Boston, MA 02114

Re: Proposed regulatory changes to the SREC I eligibility, 225 CMR 14.00

Dear Commissioner Judson,

It is incredible that you are considering regulatory changes to renege on your commitments to homeowners under the SREC I program. It is infuriating that you are couching this change under the guise of a "clarification". Even the word clarification is an obfuscation. DOER has clearly communicated to SREC I participants multiple times in the past that their projects would maintain SREC eligibility until the end of the program, not just 40 quarters. People (such as my mother) installed these projects based on these assurances and now your trying to shortchange them after the fact. What you are essentially saying to the world is that they'd be fools to trust the DOER and the government of Massachusetts at its word.

I am cc'ing my representative and senator on this issue to demand the head of whoever's idea this was.

Thank you for your consideration.
