

Route 1A Corridor Study- Public Meeting #1

What is happening?

The Massachusetts Department of Transportation (MassDOT) is conducting a study to assess the potential uses of the MassDOT and MBTA rail parcels located between Route 1A and the Chelsea Creek and evaluate the Route 1A corridor between Bell Circle in Revere and Day Square in East Boston. The study will identify opportunities to improve connections for people walking, biking and taking transit, and address safety issues and potential impacts of climate change.

Why are we holding this meeting?

This study is just beginning, and MassDOT wants to hear from you about your priorities, interests and needs. At this meeting, MassDOT will present an overview of the project, what we have found so far, and gather input from the community. Opportunities to provide input at the meeting will include: a discussion of the project need, goals, and objectives and the findings so far.
