

Exhibit A**I. General**

1. Borrower: Town of Nantucket
2. Address: 16 Broad Street
Nantucket, MA 02554
3. Project Manager: Jeffrey Willet
4. DEP Contact and Address: Steven J. McCurdy
Division Director
1 Winter Street, 6th Floor
Boston, MA 02108
5. Project Title and Description: Infiltration/Inflow Rehab Phase 2-A Construction

The project is for the rehabilitation of a portion of Nantucket's sewer system referred to as Mini System N2 Phase II to remove excessive infiltration. Phase II will be performed solely in mini-system N2. Mini-system N2 is a significant contributor of the infiltration found throughout the collection system. Illicit connections to the sanitary sewer system, backups, overflows are all problems caused by infiltration/inflow. As a direct result of overload on the Surfside Wastewater Treatment Facility, plant effluent may negatively affect area parklands, beaches and other coastal locations. Phase II will involve the rehabilitation fifteen thousand two-hundred five (15,205) linear feet, or 2.9 miles of sewer, installation of twenty-nine (29) dead end manholes, and installation of sixty-nine (69) in-line manholes. This rehabilitation work will assist in maintaining compliance levels at the WWTF and fulfill the recommendations in the Comprehensive Wastewater Management Plan (CWMP/EIR).

II. Approved Funding:

6. Eligible Costs: \$4,006,000.00
7. Financial Assistance: 2% Interest Loan
