(1) Services Included in the Rate. The approved rate includes payment for all care and services that are part of the program of services of an eligible provider, as explicitly set forth in the terms of the purchase agreement between the eligible provider and the purchasing governmental unit(s).

(2) Reimbursement as Full Payment. Each eligible provider must, as a condition of acceptance of payment made by any purchasing governmental units for services rendered, accept the approved program rate as full payment and discharge of all obligations for the services rendered. Payment from any other source will be used to offset the amount of the purchasing governmental unit's obligation for services rendered to the publicly assisted client.

(3) Payment Limitations. No purchasing governmental unit may pay less than or more than the approved program rate.

(4) Blended Contract Rate Calculation. Purchasing governmental units may pay a blended contract rate for the purchase of two or more ALTR programs. The blended rate will be calculated according to the following formula: $\text{Sum of } \{[(\text{Per Diem rate for Program Model 1}) * (\text{Units purchased of Program Model 1}) * (\text{Number of clients purchased in Program 1}) / (\text{Total number of clients in Program 1})], [(\text{Per Diem rate for Program Model 2}) * (\text{Units purchased of Program Model 2}) * (\text{Number of clients purchased in Program 2}) / (\text{Total number of clients in Program 2})], [(\text{Per Diem rate for Program Model 3}) * (\text{Units purchased of Program Model 3}) * (\text{Number of clients purchased in Program 3}) / (\text{Total number of clients in Program 3})], \dots, [\text{Total funding for Add-ons}]\}$ Divided by the $[(\text{Sum of the Units purchased}) * (\text{Count of clients})]$ for all programs in the contract.

(5) Blended Contract Rate Calculation. Purchasing governmental units may pay a Shared Living Blended Contract Rate for the purchase of programs serving two or more clients. The blended rate will be calculated according to the following formula: $\{\text{Sum of } [(\text{Operational Rate 1} * \text{Units purchased of Operational Rate 1}) \text{ plus } (\text{Stipend Rate 1} * \text{Units Purchased of Stipend Rate 1})], \text{ plus } [(\text{Operational Rate 2} * \text{Units purchased of Operational Rate 2}) \text{ plus } (\text{Stipend Rate 2} * \text{Units Purchased of Stipend Rate 2})], \text{ plus } [(\text{Operational Rate 3} * \text{Units purchased of Operational Rate 3}) \text{ plus } (\text{Stipend Rate 3}) * (\text{Units Purchased of Stipend Rate 3})], \dots, \text{ plus } [\text{Total funding for Add-Ons}] \text{ minus } [\text{Total Offsetting Revenue}]\}$ Divided by the sum of the Operational Rate Units purchased for all clients in the contract.
