overcrowding of the school district due to increased enrollment and need for additional space, supplemented by the 2019 space needs study provided by DRA Architecture. The work of the School Building Committee over the past four years to locate a suitable site for a new educational facility within the town was exhaustive and required the utilization of a portion of existing parks land and conservation land between Gile road and Bluehills Parkway. This analysis, along with the real estate appraisals of the subject parcels, show a net benefit to the conservation commission and the parks department of the town.

The School Building Committee has explored the use of privately owned parcels, along with available municipal parcels within the town. However, the necessary acreage required for the project, could not be accommodated on the available parcels. Therefore, after the years of study of parcels within the town, the SBC has voted to propose the use of portion of conservation land and a portion of park land be utilized for the new educational facility.

This document presents the details of the parcels (privately owned and town owned) identified, studied and pursued by the School Building Committee. As depicted in this analysis, the portions of Parcel D 65 6A (conservation) and D 65 6B (parks) that will be utilized for an educational facility, are replaced with land providing a net value to both the town's parks department and conservation commission.

2 INFORMATIONAL

2.1 BACKGROUND

The elementary enrollment in Milton Public Schools (MPS) has grown by 24% (450 students) over the past fourteen years, since the last school building project was completed - from 1873 students (in 2008) to 2323 students (in 2022). Last year's enrollment showed a reduction from the COVID19 pandemic, a reduction that was clearly an anomaly. This year's enrollment returned to the expected pre-pandemic numbers. The New England School Development Council (NESDEC) enrollment projections show that we MAY be nearing a peak of the elementary enrollment growth in the next four years and it will hold fairly steady until 2032. However, enrollment projections do NOT include the "student yield" of numerous residential construction projects - including EIGHT 40B site approval applications that have been recently filed for projects, along with FIVE additional residential construction projects with a potential total of 640 new housing units, that are expected to increase enrollment 2022-23 onward. In addition, a new Housing Production Plan was produced in January, 2020, by the Town of Milton that plans for additional new affordable housing in town.

The MPS elementary schools were designed and built to accommodate 14 strands at each grade level (K-5). We are currently just 4 classes short of 17 strands at all grade levels. NESDEC enrollment projections show us to be short by 26 classrooms by 2032.

MPS has taken the following steps to address this dramatic enrollment increase:

2.1.1 ELEMENTARY SPACE NEEDS STUDY - DRA ARCHITECTURE

An Elementary Space Needs Study was conducted by the architectural firm Drummey-Roseane-Anderson (DRA) in 2019. DRA concluded that, based on NESDEC enrollment history and projections, MPS elementary schools will be short by 26 classrooms in 10 years. DRA suggested a range of long term options to be considered to address the overcrowding including augmenting the existing educational facilities with additions. However these options to augment the existing facilities did not present the required amount of space to address the shortfall of 26 classrooms. Therefore, DRA recommended the construction of a new elementary school. However, the study was not scoped to find available land within the Town. This Space Needs Study was the basis for the formation of the Town's School Building Committee (SBC).

2.1.2 MAINTAINING CLASS SIZES

In order to meet the growing enrollment of the district, MPS has worked to keep its commitment to maintain small class sizes across the district, whenever possible. Target Maximum class sizes and the actual maximums are currently: K Target Maximum:23 (Actual: 24), Grade 1 – Target Maximum:22 (Actual: 27); Grade 2 – Target Maximum:23 (Actual:26); Grades 3, 4 and 5 – Target maximum:25 (Actual: 26).

To achieve a balanced distribution of class sizes, the district has encouraged new enrollees to attend other schools.

2.1.3 CONVERSIONS OF NON-EDUCATIONAL SPACE

Spaces within the existing school that were not planned as educational spaces are being converted to house educational programs currently. As these non-traditional educational spaces are cannibalized to accommodate a growing student population, the programs housed in these non-traditional educational spaces suffer. Currently over twenty (20) non-

traditional classroom spaces have been converted over the past 10 years. These conversions have all been at the expense of office space, computer labs, libraries, art rooms, music rooms, teachers' rooms, conference rooms, and adult restrooms. The conversion of these non-traditional educational spaces have students in inadequate spaces and have displaced educational professionals to closets, hallways and even their vehicles at times.

The availability of these spaces to convert has been exhausted, with no available space left to convert. An example of this was experienced this past winter where a water pipe burst due to a deep overnight chill. The water damage to two (2) classrooms required these spaces be relocated to a teacher's room (where the teacher's subsequently displaced to stage in the cafeteria behind a curtain) and the other classroom was relocated to the library. The relocation to the library, at that time, caused the library to house a total of three (3) classrooms.

As indicated by the above examples, the options have run out and additional space is now needed to resolve the ongoing enrollment increases and restore our educational programming.

2.2 ENROLLMENT

Enrollment within the district continues to grow and is reflected in our enrollment data presented by the New England School Development Council (NESDEC) which provides data on current enrollment and future anticipated enrollments. The existing data (Table 2.1 2022-2023 Historical Enrollment (NESDEC)) for Kindergarten shows an increase in class sizes¹ as compared to 2008-09 (Table 2.2 2008-09 Historical Enrollment (NESDEC)). If an overall reduction in enrollment were anticipated, it would be seen at these lower grade level first.

Table 2.2 2008-09 Historical Enrollment (NESDEC)

Similarly, the overall population of the Town has increased significantly in the past ten (10) years by over 1627 people. This increase of 1627 people since 2010 represents a larger increase in the population of Milton than the previous thirty (30) years (1143 people).

Table 2.3 Town Population (Census Data)

2.3 EDUCATIONAL PROGRAM

The previously completed study by DRA (2019) concluded a new elementary school would be required to address the district's long term needs at the elementary level.

Since then, the population of students have matriculated up to the middle school, thus causing educational space needs to be strained at the elementary AND the middle school levels. To address these space needs, the School Building Committee (SBC) has proposed the construction of a new upper (grades 7 & 8) middle school with a pre-school wing.

By this proposal, the district will perform the following:

School	Current Grade Configuration	Proposed Grade Configuration	Notes
Pierce Middle School	6 th , 7 th and 8 th Grades	5 th and 6 th Grades	Reduces existing building from 3 strands of grades, to 2 strands of grades. Available space may be used to relocate administrative offices from highschool.
Elementary Schools (Glover, Tucker, Cunningham and Collicot)	Pre-K, K thru 5 th Grades	K thru 4 th Grades	Reduces existing building and provides requires 26 classrooms and restores Art and Music Rooms.
Proposed Upper Middle School	N/A	7 th and 8 th Grades with Pre-K wing	Allows Early Childhood education program for highschool students

3 LAND PARCELS

3.1 PRIVATE PARCELS

The School Building Committee's initial work focused on securing land for the construction of a new educational facility within the Town. Acquisition of private land through purchase was explored with the parcels listed below.

3.1.1 SAINT MARY'S OF THE HILLS SCHOOL (PARCEL E 55 3)

St. Mary's of the Hills is a catholic elementary school with a preschool program consisting of a 7.25 acre site. Since the existing site housed an educational facility, it became the initial preferred site for the new school by the SBC.

The SBC contacted the archdiocese to investigate the ability to purchase or lease (99 year lease) the current property for a new school for the Town of Milton. Due to expanded preschool program, the archdiocese favored keeping the property and not selling. Further, during the COVID pandemic, the school experienced an increase in enrollment, hence solidifying their stance to not sell.

3.1.2 FONTBONNE CONVENT (PARCEL F 18 12)

In Fall of 2022, the Town was made aware the Sisters of St. Joseph were listing the convent located at 444 Centre Street on the parcel along with a sub-divided portion of the parcel for sale of approximately \$8M.

The Town and the SBC investigated the potential of the property to accommodate an educational program and made an offer to the seller to acquire the property. In December 2022, the sellers indicated through their agent they were rejecting the offer from the Town and further rescinding their offer to sell the property.

3.1.3 SAINT PIUS X CHURCH (PARCEL B 14 6)

St. Pius X church is located on a 6.2 acre site along Wolcott road in the southwestern portion of Milton. Upon initial discussions with the Archdiocese, they indicated the entire parcel would not be available for sale. However, a smaller portion (~ 3 acres of the adjacent wooded area) may be available. The SBC planned program (minimum of 6 acres) would not work on the available parcel, therefore this site was abandoned.

3.1.4 HIGHLAND AVE (PARCEL K 2 2)

A 5.34 acre parcel (K 2 2) was identified by the SBC off of Highland Avenue was owned by Beth Israel Deaconess (BID) Milton. The parcel did have portions of wetlands associated with it and the SBC approached BID for discussions of purchasing the land for a new school. BID indicated to the SBC that they were not interested in selling this parcel of land to the Town.

Since those early discussions, BID has filed for the construction of a memory care facility at this site.

<https://www.patriotledger.com/story/news/2021/05/13/70-unit-memory-care-center-proposed-hospital-site-milton/5069946001/>

3.1.5 144 RANDOLPH AVE (PARCEL F 14 11)

A private residence consisting of 4.34 acres of land off of the northern section of Randolph Avenue. At the time (2019) the SBC reviewed this property via MLS listing for sale at \$3.2 million dollars. During the review of this parcel, it sold for \$2.5 (Feb 2020).

3.1.6 501 RANDOLPH AVE (PARCEL J 16 5)

A house, owned by Milton Academy was identified consisting of 8.24 acres of land. The SBC discussed the option of purchasing this land from Milton Academy, but was told it was not for sale.

3.1.7 HORSE FARM (PARCELS I 38D 7A & I 4 12)

The parcels known as the Horse Farm were reviewed. These are two (2) private parcels totalling approximately 4.13 acres (1.24 acres parcel I 4 12 and 2.89 acres parcel I 38D 7A). The owner of this land was not interested in selling to the Town.

3.1.8 COPELAND LAND (PARCEL K P5 37)

The Copeland Foundation of Milton owned approximately 23.7 acres of land off of Hillside street. The majority of this parcel is wetlands (blue hatching on image). After the SBC reviewed this parcel and the associated wetlands, it was became evident that construction on this property of a new school would be difficult and did not bother to approach the Copeland Foundation.

3.1.9 693 CANTON AVE (PARCELS D 65 3B)

This parcel abutts the highschool and Town land (parcel D 65 8) along Canton ave. The overall parcel (D 65 3B) accounts for only 1.1 acre, however the SBC was investigating whether this parcel could be purchased and m erged with the adjoining parcel D 65 8 (town land of approximately 0.9 acres) and highschool to create a larger parcel that could be utilized for a new school. While the SBC was reviewing these options, the property sold (DEC 2019)

3.2 TOWN OWNED PARCELS

At the beginning of the SBC's search for land within the Town, they held a meeting with the Town Planner (Bill Clark) and former Town Administrator (John Cronin) to utilize their intimate knowledge of available land resources in the Town for the planned school. A list of Town owned parcels of land (Appendix A, total of 107 parcels) was provided by Mr. Clark that was used as a starting point for the SBC.

This list was sortable by acreage and allowed the SBC to focus on all sites over 6 acres. Of the 107 parcels of land provided, only twenty one (21) of which were larger than 6 acres. Of the twenty one (21): Seven (7) were for conservation, five (5) for Schools, three (3) for Municipal Use Parcels, three (3) for Parks and three (3) for Town Cemetery. This list highlighted the already known issue that available land over 6 acres is scarce within the Town.

After reviewing the available parcels, two (2) areas were identified as possible locations for the new school. These were parcel I 38D 10A located on Randolph Ave and Parcels D 65 6A and D 65 6B on Gile Road.

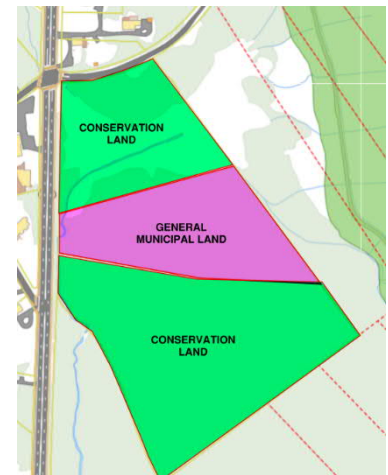

Parcel I 38D 10A is listed on the spreadsheet as owned by the Conservation Commission, but the deed reflects that approximately 6 acres of land (out of the 29.70) is for general municipal use, and the remainder of the land is conservation land.

The parcels D 65 6A and D 65 6B became identified as a potential location for a new school. Originally, the SBC planned to utilize the majority of Parcel D 65 6A, however by merging this parcel of conservation land with the portion of the parcel owned by the park's department, the SBC was able to use only 2.8 acres of conservation land and preserve a majority of the existing conservation land.

3.2.1 RANDOLPH AVE (PARCEL I 38D 10A)

This parcel was acquired by the Town in 1982 for \$90,000. The parcel consists of 29.70 acres abutting the blue hills. The middle portion of this parcel (approximately 6 acres) was reserved for municipal purposes. The SBC reviewed this site for the proposed school, however a number of concerns arose from reviewing this site.

The existing site is in proximity to another Town project (animal shelter) that is currently planned for construction. The project was previously publicly bid, and construction costs due to anticipated subterranean rock ledge increased construction bids to extremely high dollar values. This project consisted of a 4,000 square-foot building, whereas the proposed school project was going to be approximately 10-15 time larger in footprint. Therefore, the concern of elevated costs was a concern. Further, the topology of this site would require significant work to level the site.

The ideal location for a school would allow students to walk/bike to the facility. Traffic volumes, speed and the introduction of pedestrian/student conflict into this area was extremely concerning. This current stretch of roadway is one of the highest in the state for fatalities.

Finally, the SBC was made aware by former Town Planner – Bill Clark, that the location of this parcel could potentially be part of the historic Hornfels Quarry.

3.2.2 GILE ROAD (PARCELS D 65 6A AND D 65 6B)

These parcels were acquired by the Town in 1978 for \$170,000, a portion of which was by a Self-Help agreement with the State. Parcel D 65 6A is conservation land and D 65 6B is used for active recreation (parks). These parcels abut the existing high school and playing fields. Utilizing this location for a new school aligns with the planned educational program (grades 7 & 8, with a preschool) that would allow a 'campus' environment with high school and leverage certain synergies between the two educational facilities.

It should be noted, that during the previous school building project, the extension of Gile Road (not technically a road, but a driveway) between these two (2) parcels required a Article 97 land swap on these parcels. Therefore, the SBC understood this as a precedent in utilizing the mechanism of an Article 97 land swap.

4 ARTICLE 97 LAND SWAP

4.1 OVERVIEW

In the summer of 2021, the SBC decided to pursue an Article 97 land swap for the parcel D 65 6A (Conservation Land) on Gile road for the location of a new school facility. The original proposal (May 2022 – Town Meeting proposal) for the Land Swap, consisted of utilizing the majority of the conservation land (parcel D 65 6A) in exchange for parcels identified below. After receiving a letter dated April 15, 2022 from the State Forester (James Rassman – Appendix B), representatives from the SBC reached out to have a site walk with him. After walking the site and being educated on the portions of the parcel (D 65 6A) that held high ecological value, the SBC withdrew their May 2022 Town Meeting Article to revise.

The withdrawal of this article introduced a one (1) year delay to our project. However, the proposed revisions provide a substantially better proposal that includes more land going into conservation and parks use and reduces the amount of conservation land being used for the school while maintaining the ecologically valuable portions of the site.

4.2 2001 ARTICLE 97 LAND SWAP PRECEDENCE

In 2001, the Town passed Article 50 of the annual town meeting for the transfer of land on both parcels (D 65 6A and D 65 6B) for the creation of Gile Road (driveway). This previously executed Article 97 land swap provided the SBC precedence of utilizing these parcels now in a Article 97 land swap. As can be seen in the Google Earth images below, in 2001 the road/driveway did not exist. However, in 2003 the road was constructed.

ARTICLE 50. To see if the Town will vote to authorize the Board of Selectmen to petition the General Court to enact legislation in substantially the following form, provided that the General Court may reasonably vary the form and substance of the requested legislation within the scope of the general public objectives of this petition.

**AN ACT AUTHORIZING THE TOWN OF MILTON
TO TRANSFER LAND TO THE MILTON SCHOOL DEPARTMENT**

Be it enacted by the Senate and House of Representatives in General Court assembled, and by the authority of the same, as follows:

SECTION 1. Pursuant to the provisions of Article 97 of the Amendments to the Massachusetts Constitution, and any other applicable authority, the Milton Board of Selectmen is hereby authorized to transfer to the care, custody and control of the Milton School Department for school purposes, for construction of an access road between Gile Road and Blue Hills Parkway, the land shown as Parcel A on a plan designated "Plan of Land, Blue Hills Parkway in Milton, Massachusetts, (Norfolk County)" Approval Not Required, scale 1"=60', dated February 9, 2001, as revised through March 22, 2001, prepared by BSC Group, 384 Washington Street, Norwell, Massachusetts 02061, which plan is to be recorded with the Norfolk County Registry of Deeds. Parcel A contains 1,401+ square feet as shown on said plan.

SECTION 2. In consideration thereof the Town of Milton shall transfer to the care, custody and control of Milton Conservation Commission for conservation purposes, the land described below. Parcel B from plan designated "Plan of Land Blue Hills Parkway in Milton, Massachusetts (Norfolk County)" Approval Not Required, scale 1"=60', dated February 9, 2001, as revised through March 22, 2001, prepared by BSC Group, 384 Washington Street, Norwell, Massachusetts 02061, which plan is to be recorded with the Norfolk County Registry of Deeds.

SECTION 3. This act shall take effect upon its passage.

VOTED. The Town voted YES.

4.3 LAND SWAP ARTICLES COMPARISON

4.3.1 MAY 2022 ARTICLE 97 LAND SWAP

The May 2022 Article 97 land swap proposal utilized the majority of the conservation land (approximately 6.8 acres of the 8.31 acres) for the construction of the school. This article would have removed 6.83 acres (shown in yellow in Figure 4-2 – May 2023 Land Swap) of conservation land and replaced it with 8.87 acres of general municipal land.

Figure 4-1 - May 2022 Land Swap Middle School Concept

Based on the letter and site walk with the State Forester – James Rassman, the lower portion of the site abutting Blue Hills Parkway accounted for the majority of the ecologically valuable portion of the parcel. As noted in his letter, Mr. Rassman indicated there may be a way to develop this site and maintain the ecological value of this site. Therefore, the SBC developed the proposed option below for the Town's consideration.

4.3.2 MAY 2023 ARTICLE 97 LAND SWAP

The May 2023 Article 97 land swap proposal indicated a relocation of Gile Road (driveway) into the active recreation/parks parcel D 65 6B. The portions of the active recreation parcel (D 65 6B) where the road would be constructed were indicated to be of less ecologically valuable land, than the 300' buffer zone along Blue Hills Parkway. By performing this realignment, a 300' buffer zone along blue hills parkway could remain as conservation land. Similarly, this realignment allowed the project to keep a 50' conservation buffer with the abutters of Home Inc.

Overall, this proposal only utilizes 2.81 acres of conservation land (down from 6.8 acres in previous 2022 article) and 4.45 acres of active recreation land while maintaining larger portions of the existing conservation land.

4.4 REPLACEMENT PARCELS

The Town and SBC have worked diligently to identify parcels of land that are currently not protected by Article 97 that can be included. The parcels listed below have been identified as available municipal use parcels that equate to more land going into Article 97, than being removed.

The current metrics for this land swap include 7.26 acres (2.81 acres - conservation 4.45 acres – active recreation) coming out of Article 97, and approximately 33.97 acres going into Article 97. This equates to a 4.7 : 1 ratio of land going into Article 97. The parcels of land going into Article 97 are listed below.

4.4.1 RANDOLPH AVE (PARCEL I 38D 10A)

This parcel was reviewed for construction of the school (refer to 3.2.1 above). The approximate six (6) acres of land are bookended by conservation land. Unifying this site to a continuous section of land of 29.70 acres of conservation land was reviewed by the SBC. The location of this parcel abutting the Blue Hills and the historical significance previously referenced, indicated to the SBC that the value (monetary and ecological) of this parcel was significant and should be included as land to be converted with the protections of Article 97.

This parcel was included in the 2022 May Land Swap Article.

4.4.2 HERRICK DRIVE (PARCELS E 17 34 AND E 17 35)

Two (2) parcels (E 17 34 and E 17 35) shown in yellow along Herrick drive were taken by the Town for non-payment of taxes. These parcels are 1.11 acres (E 17 35) and 1.57 acres (E 17 34). These parcels abut existing conservation land (parcel E 17 36) that is currently 4.85 acres. By converting the existing municipal parcels and unifying these with the adjacent conservation parcel, it will yield over 7.53 acres of conservation land along Pine Tree Brook.

These parcels were included in the 2022 May Land Swap Article.

4.4.3 SCHOOL STREET (PARCEL E 17 19)

The School Street parcel consists of 1.33 acres of general municipal land. This land was identified after the withdrawing the 2022 May Land Swap Article. This land, along with the other parcels on Herrick Drive will create a large area of conservation land abutting Pine Tree Brook.

4.4.4 RANDOLPH AVE (BLOCK 38D LOT 6)

This parcel of land consists of municipal land that exists outside of the lease boundary with Granite Links Golf Course. The town has identified approximately 4.03 acres of land that will be transferred to the Parks department as replacement land for the 4.45 acres (parcel D 65 6B) taken out of Article 97.

This land was requested By EEA on the site walk (March 31, 2023) to be investigated and included in the article, if the land was available.

4.4.5 RANDOLPH AVE (BLOCK 38D LOT 7)

This parcel of land consists of municipal land that exists outside of the lease boundary with Granite Links Golf Course. The town has identified approximately 0.83 acres of land that will be transferred to the Parks department as replacement land for the 4.45 acres (parcel D 65 6B) taken out of Article 97.

This land was requested By EEA on the site walk (March 31, 2023) to be investigated and included in the article, if the land was available.

4.4.6 RANDOLPH AVE (BLOCK 38E LOT 3)

This parcel of land consists of municipal land that exists outside of the lease boundary with Granite Links Golf Course. The town has identified approximately 6.3 acres of land that will be transferred to the Conservation Commission as replacement land for the 4.45 acres (parcel D 65 6B) taken out of Article 97.

This land was requested By EEA on the site walk (March 31, 2023) to be investigated and included in the article, if the land was available.

4.4.7 RANDOLPH AVE (BLOCK 38E LOT 2: A TO F)

This parcel of land consists of municipal land that exists outside of the lease boundary with Granite Links Golf Course. The town has identified approximately 12.74 acres of land that will be transferred to the Conservation Commission as replacement land for the 4.45 acres (parcel D 65 6B) taken out of Article 97.

This land was requested by EEA on the site walk (March 31, 2023) to be investigated and included in the article, if the land was available.

5 CONCLUSION

5.1 ARTICLE 97 LAND SWAP

The need for a new school within the Town is well documented and is impacting the existing educational experience of the student population of the Town due to inadequate space with the existing educational facilities. The existing facilities have converted all spaces to accommodate the growth in student population. The overall enrollment is not expected to decline organically to a level that would allow the facilities to revert back to their planned program for space. Therefore the need for a school is warranted.

The town has hired professional consultants to determine the long-term solutions to their space problem by conducting a space needs study. The results of this study resulted in the formation of the Town's School Building Committee. This committee has worked for over three (3) years to study the available land and react to opportunities to purchase land.

The available land within the Town to construct the required educational facility requires approximately 6 acres currently does not readily exist. The committee has reviewed private and public land options in order to construct a new school, and has concluded the parcels on Gile road present the best option for a new educational facility.

The location of this facility will allow a campus environment that aligns with the educational programming of grade configurations in the Town. Moreover, this singular project will address overcrowding of existing facilities on all levels: Elementary, Middle and High school levels.

The vote on Article 31 of the Annual May Town meeting 2023 represents the Town's commitment to this proposal and the corresponding work of the Town and School Building Committee.

APPENDIX

A TOWN OWNED LAND PARCELS

	Town owned Land					
	Parcel ID	Owner1/Owner2		Name	Location	Area

B LETTER FROM STATE FORESTER

April 15, 2022

Hello Mr. Modugno

Thank you for inviting me up to Milton to walk the lovely Lamb property along the Blue Hills Parkway. This email is meant to provide an overview of my observations as a forester and conservationist.

We started out at the Parkway itself by entering through the old estate gates. I mention this because although it is a relatively small parcel, it is in a key position that ties it into Milton's section of the Blue Hills Parkway and directly to the Blue Hills itself. Just past the gates we observed a mature two-aged forest that came about as a younger forest established itself under the stately open-grown canopies of the Lamb Estate trees. The forest here is surprisingly diverse with impressively large black oak, red oak, sugar maple, and white oak over a second growth forest of oaks, American beech, yellow birch, black birch, and red maple. The large mature canopy shades the forest floor which creates an open condition containing scattered native shrubs and forbs. You can still make out remnants of the estate roads, and we observed several small foundation areas that were most likely from outbuildings on the estate. This upland forest area contains some amazing trees but also protects the watershed for the adjacent wetland and vernal pool. The condition of the forest is excellent from a carbon storage standpoint with the mature trees containing many hundreds of tons of stored carbon which represents many thousands of tons of greenhouse gases sequestered. In general, this parcel has very high aesthetic, habitat, watershed protection, and carbon storage value.

Still, these values may be less than the historical value this parcel has due to its location along the Blue Hills Parkway, its direct association with the Lamb family and their contributions to the town of Milton, and its broader connection to historic, ecological, and social values of the system of protected parklands around Boston. As you know, this system was envisioned, designed, and championed by many of the greatest landscape architects and conservationists which we celebrate today. As I sidenote, it's interesting to acknowledge that we will celebrate the 200th birthday of Frederick Law Olmsted next week on April 26, 2022. This small but important parcel speaks to the vision of Olmsted, Charles Eliot, and others who passed down the structure of protected spaces that give our communities their character and desirability.

It is partly due to this desirability that Milton finds its school system overcrowded and needs to address this by expanding classroom space. This is a real problem that the town faces, and there will always be some type of environmental costs associated with the need to increase infrastructure. I encourage all the citizens of the town to work with the various town committees and boards to carefully weigh all the costs and benefits of the various

options to meet this need. If after all other options are eliminated and the town is still forced to develop this parcel to support a new middle school, I would encourage that everyone works together to explore ways that this parcel could be partial developed that would be in keeping with its historic, ecological, and climate values. Although continued protection would be the best option, there may be a way to design a school that incorporates these values by protecting the majority of the parcel as an accessible outdoor classroom. With careful and imaginative thinking, it may be possible to achieve the needed expansion while protecting most of the values of this property. If we are to teach the skills that the next generation is going need to rise to the challenges of a rapidly changing climate, it would make sense to do that in a setting that directly demonstrates the needed ecological principals and collaborative thinking.

I am sorry to hear that this lovely parcel is under this pressure, but I am hopeful that the town will thoughtfully consider all options and be able to meet the needs of the expanding school system in a way that either completely or significantly protects the important values it represents.

Please let me know if I can be of further assistance.

Sincerely,

Jim Rassman
DCR Service Forester
