Hello,

Currently, I receive solar energy from a solar farm near the town where I live. However, I know that this kind of farm takes over land that should be maintained as forest or farm land. I hope to see more incentives for the solar farm companies to develop over parking lots. There are lots of parking lots associated with public transport, and if retailer were given incentives to allow solar roofs to be put over parking lots, there could be a huge increase in solar electricity production. Thanks!

Best,
Megan
