I implore you to not allow Nantucket Sound to be polluted with large windmills.

Not only is the area aesthetically beautiful, but Horseshoe Shoals is in the midst of where my family and I fish very frequently. The windmills will create a danger to all mariners especially in the fog.

Please do not let this happen to us.

There are many areas better suited i.e. not in people's backyards examples

East of Cape Cod
South of Natucket or the Vinyeard

It would cost more to develop but not interfere with the citizens' right to enjoy the public's resources.

I am for alternate sources of power...but tempered with common sense!

Thank you,

Carl Redfield
