*Residential Gallons per Capita Day is the average number of gallons used per resident per day over the calendar year. Massachusetts state standard = 65 gal/capita/day.

** Unaccounted for Water is the percent of water that cannot be accounted for by the PWS. UAW may be due to water loss through leaks (actual losses), differences between master meter and service meter totals (paper losses) and/or unmetered municipal uses such as fire fighting. Massachusetts state standard = 10%.

Blank values indicates that there was insufficient data to calculate a value at this time. Reasons include system not 100% metered, master meter malfunction, non-reporting, or seasonal population issues.
