

Good morning,

Please see below for a comment relating to the draft Guideline on Statement of Qualification Reservation Period (SQRP).

Re: Community Shared STGU documentation for Statement of Qualification application

The SMART rules reference a “customer disclosure form” which should be provided for “each Customer of Record receiving electricity or bill credits generated by the Community Shared Solar Tariff Generation Unit *as part of [the] Statement of Qualification Application*” [20.06(1)(i)]. However, based on Section 8 of the Statement of Qualification Reservation Period Guideline, it appears that no documentation of subscribership is required at the time of application for qualification. The guideline suggests that a community solar facility could submit this documentation at any point in its Qualification Period.

Can you confirm that this is the intent of the language in the guideline?
