<p>ALL</p> <p>C1. The provider collects data regarding program quality including, but not limited to, incidents, restraints, investigations and medication occurrences.</p>	<p><u>Regulations 7.04 (2) (b): The provider shall regularly evaluate the level of quality of its supports and services through a process that is utilized to implement service improvements consistent with the outcomes delineated in the provider’s mission statement and the Department’s certification regulations and standards.</u></p> <p><u>Guidelines:</u> The first step in a provider’s ability to implement an effective quality management and improvement system is the commitment to the collection of data regarding program quality from a variety of both internal and external stakeholders and sources. Providers cannot measure and evaluate services unless they collect the needed information. While providers may be very effective in remedying individual situations, service improvement activities involve moving to the next level and gathering information that sets the stage for broader organizational improvement initiatives. Information collected should directly relate to the outcomes the agency strives to achieve both organizationally, for each discrete service type and for the individuals it supports. Agencies need to demonstrate a variety of ways in which they collect aggregate data regarding program quality including utilization of HCSIS management reports, results of consumer and family satisfaction surveys, feedback from state agencies with whom they contract (performance based contracting), as well as any internal evaluation processes they may utilize.</p> <p>While there are no specific requirements concerning what information is collected, it is important that providers collect data on other measures of quality separate and apart from incident management.</p>	<p>HCSIS Annual Contract reviews Performance Based Objectives</p> <p>Management reports, QA reports, HRC minutes, other summary documentation - administrative office</p>	<p>The provider’s method of collecting data is reviewed to determine what information is gathered and how this is aggregated in order to facilitate review and analysis by service type as well as location.</p>	<p>Provider has data process in place to capture information in all of the identified areas for each of their service types and agency-wide on a regular basis. Data collection includes information regarding program quality.</p>	<p>Data collection is not occurring for each service type as well as agency wide <u>and/or</u> is not occurring on a regular basis, <u>and/or</u> does not include information regarding program quality.</p>

	<p>The staff (home provider) must first gather information about the individuals' desires and skills relative to home life, including both personal care as well as home care through a variety of mechanisms such as familiarity with the individual, interview, observation, picture books and/or other communication assistive technology. The staff (home provider) need to support, as needed, the individuals' development of skills on a routine and ongoing basis so that individuals can do things for themselves as opposed to having staff do things for them. For example, daily and weekly activities such as dressing, tooth-brushing, laundry, meal preparation, shopping, managing money, cleaning, traveling/transportation, yard work and regular medical appointments are all activities that should be used to teach, guide, encourage and prompt greater independence and further skill development and participation. Any education/ training must be geared to the learning style and needs of the individual; education and training may occur in the home or the community (such as an adult education cooking class).</p> <p>If the individual cannot perform all aspects of the task, they must be supported to participate in several steps in the process. For example, an individual may not be immediately able to learn to do laundry, but s/he can be supported to put laundered items away in the drawers. Additionally, staff should encourage and support individuals to continue to attempt tasks that they have not been able to do in the past. For some individuals', due to their health care status, for example, this indicator may be less applicable. However there are very few circumstances in which the promotion of greater independence and the development of home skills (or personal care skills), should not occur.</p>	Observation	interests and needs in these areas to ensure that individuals can do things for themselves as opposed to having staff do things for them.
