John Wassam,

I am a resident of Agawam and I vote. I write to you today to comment on the proposed amendments to Massachusetts' Renewable Portfolio Standard (RPS) program pertaining to burning woody biomass.

Biomass power plants should NEVER be located in or near Environmental Justice communities. Thus please retain this amendment without change: "A Generation Unit using Eligible Biomass Woody Fuel or Manufactured Biomass Fuel that is either: (i) sited in an environmental justice population or (ii) sited within 5 miles of an environmental justice population, shall not qualify as an RPS Class I Renewable Generation Unit."

Your proposal to eliminate efficiency requirements for existing biomass plants would allow dozens of highly polluting and inefficient biomass plants in Maine and across the Northeast to qualify for ratepayer subsidies if they claim to burn "non forest derived residues." Even if they can prove they are truly burning wood residues, rather than trees logged for fuel, these plants pump out large quantities of health-harming air pollution and greenhouse gas emissions that contribute to climate change.

DOER plans to use Massachusetts' ratepayer funds to prop up failing out-of-state biomass power plants will do nothing to mitigate climate change, reduce harmful air pollution, or promote new sources of clean, renewable energy. This proposal is WRONGHEADED and inconsistent with the state's recent acknowledgement of the health impacts from biomass power plant emissions. It is a major step backwards for a state that has been a national leader on climate issues.

I demand that you to leave the existing biomass eligibility criteria in the RPS intact, while adding the proposed provision to protect environmental justice communities.

Thank you.

Respectfully submitted,

Susan Grossberg
