

Dear Sirs/Madams,

I am writing to express my deep concern regarding the proposed wind farm for Nantucket Sound. This project proposes significant risks to the fishing industry, birds and boaters. Additionally, the use of public land, for profit, by a private corporation is not appropriate. This development group will be long gone, cash in pocket, when the equipment fails. The taxpayers will be left with the bill to remove the project in the end.

Please put an end to this before it is too late. Nantucket Sound should be left in it's natural state, for us all to enjoy and pass along to our children for generations to come.

Sincerely,
Margaret Rowland
