

Substance Abuse Block Grant
Proposed Goals, Objectives and Measures for FY22-23

No.	Goal	Objective	Baseline	Year 1 - FY2022	Year 2 - FY2023
SAMHSA Priority Area 1: Prevention of fatal and non-fatal opioid overdoses					
1	Expand overdose prevention education and naloxone distribution.	Launch a stream-lined and centralized approach to naloxone access and distribution.	Some community-based agencies are currently not able to purchase bulk naloxone at the public interest rate and distribute naloxone to the high-risk populations they serve.	Implement application system to which all community-based agencies in MA can apply and identify priority applicants to award full subsidies for naloxone costs.	Begin to collect information from applicants such as overdose response training elements, number of doses purchased, number of doses distributed, and number of individuals served.
SAMHSA Priority Area 2: Identification of high-risk populations using data from multiple sources					
2	Improve ability to identify high risk populations and communities impacted by substance use disorders (SUDs) using data from multiple sources.	Develop a system for conducting ongoing needs assessment to support identification of high-risk populations and communities impacted by SUDs.	BSAS' current system for ongoing needs assessment needs updating/improving.	Develop new system/framework for ongoing needs assessment.	Implement system/framework developed in Year 1.
SAMHSA Priority Area 3: Improved and enhanced substance abuse primary prevention in Massachusetts					
3	Decrease substance use among young people in funded and partner communities.	Facilitate and support local community substance use prevention policy or practice changes.	Each funded municipal coalition proposes a new evidence-based and/or evidence informed policy/practice change from previous FY based on findings from Strategic Prevention Framework,	Each municipal coalition facilitates at least one new evidence-based and/or evidence-informed policy/practice change from previous FY based on findings from Strategic Prevention Framework.	Each municipal coalition facilitates at least one new evidence-based and/or evidence-informed policy/practice change from previous FY based on findings from Strategic Prevention Framework.
SAMHSA Priority Area 4: Substance abuse screening, intervention and treatment integration with health care					
4	Improve access to medication for opioid use disorder (MOUD) statewide.	Work with providers to eliminate barriers to increase number of individuals in both inpatient and outpatient levels of care who are	In FY 2021, providers either maintained or inducted 50% of clients with OUD onto MOUD.	Increase the percentage of OUD enrollments who are either maintained or inducted onto MOUD by 2.5% annually from 50% in FY21 to 52.5% in FY22.	Increase the percentage of OUD enrollments who are either maintained or inducted onto MOUD by 2.5% annually from 52.5% in FY22 to 55% in

Substance Abuse Block Grant
Proposed Goals, Objectives and Measures for FY22-23

No.	Goal	Objective	Baseline	Year 1 - FY2022	Year 2 - FY2023
9	Expand service of BIPOC youth and other underserved and/or marginalized communities.	Increase the capacity of the existing system of care to effectively meet the unique needs of BIPOC and LGBTQ+ youth and their families impacted by substance misuse and substance use.	Currently 26% of youth served identify as BIPOC, 8% identify as LGBTQ+, and less than 1% identify as transgender.	Identify and contract with vendor to complete needs assessment specific to youth and young adults requiring SUD treatment, and recovery support applying a racial justice lens and applying social determinants of health.	10% increase in the number of BIPOC and LGBTQ+ youth and young adults served in SUD treatment, and recovery support.
SAMHSA Priority Area 10: Infectious disease prevention and treatment needs of clients in substance abuse treatment					
10	Increase access to infectious disease prevention and treatment for clients in substance use treatment.	Increase capacity of funded programs to screen for infectious disease and ensure linkages to appropriate care.	Released a survey last Spring to assess knowledge gaps and training needs related infectious disease prevention and treatment.	Analyze and develop plan based on survey findings.	Implement plan based on survey findings.
