Re: SMART Program

As the owner of a Residential Solar system financed through the Mass Solar Loan Program I implore DOER to continue to support the development of residential solar electric power in low income communities throughout the state. We have a 13 panel system which would not have been possible without the Mass Solar Loan Program and I know this to be true of many other installations throughout Franklin County.

The Mass Solar Loan Program is one of the prime reasons why Massachusetts is the national leader in the development of solar energy. Making access to solar energy in low income communities more difficult and more expensive makes no sense whatsoever.
