Subject: Comments on Site Suitability Guidance

CAUTION: This email originated from a sender outside of the Commonwealth of Massachusetts mail system. Do not click on links or open attachments unless you recognize the sender and know the content is safe.

Dear EEA and DOER,

Please consider my comments:

1 - Section B- For site suitability scoring, please ensure that any individual or group who feels impacted or harmed can request a score review, under sections iv and v.

2 - For Section C Criteria, I. Climate Change Resilience: The criteria should include encouraging the maintenance of intact forests, protecting all water, minimizing storm water run-off, and retaining soil integrity, in order to achieve greater resiliency in a changing climate. The Resilient Design Standards Tool should also be used to determine if the project will contribute or add to local conditions of Extreme Heat in the community.

3 - For Section C. Criteria, II. Carbon Storage and Sequestration: The National Forest Carbon Monitoring System and the Annual NLCD land cover data web sites are not user friendly, making it difficult for to review by local government or stakeholders.

4 - For Section C. Criteria, III. Biodiversity - There should be a process to ensure that a robust inventory of wildlife and rare species be applied in the Biodiversity index, plus a clear mechanism for inclusive local appeal of the biodiversity criteria.

5 - For Section E. Other Considerations of Note, I. Drinking Water Supply - Ensure that communities maintain authority to protect all drinking water supplies, including for private wells and aquifers. Provide assurance that communities can use land use or public health bylaws to create regulations for drinking water supply protection.

It makes no sense that any town would ever allow this in, let me repeat. "IN a food source."
Carver & multiple towns are Agricultural towns that grow natural cranberries. Acres & acres of them.
It's a food source.

Why folks want to believe that there is not going to be a "what if" incident..

What if something happens..

Our food and water sources are compromised.

These water ways all throughout Carver and adjoining towns have rivers & streams & ponds that feed our cranberries

This is on top of having a 6 acre lithium battery storage facility Abutting these same water sources I speak of..

Can we stop this crazy culture of potential disasters to our environment.
Sincerely yours,

Thank you
