

# Massachusetts Department of Public Health

## Signs of Health Equity: Developing public-health survey instruments in American Sign Language

October 29, 2024

**Nick Griffiths**, Nassira Nicola, Caroline Stack, McKane Sharff, Kimberley Warsett, Bianey Ramirez, Kerra Washington, Ana Kantorowski, Nicole Kitos, Anna Makaretz, Lauren Kipling, Ta-wei Lin

**MA Dept. of Public Health**

# Conflicts of interest

- No conflicts of interest

# Background: How is deafness defined?

- Most data sources define deafness in **audiological** terms
  - American Community Survey: "Are you deaf or do you have serious difficulty hearing?"
- Deaf/hard-of-hearing people do not all use ASL

# Background: ASL & Literacy

## ***ASL users are not all fluent in English***

---

- American Sign Language (ASL) is *unrelated* to English
- Data on ASL use and general English fluency are limited, but we know ASL users communicate best in their first language
- Health surveys are nearly always written only

# Background: Health Inequities

## *Limited data on health inequities impacting Deaf people*

---

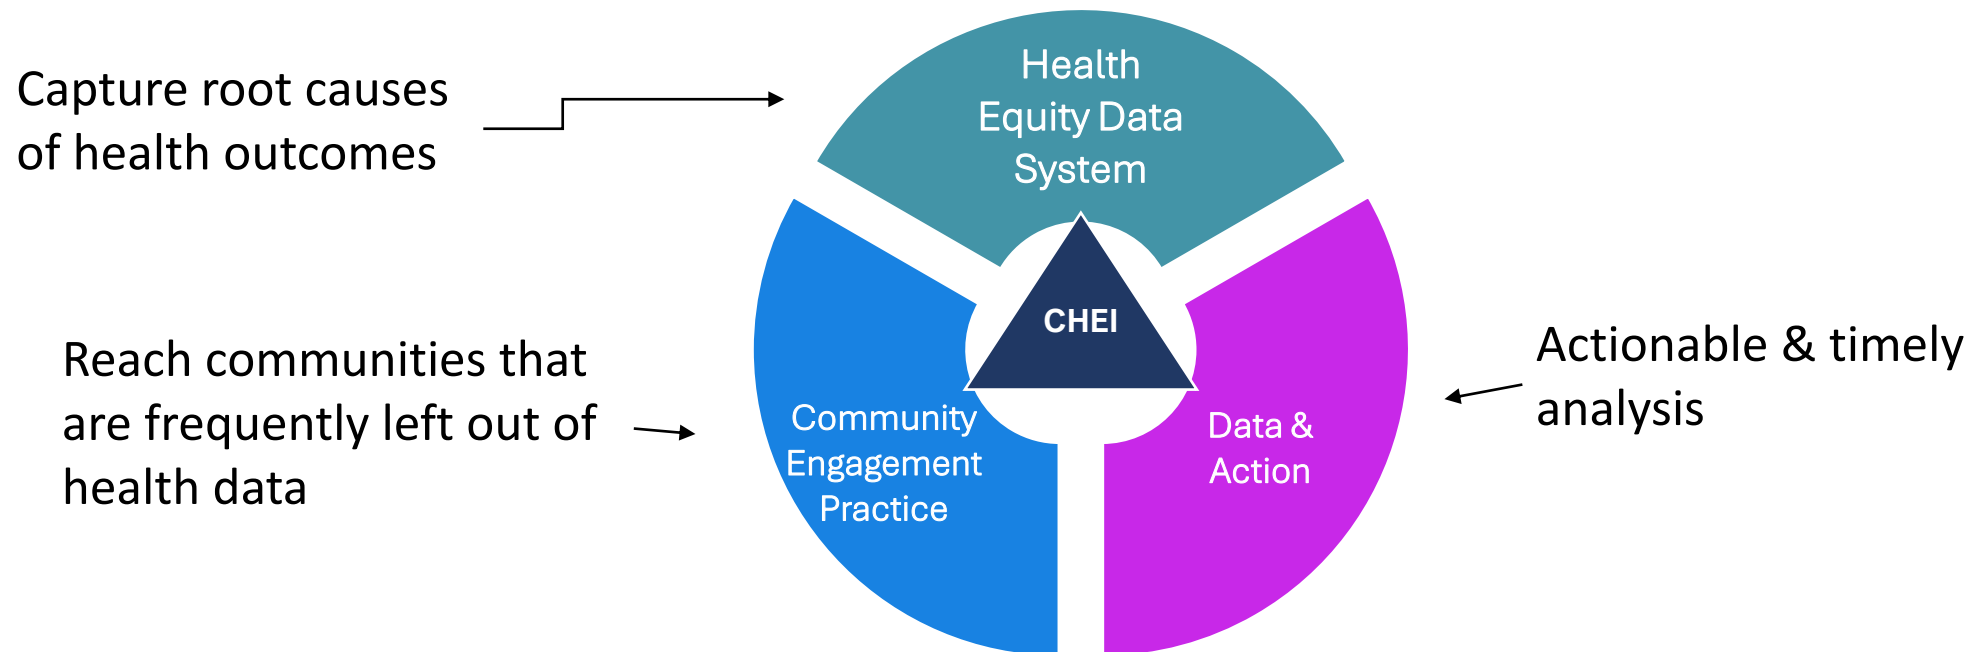

- Health literacy
  - Knowledge of nutrition, cardiovascular disease, preventive health, etc.
- Healthcare access
  - Communication difficulties, lack of access to interpreters & native signers
- Little data on outcomes

(Kuenburg et al., 2016;  
McKee et al., 2011, 2015)

# Background: The Programs (1)

## ***The Community Health Equity Initiative (CHEI)***

CHEI promotes the health of MA residents through a **health equity data & response system**

# Background: The Programs (2)

## *The Health & Disability Program (HDP)*

---

- HDP helps people across Massachusetts understand and act on health inequities affecting the disability community
- Conducting a large health needs assessment of adults with disabilities in Massachusetts

# Methods: The Surveys

## **Health & Disability Needs Assessment** (August – December 2023)

## **Community Health Equity Survey** (February – March 2024)

- Similar length: ~60 questions, typical response time 10-30 min
- REDCap

# Methods: Animated GIFs (HDP survey)

Please describe your current housing status:

**Please describe your current housing status**

☐ Owned by you or someone in the household with a mortgage or loan

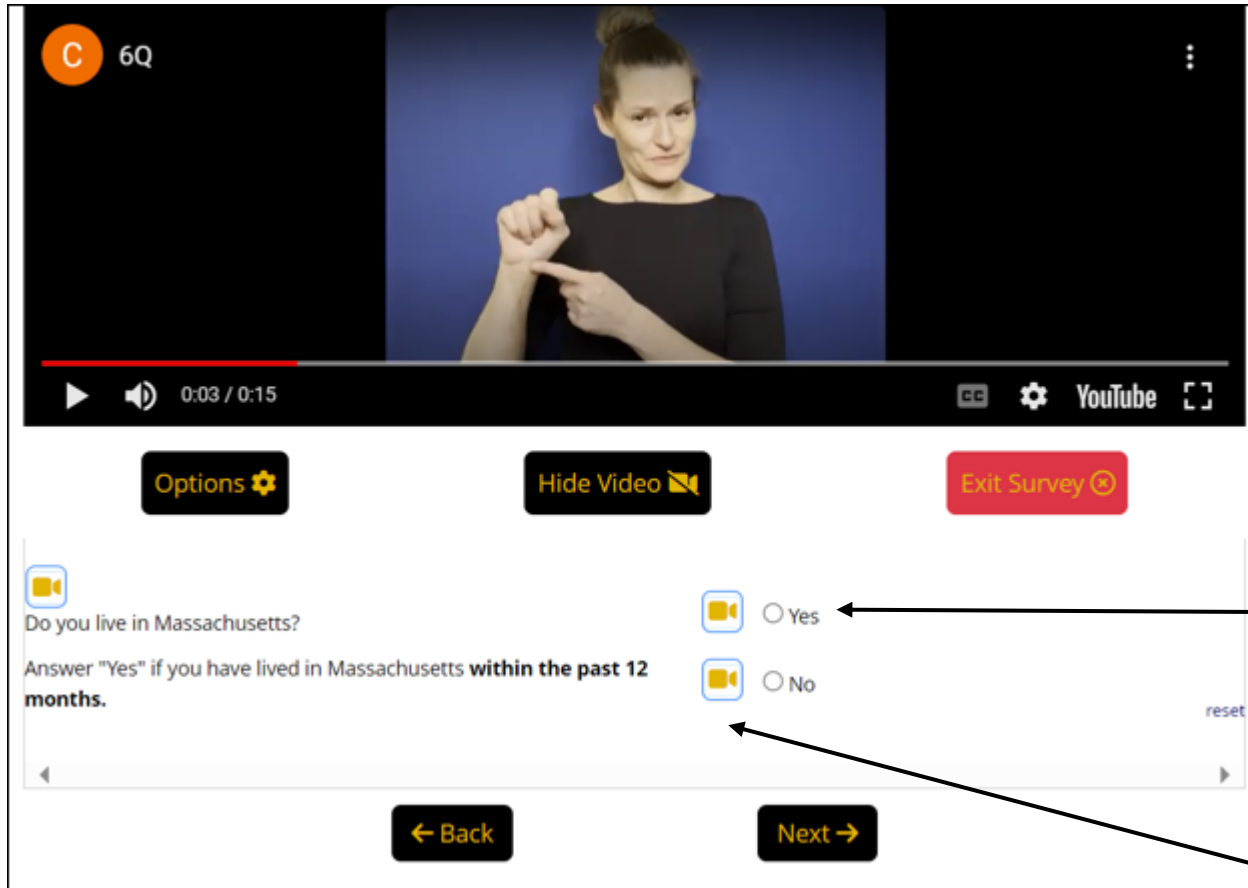

**Owned by you or someone in the household with a mortgage or loan**

← GIF showing question

← GIF showing first response,  
displayed below the  
corresponding radio button

# Methods: ASL Module (CHES)

Dedicated video player  
(Auto-plays question & responses)

Response radio buttons

Buttons to select a video  
to play

# Methods: Taking the two surveys (1)

## *What does the user need?*

---

- Seamless video playing

Feedback: ensure signing begins in the first seconds of each clip

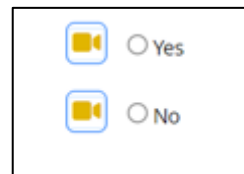

# Methods: Taking the two surveys (2)

## *What does the user need?*

- Matching response options to radio buttons
  - Captioning with English helps

Feedback: ensure  
caption timing matches  
exactly

☐ Yes

☐ No

# Methods: Taking the two surveys (3)

## *What does the user need?*

---

- High-quality translations
  - Health surveys are likely to include some precise and nuanced concepts that are critical to convey accurately

## *The ASL User Survey Samples*

---

- Surveys were disseminated in partnership with Advocates, Center for Living and Working, Deaf Inc, Viability
- Total: 108 respondents to the two surveys
  - Includes 87 deaf or hard of hearing respondents

# Best Practices for ASL surveys

## *Effective outreach & understanding tools*

---

- **Involve ASL users** throughout development
- **Research existing tools** and their pros & cons
- **Disseminate surveys** using tailored promotional materials, and create tutorial videos and user resources

# Conclusion

- ASL surveys are feasible
- Community engagement is critical
- ASL surveys address a major language access problem

# Thank you!

- The Massachusetts Health and Disability Program is funded by the CDC Disability and State Health Program (Grant Number: NU27DD000030; CDC-RFA-DD21-2103).
- The Community Health Equity Initiative is supported by funding from the CDC Immunization and Vaccines for Children Program COVID Cycle 3 and Cycle 4 Supplemental Funding.
- The CHES survey used the Rochester Survey Accessibility module (<https://github.com/vanderbilt-redcap/rochester-survey>).
