October 9, 2019

Mr. Sean Cronin
Senior Deputy Commissioner of Local Services
MA Department of Revenue
PO Box 9569
Boston, MA 02114

Dear Mr. Cronin,

The Town of Salisbury, in conjunction with the MVPC, has been working diligently to map all of its infrastructure and assets into the GIS system, using the standardized Local Government Model. The MVPC recently assisted the Salisbury DPW by using high accuracy global positioning technology to locate all of the Town's outfalls, catch basins, and manholes that comprise the drainage system. This project was extremely impactful to the DPW as it brought the Town one step closer to achieving compliance with the MS4/NPDES permit requirements. The collection of data allowed the DPW to develop best management practices for data collection, catch basin cleaning, and IDDE program implementation. This living document will continue to be updated to include all receiving waters, open channel conveyances, interconnections with other MS4s, impaired water bodies, and initial catchment delineations. The Town of Salisbury appreciates the assistance from the MVPC while we work to further improve and update this important mapping platform.

Sincerely,

Lisa E. DeMeo, P.E.
