

As a registered voter in Ma. please do not allow utility companies to regulate what is in the best interests for the people of our commonwealth. We the people will keep a close eye out for those elected officials who cave into supporting the guidelines outlined in the SMART proposal. We should be progressive and a leader in teaching the country why a change in doing business as usual is needed not only for our state but for the country.

Change can be disruptive for some for awhile but in the long run better outcomes for all our citizens will be enhanced. Alternative energy solutions must be embraced going forward not stymied. Jobs that were dependent on the fossil fuel industry will be replaced by alternative jobs in these new industries. Technology is a disrupter to doing business as we have known it. In the long run we must accept it. Not to will be to our and our children's detriment.

Sincerely,

James Roman

Registered voter
