

# Project Advisory

## Newton-Weston Bridge Replacement and Rehabilitation at I-90/ I-95

### Project Advisory: Slope Construction Work along I-90 Westbound in Newton

#### What is Happening?

Starting early February, the Contractor will be working along I-90 westbound in Newton from the MBTA bridge to Charles Street preparing slopes for construction operations. Weather and unexpected circumstances make all construction activities subject to change, but we will do our best to keep you updated.

#### How Will This Affect You?

Starting **February 3**, earthwork will take place directly adjacent to I-90 westbound. Construction equipment including excavators, vibratory rollers, loaders, and dump trucks will enter and exit the work zone from the access point at Auburn Street and Woodland Road. Work will take place from 6:00 am to 2:30 pm Mondays through Fridays and is expected to last until March 21, 2025.

To mitigate traffic impacts, Police details will be onsite to direct traffic at the access point. Equipment will be positioned within the limits of the work zone, as far away from homes as possible. There will be no impact noise associated with this work, but the Contractor will monitor sounds to avoid exceeding allowable limits.

#### Travel tips

Please take care to pay attention to all signage as it is posted. Police details, changes in lane markings, temporary controls such as barriers and traffic cones, signage, and other tools will be used throughout the project to control traffic and create safe work zones within the project limits.

## How can I find more information?
